2010 International Conference on Web Information Systems and Mining

(WISM 2010)

Sanya, China
23 - 24 October 2010

Volume 1
Pages 1 - 440
# Table of Contents

## Volume - 1

- **Preface - Volume 1**
- **Organizing Committee - Volume 1**
- **Program Committee - Volume 1**
- **Reviewers - Volume 1**

## XML and Semi-structured Data

- Development of Impact Test System for Waterjet Descaling Nozzles with LabVIEW
  - *Yayu Liu, Fei Ma, Hui Xie, and Yong Li*  
  - Page 3

- Research of Automatic Marking on SQL Server Skill Assessment Based on XML
  - *Yaofei Chen and Huantong Chen*  
  - Page 8

## Web-Based Learning

- Approximated Maximum Likelihood Bearing Estimation Based on Ant Colony Algorithm
  - *Hongcun Zhai, Yunshan Hou, and Yong Jin*  
  - Page 15

- Solely Tag-Based Music Genre Classification
  - *Chao Zhen and Jieping Xu*  
  - Page 20

- Using Text Categorization to Find Job Opportunities
  - *Shilin Zhang and Mei Gu*  
  - Page 25
Web Usage Mining

A Method for Privacy Preserving Mining of Association Rules Based on Web Usage Mining ..............................................................33
    Yan Wang, Jiajin Le, and Dongmei Huang

A New Perspective of Web Usage Mining: Using Enterprise Proxy Log ..........................................................38
    Yu Zhang, Li Dai, and Zhi-Jie Zhou

A Product Recommendation Algorithm Based on the Expectation of a Not Scored Item by the Prospective User ..................................................43
    Zheng Zhai, Yang-Jie Chu, and Jia-Min Wei

An Apparel Recommender System Based on Data Mining ..................................................................................48
    Xinjuan Zhu, Junfang Huang, and Yang Qi

An Improved BIRCH Clustering Algorithm and Application in Thermal Power ..................................................53
    Hai Zhou Du and YongBin Li

BBS Topic’s Hotness Forecast Based on Back-Propagation Neural Network ..........................................................57
    Tao Xu, Ming Xu, and Hong Ding

Mining Association Rules: A Continuous Incremental Updating Technique ..........................................................62
    Siqing Shan, Xiaojing Wang, and Miao Sui

Research on the Prediction Model of Supply Risk Based on SVM ........................................................................67
    Da-peng Meng and Chun-sheng Shi

Research on User Access Sequence Mining Based on the Duration Time of Web Page ..................................................72
    Changchun Yang, Jing Sun, and Ziyi Zhao

Web Structure Mining

Advances in Applications of Social Network in Business Management ........................................................................79
    Guoliang Shi and Xu Wan

An Intelligent Topic Web Crawler Based on DTB .........................................................................................84
    Ming-sheng Zhao, Peng Zhu, and Tian-chi He

The Study of Human Behavior Dynamics Based on Blogosphere ........................................................................87
    Yading Song, Chuang Zhang, and Ming Wu

Web Services and E-learning

A Fast Terminal Sliding Mode Control with Novel Fuzzy Disturbance Observer .................................................................95
    Guoyong Huang

A Flexible Failure Mechanisms for Reliable Web Services Transaction .................................................100
    Xiaoyong Mei and Yiyan Fan

A Hybrid Algorithm for the Circular Packing Problem with Constraint of Equilibrium ....................................................105
    Jinmin Wang, Yang Qi, and Yonggang Li

Web Intelligence

A Collaborative Filtering Method Based on the Forgetting Curve ...................................................... 183
  Hong Yu and Zhuanyun Li
Designing a Fuzzy RBF Neural Network with Optimal Number of Neuron in Hidden Layer and Effect of Signature Shape for Persian Signature Recognition by Zernike Moments and PCA ...................................................................................... 188  
  Zohre Fasihfar and Javad Haddadnia
Optimizing the Web Search Engines with Features and Caching ..................................................... 193
  Hui Li, Cun-hua Li, Shu Zhang, Yun Hu, and Xia Wang

Web Information Retrieval

An Automatic Multiple TBoxes Mapping Strategy ............................................................................... 201
  Zhiping Peng and Zhanfeng Xia
Chinese Web Information Retrieval Based on Shallow Parsing ........................................................... 206
  Zhi-qun Chen, Qi-li Zhou, and Rong-bo Wang
Dynamic Query Expansion for Efficient Information Retrieval ......................................................... 211
  Namita Mittal, Richi Nayak, M.C. Govil, and K.C. Jain
Study on Multi-layer Fusion Classification Model of Multi-media Information .................................. 216
  Xiao-Dan Zhang

Web Information Extraction

A Framework: Event Extraction from the Temporal Web ....................................................................... 221
  Yiyang Yang and Zhiguo Gong
An Effective Keywords Extraction Method Based on Deleting Actor Index ....................................... 227
  Yan Tang and Ruyi Kan
Automatic Web News Content Extraction Based on Similar Pages .................................................... 232
  Chunyuan Zhang and Zhiyang Lin
Research and Implementation of Chinese Patent Information Gathering System Based on Domain Ontology ........................................................................................................................................... 237
  Hong Wu and Yuping Li
Optimal Hash List for Word Frequency Analysis .................................................................................. 242
  Sheng-Lan Peng
Web Content Information Extraction Approach Based on Removing Noise and Content-Features .............................................................................................................................................. 246
  Dingkui Yang and Jihua Song

Web Information Classification

A Label Quality-Oriented Method for Chinese Web Search Results Clustering ..................................... 253
  Liping Zhang, Shoubin Dong, Ming Tao, and Tiezhu Zhao
Clustering Web Retrieval Results Accompanied by Removing Duplicate Documents ................................................................. 259
  Xinye Li, Qinhai Yang, and LinNa Zeng
Improved Feature Selection Algorithm Based on Concentration and Dispersion ................................................................. 262
  You-Wen Shen and Xin-Jian Zhao
Improved Techniques for Caches of Search Engines Results ........................................................................................................ 266
  Hui Li, Cun-hua Li, Yun Hu, Shu Zhang, and Xia Wang
Improving Anti-spam Engine with Large Imbalanced Dataset Using Information Retrieval Technology ......................................................... 271
  Lili Diao and Chengzhong Yang
Review and Evaluation of Classification Algorithms Enhancing Internet Security .................................................................................. 276
  Liquan Yu and Meihua Xiao

Web Content Mining
A Novel Product Features Categorize Method Based on Twice-Clustering .................................................................................. 281
  Wen-Jie Jia, Shu Zhang, Ying-Ju Xia, Jie Zhang, and Hao Yu
Algorithm of the Text Copy Detection Based on Topic Bag ........................................................................................................ 285
  Sen Wang and Yu Wang
Research on Personalized Blog Information Retrieval .................................................................................................................. 289
  Ping Zhou
Research on the Automatic Evaluation of Merchandise Comments on Blogs ................................................................................. 293
  Liping Qian, Xiaoping Yang, and Lidong Wang
Study on Application of Document Representation Model Based on Query and Content Information in Website Search Engine ........................................................................................................ 297
  Zuo Zhou, Hui Jiang, Jia-yu Ma, and Xiao-hua Yang

Semantic Web and Ontologies
A Web Based Framework for Developing Domain Ontology ........................................................................................................ 305
  Yu-dong Qi, Ning Qu, and Xiao-fang Xie
Research and Implementation of the SPARQL-TO-SQL Query Translation Based on Restrict RDF View ........................................................................................................ 309
  Lili Lv, Hao Jiang, and Liwei Ju
Research on the Mapping Rules of Building Geo-ontology Based on Geodatabase ................................................................................. 314
  Su-juan Chen and Li-hong Shi
Semantic Web in Military Decision Support: Application Analysis .......................................................................................... 319
  Jin Xin, Yan Jingjing, and Liang Weitai
The Evaluation Method of Marketing Staff Competency Based on Gray Relational Analysis ......................................................................................... 324
  Haojie Liu, Juan Wang, Jiahai Yuan, and Minpeng Xiong
Towards a Preliminary Ontology for Conceptual Model Quality Evaluating ........................................329
Yu-dong Qi, Ning Qu, and Xiao-fang Xie
Towards Integration Rules of Mapping from Relational Databases to Semantic
Web Ontology .......................................................................................................................................335
Mohamed Hazber, Jincai Yang, and Qian Jin

Multi-agent Systems

A Supervising and Controlling System for Batch Dyeing Process Based on Multi-agent ........................343
Jianxin Zhang and Zhiyu Zhou
An Agent-Based Autonomous Component Model for Internetware ........................................348
Maoguang Wang, Junjing Jie, Tingxun Shi, and Xi Fang
Ontology Integration Equality and Strong Bisimulation .................................................................353
Shu-bin Ji and Yin-fa Zhang
Study of Hoist Perception System Based on IOT Technology ..................................................357
Feng Wang and Fengyou He
Survey on Early Warning of TBT Based on Information Technology .....................................361
Guo-rui Jiang and Qiu-li Wang
The Research of Multi-information Dissemination Models and Simulation ................................366
Shujing Li, Fengjing Shao, RENCHENG SUN, and Yi Sui
The Research on the Path Optimization of Container Truck Based on Ant Colony Algorithm and MAS .................................370
Guang-ru Li and Sun Zhi

Management Information Systems

An Assessing Model for Measuring ERP Benefit .................................................................379
Songsheng Chen and Peipei Yin
Deliberately Multicasting Multimedia Contents on Multiple Channels for Smart Mobile Terminals Retrieving Efficiently ..............................383
Shaohua Liu, Xu Zhang, Yinglong Ma, Tianlu Mao, Yinghui Liu, Junsheng Yu, and Xiaodong Chen
Development of Dalian Groundwater Resources Management Geographical Information System ........................................................................388
Fangjie Cong and Yanfang Diao
Fault-Tolerant Control for a Class of Nonlinear Uncertain Singular Systems ..........................391
Jiqing Qiu, Yuming Guo, Yanchun Zhao, and Mifeng Ren
Realization and Research of Online Exam System Based on S2SH Framework ........................396
Huang Darong and Huang Huimin
Research on the Improved 6σ Method and Its Application in Quality Improvement of Electric Company Products ..................................................400
Renwang Li, Xinli Wu, Xing Xu, Hao Luo, and Zefei Zhu
The Design and Realization of the Universal Report System in the Power System Based on Physical View ..........................................................................................................................404
Haizhou Du and Yongbin Li

The Two-Dimensional Bar Code Application in Book Management .........................................................................................................................409
Xuechen He

Intelligent Networked Systems (I)
A Hybrid Neural Network and Genetic Algorithm Model for Predicting Dissolved Oxygen in an Aquaculture Pond ............................................................................................................415
Xinying Miao, Changhui Deng, Xiangjun Li, Yanping Gao, and Donggang He

Application of Second Order Diagonal Recurrent Neural Network in Nonlinear System Identification .................................................................................................................420
Yan Shen, Xianlong Ju, and Chunxue Liu

Design and Research of the Intelligent Front-End Based on the DCS Configuration Software .................................................................................................................................425
Yongjun Lin and Xiaolin Zhu

Design and Research on Interactive Intelligent Information Platform for Workflow and Network Flow Oriented to Express Logistics .........................................................................................429
Chen Lin, Shenglu Zhou, Da Li, Xiao Wang, and Xiao Wang

Dynamic Blind Source Separation Using Subspace Method .................................................................................................................................433
Yuexia Zhang and Jihua Cao

Author Index - Volume 1 ........................................................................................................................................................................................................437
Table of Contents
Volume - 2

Preface - Volume 2 .......................................................................................................................... xii
Organizing Committee - Volume 2 ............................................................................................... xiii
Program Committee - Volume 2 ................................................................................................... xiv
Reviewers - Volume 2 ................................................................................................................... xvi

Intelligent Networked Systems (II)

Improvement of Running Tunnel Based on OSPF TE ................................................................. 3
  Chongwen Wang and Jing Hu

Investigation of Security and Defense System for Home Based on Internet of Things ................................................................................................................................. 8
  Guang-xue Yang and Feng-jiao Li

Research on Multi-colony Diploid Genetic Algorithm for Production Logistics ......... 13
  Beilin Liu and Li Ma

Research on Security Models of Highway Toll Network .......................................................... 18
  Jinwei Li

Research on the CAD/CAE Integrated System for Mass Customization .................................. 22
  Yunxia Wang, Xiaoyu Ni, Zhiliang Wang, and Yong Lu

RFID and GSM Technology Building Intelligent Relief Supplies Distribution and Monitoring System .......................................................................................................................... 26
  Dongmei Huang, Cheng Su, Dingou Fang, and Peihong Kang
The Agents Screening Model Based on Fairness Preference in Knowledge Networks
Jian Chen, Xin Gu, and Shaobo Wu

The Application of Wireless Sensor Networking in Environmental Monitoring Based on LEACH Protocol
Yang Yu, Xinhua Li, and Liang Chen

The Research in Real-Time Protected Management System of Broadband Network Information Safety
Jinwei Li

Information Security

A (t,n)-Threshold Group Signature Scheme Based on Compartmented Secret Sharing
Tianqin Wang

A Digital Image Watermarking Method Based on Tight Framelet
Runhai Jiao and Biying Lin

A New Certificateless Proxy Re-encryption Scheme
Jun Zhu, Futai Zhang, and Xiaodong Song

A Temporal Model for Group-Centric Secure Information Sharing
Peiwu Li

A Cryptography Application of Conjugate Quasigroups
Yunqing Xu

An Optimization of Rekeying Scheme for Secure Multicast
Huanhuan Zhao, Yong Xu, and Xiaowei Zhu

Discrete Chaotic Exclusive OR Encryption of Digital Image
Dinghui Zhang, Jianwei Zhang, Yuping Wang, Saisai Xu, and You Li

Mobile Commerce Identity Authentication Protocol Based on Conic Curves
Zhigang Chen and Xinxia Song

Research on Secure Multi-party Ranking Problem and Secure Selection Problem
Chao Cheng, Yong-long Luo, Cai-xia Chen, and Xiao-kong Zhao

Research on Use Rule Conflict in Digital Content Nested Protection
Mei Xue, Zhongxiong Yuan, and Jing Li

Study of Recent Development about Privacy and Security of the Internet of Things
Hailong Feng and Wenxiu Fu

Trusted Behavior Based Spam Filtering
Cong Wang and Jianyi Liu

On Relationship Between Real Estate Enterprise E-business Model and Its Performance ................................................................. 171
  Yan Ma and Lu Sun

Semantic and Heuristic Approach to the Composition of Web Services ................................................................. 175
  Qing-mei Yu, Peng-yan Xiao, Ting Jin, and Dong-mei Huang

**Distributed Systems**

GA-Based Task Scheduler for the Cloud Computing Systems ......................................................................................... 181
  Yujia Ge and Guiyi Wei

Hybrid MATLAB and LabVIEW to Implement Single Neuron PID in Foundation Fieldbus Remote Control System .................................................................................................................. 187
  Yang Ding, Bin Sun, Xiaofeng Ye, and Jiadong Xu

Overview of P2P Distributed Database System .................................................................................................................. 192
  Tian-shi Liu, Jiao Li, Rong-fang Gao, and Gang Ma

**Digital Libraries**

  Brahim Hamadicharef

The Research of Simulation Technology in Nuclear Power Plant and the Application of Fuzzy Control in Temperature Control System ........................................................................................................... 205
  JianHua Ye and HuaYan Ji

**Applications of Web Mining**

A Study on C-Fusion Frames .......................................................................................................................................................... 211
  Gang Wang, Bao-Qin Wang, Li-Xia Yuan, and Xiao-Hui Zhou

An Improved Fourier Algorithm for Elimination of Decaying Aperiodic Component .................................................................................................................................................................................. 216
  Xiaoling Yang and Zhan Li

Analysis of Position Servo System of Pneumatic Manipulator Based on RBF Neural Network PID Control .................................................................................................................................................................................. 221
  Ruibo Yuan, Chungeng Sun, Shaonan Ba, and Zongcheng Zhang

Computer Technology in Adult Blood Pressure Monitoring Application in Shandong Province .................................................................................................................................................................................. 227
  Min-hang Liu and Hui Zhou

Decline Analysis of Oil Well Stimulation Rule Using Matlab ................................................................................................. 231
  Congjiao Xie, Zhenliang Guan, Guoping Luo, and Xiyu Li

Design and Implementation of the Large Enterprise Reporting Engine ................................................................................................. 235
  Yongjun He and Fagen Gong

Eye Movement Measure System and Its Applications .................................................................................................................. 239
  Wei Liu, Damin Zhuang, Xiugan Yuan, and Chengkun Liu

Fraud-Tolerant Measurement of User Contribution in Online Forum ................................................................................................. 244
  Guoying Wang and Jiyu Cheng
Pieces Identification in the Chess System of Dual-Robot Coordination Based on Vision

Yubo Jia, Yuntao Duan, Dianjun Wang, Long Xue, Zhanmin Liu, and Wei Wang

Some Properties of Generalized Tensor Bezoutian with Respect to a General Polynomial Basis

Huazhang Wu and Chao Ma

The Classification for E-government Document Based on SVM

Yunliang Jiang, Qing Shen, Jing Fan, and Xiongtao Zhang

The Performance Parameter Fault Diagnosis for Automobile Engine Based on ANFIS

Jian-Hua Zhang, Li-Fang Kong, Zhang Tian, and Wei Hao

The Property Analysis of a New EMP Simulator

Jinliang Cai, Fengye Hu, Yufei Wang, and Gang Guo

Applications of Web Information Systems

A New Cluster Routing Strategy Based on ZigBee

Ruixia Liu, Qiang Guo, Yong Fu, and Xianglong Kong

A Study on the Dynamic Mechanism of Group Investment and Local Economic Development

Weixiang Xu and Zhigang Zhang

A Web-Based Management System for Urban Road Lighting

Yun-gui Zhang, Li-na Zhao, Li-na Wang, and Sheng-yong Zhang

Algorithm of Word-Lattice Parsing Based on Improved CYK-Algorithm

Yuqiang Sun, Lei Zhou, Qiwei He, Yuwan Gu, and Liang Jia

An Application of Business Intelligence Based on Patent in Data Integration and Analysis

Dongsheng Zhai and Wenhui He

An Institutional Collaboration Between Universities, Enterprises and Governments in China

Yingbo Li

Analysis and Prediction of the Wearing Comfort Performance of an Assembly of Fabric by Optimization ANN

Shan Cong and Baozhu Ke

Approximation Operators in Residuated Lattice

Yingchao Shao, Zhengjiang Wu, and Keyun Qin

Current Status of Ant Colony Optimization Algorithm Applications

Qinghong Wu, Zongmin Ma, and Ying Zhang

Delay-Dependent Robust Stability of Uncertain Stochastic Nonlinear Time-Varying Systems with Time-Delays

Hongyan Cui and Cunchen Gao
Design a Digital Campus Information System Based on SOA ................................................................. 314
