2010 Annual Meeting of the American Electrophoresis Society (AES)

Topical Conference at the 2010 AIChE Annual Meeting

Salt Lake City, Utah, USA
7-12 November 2010

</table>
AMicroscale Platform for Integrated Cell-Free Expression and Activity Screening of Cellulases .................................................. 31
Aarthi Chandrasekar, Rajiv Bharadwaj, Joshua I Park, Rajat Sapra, Massood Z Hadi, Paul D Adams, Anup K Singh

A Novel Approach for Modified Protein Identification .................................................. 32
Richard Baliban, Peter A. DiMaggio Jr., Benjamin A. Garcia, Christodoulos A. Floudas

Generation of Phosphorylated Protein Standards for 2D Gel Western Blotting .................. 35
Nancy Kendrick, Matt Hoelter, Jon Johansen

Electrophoretic Separation of Amyloid Proteins Via Capillary Electrophoresis .................. 36
Elizabeth Pryor, Christa Hestekin, Melissa Mass

Pneumatically Controlled 32 Channel Scalable Disposable Microfluidic Sample Handling Device with Integrated Metering, Mixing, and Demultiplexing .................................................. 37
Greg A. Liddiard, Bruce K. Gale

A Fully Automated Microfluidic Platform for Nucleic Acid Extraction .................. 39
Michael A. Johnson, Jungkyu Kim, Bruce K. Gale, Angela Williams

Advancement of the Microfluidic Mars Organic Analyzer Platform for Detection of Organic Biomarkers: Amines, Aldehydes, Ketones, Carboxylic Acids, and PAHs .................................................. 41
Thomas N. Chiesl, Amanda Stockton, Richard A. Mathies

Detection of Rare Variants of Type 2 Diabetes by CE-SSCP .................................................. 43
Alice C. Jernigan, Hannah Lintag, Christa Hestekin

Microfluidic Flow Assays for Diagnosing Bleeding and Thrombotic Disorders .................. 44
Keith B. Neeves, Ryan R. Hansen, Jorge A. Di Paola

Electrochemical Biomolecule Sensing by Carbon Nanotubes: Quantification by Warburg Impedance .................. 46
Satyajyoti Senapati, Sagnik Basu Ray, Hsueh - Chia Chang

Response of Human Erythrocytes to 10 KHz to 50 MHz Alternating Current Dielectrophoretic Stimulus .................................................. 47
Kaela M. Leonard, Adrienne Minierick

Insulator Based Dielectrophoresis: Dependence of Erythrocyte ABO Antigens .................. 48
Soumya K. Srivastava, Adrienne Minierick, Blanca H. Lapizco-Encinas

A Programmable Microfluidic System for Selective RNA or DNA Extraction From Various Raw Biological Samples .................................................. 49
Michael A. Johnson, Jungkyu Kim, Bruce K. Gale, Angela Williams

One-Step Extraction of Subcellular Proteins From Eukaryotic Cells .................................................. 51
Yihong Zhan, Victoria A. Martin, Robert L. Geahlen, Chang Lu

Multichannel Mars Organic Analyzer (MeMOA): Microfluidic Networks for the Automated in Situ Microchip Electrophoretic Analysis of Organic Biomarkers .................................................. 52
Thomas N. Chiesl, Merwan Benhabib, Amanda Stockton, Richard A. Mathies

Pneumatically Driven 16 Channel Disposable Nucleic Acid Filter Device with Integrated Demultiplexing and Multiplexing .................................................. 54
Greg A. Liddiard, Erik Liddiard, Bruce K. Gale

Chip-Based in Situ Hybridization for Identification of Bacteria From the Human Microbiome .................................................. 56
Robert J. Meagher, Peng Liu, Yooli K. Light, Anup K. Singh

Integrated Microfluidics for Serotype Identification of Foot and Mouth Disease Virus .................................................. 57
Himanshu Jayant Sant, Scott Sundberg, Erik Liddiard, Michael A. Johnson, Bruce Gale

Asymmetrical Cross-Flow Based Split Thin Cell Fractionation .................................................. 59
Vena M. Arremsetty, Bruce K. Gale

Measurement of Muscle Force in C. Elegans Worm Using Microfluidics .................................................. 60
Erik Liddiard, Himanshu Jayant Sant, Frederic Horndli, Bruce Gale

A Masked Corona Discharge Method for Selective Bonding in PDMS for Microfluidic Applications .................................................. 62
Michael A. Johnson, Erik Liddiard, Bruce K. Gale

Rapid Detection of Bacteria in Blood for the Early Diagnosis of Sepsis .................................................. 64
Sachidevi Puttaswamy, Shramik Sengupta

Electrokinetic Differentiation of Microorganisms in Glass Microchannels .................................................. 65

Dielectrophoretic Characterization of Microorganisms Employing Three Dimensional Carbon Electrodes .................................................. 71

Assessing Particle Selectivity of An Insulator-Based Dielectrophoretic Microdevice .................................................. 79
Ana F. Chávez-Santoscoy, Javier L. Baylon-Cardiel, Héctor Moncada-Hernández, Blanca H. Lapizco-Encinas

Size, Charge, and Affinity Fractionation of Hemolyzed Sera From a Neonatal Repository .................................................. 86
Gary B. Smajkal, Camilla R. Martin, Steven Freedman, Winston P. Kuo
Spermatogenic Cells Manipulation Employing Dielectrophoresis..............................87
Elizabeth Rosales-Cruzalez, Perla A. Cola-Elizondo, Daniel P. Gonzalez-Herrera, Blanca H. Lapizco-Encinas

Particle Manipulation In a Multi-Section Insulator-Based Dielectrophoresis Microdevice .................................................................92
Roberto C. Gallo-Villanueva, Blanca H. Lapizco-Encinas

Electro-Poiseuille Flow Modeling in Annular Geometry .........................................99
Jeffery W. Thompson, Seth Wynne, Holly Stretz, Mario Oyanader, Pedro Arce

Using a Linear Operator Method Approach in Assessing Dynamic Behaviors in Electrophoresis Separations ..................................................100
Jonathan D. Posner, Carlos L. Perez

Temperature Distribution in Electrophoresis with an Oscillatory Transverse Electric Field .................................................................101
Wei Yuan, David R. Nielsen, Yan Sun

Monitoring Algae Species in Bio-Fuel Production by CE-SSCP ................................102
Alice C. Jernigan, Lauren Woods, Robert Beitle, Jamie Hestekin, Christa Hestekin

Imaging Amperometry: Single Particle Experiments and Theory ................................103
Christopher L. Wirth, Paul J. Sides, Dennis C. Priewe

Multiple Measurements On Single DNA Molecules in Nanopore Sensors ..............104
Jiaoying Chen, Hongwei Liu, Yaping Gu, Gang Xie

Applications of Nanoparticle Organic Hybrid Materials in DNA Separation ............106
Henry W. Lau, Lynden A. Archer

Fluid-Flow Enhanced Electrokinetic Sample Pre-Concentration in a Voltage Gated Nanochannel .................................................................107
Aditya S. Khair, Todd M. Squires

Dielectrophoresis and AC-Field Induced Encapsulate Release of Micelles in Aqueous Suspensions .................................................................108
Victoria Froude, Yingyi Elaine Zhu

Microparticle Manipulation Employing Low Frequency AC Electric Fields with Insulator-Based Dielectrophoresis .....................................................109
Javier Baylon-Cardiel, Nadia M. Jesus-Perez, Ana V. Chaves-Santoscoy, Blanca H. Lapizco-Encinas

Predicting Electroosmotic Volumetric Flowrates In Porous Media: Role of Capillary Geometries In the Description of Media Morphology ....................116
Jennifer Pascal, Mario Oyanader, Pedro Arce

Simulation of DNA Conformation Pre-Conditioning for Electrophoretic Stretching in a Microcontraction ..............................................................117
Chih-Chen Hsieh, Tsung-Hsien Lin

DNA Translocation through Nanopores Under Time-Varying Electric Fields: A Brownian Dynamics Study .................................................................118
Christopher M. Edmunds, Yeny C. Hudjiong, Amir A. Ahmadi, Peter Hesketh, Sankar Nair

Molecular Simulation of Polyelectrolyte Conformational Dynamics Under An AC Electric Field .................................................................120
Honggion Liu, Yingxin Zhu, Edward Maginn

Pressure-Induced Flow and Resultant Orientation of Polyacrylamide Chains Impacts Peak Width in DNA Sequencing Separations in Microchannel Electrophoresis ..........................................................................................121
Thomas Niedringhaus, Daniel G. Hert, Christopher P. Fredlake, Annelise Barron

Electrophoretic Concentration of DNA at Nanoporous Polymer Membranes for Separations and Diagnostics .............................................................122
Robert J. Meagher, Anup K. Singh

Long DNA Separation Using a Sparse Micropost Array ...........................................123
Jia Ou, Samuel J. Carpenter, Kevin D. Dorfman

DNA Separation and Sequencing at a Stretch .........................................................124
Jiaming Wu, Shuangliang Zhao, Lizeng Gao, Jianzhong Wu, Di Gao

Exploiting the Entropic Trapping Regime to Enhance Separation Performance in Microchip Gel Electrophoresis .......................................................125
Nan Shi, Victor M. Ugaz

Molecular Native Chromatin (nuChIP) Assay for Histone Acetylation Detection ........126
Tao Geng, Ning Bao, Michael Litt, Chang Lu

Far-Field Optical Nanoscopiy Based On Continuous Wave Laser Stimulated Emission Depletion (STED) for Nanofluidics ..................................................127
Guiren Wang, Cuifang Kuang, Wei Zhao

Entrapment of Human Leukemia Cells From Blood Using Contactless Dielectrophoresis .................................................................128
Mike Sano, Hadi Shafiee, Rafael Davalos

Electrokinetic Vortices and Traveling Waves in Non-Dilute Colloidal Dispersions ........129
Jonathan D. Posner, Carlos L. Perez
