2010 7th International Conference on Ubiquitous Intelligence & Computing and 7th International Conference on Autonomic & Trusted Computing

(UIC/ATC 2010)

Xi’an, Shaanxi, China
26-29 October 2010
2010 Symposia and Workshops on Ubiquitous, Autonomic and Trusted Computing

UIC-ATC 2010

Table of Contents

Message from ATC/UIC 2010 General/Program Chairs ...............................................................xiii
Message from the ATC/UIC 2010 Workshop Chairs ...........................................................................xiv
Message from ATC 2010/UIC 2010 Demo Chairs .............................................................................xvi
Preface of PerMedia 2010 ............................................................................................................................xvii
Organizing Committee of PerMedia 2010 .........................................................................................xviii
Preface of UMCC 2010 ...............................................................................................................................xix
Organizing Committee of UMCC 2010 .................................................................................................xx
Preface of USST 2010 ...................................................................................................................................xxi
Organizing Committee of USST 2010 ......................................................................................................xxiii
Preface of SSDU 2010 ....................................................................................................................................xxiv
Organizing Committee of SSDU 2010 .................................................................................................xxv
Preface of IWDTN 2010 ...............................................................................................................................xxvi
Organizing Committee of IWDTN 2010 .................................................................................................xxvii
Preface of MobiCPS 2010 ............................................................................................................................xxx
Organizing Committee of MobiCPS 2010 ..............................................................................................xxxii
Preface of HiCEC 2010 ..............................................................................................................................xxxiii
Organizing Committee of HiCEC 2010 .................................................................................................xxxiv
Preface of MENS 2010 ..............................................................................................................................xxxv
Organizing Committee of MENS 2010 .................................................................................................xxxvi
Preface of SoTrust 2010 ...............................................................................................................................xxxix
Organizing Committee of SoTrust 2010 ...............................................................................................xl
Preface of ANSR 2010 .................................................................................................................................xli
Organizing Committee of ANSR 2010 .................................................................................................xliii
Reviewers .....................................................................................................................................................xlv
International Workshop on Pervasive Media (PerMedia 2010)

Pervasive Social Computing: Augmenting Five Facets of Human Intelligence .................................................................1
   Jiehan Zhou, Junzhao Sun, Kumaripaba Athukorala, and Dinesh Wijekoon
Toward a Smart Home Environment for Elder People Based on Situation Analysis .......................................................7
   Xing Zhang, Haipeng Wang, and Zhiwen Yu
Providing Real-Time Guarantees to Smart Car ................................................................................................................13
   Jie Sun, Yongping Zhang, and Jianbo Fan
MSOrgm©: Emergent Techniques for Kinetic Artifact ................................................................................................18
   Scottie Chih-Chieh Huang and Shen-Guan Shih
A Comparison of Programming Skills by Genders of Hungarian Grammar School Students ............................................24
   Gabor Kiss

International Workshop on Ubiquitous Multimedia Computing and Communication (UMCC 2010)

An Improved Multi-Scale Retinex Algorithm for Vehicle Shadow Elimination Based on Variational Kimmel ......................31
   Qi-sheng Wu, Xiang-long Luo, Han Li, and Pan-zhi Liu
Reliability Analysis of a Multiview Multi-description Video Streaming System ..........................................................35
   Ivan Lee
QoS Control Framework for Ubiquitous Multimedia Computing ......................................................................................40
   K.L. Eddie Law and Sunny So
A Walkthrough System with Improved Map Projection Panoramas from Omni Directional Images ....................................45
   Chao Liu, Susumu Shibusawa, and Tatsuhiro Yonekura
Toward a Programming Model for Safer Pervasive Spaces .........................................................................................52
   Chao Chen and Sumi Helal
Multilevel Image Thresholding Selection Based on the Firefly Algorithm ........................................................................58
   Ming-Huai Horng and Ting-Wei Jiang
A Study of Video Coding by Reusing Compressive Sensing Measurements ...................................................................64
   Zhenglin Wang and Ivan Lee

International Workshop on Ubiquitous Service Systems and Technologies (USST 2010)

Water Quality Monitoring with Ubiquitous Computing ..............................................................................................70
   Yo-Ping Huang, Change-Tse Chou, Jung-Shian Jau, and Frode Eika Sandnes
A Mobile Agent-Based Software Intelligence Framework in Ubiquitous Environment ..................................................76
   Yue-Shan Chang and Chih-Tien Fan
Sweep Coverage Mechanism for Wireless Sensor Networks with Approximate Patrol Times ...........................................82
   Hung-Chi Chu, Wei-Kai Wang, and Yong-Hsun Lai
Personal Smart Spaces as a Basis for Identifying Users in Pervasive Systems ..............................................................88
   Elizabeth Papadopoulou, Sarah Gallacher, Nick K. Taylor, and M. Howard Williams
Performance on Adaptive Path Selection Scheme for Cooperative Communication

Yung-Fa Huang, Cing-Chia Lai, Ling-Cheng Hsu, and Tan-Hsu Tan

International Symposium on Service, Security and Data Management Technologies in Ubi-com (SSDU 2010)

Session 1: Applications and Services
Ubiquitous Community Care Using Sensor Network and Mobile Agent Technology ..........................................................99

Chuan-Jun Su and Bo-Jung Chen
A Macro-observation Approach of Intelligence Video Surveillance for Real-Time
Unusual Event Detection ..................................................................................................................................................................105

Du-Ming Tsai and Wei-Yao Chiu
Research on Pervasive Computing Security .......................................................................................................................................................111

Long Zhao Hua, Jia Zhen, and Li Tao

Session 2: Security and Privacy
An Advanced ECC ID-Based Remote Mutual Authentication Scheme for Mobile
Devices .........................................................................................................................................................................................116

Tien-Ho Chen, Yen-Chiu Chen, and Wei-Kuan Shih
Visual Scoping of Private Information Displayed on Shared Tabletop Surfaces .........................................................................................................................121

Simen Hagen and Frode Eika Sandnes
Improved Identity Based Online/Offline Signature Scheme .................................................................................................................................126

Yang Ming and Yumin Wang
A Method of Privacy Preserving in Mobile Wireless Environments .............................................................................................................................132

YaHui Li, YaDi Zhang, and WenSheng Niu

Session 3: Algorithms and Protocols
A New Image Registration Method Using Intensity Difference Data on Overlapped
Image ..............................................................................................................................................................................................138

Shu-Kai S. Fan and Yu-Chiang Chuang
Adaptive Wireless Mesh Networks Routing Protocols ..................................................142

Saaidal R. Azzuhri, Marius Portmann, and Wee Lum Tan
Media Access Control Protocol Based on Hybrid Antennas in Ad Hoc Networks ............................................................................................................148

Yanrong Ding, Xiaodong Wang, Hu Shen, and Pengyu Guo
A Dynamic Risk Assessment Framework Using Principle Component Analysis with Projection Pursuit in Ad Hoc Networks .........................................................................................................................................................154

Cai Fu, Jihang Ye, Li Zhang, Yunhe Zhang, and Han LanSheng
Dynamic Adaptive Self-Configurable Network Processor .................................................................................................................................160

A. Satheesh, D. Kumar, and S. Krishnaveni
International Workshop on Delay/Disruption Tolerant Networking (IWDTN 2010)

**Session 1: Network Architecture Models**

An Adaptive Cross-Layer Mechanism of Multi-channel Multi-interface Wireless Networks for Real-Time Video Streaming..........................................................165
   Jian Liu, Fangmin Li, Fei Dou, Xu He, Zhigang Luo, and Hong Xiong

An Trace Based Vehicular Mobility Model for Simulation of Vehicular Delay Tolerant Networks ..................................................................................................................171
   Yang Wei-dong, Liu Ji-zhao, and Zhou Xin-yun

A Link Quality Prediction Mechanism for WSNs Based on Time Series Model .................................................................................................................................175
   Linlan Liu, Youlei Fan, Jian Shu, and Kun Yu

Message Publish/Subscribe Scheme Based on Opportunistic Networks .................................................................................................................................180
   Jianwei Niu, Feifei Wu, Da Huo, and Kai Hu

**Session 2: MAC Routing and Congestion Control Protocols**

RANC: Opportunistic Multi-path Routing Protocol in WSNs Using Reality-Aware Network Coding .................................................................................................................185
   Jia Liu, Junzhao Du, Jie Zhang, Xiaojun Li, and Hui Liu

Epidemic-Based Controlled Flooding and Adaptive Multicast for Delay Tolerant Networks ................................................................................................................191
   Zhigang Jin, Jia Wang, Sainan Zhang, and Yantai Shu

BiBUBBLE: Social-Based Forwarding in Pocket Switched Networks .................................................................................................................................195
   Tong Hu, Feng Hong, Xiqing Zhang, and Zhongwen Guo

Energy-Efficient Clustering Rumor Routing Protocol for Wireless Sensor Networks ......................................................................................................................200
   Zhong-hua Wang, Kai Chen, Mei Lin, and Min Yu

**Session 3: Practical Applications**

Asymptotic Stability Criterion for the Networked Control Systems Based on Time-Delay System ................................................................................................................206
   Xi-min Zhang and Ya-di Zhang

Hierarchical Probabilistic Network-Based System for Traffic Accident Detection at Intersections ......................................................................................................211
   Ju-Won Hwang, Young-Seol Lee, and Sung-Bae Cho

International Workshop on Mobile Cyber-Physical Systems (MobiCPS 2010)

**Session 1: Networking and Architectures**

Seamless Mobility Support for Adaptive Applications in Heterogeneous Wireless Networks ..............................................................................................................217
   Jianmong Cao, Weigang Wu, and Xuan Liu

Heterogeneous Multi-layer Wireless Networking for Mobile CPS .................................................................................................................................223
   Jia Shen, Fei Xu, Xiangyou Lu, and Huafei Li
R-CA: A Routing-Based Dynamic Channel Assignment Algorithm in Wireless Mesh Networks .....................................................................................................................................................................228

Weifeng Sun, Rong Cong, Feng Xia, Xiao Chen, and Zhenquan Qin

An ECG-Based Signal Key Establishment Protocol in Body Area Networks .................................................................233

Lin Yao, Bing Liu, Kai Yao, Guowei Wu, and Jia Wang

Design and Implementation of a Wireless Sensor Network for Smart Homes .................................................................239

Ming Xu, Longhua Ma, Feng Xia, Tengkai Yuan, Jixin Qian, and Meng Shao

Session 2: Technologies and Applications

A Mobile Context Sharing System Using Activity and Emotion Recognition with Bayesian Networks .....................................................................................................................................................................244

Keunhyun Oh, Han-Saem Park, and Sung-Bae Cho

Net-in-Net: Interaction Modeling for Smart Community Cyber-Physical System .................................................................250

Longhua Ma, Jun Yao, Ming Xu, Tengkai Yuan, and Meng Shao

DISG: Decentralized Inter-user Interference Suppression in Body Sensor Networks with Non-cooperative Game ........................................................................................................................................256

Guowei Wu, Jiankang Ren, Feng Xia, Lin Yao, and Zichuan Xu

TouchInteract: An Interaction Technique with Large Displays Using Touchscreen-Phone ....................................................................................................................................................262

Hanging Ruan, Yi Qian, Yong Zhang, and Min Zhou

Haptic u-Table: A Believable Feedback System with a Quasi-tangible Tabletop Interface ......................................................................................................................................................................266

YoungTae Roh, Jun Lee, Jee-In Kim, YoungSeok Ahn, HyungSeok Kim, and MinGyu Lim

International Symposium on High Confidence Embedded Computing (HiCEC 2010)

Session 1: Testing and Measurement for Embedded Software

Testing of Component-Based Software: A Metamorphic Testing Methodology .....................................................................................................................................................................272

Xiao-li Lu, Yun-wei Dong, and Chao Luo

Experiments on Test Case Reuse of Test Coverage Criteria .....................................................................................................................................................................277

Yunwei Dong, Yuying Wang, M.F. Lau, and Si-yu Lin

A Measurement of Software Trustworthiness Based on Approximation Algorithms ........................................................................................................................................282

Jie Zhou and Hong Zhu

Session 2: Component-Based Development for Embedded Software

An Integrated PLC Smart Home System in Pervasive Computing .....................................................................................................................................................................288

Yunwei Dong, Bo Zhang, and Kang Dong

Trustworthiness Expectation of Real-Time Web Services .....................................................................................................................................................................292

Xinxing Wu and Yixiang Chen

Security Model Oriented Attestation on Dynamically Reconfigurable Component-Based Systems ........................................................................................................................................299

Liang Gu, Guangdong Bai, Yao Guo, Xiangqun Chen, and Hong Mei
Formal Definitions for Trust in Trusted Computing .......................................................... 305
Xinmao Gai, Yong Li, Yasha Chen, and Changxiang Shen

The 2nd International Symposium on Multidisciplinary Emerging Networks and Systems (MENS 2010)

Assurance Networks: Concepts, Technologies, and Case Studies .......................................... 311
Yoshiaki Kakuda

Session 1: Special Session on Assurance Networks

Sensitivity Analysis of Random Port Hopping ........................................................................ 316
Kousaburou Hari and Tadashi Dohi

Autonomous Community Construction Technology for Timely Transmitting
Emergency Information ........................................................................................................... 322
Fan Wei, Md. Emadadul Haque, Yukihiro Fukunaga, Takehiro Gouda, Xiaodong Lu, and Kinji Mori

File Diffusion Control on Super-Seed Mode Over BitTorrent-Like P2P Networks ...................... 328
Yuki Kuwabara, Junichi Funasaka, and Kenji Ishida

An Extended Micro Loop Routing for Adapting to Energy Consumption .................................... 334
Mario Takeuchi, Eitaro Kohno, Tomoyuki Ohta, and Yoshiaki Kakuda

Improvement of the Security Against Node Capture Attacks Using Dispersed Data
Transmission for Wireless Sensor Networks ........................................................................... 340
Eitaro Kohno, Tomoya Okazaki, Mario Takeuchi, Tomoyuki Ohta, Yoshiaki Kakuda, and Masaki Aida

Architecture-Oriented Assurance Technology in Microgrid ......................................................... 346
Tianhu Ma, Peng Li, Yanbo Wang, and Yongdong Tan

Session 2: Multidisciplinary Models for Autonomous Networks and Systems

Application of Deterministic Annealing EM Algorithm to Markovian Arrival Process
Parameter Estimation .............................................................................................................. 352
Hiroyuki Okamura, Hidenari Kishikawa, and Tadashi Dohi

Dual-EigenRep: A Reputation-Based Trust Model for P2P File-Sharing Networks ..................... 358
Xinxin Fan, Mingchu Li, Yizhi Ren, and Jianhua Ma

On Alternation and Information Sharing among Cooperating Autonomous Management Agents .................................................................................................................. 364
Siri Fagernes and Alva L. Couch

Autonomic Fault Identification for Ubiquitous Self Healing Systems ......................................... 370
Junaid Ahsenali Chaudhry and Muhammad Imran

An SVM Based Automatic Segmentation Method for Brain Magnetic Resonance
Image Series ............................................................................................................................. 375
Bofeng Zhang, Wenhao Zhu, Hui Zhu, Anping Song, and Wu Zhang

Verification of a Sub-ontology Update Mechanism for the Semantic Grid ................................... 380
Toshihiro Uchibayashi, Bernady O. Apduhan, Norio Shiratori, Wenny Rahayu, and David Taniar
Session 3: Empirical Studies of Multidisciplinary Approaches

A Framework of Organic Streams: Integrating Dynamically Diversified Contents into Ubiquitous Personal Study

Hong Chen, Xiaokang Zhou, Haifeng Man, Yan Wu, Ashraf Uddin Ahmed, and Qun Jin

Making Architectural Decisions Based on Requirements: Analysis and Combination of Risk-Based and Quality Attribute-Based Methods

Bingfeng Xu, Zhiqiu Huang, and Ou Wei

Monitoring Spatially Referenced Entities in Wireless Sensor Networks

Farhana Jabeen and Alvaro A.A. Fernandes

An Idle-Time Eliminating Channel Transmission Scheme in EPON System

Jianhua Shen, Hongmei Guo, and Zhengkun Mi

Cloud Computing Landscape and Research Challenges Regarding Trust and Reputation

Sheikh Mahbub Habib, Sebastian Ries, and Max Mühlhäuser

The 2010 International Workshop on Software Trustworthiness (SoTrust 2010)

Session 1: Classification and Assurance

A Flexible Multi-Source Web Service’s QoS Acquisition Framework and Implementation

Junfeng Zhao, Lingshuang Shao, Zhiwen Cheng, and Bing Xie

Towards Trustworthy Composite Service Through Business Process Model Verification

Wenjia Huai, Xudong Liu, and Hailong Sun

Formal Analysis of Behavioural Equivalence for Trustworthy and Composite Web Services

Yongwang Zhao, Chunyang Hu, Min Liu, and Dianfu Ma

DS Theory-Based Software Trustworthiness Classification Assessment

Ben Wang, Xingshe Zhou, Gang Yang, and Yalei Yang

Session 2: Techniques and Applications

Static Detection of Unsafe Use of Variables in Java Program

Xiaoquan Wu and Jun Wei

Mining Frequent Development Patterns of roles in Open Source Software

Lin Yuan, Huaimin Wang, Gang Yin, Dianxi Shi, Xiang Li, and Bixin Liu

Checking Compliance to Coding Standards for x86 Executables

Ziying Dai, Xiaoguang Mao, Dianlin Wang, Donghong Liu, and Jie Zhang

User-Centered Trust Model Visibility of Trust Technologies

Hao Jiang, Yang Li, and Yongjun Xu
Collocated Workshops on Autonomic Networks and Services, Network Evolution and Routing Innovation (ANSR 2010)

MiniMASC: A Framework for Diverse Autonomic Adaptations of Web Service Compositions ..............................................................................................................................................................460
Qinghua Lu and Vladimir Tosic

PCR-a Position-and-Connectivity-Based Routing Protocol for VANETs ..............................................................................................................................................................469
Lin Lei, Xiao Xiaoyang, Xu Ming, and Wei Liqi

ATC Demo and Exhibition Session

MiniMASC+MiniZinc: An Autonomic Business-Driven Decision Making Middleware for Adaptation of Web Service Compositions ......................................................................................................................................................474
Qinghua Lu and Vladimir Tosic

ATC Demo and Exhibition Session

Exploration on Integrated Development Environment of Trusted Data Processing Oriented Software Product Line for WEB Application ..............................................................................................................................................................478
Hongwen Huang, Xinyu Zhang, Li Zheng, and Shulan Zhao

An Indoor Location-Based Social Network for Managing Office Resource and Connecting People ..............................................................................................................................................................481
Hao Wang, Lijun Zhu, and Alvin Chin

UIC Demo and Exhibition Session

Drive Smartly as a Taxi Driver ..............................................................................................................................................................484
Yu Zheng, Jing Yuan, Wenlei Xie, Xing Xie, and Guangzhong Sun

HouseGenie: Universal Monitor and Controller of Networked Devices on Touchscreen
Phone in Smart Home ..............................................................................................................................................................487
Yue Suo, Chenjun Wu, Yongqiang Qin, Chun Yu, Yu Zhong, and Yuanchun Shi

A-CUBE: A Tangible Tabletop Application to Support Safe and Independent Chemistry Experiments ..............................................................................................................................................................490
Akifumi Sokan and Kaori Fujinami

Fall Detecting and Alarming Based on Mobile Phone ..............................................................................................................................................................494
Zhongtang Zhao, Yiqiang Chen, Junfa Liu, and Zhongtang Zhao

Taxi-Viewer: Around the Corner Taxis Are! ..............................................................................................................................................................498
Ke Hu, Zhangguang He, and Yang Yue

Directional Wi-Fi Based Indoor Location System for Emergency ..............................................................................................................................................................501
Mi Zhao, Hua Yang, Junfa Liu, Yiqiang Chen, and Jingye Zhou

Speech and Auditory Interfaces for Ubiquitous, Immersive and Personalized Applications ..............................................................................................................................................................503
Lei Xie, Wenhuai Zhao, Xiangzeng Zhou, Xiaohai Tian, Bingfeng Li, Naicai Sun, Yali Zhao, and Yanning Zhang

GeeAir: Waving in the Air to Control Home Appliances ..............................................................................................................................................................506
Jiahui Wu, Gang Pan, Shijian Li, Zhaohui Wu, and Daqing Zhang

Author Index ..............................................................................................................................................................509
