51st Annual Meeting of the Institute of Nuclear Materials Management 2010

(INMM 51)

Baltimore, Maryland, USA
11-15 July 2010

Volume 1 of 5

# TABLE OF CONTENTS

## Volume 1

**Opening Plenary: Nuclear Materials: Current and U.S. Nuclear Future Regulatory Challenges Regulatory Commission** ................................................................. 1

- Gregory B. Jaczko

## CONCURRENT TECHNICAL SESSIONS I

### INTERNATIONAL SAFEGUARDS/NONPROLIFERATION AND ARMS CONTROL: THE NPT IN REVIEW 2010

- Abstract #580 The NPT Review Conference 2010: Perspectives for International Safeguards ................................................................. 6
  - Irmgard Niemeyer, Bernd Richter, Gotthard Stein

- Abstract #689 Principles for the Sustainable Development of Nuclear Energy .......................................................................................... 14
  - Philippe P. Delaune

- Abstract #283 Strengthening the NPT and IAEA Safeguards: Recommendations of the International Commission on Nuclear Non-Proliferation and Disarmament ......................................................... 22
  - John Carlson

- Abstract #730 Panel: An NPT RevCon Retrospective: What Happened And Where Are We Going From Here? ........................................... 28
  - Chantell L. Murphy, James A. Larrimore

### INTERNATIONAL SAFEGUARDS: PROCESS MONITORING I

- Abstract #228 Evaluation of Monitoring Capability and Sensitivity of Advanced Solution Monitoring and Measurement System (ASMS) ........................................................................................................ 35
  - Yasunobu Mukai, Hironobu Nakamura, Tatsuki Hoshino, Katsunobu Yoshimoto, Takayuki Tamura, Tomonori Iwamoto

- Abstract #116 The Inspector Interface in Solution Monitoring Systems ........................................................................................................ 44
  - John Howell, Thomas Burr, Michael Ehinger

- Abstract #353 A Comparison of Change Detection Methods for Solution Monitoring .................................................................................. 53
  - Tom Burr, John Howell, Claire Longo, Mitsutoshi Suzuki

- Abstract #620 Results of TACIS/JRC Project on “Modernisation and Enhancement of NMAC at the Mayak RT-1 Plant” ............................................ 63
  - Boris Ryazanov, Patrice Richter, V. Gorunov, S. Kazmin

- Abstract #638 Potentiometric Sensor for Real-Time Monitoring of Multivalent Ion Concentrations in Molten Salt ........................................ 72
  - P. A. Zink, Jun-Fong Jue, Brenda E. Serrano, Guy L. Fredrickson, Ben F. Conen, Steven D. Herrmann, Shelly X. Li

- Abstract #120 Optimizing Near Real-Time Accountability for Reprocessing .............................................................................................. 82
  - Benjamin Cipiti

### INTERNATIONAL SAFEGUARDS: EDUCATION AND TRAINING I: TOOLS, TECHNIQUES AND SYSTEMS

- Abstract #304 Tutorials for Managers: Emerging Best Practices ......................................................................................................................... 92
  - Ken Desson, Q. S. (Bob) Truong, D. Martin

- Abstract #407 The UK National Nuclear Laboratory: Supporting Safe and Secure Fuel Cycle Research .......................................................... 100
  - Andrew Worrall, Graham A. Fairhall, Zara Bunfield, Jeremy Edwards, Bruce Hanson, Daniel Mathers

- Abstract #144 3D-Based Educational Computer System for Safeguard Inspectors ...................................................................................... 110
  - Ichkyun Shin, Wonsik Choi, Jungso Kim, Seungik Park, HaeWon Shin

- Abstract #357 Enhanced Diversion Detection Methodology: 3-D Virtual Models Coupled with the Integrated Knowledge Engine .................................................. 118
  - Kelly D. Michel, Birchard P. Hayes, Deborah Ann Leishman

- Abstract #201 The Safeguards Technology Base: How is the Patient Doing? .............................................................................................. 125
  - Mark J. Schanfein, Fernando S. Gouveia, Cary Crawford, Jeff Jay, Chris Pickett

### MATERIALS CONTROL AND ACCOUNTABILITY: DESTRUCTIVE ASSAY (DA) METHODS I

- Abstract #156 Development of Safeguards Destructive Analysis in JAEA ........................................................................................................ 137
  - Yasuake Kano, Toru Suzuki, Akira Karosawa, Masaaki Magara

- Abstract #684 Destructive Analysis Capabilities for Plutonium and Uranium Characterization at Los Alamos National Laboratory ........................................................................ 148
  - Louis Tandon, Kevin Kuhn, Lawrence Drake, Duane Decker, Laurie Walker, Lisa Colletti, Khalil Spencer, Dominie Peterson, Jaclyn Herrera, Amy S. Wong
Abstract #665 A Documentary History of the United State's First Plutonium Isotopic Reference Materials — Origin, Production and Certification of the 946, 947 and 948 Reference Materials

Peter Mason, Usha Narayanan

Abstract #680 Update on Isotopic Reference Materials and Measurements for Nuclear Safeguards at IRMM

Stephan Richter, Yetunde Aregebe, Razle Jakopic, Heinz Kuehn, Monia Kraiem, Jan Trayens, Andre Verbruggen, Stefan Buerger

Abstract #679 Verification of LSD Spikes Prepared in Japan from a MOX Source Material

Mika Sumi, Katsuos Abe, Tomio Kageyama, Hiroaki Nakazawa, Peter Mason, Jon W. Neuhoff, Norbert Dausbek, Steven Devry, Balsley, Andre Verbruggen, Stephan Richter, Razle Jakopic, Evelyn Zuleger, Piet Van Belle

MATERIALS CONTROL AND ACCOUNTABILITY/WASTE MANAGEMENT: GAMMA MEASUREMENT METHODS

Abstract #214 FRAM v.5: Simple is Good

Da C. Ye

Abstract #234 Identification of Nuclear Material with Hand-Held and Portable Gamma and Neutron Measuring Devices

Monika Risse, Wolfram Berky, Hermann Friedrich, Theo Köhle, Wolfgang Rosenstock

Abstract #490 Radioisotope Identification of Shielded and Masked SNM/RDD Materials

Saleem R. Salaymeh, Ron D. Jeffcoat, Cory Lorenz, Lane Owsley, Alex Athey

Abstract #504 A Comparison of GADRAS-Simulated and Measured Gamma-ray Spectra

Ron D. Jeffcoat, Saleem R. Salaymeh

Abstract #505 Spectral Absorption Difference Analysis Method

Alex Athey, Saleem R. Salaymeh

Abstract #515 New Directions in Radioisotope Spectrum Identification

Saleem R. Salaymeh

MATERIALS CONTROL AND ACCOUNTABILITY/INTERNATIONAL SAFEGUARDS: LAUREL C-D MATERIAL CONTROL AND MONITORING SYSTEM

Abstract #136 Why RFID Tags Offer Poor Security

Jon S. Warner, Roger G. Johnson

Abstract #263 Activated Ultra-Wide Band (UWB) Tagging for Use in Secure Environments

Nathan C. Rowe, Brad J. Stinson, James R. Younkin, Justin E. Randall, Chris A. Picket, Leesa Duckworth, Michael Kahn, Jonathan W. Hickerson

Abstract #340 Using Radiofrequency Identifiers and Optical Time Domain Reflectometers to Verify Fiber Optic Seals

Markku Koskelo, David Johnson, Bernard Wixhard, Chris Martinez

Abstract #366 Investigation of the State and Uses of Ultra-Wide-Band Radio-Frequency Identification Technology

Jonathan W. Hickerson, Jon Younkin

Abstract #413 The Application of 3D Laser Scanning Techniques for the Efficient Safeguarding of Fairly Static Storage Facilities for Nuclear, Depleted and Reprocessed Uranium

Julie Oldenau, Jean-Luc Doignon, Eric Damgé, Brigitte Le Mustais, Vitor Sequeira, Gunnar Boström, João G. M. Gonçalves, Paul Meylemans, Johan Dackner

Abstract #437 An Optically Stimulated Luminescence Uranium Enrichment Monitor

Steven D. Miller, Jennifer E. Tanner, Kevin L. Simmons, Matthew M. Cowady, Jacob M. Benz, Bryce A. Greenfield

NONPROLIFERATION AND ARMS CONTROL: PROLIFERATION RESISTANCE AND ASSESSMENT METHODOLOGY

Abstract #714 Results from the 2010 International Workshop for Users of Proliferation Assessment Tools Held at Texas A&M University

William S. Charlton, Michael D. Zentner, Adrienne M. Lafleur

Abstract #715 An Expert Elicitation Based Study of the Proliferation Resistance of a Suite of Nuclear Power Plants

Michael D. Zentner, Ike Therios, Robert Bart, Laiy Cheng, Meng Yue, Roald Wigeland, Jim Hasseberger, Brian Boyer, Joseph Pilat

Abstract #222 Incorporating the GIF-PRPP Proliferation Resistance Methodology in Reactor Design

Jeremy D. Whitlock

Abstract #167 Benchmarking of NNL Proliferation Resistance Assessment Methodology

Andrew Worroll, Kevin W. Hesketh

Abstract #175 Proliferation Resistance R&D Activities in Korea

Ho-Dong Kim, Hong-Lae Chang, Won Il Ko

Abstract #435 A Consideration of Proliferation Resistance of a FBR Fuel Cycle System

Naoko Inoue, Naiya Kaji, Kazunori Suda, Yoko Kawakubo, Mitsutoshi Suzuki, Tomozo Koyama, Yusuke Kuno, Manao Senzaki
NONPROLIFERATION AND ARMS CONTROL: FUTURE ARMS CONTROL VERIFICATION
TECHNOLOGIES I

Abstract #301 Future Directions for Arms Control Verification Technologies ................................................................. 350
Michele R. Smith, John Dunn, Kevin D. Seager

Abstract #256 Random Selection as a Confidence-Building Tool ......................................................................................... 360
Duncan W. Macarthur, Danielle Hauck, Diana Langner, Morag Smith, Jonathan Thron

Abstract #544 UK-Norway Initiative: Research into Information Barriers to Allow Warhead Attribute Verification Without Release of Sensitive or Proliferative Information ............................................. 366
David M. Chambers, Steve Allen, Steinar Bakke, Damian Curtis, Steinar Haukåsen, Kjell Johanson, Morgan Jones, David Keir,
Douglas Reynolds, Aled Richings, Hans E. Torkildsen

Abstract #535 UK-Norway Initiative: Research into Managed Access of Inspectors During Warhead Dismantlement Verification ............................................................................................................. 376
Ole Reistad, Steinar Bakke, Steinar Haukåsen, Svein Mykkeltveit, Pavel Tishakov, Colin Waters, David Chambers, Helen White,
Iain Russell, Keir Allen, David Keir

Abstract #132 Security Theater in Future Arms Control Regimes ..................................................................................... 386
Roger G. Johnston, Jon S. Warner

CONCURRENT TECHNICAL SESSIONS II

INTERNATIONAL SAFEGUARDS: INCREASING THE ROLE OF SSACS/RSACS FOR INTERNATIONAL SAFEGUARDS

Abstract #425 SSAC/IAEA Cooperation: Some Reflections from the Canadian SSAC .................................................................. 395
James A. Casterton, Karen Owen, Adam Parsons

Abstract #163 Strengthening Safeguards Through Regional Cooperation: Establishment of the Asia-Pacific Safeguards Network ........................................................................................................ 403
John Carlson

Abstract #355 Safeguards: Its Role in the Promotion of the Nuclear Industry ........................................................................ 409
Na Young Lee

Abstract #718 Euratom Treaty—Euratom Safeguards: An Example to Follow? ........................................................................ 415
Stamatis Tulas, Maurizio Boella, Finlay Maclean

Abstract #630 Peaceful Use of Nuclear Energy and the Role of Regional Safeguards Systems in Increasing Transparency and Confidence - One Perspective of ABACC ......................................................... 423
Sonia Fernández Moreno

Abstract #405 Regional Safeguards Systems: Contributions and Perspectives for Future Safeguards Implementations ................................................................................................................................. 429
Opet J. Pecioño, Antonio A. Oliveira

Abstract #717 NNSA’s Next Generation Safeguards Initiative Efforts to Define an Effective State System of Accounting and Control ........................................................................................................ 437
Rebecca Stevens, Carrie Mathews, Alex Sunshine, Sarah Frazar, Shirley Johnson

INTERNATIONAL SAFEGUARDS: PROCESS MONITORING II

Abstract #316 Interpretation of Field Test Data from UF6 Cylinder Accountancy Scales .............................................................. 440
Mark Laughter, Adam Shephard, Nathan Rowe, Michael Whiaker, Rose Martyn, Peter Fitzgerald

Abstract #608 Results of Inspections of Operation of the ORNL Mock Feed/Withdrawal System .................................................. 440
Jessica L. White, Mark Laughter, Patrick Lynch, Alan Krizinsky

Abstract #569 Measurement Uncertainty of Actinide Ratios Using Dual-Channel Monochromatic Wavelength Dispersive X-Ray Fluorescence ................................................................................. 450
Michael L. Collins, George J. Havrilla

Abstract #285 Process Monitoring for Safeguards via Event Generation, Integration and Interpretation ................................................. 457
Humerto E. Garcia, Wen-Chiao Lin, Tae-Sic Yoo

Abstract #447 Data Recovery Efforts at Idaho National Laboratory, Oak Ridge National Laboratory, and Savannah River National Laboratory .................................................................................................. 463
Richard R. Metcalf, Saleem Salaymeh, Michael Ehinger

Abstract #354 Solution Monitoring Scoring Systems ................................................................................................................. 470
Tom Burr, John Howell, Mike Ehinger

Abstract #262 Secondary Ion Mass Spectrometry Analysis of Materials to Develop In-core Safeguards Reactor Monitoring Devices ............................................................................................................... 497
David Gerlach, Bruce D. Reid, Christopher J. Gesh, Mark R. Mitchell, Scott C. Szczesny, Matthew Douglas, Bruce K. McNamara,
Tere A. Ellis, Ruby M. Ermi

Abstract #554 Application of the Isotope Ratio Method to a Boiling Water Reactor ................................................................. 497
Christopher J. Gesh, David C. Gerlach, David E. Hurley, Mark R. Mitchell, George H. Merrit, Bruce D. Reid, Doug Frank

Abstract #396 Material Declaration Validation Using Process Monitoring for a Liquid Transfer Facility ........................................................................................................................................... 507
James J. Henkel, David A. Hooper, J. Wesley Hines
INTERNATIONAL SAFEGUARDS: EDUCATION AND TRAINING II: HUMAN RESOURCE DEVELOPMENT

Abstract #423 Training of Safeguards Inspectors Training at the European Commission
Wolfgang Kahlmeyer, Mats Olsson, Maurizio Boella

537

Abstract #368 An American Academy for Training Safeguards Inspectors: An Idea Revisited
Philip Casey Durst, Robert Bean

544

Abstract #465 Global Professional Networks: Establishing a Link to the Gulf Region
Ryan T. Whalen, Patrick D. Lynch

551

Abstract #550 U.S.-Russian Academic Collaborations at Texas A&M University
Claudio A. Gariazzo, William Charlton, Kenneth Lee Peddicord

555

Abstract #267 GENE II – Instilling Global Standards for Nuclear Safety, Security and Safeguards in Developing Countries
David R. Boyle, Amir H. Mohagheghi, Adam D. Williams

565

Mary Elise Elman, Birchard P. Hayes, Kelly D. Michel, Brian D. Boyer

573

Abstract #690 Challenges in the IAEA Safeguards Training of Inspectors
Jean Maurice Crete, Matthew Ferguson, Kenneth Aoki, John Patten

580

MATERIALS CONTROL AND ACCOUNTABILITY: NNSA/DNS MC&A CURRENT ACTIVITIES

Abstract #189 Energy Facility Contractor’s Group (EFCOG)
Geneva Johnson

587

Abstract #185 Deployment of the Los Alamos Materials Control and Accountability System (LAMCAS)
Buel Hicks, Caroline Boyle

591

Abstract #707 LANL’s Near Real Time Measurement Control Bolt-on to LANMAS
Mary Alice Price

597

Abstract #151 Safeguards First Principle Initiative (SFPI) Cost Model
James Poorbaugh

603

Abstract #217 Highly Enriched Uranium Materials Facility (HEUMF) Startup Lessons Learned
Jeremy S. Underwood

608

Abstract #250 Materials Control & Accountability System Readiness for HEUMF Operation at the Y-12 National Security Complex

618

MATERIALS CONTROL AND ACCOUNTABILITY/INTERNATIONAL SAFEGUARDS: NUCLEAR FORENSICS I: NEW TECHNIQUES AND TECHNOLOGIES

Abstract #643 Intrinsic Dosimetry: A Potential New Tool for Nuclear Forensic Investigations
Richard A. Clark, Steven D. Miller, J. Dave Robertson, Roger A. Gregory, Mark K. Murphy, Jon M. Schwantes

624

Abstract #337 Ultra-High-Resolution Alpha Spectrometry for Nuclear Forensics and Safeguards Applications

631

Abstract #247 Application of Chemical Structure and Bonding of Actinide Oxide Materials for Forensic Science

636

Abstract #529 Validation of Electrochemically Modulated Separations Performed On-line with MC-ICP-MS for Uranium and Plutonium Isotopic Analyses
Martin Liezers, Khris B. Olsen, Alexandra V. Mitroshkov, Douglas C. Duckworth

644

Abstract #511 Validation of Inverse Methods Applied to Forensic Analysis of Spent Fuel
Bryan Broadhead, Charles Weber

644

Abstract #480 Dissolution and Analysis for Yellowcake Components for Fingerprinting Uranium Ore Concentrate Sources
Charles K. Bayne, John M. Begovich, Debra A. Bostick, Joel A. Carter, Joseph M. Giaquinto, Cole R. Hextel, Joske Horita, W. D. Bostick

654

Abstract #642 Trace Elemental Signatures Imparted from Reagents of the Bismuth Phosphate Spent Nuclear Fuel Reprocessing Method
Jon M. Schwantes, Paul L. Gassman, Tere A. Ellis

660

Abstract #685 Nuclear Forensics of Special Nuclear Materials at Los Alamos: Three Recent Studies

667

Abstract #625 Surrogate Nuclear Explosive Debris for Measurement Validation and Research
Philip Casey Durst, Robert Bean

677

Abstract #733 Methodology for Assessing the Status of a Physical Protection System on the Basis of Agency Inspections and Site Self-Assessments in Rosatom .......................................................... 870
   Alexander Pinkarev, Vladimir Babkin, Alexander Izmaylov, Mikhail Kulikovsky, Vladimir Matveev, Douglas Shaw, Linwood Livingston

NONPROLIFERATION AND ARMS CONTROL: FUTURE ARMS CONTROL VERIFICATION TECHNOLOGIES II

Abstract #623 Verification with Gamma Ray and Fast Neutron Detection ................................................................. 880

Abstract #635 Fieldable Material Identification System .............................................................................................................. 888

Abstract #650 Enhanced Photofission-based, Coincidence/Multiplicity Inspection Measurements .......................................................... 896

Abstract #335 Advantages of Dual Mode Imaging for Managing Sensitive Imaging Information ..................................................... 906
   William K. Pitts, Kenneth Jarman, Erin Miller, Benjamin McDonald, Alex Misner, Mitchell Myjak, Sean Robinson, Allen Seifert, Cari Seifert, Mitchell Woodring

Abstract #334 Image Analysis Algorithms for Dual Mode Imaging System ................................................................. 912

Abstract #499 Feasibility Study on Using a Fast Calorimetry Technique to Measure a Mass Attribute as Part of a Treaty Verification Regime .............................................................................................................. 922
   Peter A. Santi, David Bracken, Danielle Hauk, Duncan Macarthur, Jonathan Thron

Abstract #603 Artificial Neural Networks for Arms Control and the Verification of Treaty Accountable Items ............................................ 932
   Mark C. Owen, Matt J. Aitkenhead, David M. Chambers

Abstract #531 Autoradiography Using OSL for Monitoring Warhead Dismantlement ......................................................... 942
   Jennifer E. Tanner, Steven D. Miller, Matthew M. Conrady, Jacob M. Benz

Abstract #345 Next Generation Trusted Radiation Identification System .................................................................................. 952
   Peter B. Merkle, Thomas Weber, Jerry Srother, Adam Flynn, Joshua Etzkin, Jack Bartherger, Wendy C. Amai, Lawrence F. Anderson

PACKAGING AND TRANSPORTATION: RADIOACTIVE MATERIAL PACKAGING ANALYSIS

Abstract #584 Recommended Best Practices for Finite Element Analysis of Spent Nuclear Fuel Transfer, Storage and Transportation Systems ................................................................. 957
   Christopher S. Bajwa, Jason Piotter, Judith Cuta, Harold Adkins, Nicholas Klymyschn, James Fort, Sarah Suffield

Abstract #525 Performance of a Containment Vessel Closure for Radioactive Gas Contents ......................................................... 969
   Kurt Eberl, Paul Blanton, Paul Mann

Abstract #510 Alternate Materials in Design of Radioactive Material Packages .............................................................................. 979
   Paul S. Blanton, Kurt Eberl, Paul Mann

Abstract #418 Best Practice Guidelines for the Use of CFD in Dry Cask Applications ................................................................. 993
   Jorge Solís, Ghani Zigh

Abstract #239 Finite Element Analysis of Bulk Tritium Shipping Package .................................................................................. 1001
   Jeff Jordan, Paul Blanton, Kurt Eberl

WASTE MANAGEMENT: SPENT FUEL MANAGEMENT I

Abstract #654 U.S. Used Nuclear Fuel Management: Future Options .................................................................................. 1009
   Lake Barrett

Abstract #374 Managing the Nuclear Fuel Cycle: The Big Picture .................................................................................. 1018
   Brett W. Carlson

Abstract #466 Establishing a Radioactive-Waste Management Center of Excellence in East Asia .......................................................... 1028
   Batsun W. Barnard, Robert J. Finch, Hong-Lae Chang

Abstract #119 Spent Fuel Management in South Korea: The Illogic of Pyroprocessing .......................................................... 1034
   Frank N. Von Hippel

Abstract #212 China’s Current Spent Fuel Management and Future Management Scenarios ......................................................... 1044
   Yun Zhou

Abstract #118 A Practical Solution to Used Nuclear Fuel Treatment to Enable Sustained Nuclear Energy and Recovery of Vital Materials .............................................................................. 1053
   Emory D. Collins, G. D. Del Cel, James E. Bushton, K. A. Williams

Abstract #498 Used Fuel Storage Security .......................................................................................................................... 1060
   Felicia A. Duran, Albert G. Garrett, Sherri L. Garrett
CONCURRENT TECHNICAL SESSIONS III

INTERNATIONAL SAFEGUARDS: POLICIES, CHALLENGES AND COUNTRY ISSUES

Abstract #543 Next Generation Safeguards Initiative: 2010 and Beyond ................................................................. 1070
J. Mark Whitney, Stephen Lamonantos, Dunbar Lockwood, Alexander Sunshine, Gregory Dupay, Melissa Scholz

Abstract #238 Creation of the IAEA Model Additional Protocol .................................................................................. 1078
Michael D. Rosenthal, Norman A. Wulf, Frank Houck

Abstract #281 Revisiting the Practices and Technical Objective of Safeguards ............................................................ 1087
Craig W. Everton, John Carlson, Russell Leslie

Abstract #365 Compliance Under a Small Quantities Protocol to a Comprehensive Safeguards Agreement ..................... 1094
James A. Larrimore

Abstract #453 The ESARDA Working Group on Verification Technologies and Methodologies (VTM) .......................... 1103

Abstract #708 World Trade Data: Can They Help Safeguards Verification Activities? .............................................. 1111
Renaud Chatelas, Cristina Versino, Giacomo Cojazzi, Franca Contini, Ari Sitos, M. Tarvainen

Abstract #370 Nuclear Archeology on the 5 MWe Graphite Reactor at Yongbyon ........................................................ 1121
Jungmin Kang

Abstract #467 Establishing the New Nuclear Taboo: Pakistan’s Nuclear Behaviour After the Revelation of the A. Q. Khan Case ................................................................. 1127
Rizwana K. Abbasi

INTERNATIONAL SAFEGUARDS: NEXT GENERATION SAFEGUARDS PROFESSIONAL NETWORK I

Abstract #468 The Inaugural Meeting of the Next Generation Safeguards Professional Network at ORNL .................. 1139
Alena V. Zhermosek, Patrick D. Lynch, Mark D. Laughter, Jessica L. White

Abstract #426 Profiling the Next Generation of IAEA Safeguards Professionals ........................................................... 1148
Steven Amandson

Abstract #427 Human Capital Development — Cultivating the Next Generation of Safeguards Professionals ................ 1158
Melissa Scholz

Abstract #570 The Benefits and Challenges of Understanding Nuclear Public Policy for a Young Safeguards Professional ................................................................. 1165
Bryan T. Sims

Abstract #257 INL Human Resource Development and the Next Generation Safeguards Initiative ................................ 1172
Richard Metcalf, Fernando Gouveia

Abstract #317 LLNL-CNS International Safeguards Policy and Information Analysis Summer Course .......................... 1177
Justin K. Reed, Fred Wehling, Sean Dunlop

Abstract #339 ICs Radiation’s Sustaining Leadership in Technology Implementation and Product Development .............. 1187
Jeffrey W. Perkins

Abstract #430 Knowledge Management Initiatives to Maintain Regulatory Expertise in Storage and Transportation of Radioactive Materials ................................................................. 1192
Haile K. Lindsay, Norma Garcia-Santos, Neil H. Day, Alexis Sotomayor-Rivera, Pierre Saverot, Lucieann Vechioli, Michael D. Waters

MATERIALS CONTROL AND ACCOUNTABILITY: NUCLEAR MATERIALS MANAGEMENT I

Abstract #186 Aberdeen/SPR II Nuclear Material: A Successful Integrated Effort to Disposition Legacy Highly Enriched Uranium ................................................................. 1199
Scott H. Davies, Patricia B. Helms

Abstract #547 Inventory Characterization for Planning and Executing Effective Nuclear Material Management, Consolidation and Disposition ................................................................. 1205
Xavier Ascanio, Jay Beams, Dale Dunsworth

Abstract #245 Disposition of Y-12 Legacy Non-SNM Classified Items ................................................................. 1215
John Meersman

Abstract #184 Accelerated Loadout of the Highly Enriched Uranium Materials Facility at the Y-12 National Security Complex ................................................................. 1220
Ron F. Milligan

Abstract #651 HEU Commercial Downblending — A Non-Proliferation Winner! ........................................................... 1230
Gary Person, Robert George

Abstract #486 Value Stream Analysis in the Nuclear Material Management Program at Sandia National Laboratories ................................. 1240
Warren R. Strong, John A. Engleman

Abstract #139 Safeguarding the Fast Reactor Fuel Cycle ................................................................. 1248
Michael J. Lineberry, Robert W. Benedict, Zachary Miller

Abstract #507 PF-4 Actinide Disposition Strategy (PADS) ................................................................. 1257
Robert Margarievici

Richard E. Koenig, Terence Willoner, Hunchang Tsai, Yung Liu, Richard Turlington, Daniel Leduc
MATERIALS CONTROL AND ACCOUNTABILITY/INTERNATIONAL SAFEGUARDS: NUCLEAR FORENSICS II: PROGRAM DESCRIPTIONS AND FUTURE DIRECTIONS

Abstract #441 Recent Activities at the International Atomic Energy Agency to Advance International Nuclear Forensics
David K. Smith, Carlos Nogueira De Oliveira, Reza Abedini-Zadeh .......................................................... 1271

Abstract #520 National Technical Nuclear Forensics Center Overview
William B. Daitch, William D. Ulicny, Courtney C. Taylor .......................................................... 1280

Abstract #336 Nuclear Materials Information Program
Marcia Brisson .......................................................... 1287

Abstract #648 A Concept for National Nuclear Forensic Libraries
John F. Wacker, Michael R. Curry .......................................................... 1289

Abstract #613 Nuclear Forensics Activities and Opportunities at the Nevada Test Site
Zaheer A. Ali, Michael McElfresh, Tim Meehan, Ding Yuan, Howard Bender, David Bednau, Ping Lee, Stephen Younger .......................................................... 1295

Abstract #469 International Data on Radiological Sources
Margaret Goldberg, Martha Finck .......................................................... 1296

Abstract #653 Joint Project of European Union and Russian Federation on Combating Illicit Trafficking of Nuclear and Radioactive Material
Andrey Smirnov, Igor Sazonov .......................................................... 1302

Abstract #606 Nuclear Forensics Certificate Program Development at TAMU

MATERIALS CONTROL AND ACCOUNTABILITY/INTERNATIONAL SAFEGUARDS: NEUTRON MEASUREMENTS II

Abstract #479 Evaluation of a Combined Neutron and Gamma-Ray Multiplicity Counting System
Andreas Engqvist, Sara A. Pozzi, Marek Flasha, Jennifer L. Dolan, David L. Chichester .......................................................... 1313

Abstract #145 A Study of an Epithermal Neutron Multiplicity Counter (ENMC) for Nuclear Material Accountancy
Takayuki Tamura, Masashi Komatsu, Tomonori Iwamoto, Martyn T. Swinhoe, Carlos D. Rael, Johnna B. Marlow, Howard O. Menlove .......................................................... 1323

Abstract #194 Neutron Multiplicity and Active Well Neutron Coincidence Verification Measurements Performed for March 2009 Semi-Annual DOE Inventory
Raymond Dewberry, K. P. Klapper, F. K. Tietze, James Ayers .......................................................... 1329

Abstract #531 Comparison of Fast and Thermal Neutron Multiplicity Counters for Assaying Special Nuclear Materials
Steven A. Sheets, Phil Kerr, Les Nakae, Ron Wurtz, Arden Dougan, Daniela Hentzlova, Howard O. Menlove, Johnna B. Marlow, Martyn T. Swinhoe .......................................................... 1337

Abstract #450 A Stochastic Model of the Differential Die-away Analysis (DDAA) Method
Imre Pázsit, Lénárd Pál .......................................................... 1344

Abstract #158 Time Correlation Measurements of 235U-Source-Driven Fission Chains in Bare HEU Metal Assemblies
Seth McConchie, Paul Haulsaden, John Mihalczko .......................................................... 1354

Jennifer L. Dolan, Marek Flasha, Sara A. Pozzi, David L. Chichester .......................................................... 1364

Abstract #611 Induced-Fission Imaging of Nuclear Material
Paul Haulsaden, Matthew A. Blackston, James A. Mullens, Seth McConchie, John T. Mihalycz, Philip R. Bingham, M. Nance Ericson, Lorenzo Fabris .......................................................... 1374

Abstract #514 Simulations of Neutron Multiplicity Measurements of a Weapons-Grade Plutonium Sphere with MCNP-PoliMi
Eric C. Miller, Ben Dennis, Shaun D. Clarke, Sara A. Pozzi, John K. Mattingly, E. Padovani .......................................................... 1384

MATERIALS CONTROL AND ACCOUNTABILITY/INTERNATIONAL SAFEGUARDS: OTHER NONDESTRUCTIVE ASSAY (NDA) I

Abstract #176 Enhancing Nuclear Non-Proliferation Control by Overlaying Nuclear, Infrared Hyper Spectral FTIR, Imaging, and Optical Imaging/Scanning Detection Technologies
Graham V. Wulford, John E. Patterson, James S. Bogard, Linda A. Lewis, Steven E. Smith, Alan M. Krichinsky, John E. Gunning, Kevin C. Gross, Glen P. Perram, Gary D. Liu, Vincent J. Farley .......................................................... 1393

Abstract #283 Monochromatic Wavelength Dispersive X-Ray Fluorescence Providing Sensitive and Selective of Uranium
George J. Harrilla, Michael Collins, Velma Montoya, Zewu Chen, Fuzhong Wei .......................................................... 1407

Abstract #244 A Correlation Based Pulse Detection Technique for Liquid Scintillation Detectors
Muhammad Faisal, Randolph T. Schiffer, Marek Flasha, Sara A. Pozzi, David D. Wentzloff .......................................................... 1414

Abstract #513 Expressing Precision and Bias in Calorimetry
Stephen Croft, David S. Bracken, Danielle K. Hauck .......................................................... 1422

Abstract #634 The Theoretical Detection Limits of Scanning Electron Microscopy
Alexandra Khudoleeva .......................................................... 1432
NONPROLIFERATION AND ARMS CONTROL: LONG-RANGE DETECTION OF NUCLEAR THREATS

Abstract #693 The DTRA Program for Long-Range Detection of Nuclear Threats .......................................................... 1463
James R. Lemley, Peter Zieliński

Abstract #691 Active Interrogation with Proton Beams ................................................................................................. 1470
Christopher L. Morris, Jeffery Bacon, Steven J. Greene, Kiwhan Chung, Gary Hogan, Kris Kwiatkowski, Mark Makela, Fesheh Mariam, Matthew Murray, Randy Spaulding, Alexander Saunders, Zhehui Wang, Fred Wysoczki

Abstract #705 Long Range Detection of Radiation-Induced Air Fluorescence ................................................................. 1489

Abstract #127 Detection of Actinide Elements Using LIBS ............................................................................................... 1498
D. A. Cremers, R. C. Chinni, M. Bostian, C. R. Jones, L. J. Radziemska, C. Navarro, L. Karch

Abstract #128 Detection of Nuclear-related Chemicals and Other Threat Materials Using LIBS ....................................... 1508
Christopher L. Morris, Jeffery Bacon, Steven J. Greene, Kiwhan Chung, Gary Hogan, Kris Kwiatkowski, Mark Makela, Fesheh Mariam, Matthew Murray, Randy Spaulding, Alexander Saunders, Zhehui Wang, Fred Wysoczki

Abstract #169 Application and Development of Laser Induced Breakdown Spectroscopy (LIBS) for International Safeguards ...................................................................................................................... 1518
James E. Barefield II, Samuel M. Clegg, D. Kirk Yeirs, Mike Browne, Leon Lopez, Loan Le

NONPROLIFERATION AND ARMS CONTROL: THE RUSSIAN AVNG ATTRIBUTE MEASUREMENT SYSTEM

Abstract #305 Introduction to the Attribute Verification: Neutron/Gamma (AVNG) Program .............................................. 1529
Michele R. Smith

Abstract #210 The Attribute Measurement Technique ...................................................................................................... 1532

Abstract #258 AVNG System Objectives and Concept ........................................................................................................ 1538

Abstract #302 The Design and Implementation of the AVNG ............................................................................................... 1545

Abstract #487 AVNG Authentication Features .................................................................................................................. 1554
Jonathan L. Thron, Duncan Macarthur, Sergey Razinkov, Alexander Livke, Greg White

Abstract #327 AVNG as a Test Case for Cooperative Design .................................................................................................. 1561
S. J. Luke

Abstract #319 Reference Material Manufacture and Certification ....................................................................................... 1566
Alexander Livke, M. Bulatov, Danielle K. Hauck, Sergey Kondratov, M. Leplyavkina, Duncan Macarthur, Sergey Razinkov, D. Sivachev

Abstract #323 Testing the AVNG ............................................................................................................................................. 1574

Abstract #324 AVNG System Demonstration .......................................................................................................................... 1585

NONPROLIFERATION AND ARMS CONTROL: GLOBAL THREAT REDUCTION INITIATIVE

Abstract #373 Risk Analysis and Management of State Nuclear Security Measures .......................................................... 1594
Christopher T. Myers, William S. Charlton, David G. Ford

Abstract #582 GTRE's Efforts to Minimize the Use of Highly Enriched Uranium in Medical Isotope Production .............. 1602
Jennifer Lacey, Cheryl Fitzgerald, Rilla Hamilton, Parrish Staples, Jeff Lindenmeyer

Abstract #589 Protecting U.S. Cities from Radiological Threats: Cooperative Efforts Between GTRI and Local Law Enforcement Agencies ................................................................................................................. 1607
Peter Tenemyer, Kristina Hatchett, Joanna Baptiste, Paul D. Moskowitz, Kenneth Sheene

Charles Messick, Jerry Taylor, Mark Niches, Sarah Dickerson, Christopher Landers
Abstract #592 Romania and Libya Air Shipments of Highly Enriched Uranium Spent Nuclear Fuel ........................................ 1622
Christopher Landers, Igor Bolshinsky, Ken Allen, Stanley Moses

Abstract #597 Nuclear and Radiological Risk Reductions: Program Management and Risk Mitigation on a Global Scale ........................................................................................................ 1627
Ken Shoely, Alma Contreras, Peter Hoag, Marc Zocher, David Pells, Richard Archibald

Abstract #601 An Overview of the Global Threat Reduction Initiative Research Reactor Conversion Program ................................ 1634
Parrikk Staples, Douglas Burkes, Michael Macquigg

Abstract #585 Value of Cooperative Relationships for Securing a Safer World ........................................................................... 1639
Ilir Molellari, Nikolla Civici, John Randolph, Kristin Hirsch

Abstract #605 An Overview of the Global Threat Reduction Initiative’s Physical Protection Work in Tanzania ......................................... 1648
Firmi Banzi, Phil Robinson, Michael Itamura, Michael Strosinski

PACKAGING AND TRANSPORTATION: STORAGE OF PLUTONIUM BEARING MATERIAL I

Abstract #672 Sampling Approach To Validate The Safe Storage of Plutonium-Bearing Materials .............................................. 1653
Elizabeth J. Kelly, Larry Peppers, Laura Worl, James McClard

Abstract #225 Alpha-Particle-Induced Prompt Gamma-Ray Analysis of Plutonium-Bearing Materials Packaged in 3013 Containers .................................................................................................................. 1660
Joshua Narlesky, Lynn Foster, Elizabeth Kelly, Roy E. Murray IV

Abstract #438 Material Properties of Plutonium-Bearing Oxides Stored in Stainless Steel Containers ........................................ 1668
Glen E. Kiesinger, Philip M. Almond, Nick J. Bridges, Mike G. Bronikowski, Mark L. Crowder, Jonathan M. Duffy, Dave M. Missimer, John H. Scogin, Michael E. Sammer, Ronald B. Livingston, Morgan M. McElvee, Art R. Jurgensen

Abstract #640 Relationship between Reported, As-Packaged Moisture and Moisture Measurements Made during Surveillance of 3013 Containers ............................................................................. 1682
John M. Berg, Mark L. Crowder, Philip M. Almond

Abstract #641 Thermal Gradients and the Potential to Form Liquids in 3013 Containers .............................................................. 1689
D. Kirk Veirs, John M. Berg, N. E. Gupta, Binh V. Nguyen, Joshua E. Narlesky, F. Coyne Prenger, Lance B. Traver

Abstract #637 Evidence of Corrosive Gas Formed by Radiolysis of Chloride Salts in Plutonium-Bearing Materials .................................. 1699
D. K. Veirs, John M. Berg, Kerry A. Dunn, McIntyre R. Louthan Jr., Laura A. Worl, Joshua E. Narlesky

Abstract #517 Pressure Development in Sealed Containers with Plutonium-Bearing Materials ................................................. 1706
Jonathan M. Duffy, D. Kirk Veirs, John M. Berg, Ronald R. Livingston

Abstract #501 Interactions Between Stainless Steel and Plutonium Metal ...................................................................................... 1717

Abstract #445 Compaction of Fiberboard in a 9975 Shipping Package ......................................................................................... 1725
Tina M. Stefek, William L. Daugherty, Joseph L. Murphy, Eddie G. Estochen

PHYSICAL PROTECTION: SECURITY POLICY AND HUMAN FACTORS

Volume 3

Abstract #284 Developments in the IAEA’s Nuclear Security Series and Physical Protection Guidance Document INFIRC/225 .......................................................................................................................... 1735
Craig Everton, Stephan Bayer, John Carlson

Abstract #338 Developing New Tools for Policy Analysis .................................................................................................................. 1744
Richard L. Donovan, Michael J. Schwartz, Norma L. Elkecker, Kevin B. Selby

Abstract #572 NRC: Taking Spent Fuel Security in the Wrong Direction ..................................................................................... 1753
Edwin Lyman

Abstract #390 Nuclear Security Culture Evaluation Proposal ........................................................................................................ 1760
Jose Rodriguez, Paul Ebel

Abstract #137 Countermeasures to Perceptual Blindness .............................................................................................................. 1768
Roger G. Johnston

Abstract #148 Handbook of Security Blunders ......................................................................................................................... 1771
Roger G. Johnston, Jon S. Warner

Abstract #278 General Strain Theory as a Vehicle to Analyze Insider Threat .................................................................................. 1781
Galya I. Balatsky, Carolyn Slentz, William Severe

Poster #16/Abstract #400 Review of the International Convention for the Suppression of Acts of Nuclear Terrorism from the Criminal Law’s Point of View ........................................................................... 1791
Sang Cheol Hyung

WASTE MANAGEMENT: WASTE MEASUREMENTS

Abstract #248 Application of Spectral Summing to Suspect Low-Level Debris Drums at Los Alamos National Laboratory ................................................................. 1794
Kathleen M. Graetzmaier, John M. Veileux, Randy P. Lucero, James T. Seams, Martin J. Clapham

Abstract #213 Resolution of Nuclear Inventory Discrepancies During the Argonne Alpha Gamma Hot Cell Facility De-Inventory Process .............................................................................. 1800
Janie A. Johnston
Abstract #264 Use of UV-Visible Spectroscopy to Determine Solution Chemistry Under Used Nuclear Fuel Reprocessing Conditions .............................. 1808
  Jamie L. Warburton, Philippe Week, Nicholas A. Smith, Kenneth R. Czerwinski

POSTER SESSION

Poster #1/Abstract #129 Neutron Multiplicity Analysis Tool ...................................................... 1816
  Scott Stewart
Poster #2/Abstract #138 Using Highly Interactive Virtual Environments for Safeguards Activities ................................................................. 1821
  Bradley S. Weil, Mary D. Epeldeauer, Scott Alcala, Logan Weil, Benjamin S. Alcala
Poster #3/Abstract #188 Using Pointers for Better Key and Password Security .................................................. 1829
  Roger G. Johnston, Jon S. Warner
Poster #4/Abstract #219 Using GPU Programming for Inverse Spectroscopy .......................... 1837
  David Gertz, Hugh Wimbernly, Nathaniel Fredder
Poster #5/Abstract #235 A Technique for Electron Lifetime Measurements in High Mu-tau Product CdZnTe Material ...................................................................................... 1847

Poster #6/Abstract #287 A 2D Map-based Vulnerability Assessment Code of a Physical Protection System ........................................................................ 1857
  Mercedes Lis, Colin Wilkins, Susan Kane Smith
Poster #7/Abstract #288 Design and Modeling of a Silo Waste Grab Monitor .................................. 1868
  Jose Marcial, Pavel Krma, Michael J. Schweiger, Kevin J. Swearingen, Nathan E. Tegrotenhuis, Samuel H. Henager

Poster #8/Abstract #360 Efforts for Harmonization Between Security and Safeguards in the ROK 1897
  HoSik Yoo, Sung-Woo Kwak, Sung-Soon Chang, Na-Young Lee, Hyung-Min Seo
Poster #9/Abstract #362 ROK’s Control Practices for Nuclear Power Plant Exports ........................................ 1904
  Seong Yoon Joo
Poster #10/Abstract #369 The Status of the Remote Monitoring Activities Under the IS in Korea 1912
  Jinkyun Yeo
Poster #11/Abstract #403 Surveillance System for Advanced Spent Fuel Conditioning Process Facility (ACPF) 1920
  Dae-Yong Song, Seong-Kyu Ahn, Hee-Sang Shin, Ho-Dong Kim
Poster #12/Abstract #406 Integrated Management Approach for Nuclear Waste from Fresh Nuclear Material at KAERI ........................................................................ 1927
  Hanwha Ko, Byunghoo Lee, Hujin Park, Hyun-Jo Kim, Hyung-Sook Kim
Poster #13/Abstract #409 Design of a Detector System to Measure the Axis Profile of Spent Fuel Burn-up .................................................. 1932
  Jeong Min, Hee-Sang Shin, Sung-Ho Eom, Hye In Im, Ho-Dong Kim
Poster #14/Abstract #431 Analysis of Material Unaccounted for Uncertainty for the Reference Pyroprocessing Facility ........................................................................ 1939
  Bo-Young Han, Seong-Kyu Ahn, Heesung Shin, Ho-Dong Kim
Poster #15/Abstract #443 Next Generation Information Systems .................................................. 1946
  Nathan P. Limback, Melanie A. Medina, Michelle E. Silva
Poster #16/Abstract #477 Photometric Determination of Uranium Concentration .......................... 1953
  Richard L. Mayers
Poster #17/Abstract #503 Potential Route Evidence from Fugitive Chemicals Adsorbed to Packaging Materials ............................. 1960
  M. Lee Davison, Hope A. Ishii, Roald N. Leif
Poster #18/Abstract #549 Analytical Expressions for the Gate Utilization Factors of Passive Multiplicity Counters Including Signal Build-up ............................................. 1970
  Stephen Croft, Melissa A. Schear, Louise G. Evans
Poster #19/Abstract #562 Technical and Intelligence Challenge of Safeguarding Technologies ................................................................................ 1980
  Stephen Mendez Torres, David H. Hanks
Poster #20/Abstract #564 Cf-252 Shuffler for Waste Assays and Safeguards Applications ............................................................................. 1985
  Nabil Menaa, Susan Kane Smith, Dante Nakazawa, Robert D. McElroy, John Kirkpatrick, Rich Mowry, Mike Henry
Poster #21/Abstract #587 Applications of Next Generation Remote Monitoring System Technologies ............................................................................. 1995
  Barry Schoeneman, Troy Ross
Poster #22/Abstract #574 Spectral Multi-peak Analysis Methodology for Eliminating Effects of NaI Temperature Drift ................................................................................ 2005
  Taner Ucidan, Jose March-Leuba, Patrick Brukewia, Belle R. Upadhyaya
CONCURRENT TECHNICAL SESSIONS IV

INTERNATIONAL SAFEGUARDS: STATE LEVEL SAFEGUARDS, THE ADDITIONAL PROTOCOL AND INTEGRATED SAFEGUARDS

Abstract #692 Information-driven Safeguards: A Country Officer’s Perspective ........................................................... 2015
Eva Gyane

Abstract #227 Establishment of the Integrated Safeguards Information System in Japan for Reliable SSAC ........................................... 2023
Noriaki Nishiyama, Hideki Yoshida, Shin-Ichi Kamakura, Keji Takizawa, Isao Kobayashi, Masahiro Kikuchi, Tsuyoshi Hayakawa, Tomohiro Terasaki

Abstract #481 Developments in Assisting Countries in Implementing the IAEA Additional Protocol .............................................. 2030
Mark H. Killinger, Linda H. Hansen, Ronald A. Cain, Donald N. Kovacic, Kenneth E. Apt, Matthew C. Van Sickle

Abstract #615 The Additional Protocol Declaration Helper: A Software Tool to Help Determine What Must be Declared to the IAEA .......................................................................................................................... 2040
Ron Cain, Alexander D. Sunshine, Donald N. Kovacic, Daniel Ellis, Kevin Hannan

INTERNATIONAL SAFEGUARDS: NEXT GENERATION SAFEGUARDS PROFESSIONAL NETWORK II

Abstract #596 Safeguards Education at Texas A&M University .................................................................................................. 2048
David G. Ford, William S. Charlton, Kelley Ragusa

Abstract #567 A Multidisciplinary Workshop to Train the Next Generation Safeguards Advocate ............................................. 2053
James S. Cole, Kathleen M. Trauth

Abstract #451 PANEL: Next Generation Safeguards Professionals .................................................................................................. 2061
Richard R. Metcalf

INTERNATIONAL SAFEGUARDS: IMAGERY FOR INTERNATIONAL SAFEGUARDS

Abstract #298 Application of Earth Observation Satellite Products to Non-Proliferation Studies .................................................. 2063
João G. M. Gonçalves, Michel M. Verstraete, Linda A. Hunt, Erik Wolpert

Abstract #524 Safeguards Application of 3-D Technology and Satellite Imagery for Volume Change Detection ........................................... 2072
Bob Truong, Steven M. Arlde, John Tararu, Yasmin Khayber

Abstract #329 Change Detection Using High-Resolution Radar Imagery from Multiple Sensors .......................................................... 2081
Joseph Chamberland, Bob Truong, Garrett Parsons, John Mulvic, Stephen Churchill

Abstract #411 Monitoring Uranium Mining and Processing Sites: Some Findings From an Airborne Hyperspectral Survey of Uranium Mining Legacies Under Rehabilitation .............................................. 2091
Irmgard Niemeyer, Clemens Listner, Tim Buchholz, Markus Hillmann

INTERNATIONAL SAFEGUARDS: THE CHALLENGES TO MOX: PLUTONIUM, POLICY AND PROLIFERATION

Abstract #434 Constraints on India’s Fast Breeder Program .................................................................................................. 2101
M. V. Ramana

Abstract #279 Current State of Safeguards Design for J-MOX .................................................................................................. 2110
Junji Shimizu, Tsuyoshi Sanpei, Kazunori Fujimaki, Motimoto Deguchi

Abstract #111 Some Implications of Applying NRTA to a MOX Facility with Significant Temporary Stores ........................................... 2118
Gordon E. Cowell, John Howell, Thomas E. Bar

Abstract #538 Progress of a Member State Support Program (MSSP) for the Development of a Safeguards Approach for a Pyroprocessing Facility .................................................................................................. 2126
Heesang Shin, Bo-Young Han, Seong-Kyu Ahn, Dae-Yong Song, Ji-Sun Seo, Je-Nam Jang, Ho-Dong Kim

Abstract #561 Nuclear Fuel Reprocessing: Safeguarding and Nonproliferation Issues .................................................................................................. 2133
Adrian E. Mendez Torres, David H. Hanks

MATERIALS CONTROL AND ACCOUNTABILITY/INTERNATIONAL SAFEGUARDS: NUCLEAR FORENSICS III: CONCEPTS AND POLICIES

Abstract #626 Nuclear Forensics: A Holistic Approach .................................................................................................. 2141
Andy Lukic, J. I. Friese, J. M. Schwant, J. R. Starner, J. W. Wacker

Abstract #478 Is Nuclear Forensics an Effective Deterrent Against Nuclear Smuggling and Terrorism? ........................................... 2149
Shaheen A. Dewji, Adam N. Stulberg

Abstract #276 International Views on Illicit Nuclear Trafficking .................................................................................................. 2159
Galina I. Balatsky, William Severe

Abstract #622 Isotopic Measurements: Interpretation and Implications of Plutonium Data .................................................................................................. 2165
MATERIALS CONTROL AND ACCOUNTABILITY: BEST PRACTICES FOR STANDARDS AND MATERIALS MANAGEMENT

Abstract #576 Nuclear Material Control and Accountancy for Nuclear Security ................................................................. 2171
Vladimir Rukhlo, Maegon Barlow, Miro Gregoric, Joel Lewis

Peter Mason, Anna Voeks, Usha Narayanan

NONPROLIFERATION AND ARMS CONTROL: PROSPECTS FOR A FISSILE MATERIAL CUTOFF TREATY (FMCT)

Abstract #159 Factors Affecting Key Treaty Provisions ................................................................................................. 2188
Thomas E. Shea

Abstract #182 The FMCT and Germany: Encouraging the Process .................................................................................. 2197
Annette Schaper

Abstract #282 Proposed Fissile Material Cut-off Treaty — Verification Issues ............................................................... 2207
John Carlson

Abstract #180 Treatment of Pre-existing Stocks in a Fissile Material (Cutoff) Treaty ........................................................... 2215
Frank N. Von Hippel, Harold A. Feiveson, Alexander Glaser, Arend Meerburg, Zia Mian

PHYSICAL PROTECTION: GLOBAL EFFORTS TOWARDS COOPERATIVE BORDER SECURITY

Abstract #676 Information Analysis Methodology for Border Security Deployment Prioritization and Post Deployment Evaluation .......................................................................................................................... 2223
Scott A. Maple, Paul M. Booker

Abstract #698 Analyzing Frontier Border Security Utilizing Computerized Modeling and Simulation Tools .......................... 2233
Robert Greenswill, Wilthea Hibbard, Bruce D. Hendler

Abstract #677 Performance Test Bed for Border Security Technologies .................................................................................. 2243

Abstract #645 Threat Convergence: Achieving Integrated Security ...................................................................................... 2251
Rita Grossman-Vermaas

WASTE MANAGEMENT: SPENT FUEL MANAGEMENT II

Abstract #700 Containment Analysis Methodology for Transport of Breached or Damaged Aluminum Spent Fuel ................................................................................................................................. 2261
Dennis W. Vinson, Robert L. Sindelar, Natraj C. Iyer

Abstract #237 Topic Investigations of Cask Metal Seals and Polymer Components for Long Dry Storage Periods .................. 2279
Holger Voelzke, Dietmar Wolff, Kerstin Von Der Ehe, Ulrich Probst, Sebastian Schulz

Abstract #699 Management of Research and Test Reactor Aluminum Spent Nuclear Fuel - A Technology Assessment ................................................................................................................................. 2289
Dennis W. Vinson, Robert L. Sindelar, Natraj C. Iyer, William Swift, Hitesh Nigam, Edgardo C. Deleon

Abstract #126 Transuranic Waste Disposal Facility Performance Assessment Results .............................................................. 2300
Daniel Clayton, Moo Lee

CONCURRENT TECHNICAL SESSIONS V

INTERNATIONAL SAFEGUARDS: SAFEGUARDS BY DESIGN

Abstract #602 EURATOM’s Contribution to the IAEA “Safeguards by Design” Process ............................................................. 2310
Filippo Sevini, Paolo Peirani, Giacomo Cojazzi, Willem Janssens, Maurizio Boella, Christos Koutsoyannopoulos, Peter Chare, Thomas E. Killeen

Abstract #533 Safeguards-by-Design: The Canadian Experience ............................................................................................ 2318
Jim Casterton, Tim Eliacott, Michael Kent

Abstract #609 Safeguards by Design: An Industrial View ........................................................................................................ 2324
Marius Stein, Massimo Morichi, Luc Van Den Duerpel

Abstract #290 Safeguards for Gen IV Reactors — Some Considerations on the Role of Design Information ............................ 2332
Roland Carvch, Klaus Van Der Meer

Abstract #243 Implementing Safeguards-by-Design: A Review Prior to the Final Design Phase on the Uranium Processing Facility Project in Oak Ridge, TN (U) ......................................................... 2342
Jon D. Long

Abstract #292 Safeguards by Design for Uranium Conversion Facilities .................................................................................... 2352
Stephen Francis

Abstract #492 Industry Engagement for Safeguards by Design of New Uranium Enrichment Facilities ....................................... 2358
Scott Demuth, Thomas Grice, Dunbar Lockwood
Abstract #695 Implementing the Safeguards-by-Design Process at UF6 Enrichment Plants .............................................. 2366
Philip Casey Durst, Scott Demuth, Brent McGinnis, Michael Whitaker, James Morgan

INTERNATIONAL SAFEGUARDS: CONTAINMENT AND SURVEILLANCE, PROCESS MONITORING, REMOTE MONITORING

Abstract #346 Sustainability of Gamma-ray Isotopes Evaluation Codes ............................................................... 2384
Markku Koskelo, Brent McGinnis, Duc T. Vo, Tzu-Fang Wang, Paolo Peerani, Geraldo Renha, Fabio Cordeiro Dias

Abstract #361 Bilateral RM Activities and its perspective in Korea ........................................................................ 2398
Seung Sik Park, Jong-Soo Kim, Jong Kye Jeon, Jin Kyun Yoo

Abstract #595 Preliminary Results from the 2010 INMM International Containment and Surveillance Workshop ........ 2404
Frances Keel, Steve Lamontange, Chris Pickett, Keith Tolk

Abstract #261 Working Toward Robust Process Monitoring for Safeguards Applications ..................................... 2413
Alan Krichinsky, Lisa Bell, Kimberly L. Gilligan, Mark D. Laughter, Chris Pickett, L. Paul Miller, G. David Richardson, Nathan Rowe, Jim Younkin

Abstract #133 The IAEA’s XCOM Surveillance System - Project Report ................................................................. 2423
Marian Stein, Stephan Langs, Martin Moestligner, Guenter Neumann, Satsan Peper, Bernd Richter, Konrad Schoop

Abstract #350 Design Vulnerability Assessments for Safeguards Sealing Systems ................................................... 2431
Victor Kravchenko, Bernard Wexhard, Linda Brockman, Roger Johnston, Halver A. Undem

Abstract #273 SERS-Active Nanoparticle Aggregate Technology for Tags and Seals ................................................ 2439
Leif O. Brown, George J. Havrilla, Stephen E. Doorn, Velma M. Montoya

MATERIALS CONTROL AND ACCOUNTABILITY: NEUTRON DETECTOR MATERIALS AND TECHNOLOGY: ALTERNATIVES TO HELIUM 3

Abstract #246 U.S. Government Approach to Address the He-3 Shortage ............................................................... 2449
Julie Bente, Nanette Founds, Joseph Gaxer, John Pantaleo, Greg Slovak

Abstract #300 Research and Development into 3He Replacement Technology for Nuclear Material Detection ......... 2455
Robert Runkle

Abstract #114 Alternatives to 3He for Neutron Detection for Homeland Security ..................................................... 2462

Abstract #655 Materials Discovery: Strategies to Downselect Radiation Detection Materials using Performance-based Metrics ................................................................................................................................................. 2471

Abstract #459 Analysis of a Cadmium-Plastic Scintillation Capture-Gated Neutron Detector ........................................ 2481
Shaun D. Clarke, Chris C. Lawrence, Marek M. Flaska, Sara A. Pozzi, David Wentzloff, Muhammad Faisal, Bandy Schiffer, J. Bart Czirr, Lawrence Rees

Abstract #516 Development of Controlled Pitch Carbon Nanotube Arrays for Nanoscale-based Proportional Counters ................................................................................................................................................. 2488
Lindsay T. Sexton, Joseph Cordaro, Matthew Siegfried, Kevin Kane, Steven M. Serkis, Timothy Devol, Landon Pruitt, Jay Guillard, Apparao Rao

Abstract #522 A Flexible, Si-based Neutron Detector for Safeguards Applications .................................................. 2498
Claudio Gariazzo, Craig Marianno, Dehu Cui, Xing Cheng, Lin Shao

Abstract #566 Review of Sp3 Carbon-based Diamond Detectors for Special Nuclear Material Verification ............... 2506
Adrian E. Mendez Torres, David Hanks

MATERIALS CONTROL AND ACCOUNTABILITY: NEW DETECTOR MATERIALS FOR IMPROVED NUCLEAR MATERIAL MEASUREMENTS

Abstract #462 Examining Alternative Detector Materials for International Safeguards: NGSI Perspective on Context, Challenges and Outlook .................................................................................................. 2515

Abstract #170 Advanced Materials for Detecting Gammas and Neutrons ............................................................... 2523
Peter E. Vanier, David B. Beach, Robert Runkle

Abstract #673 New Detector Materials for International Safeguards .......................................................................... 2530
Arden Dougan, Steve Payne

Abstract #211 Alternative Neutron Detectors to Eliminate the Use of 3He for Homeland Security, Nonproliferation, and Other Applications .................................................................................................. 2540
Lyn A. Bouton, John S. Neal

Abstract #357 Pillar Structured Thermal Neutron Detectors: Effects of High Radiation Fluence .............................. 2548
Rebecca Nikolic, L. F. Yoss, J. M. Conway, Q. Shao, T. F. Wang, C. L. Cheung, L. Fabris

Abstract #269 6Li Foil Thermal Neutron Detector ................................................................................................. 2557
Kiril Ianakiev, Martyn T. Swinney, Andrea Favalli, Kayihan Chung, Duncan W. Macarthur
Abstract #519 High-Resolution Microcalorimeter Detectors as a Tool in the Future of Nuclear Safeguards .......................................................... 2567
Mark N. T. Giaquinto, Jeff S. D'elashmitt, Cole R. Haxel, Ralph H. Ilgner, Rob R. Smith, Tammy J. Keever

Abstract #166 Cadmium Manganese Telluride: A Potential Alternative Material for Room-temperature Radiation Detector .................................................. 2575

Anwar M. Hossain, Yonggang Cui, Aleksey E. Bolotnikov, Giuseppe S. Camarda, Ge Yang, Ki Hyun Kim, Rubi Gul, Andrzej Mycielski, Ralph B. James

MATERIALS CONTROL AND ACCOUNTABILITY: NUCLEAR MATERIALS MANAGEMENT II

Abstract #259 A Year in the Life of a Storage Facility De-Inventory: How Y-12 National Security Complex (Y-12) Successfully Relocated the Inventory of Enriched Uranium Not Qualified for the HEUMF .................................................. 2584

Jenicee V. Mai

Abstract #436 De-Inventory of Nuclear Materials from Buildings 9201-5 and 9204-4 .......................................................... 2593

Richard N. Mowery

Abstract #348 Creative Storage Solutions in an Ever-Changing Environment .......................................................... 2599

Jack S. Lewis, James R. Otto

Volume 4

Abstract #419 The Tennessee Valley Authority Blended Low Enriched Uranium Program in Partnership with the Department of Energy Off-specification Fuel Program .......................................................... 2603

T. A. Keys, Frank X. Masseth, Virginia E. Magoulas, Dale M. Davis

Abstract #470 Identifying Impairments in Surplus Non-Pit Plutonium Feeds for MOX or Alternative Disposition .......................................................... 2611

Edwin N. Moore, Jeffrey S. Allender

Abstract #555 An Authorized Container Program at the Nevada Test Site .......................................................... 2621

Rustin G. Long, Robert A. Kannings Jr., Benjamin O. Garcia

Abstract #526 Disposition of Fuel Elements from the Aberdeen and Sandia Pulse Reactor (SPR-II) assemblies .......................................................... 2626

Bill McKeery, Jacqueline Bustamante, Anthony Drypolcher, Joseph Hickey

Abstract #502 Development of an Alternate Pathway for Materials Destined for Disposition to WIPP .......................................................... 2635

Georgette Ayers, Bill McKeery, Gerald Yeazly, Thomas Ricketts

Abstract #567 Decommissioning the Fuel Process Building: A Shift in Paradigm for Terminating Safeguards on Process Holdup .......................................................... 2644

Ivan R. Thomas

MATERIALS CONTROL AND ACCOUNTABILITY: DESTRUCTIVE ASSAY (DA) METHODS II

Abstract #295 Detailed Destructive Post-Irradiation Examinations of Mixed Uranium and Plutonium Oxide Fuel .......................................................... 2653

Joe M. Giaquinto, Jeff S. D'elashmitt, Cole R. Haxel, Ralph H. Ilgner, Rob R. Smith, Tammy J. Keever

Abstract #130 Implementation, Validation, and Analytical Performance of High-accuracy Minor Isotope Determination 057Using Modified Total Evaporation Multi-collector TIMS for Safeguards Applications .......................................................... 2663

Stefan Bünger, Sergei F. Boulyga, Alan F. Cunningham, Andreas Kupf, Jane Potel, Stephan Richter

Abstract #198 Analysis of Single Micro-Sized Uranium Particles by TIMS .......................................................... 2673

Monia Kraiem, Stephan Richter, Heinz Kuehn, Yetunde Aregbe

Abstract #607 Extending the Useful Life of Older Mass Spectrometers .......................................................... 2680

Joseph V. Cordaro, Sherold R. Johnson, Michael K. Holland, Vernon D. Jones

Abstract #233 Advancement of Screening Methods Used for Environmental Swipes at IAEA-SGAS .......................................................... 2687

Andrew Maddison, Katharina Breitenecker, Andrej Cuiapinsko, Herbert Siegmund, Dave Donohue

Abstract #580 The Role of Uncertainty Estimation on the Improvement of Measurement Processes and Results Comparison .......................................................... 2696

Fabio C. Dias, José Wanderley S. Da Silva, Pedro D. De Barros, Radier M. S. De Araújo, Marcos S. Grand, Bárbara G. Cristiano, Olivia Pereira De Oliveira Jr., B. Srivinasan

Abstract #312 Electrochemically Modulated Separations for Safeguards Measurements .......................................................... 2699

Michael A. Green, Leah M. Arrigo, Martin Liezers, Christopher Orton, Matthew Douglas, Shane Peper, Jon M. Schwantes, Douglas C. Duckworth, Sandra Hazellon

Abstract #632 Measurement of Uranium in Bio Matrices for Nuclear Forensic Purposes .......................................................... 2707

James Miller, William Charlton

Abstract #100 Independent Verification of Research Reactor Operation .......................................................... 2717

MATERIALS CONTROL AND ACCOUNTABILITY/INTERNATIONAL SAFEGUARDS: DETERMINATION OF PU MASS IN SPENT FUEL WITH NDA - LOOKING AT THE INSTRUMENT AND SYSTEM LEVEL ISSUES - I NEUTRON TECHNIQUES

Abstract #183 NGSI Program to Investigate Techniques for the Direct Measurement of Plutonium in Spent LWR Fuels by Non-destructive Assay .......................................................... 2727

Kevin D. Voel, Stephen A. Lamontagne, Stephen J. Tobin, L. Eric Smith
Abstract #172 Experimental Benchmark of MCNPX Calculations Against Self-Interrogation Neutron Resonance

Densitometry (SINRD) Fresh Fuel Measurements ................................................................. 2735

Abstract #456 Determining Fissile Content in PWR Spent Fuel Assemblies Using a Passive Neutron Albedo Reactivity with Fission Chambers Technique ........................................... 2743

Abstract #460 Non-destructive Assay of Spent Nuclear Fuel Using Passive Neutron Albedo Reactivity .................................................................................................................. 2753

Abstract #394 Fissile Material Measurements Using the Differential Die-away Self Interrogation Technique .......................................................... 2762

Abstract #160 Determining Plutonium Mass in Spent Fuel Using 252Cf Interrogation with Prompt Neutron Detection ......................................................... 2772

Jianwei Hu, Stephen J. Tobin, Howard O. Menlove, Stephen Croft

Abstract #559 Delayed Neutron Detection with an Integrated Differential Die-Away + Delayed Neutron Instrument ........................................................................................................ 2783

Abstract #199 Differential Die-Away Technique for Determination of the Fissile Contents in Spent Fuel Assembly ................................................................. 2793

Taecheon Lee, Howard O. Menlove, Martin T. Svinhøe, Stephen J. Tobin

Abstract #161 Advancements in Time-Spectra Analysis Methods for Lead Slowing-Down Spectroscopy ................................................................. 2803

L. Eric Smith, Mark Shaver, Chris Gesh, Kevin Anderson

Abstract #280 Status of Lead Slowing Down Spectrometer Development for Nuclear Fissile Assay ................................................................. 2813

Yongdeok Lee, Chang-Je Park, Geun-Ill Park, Jung Won Lee, Kee Chan Song

NONPROLIFERATION AND ARMS CONTROL: VERIFICATION AND MONITORING: TOWARD A WORLD FREE OF NUCLEAR WEAPONS

Abstract #452 Verification and Monitoring for a World Free of Nuclear Weapons: Key Opportunities and Challenges ................................................................. 2820

Abstract #140 Political Dimensions of Determining “Effective” Verification .......................................................................................................................... 2830

Edward M. Iffi

Abstract #179 Going to Zero: Verifying Nuclear Warhead Dismantlement ................................................................. 2840

James Fuller

Abstract #307 Approaches to Integrating Nuclear Weapons Stockpile Management with Arms Control Objectives ................................................................. 2850

Sharon Deland, Lani M. Sanders, Arrian Prenger

Abstract #108 The U.S. Nuclear Weapon Infrastructure and a Stable Global Regime for Nuclear Weapons ............................................................................... 2859

John D. Inmele, Richard L. Wagner

Abstract #410 Verification of the Transition to a Nuclear Weapon Free World ................................................................................................. 2873

Annette Schaper

Abstract #512 Facilitating Nuclear Disarmament: Verified Declarations of Fissile Material Stocks and Production ................................................................. 2883

Alexander Glaser

Abstract #306 Establishing Non-Nuclear Weapons States Confidence in Verification ................................................................................................. 2893

Snejana Hurlburt, Halvor Kippe

Abstract #143 The Role of the IAEA in a World Reducing Stocks of Nuclear Weapons ................................................................................................. 2903

Thomas E. Shea

Abstract #527 Is There a Legal Basis for Multilateral Nuclear Disarmament Verification? ................................................................................................. 2913

Hanne Kofstadmoen, Ole Reistad

Abstract #206 Verification Options for Future Nuclear Arms Reductions ................................................................................................. 2923

James E. Doyle

NONPROLIFERATION AND ARMS CONTROL: NONPROLIFERATION COMMERCIAL AND POLICY ISSUES

Abstract #265 Status of U.S.-Russian Plutonium Disposition ................................................................................................. 2931

Karyn R. Durbin

Abstract #658 URENCO: 40 Years’ Experience of Operating a Multinational Uranium Enrichment Company ................................................................................................. 2936

Peter Friend

Abstract #303 Risk Informed Safeguards Integration Studies for a Fast Reactor Fuel Cycle ................................................................................................. 2944

Sunil Chirayath, William Charlton, Aliisa Stafford, Christopher Myers, Braden Goddard, Jeremy Alfred, Mitchell Carroll, Matthew Starnes, Eric Rauch

Abstract #379 Development and Implementation of a Comprehensive Program for MPC&A System Performance Testing at FSUE “Research Institute of Scientific Instruments” ................................................................................................. 2954

Alexander M. Chlenov, Taisia A. Piskureva

Abstract #131 Priorities for Technology Development and Policy to Reduce the Risk from Radioactive Materials ................................................................................................. 2962

Beth Duggan

Abstract #464 Determining Acquisition Pathways for a Radiological Dispersal Device ................................................................................................. 2970

Gretchen J. Hundley, William S. Charlton, Kristin Childress

Abstract #590 Strong Neutron Sources — Is There an Exploitable Gap? ................................................................................................. 2980

Matthias Engfer, Wolfgang Liebert
Abstract #732 Tools of Nuclear Nonproliferation: Tough Engagement and the Case of China from the 1960s to 1990s

Jonathan Ray

PACKAGING AND TRANSPORTATION: STORAGE OF PLUTONIUM BEARING MATERIAL II

Abstract #310 Characterization of Representative Materials in Support of Safe, Long Term Storage of Surplus Plutonium in DOE-STD-3013 Containers

Paul H. Smith, Joshua E. Narlesky, Laura A. Worl, Obie W. Gillispie

Abstract #299 Thermal Simulation of Plutonium Storage Packages in a Vault Environment

Stephen Shaw, Kevin Malone

Abstract #639 Los Alamos National Laboratory DOE M441.1-1 Implementation

D. K. Veirs, Laura A. Worl, Tresa F. Yarbrough, Timotheo A. Stone, Paul H. Smith

Abstract #594 Use of Hydrogen Getters for Ensuring Safe Storage of Plutonium-Bearing Materials at the Savannah River Site

Lance E. Traver, Todd D. Woodsmall, Elizabeth R. Hackney

Abstract #168 Certification of the ES-3100 Shipping Container for Plutonium Oxide

Jeffrey G. Abbt, Monty L. Goins, Kenneth E. Sanders

Abstract #444 Los Alamos National Laboratory SAVY-3000 Design: Meeting the Challenge for Worker Safety

Timotheo A. Stone

Abstract #719 Management of Disused Plutonium Sealed Sources

Julia Whitworth, M. Pearson, C. Abeita

PHYSICAL PROTECTION: ANALYSIS TOOLS AND TECHNOLOGY

Abstract #154 Probabilistic Effectiveness Methodology Use in Preventive Radiological/Nuclear Detection

Ross W. Snare

Abstract #204 A Transferrable Belief Model Representation for Physical Security of Nuclear Materials

David Gerts

Abstract #253 Video Performance for High Security Applications

Bradley C. Norman, Jack C. Conwell

Abstract #342 Human Reliability-based MC&A Models for Detecting Insider Theft

Felicia A. Duran, Gregory D. Wyss

Abstract #528 Impact of Tabletop Simulation Modeling on Site Physical Protection Planning

Vasili V. Zianevich

Abstract #532 Tools of Nuclear Nonproliferation: Tough Engagement and the Case of China from the 1960s to 1990s

Mark Laughter, Brent McGinnis, Michael Whitaker, Jim Morgan, Kimberly Gilligan

CONCURRENT TECHNICAL SESSION VI

INTERNATIONAL SAFEGUARDS: GAS CENTRIFUGE ENRICHMENT PLANT SAFEGUARDS: APPROACHES AND TECHNOLOGY I

Abstract #664 DOE Investigation of Advanced Safeguards Concepts for GCEPS

Dunbar Lockwood, Mark Laughter

Abstract #656 URENCO Conference on GCEP Safeguards Held in December 2009

Peter Friend

Abstract #678 Analysis of the Effectiveness of Gas Centrifuge Enrichment Plants Advanced Safeguards

Brian D. Boyer, Heather H. Erpenbeck, Karen A. Miller, Martyn T. Swinhoe, Kiril Ianakiev, Johnna B. Marlow

Abstract #618 Computational Tool for Analyzing Flows and Gradients in Gas Centrifuge Cascades

Patrick J. Migliorini

Abstract #261 A Study of Minor Isotopes in Enriched Reprocessed Uranium

Houston G. Wood, Patrick Migliorini

Abstract #593 Mathematica as a Computational Tool to Assess Proliferation Risks Associated with Centrifuge Enrichment

Matthias Englert

Abstract #377 Detection of Illicit HEU Production in Gaseous Centrifuge Enrichment Plants Using Neutron Coincidence Counting on Product Cylinders

Mark Laughter, Brent McGinnis, Michael Whitaker, Jim Morgan, Kimberly Gilligan
Abstract #274 Supplemental Systems for Unattended UF₆ Cylinder Monitoring .......................................................... 3211

Michael M. Curtis

INTERNATIONAL SAFEGUARDS: INFORMATION, DATA MANAGEMENT AND DIV

Abstract #696 The Safeguards ISIS Re-engineering Project .......................................................................................... 3219
Gregg Whicker, Jean-Michel Becar, Ameer Pickan

Abstract #604 Use of Modern Information Technologies for Strengthening Nonproliferation Regime ........................................ 3227
Gennady M. Pshakin, Konstantin Moisseev

Abstract #489 Augmented Reality: Don’t We All Wish We Lived In One? ................................................................. 3235
Kelly D. Michel, Douglas A. Few, Birchard P. Hayes, David Gertman, Katya Leblanc

Abstract #378 A Future Tool for Design Information Examination and Verification for Nuclear Safeguards ...................... 3245
Robert Bean, Philip Casey Durst

Abstract #647 Combining Measurements with Three-Dimensional Laser Scanning System and Coded Aperture
Gamma-Ray Imaging Systems for International Safeguards Applications ........................................................................ 3253
Ana Claudia Raffo-Caiado, Steven Smith, Klaus-Peter Zlock, Jason Hayward, Jim Bogard, Chris Boehnen

Abstract #395 Quality Assurance in Safeguards: Indonesian Document Control and Records Management System ............. 3261
Jacqueline L. Shipwash

Abstract #439 Safeguards Envelope: Updated Methods and Efficiency Considerations ..................................................... 3267
Richard R. Metcalf, Duc Cao

INTERNATIONAL SAFEGUARDS: THE SAFEGUARDS SCIENTIST: THE CHALLENGES ACCESSING NUCLEAR MATERIALS; PROBLEMS AND SOLUTIONS

Abstract #197 Survey of Nuclear Materials and Infrastructure for International Safeguards ........................................ 3276
Stephan Lamontagne, Mark Schaefer, Arden Douglas, Michael Kristo

Abstract #521 The History of Safeguards Technology Training’s Use of Nuclear Materials .................................................. 3281
David S. Brucken, Peter A. Santi, Douglas T. Reilly, William Geist

Abstract #190 Calibrating and Training of Neutron Based NDA Techniques with Less SNM Standards .......................... 3288
William H. Geist, Martin T. Swinhoe, Corey B. Freeman, Matt R. Newell

Abstract #578 Virtual Reality Technologies for Nuclear Safeguards and Security ......................................................... 3297
João G. M. Gonçalves, Emilio Ruiz Morales, Vitor Sequeira, Pascal Daures, Paolo Pernani

Abstract #631 The Integrated Equipment Test Facility at Oak Ridge as a Non-Proliferation Test Loop ............................. 3307
Michael Ethinger

Abstract #662 Y-12 Nuclear Detection and Sensor Testing Center ..................................................................................... 3314
Carter D. Hull

Abstract #575 Access to Special Nuclear Material for Measurements at the Idaho National Laboratory ............................ 3324
Robert S. Bean, David W. Gerts, Bevin A. Brush

Abstract #287 Calibration of Safeguards Monitors Using the Uranyl Nitrate Calibration Loop Equipment (UNCLE) at ORNL ................................................................. 3332
Jennifer L. Ladd-Lively, David Brucken, Eric Rauch, Denise Schuh, James D. West

Abstract #731 Panel: Tools of Nuclear Nonproliferation: Tough Engagement and the Case of China from the 1960s to 1990s ........................................................................... 3339
N/A

MATERIALS CONTROL AND ACCOUNTABILITY: OTHER NONDESTRUCTIVE ASSAY (NDA) II

Abstract #164 Experience of Development Gamma-Spectrometric Methods to Measure Uranium-Containing Materials ..................................................................................... 3340

Abstract #218 Nuclear Material Accountability Applications of a Continuous Energy and Direction Gamma Ray Detector .......................................................................................... 3347
David Gerts, Robert Bean, Marc Paff

Abstract #230 Fast Enrichment Screening for ‘Go / No Go’ Classification of Large Containers ........................................ 3353
Alan Simpson, Stephanie McElhaney

Abstract #349 Non-intrusive Isotope Detection with Nuclear Resonance Fluorescence ...................................................... 3363
William Bartozzi, Curtis Hicks, Stephen E. Korbly, Robert J. Ledoux, Cody Wilson

Abstract #710 Antineutrino Detector for Monitoring a CANDU Reactor ........................................................................ 3374
Guy Jonkmans, C. Jewett, R. Didsbury, B. Sur

Abstract #716 Ruminations on NDA Measurement Uncertainty Compared to DA Uncertainty .............................. 3380
Saleem Salaymeh, Stephen Croft, Steve Goldberg, Lynne Preston, Peter Santi, James Sprinkle, Ramkumar Venkatarama, Glenn Pfennigwerth, Raymond Dewberry, Aaron Clare
Abstract #165 High-Fidelity MCNP Modeling of a D-T Neutron Generator for Active Interrogation of Special Nuclear Material
Thomas E. G. F. Smith, Danielle Hanck, Duncan Macarthur, Jonathan Thron

Abstract #149 Simulation Modeling of Mobile Detection Systems
Robert J. Estep, Sean M. Brennan

Abstract #440 Modeling Traffic Flow Through Multi-Lane Portal Monitors Using the FastGamma Simulation Software
Gregory G. Thorson, Eric A. Schneider

Abstract #475 A New Method for Rapid Nuclear Material Interdiction Analysis
Robert J. Estep, Sean M. Brennan

Abstract #675 Algorithms for Optimization of System Performance in Layered Detection Systems
Thomas E. G. F. Smith, Danielle Hanck, Duncan Macarthur, Jonathan Thron

Abstract #599 Monte Carlo Modeling of a Detector System for Gas Phase Uranium Enrichment Measurements
Andrea Favalli, Martyn Swinhoe, Marcie Lombardi, Kiri Imanaka, Calvin Moss, Duncan Macarthur, Joetta Goda

Abstract #581 Desired Features for Enhanced Simulation of X-Ray Fluorescence Experiments in MCNPX
Michael L. Collins

Abstract #202 High-Fidelity Compton-Camera Simulations for Nonproliferation Applications
Alexis Potirasson-Rivière, Michael C. Hamel, Shaun D. Clarke, Marek Flaska, Sara A. Pizzi, Andrei Gueorguiev, Guntram Pausch, Claus-Michael Herbach, Michael Ohmes, Juergen Stein

Abstract #697 An Overview of the U.S. Nuclear Regulatory Commission
Sheena A. Whaley, Steven L. Ward

Abstract #704 The Status of the U.S. Nuclear Regulatory Commission’s Rulemaking Process and the Status of the Part 74 Rulemaking
Steven L. Ward, Thomas Pham

Abstract #701 The U.S. Nuclear Regulatory Commission’s Rulemaking Process and the Status of the Part 74 Rulemaking
Steven L. Ward

Abstract #725 The Review Process for New and Advanced Reactors
Amy M. Snyder, Saima Shaikh

Abstract #726 Development of the U.S. Nuclear Regulatory Commission’s Safety Culture Policy Statement
June Cai, Maria E. Schwartz

Abstract #727 U.S. Nuclear Regulatory Commission Staff Integrating Spent Fuel Regulatory Activities
Thomas Matula

Abstract #706 The Status of the U.S. Nuclear Regulatory Commission’s Implementation of the U.S./IAEA Additional Protocol
Thomas A. Grice

Abstract #728 Panel: Implementation of IAEA Safeguards at NRC-licensed Facilities Panel
Steven L. Ward

Abstract #343 Active Thermal Standoff Inspection for Physical Authentication
Peter B. Merkle, John W. Cates, Ernest M. Correa, Jack C. Bartsberger, Manuel M. Trujillo

Abstract #681 Software Authentication Using Rose and Compass
Greg White

Abstract #195 Unconventional Approaches to Chain of Custody and Verification
Roger G. Johnston, Jon S. Warner

Abstract #341 Automated Reflective Particle Tag System for Physical Authentication
Peter B. Merkle, Karl E. Horak, Jason C. Bolles, Christopher W. Wilson, Charles O. Little, David L. Zamora, Juan A. Romero, Robert K. Grubbs, Jack C. Bartsberger, Antonio I. Gonzalez

Abstract #616 Performance Evaluation of State-of-the-Art Commercial UWB RFID Systems for Chain of Custody Process
Farazak Nekooog, Farid Dowla

Abstract #315 Design and Performance of Low Power Miniature Electronics for Radiation Sensors
Tsu-Fang Wang, J. Martinez, B. Murmann
Abstract #135 Chirping Tag and Seal .................................................................................................................. 3573
  Jon S. Warner, Roger G. Johnson

PACKAGING AND TRANSPORTATION: RADIOACTIVE MATERIAL – DESIGN

Abstract #518 Air Transport of Plutonium Metal: Content Expansion Initiative for the Plutonium Air
Transportable (PAT-1) Packaging .......................................................................................................................... 3583

Abstract #141 Beyond GIRM: Nuclear Archaeology for Heavy-Water-Moderated Plutonium Production Reactors .......................................................................................................................................................... 3655
  Alex Gasner, Alexander Glaser
Abstract #296 Radiological Performance of an Automated HPGe Assay System for Bulk Containers of
Decommissioning Waste Intended for Free Release .............................................................................................. 3665
  Timothy B. Twomey, Ronald M. Keyser, Davide Sacchi, Giuseppe Merlini, Paolo Grignani, Sabrina Romani, Nunzia Badatti,
  Gianluigi Migliore
Abstract #588 An Analytical Framework for Assessing Reliable Nuclear Fuel Service Approaches: Economic and
Non-proliferation Merits of Nuclear Fuel Leasing ............................................................................................... 3675
  Sean Kreyling, Alan Brothers, Steve Short, Jon Phillips, Mark Weimar
Abstract #484 A Comparison of Simulators for Nuclear Fuel Cycle Needs in East Asia .................................. 3685
  Robert J. Finch, Yongsoo Hwang, Sharon M. Deland
Abstract #240 The History and Status of Fast Breeder Reactor Programs .............................................................. 3694
  Thomas B. Cochran, Harold A. Feiveson, Walt Patterson, M. V. Ramana, Mycle Schneider, Frank Von Hippel
Abstract #124 Methodology of Testing Vehicle Radiation Portal Monitors Considering Field Operation Conditions .......................................................................................................................................................... 3699
  Andrei Stavrov, Leonid Kagan

CONCURRENT TECHNICAL SESSIONS VII

INTERNATIONAL SAFEGUARDS: GAS CENTRIFUGE ENRICHMENT PLANT SAFEGUARDS:
APPROACHES AND TECHNOLOGY II

Abstract #162 Enrichment Assay Methods for a UF6 Cylinder Verification Station .............................................. 3706
  L. Eric Smith, Alex Misner, David Jordan, Emily Mace, Chris Orton
Abstract #112 A More Accurate and Penetrating Method to Measure the Enrichment and Mass of UF6 Storage Containers using Passive Neutron Self-Interrogation ............................................................. 3717
Howard O. Menlove, Martyn T. Swinhoe, Karen A. Miller

Abstract #196 The Uranium Cylinder Assay System for Enrichment Plant Safeguards ............................................. 3725
Karen A. Miller, Martyn T. Swinhoe, Johnna B. Marlow, Howard O. Menlove, Carlos D. Rael, Tomonori Iwamoto, Takayuki Tamura, Syu Akich

Abstract #442 Determining the Thickness of Aluminum Cascade Pipes in the Presence of UF6 Gas .................................. 3734
Marcie L. Lombardi, Joëlle M. Goda, Kirill D. Yanukiev, Calvin E. Moss

Abstract #548 Unattended Monitoring of HEU Production in Gaseous Centrifuge Enrichment Plants Using Automated Aerosol Collection and Laser-based Enrichment Assay .................................................... 3742
Norm C. Antheier, Bruce A. Bashaw

Abstract #573 Micro-Raman Spectrometry of Uranium Oxylfluoride Particulate Material for Nuclear Safeguards .................. 3752
Ruth Kips, Michael J. Kristo, Jonathan Crowhurst, Elżbieta Stefaniak, J. D. Hutchison

Abstract #375 Global Monitoring of Uranium Hexafluoride (UF6) Cylinders Next Steps in Development of Action Plan ............................................. 3762

Abstract #729 Panel: Gas Centrifuge Enrichment Plant Safeguards: Approaches and Technology ................................... 3770
Brian Boyer

INTERNATIONAL SAFEGUARDS: SAFEGUARDS IMPLEMENTATION: EXPERIENCE AND ADVANCES

Abstract #682 Development of a Security by Design Handbook .................................................................................. 3772
Mark K. Snell, David Olson, Koji Tanuma, Kazuya Ochiai, Toru Lida

Abstract #408 Implementation Experience of the Integrated Safeguards Approach at the KAERI Site ................... 3780
Byung-Doo Lee, Han-Suk Ko, Hyun-Jo Kim, Hyun-Sook Kim

Abstract #232 Non-proliferation Issues Related to Misuse of Research Reactors ............................................................. 3788
Alice Tomanin, Paolo Perurani, Greet Janssens-Maenhout

Abstract #387 Progress Towards Deployable Antineutrino Detectors for Reactor Safeguards ................................ 3798
Nathanial Bowden, Adam Bernstein, David Reyna, Steven Dazeley, Scott Kiff, G. Keefer, B. Cabrera-Palmer

Abstract #150 Enhancement of Environmental Sampling Through an Improved Air Monitoring Technique .............. 3805
David H. Hanks, Paula Cable-Dunlap

Abstract #866 Results of Continuous Load Cell Monitoring Field Trial for UF6 Withdrawals at an Operating Industrial Plant ........................................................................................................... 3811
Alan M. Krichinsky, Chris A. Pickett, G. David Richardson, Nathan C. Rowe, James R. Younkin, Lisa S. Bell, Curtis A Conchevarski, Benjamin R. Peters

Abstract #266 Design Strategies for a Radio Frequency-Based Cylinder Accountability and Tracking ....................... 3821
Nathan C. Rowe, James R. Younkin, Chris A. Pickett, Michael Whitaker, Mark D. Laughter

Abstract #313 Conceptual Design of a Scalable Tamper Indicating Valve Seal for Monitoring UF6 Cylinders ................ 3831
Benjamin R. Peters, Chris A. Pickett, Brad J. Stinson, James R. Younkin, Nathan C. Rowe, J. L. Fritz

MATERIALS CONTROL AND ACCOUNTABILITY: ACCOUNTING SYSTEMS

Abstract #231 Accounting and Control of Nuclear Materials: Application RFID Technology .............................................. 3839
Andrey Gogolay, Vladimir Agamalyan

Abstract #241 Material Tracking Using LANMAS ....................................................................................................... 3845
Fay Armstrong, Lawrence B. Bowers

Abstract #242 Unclassified Location Tracking of Special Nuclear Material at the Y-12 National Security Complex .......... 3854
Paul J. Predhomme

Abstract #320 The Impact of Front End Non-Destructive Test Techniques on Accountancy Systems at Reprocessing Facilities .................................................................................................................. 3862
Jessica S. Feener, William S. Charlton

Abstract #422 Automated Flow Verification of Nuclear Material with CRISP (Central RADAR Inspection Support Package) .................................................. 3868
Andreas Smejkal, Peter Schwalbach, Maurizio Boella, Darius Ancius, Eric Roesgen, Ralf Linnebach

MATERIALS CONTROL AND ACCOUNTABILITY: MC&A DETECTOR TECHNOLOGIES

Abstract #173 LLNL Radiation Detector Materials for International Safeguards .......................................................... 3878
Stephen A. Payne, Nerine Cherney, Adam Conway, Arden Dougan, Rebecca Nikolic, Tsz-Fang Wang, Natalia Zaitseva

Abstract #215 Characterization of CZT Radiation Detectors at NSLS ................................................................................ 3882
Giuseppe G. Camarda, Aleksey Bolotnikov, Tongyang Cui, Rubi Gul, Aravind Hossain, Kihyun Kim, Laura Marchetti, Lingyun Xu, Ge Yang, Ralph B. James

Abstract #318 Exploration of X-Ray Fluorescence Spent Nuclear Fuel Source Term ................................................... 3892
Alissa S. Stafford, William S. Charlton, Corey R. Freeman

Abstract #333 A Guide for Detector Development and Deployment ................................................................................. 3901
Craig M. Marianno, David R. Boyle, William S. Charlton, Gary M. Gaukler, Arnold Veditz

Abstract #372 Spectrum Tailoring of the Neutron Energy Spectrum in the Context of Delayed Neutron Detection ................ 3910
Will Koehler, Stephen J. Toh, Nathan Sandoval, Michael Fensin
Abstract #332 SPG: The Next Generation Mechanically Cooled Germanium Spectrometer
Morgan Burks, Ethan Hull, Arden Dougan

MATERIALS CONTROL AND ACCOUNTABILITY/INTERNATIONAL SAFEGUARDS: NEUTRON MEASUREMENTS III

Abstract #134 An Experimental Comparison of Triggered and Random Pulse Train Uncertainties
Daniela Henzlova, Howard O. Menlove, Martyn T. Swinhoe

Abstract #157 Reflected Neutron Effects in Passive Multiplicity Measurements of Bare HEU Metal Assemblies
Seth McConchie, Paul Hausladen, John Mihalczko

Abstract #205 Optimization of a Uranyl Nitrate Passive Neutron Counter
Eric B. Rausch, David S. Bracken, James D. West, Corey B. Freeman, Jennifer L. Ladd-Lively, Matthew R. Newell, Steven C. Bourret, Richard B. Rothrock, Denise Schuh

Abstract #402 A Comparison of Active Neutron Coincidence Counting Using Various Neutron Sources and Its Applicability for a Fissile Material Accounting in Pyroprocess
Seong-Kyu Ahn, Sung-Ho Eom, Hee-Sung Shin, Ho-Dong Kim

Abstract #463 Measurement of the Response of the BC-523A Capture-Gated Liquid Scintillator to Typical Neutron Sources
Marek Flaska, Sara A. Pozi, James S. Bogard, Steven E. Smith, Ana C. Raffo-Caiado

Abstract #542 Prompt Neutron Time Decay in Single HEU and DU Metal Annular Storage Castings
Kirsten Peña, John Mihalczko, Seth McConchie

Abstract #600 Mass Verification Method for Actinide Mixtures Using a Multi Energy Spectrum Active Well Coincidence Counter
Braden Goddard, William S. Charlton, Angela L. Loutsteau, Claudio A. Gariazzo

Abstract #476 Template-Matching Neutron/Gamma-Ray Pulse Shape Discrimination
Marek Flaska, Scott D. Ambers, Lu Huang, Sara A. Pozi

Abstract #471 Characterization of the Neutron Source Term and Multiplicity of a Spent Fuel Assembly in Support of NDA Safeguards of Spent Nuclear Fuel
Joshua G. Richard, Michael Fensin, Stephen J. Tobin, Martyn Swinhoe, Howard O. Menlove, James Baciak

MATERIALS CONTROL AND ACCOUNTABILITY/INTERNATIONAL SAFEGUARDS: DETERMINATION OF SPENT FUEL PLUTONIUM MASS II PHOTON TECHNIQUES

Abstract #610 Progress on High Energy Delayed Gamma Spectroscopy for Direct Assay of Pu in Spent Fuel
Lake Campbell, Leon Eric Smith

Abstract #509 Delayed Gamma Technique for Fissile Material Assay
Vladimir V. Mozin, Stephen J. Tobin, Jasmina Vajic, Alan Hunt

Abstract #367 The Use of Self-induced XRF to Quantify the Pu Content in MOX Spent Nuclear Fuel
Alexander A. Solodov, William S. Charlton, Steven Saavedra, Leonid Khodadov

Abstract #376 Feasibility of X-Ray Fluorescence for Spent Fuel Safeguards
Corey R. Freeman, Stephen J. Tobin, Vladimir Mozin, Michael L. Fensin, J. White, A. Stafford, W. Charlton, S. Croft

Abstract #497 Using NDA Techniques to Improve Safeguards Metrics on Burnup Quantification and Plutonium Content in LWR SNF
Corey R. Freeman, Stephen J. Tobin, Vladimir Mozin, Michael L. Fensin, J. White, A. Stafford, W. Charlton, S. Croft

Abstract #398 Nondestructive Assay of Plutonium in Spent Nuclear Fuel Assembly in Water Pool
Takehito Hayakawa, Toshiyuki Shizuma, Ryoichi Hajima, Nobuhiro Kikuzawa, Nobuyuki Nishimori, Michio Seya, Mamoru Fujiwara

Abstract #404 Possible Applications of NDA Systems Using Laser Compton Scattering (LCS) X-rays and g-rays in Material Accountancy and Safeguards Verification for Future Nuclear Fuel Cycle Facilities
Michio Seya, Ryoichi Hajima, Nobuhiro Kikuzawa, Nobuyuki Nishimori, Takehito Hayakawa, Toshiyuki Shizuma, Mamoru Fujiwara

Abstract #359 Using Nuclear Resonance Fluorescence for Nondestructive Isotopic Analysis
Bernhard Ludewigt, Vladimir V. Mozin, Brian J. Quiter, Andrew R. Haefner

Abstract #356 Using Nuclear Resonance Fluorescence to Probe Nuclear Materials
Micah S. Johnson, James M. Hall, Dennis P. McNab, John Gonzalez

MATERIALS CONTROL AND ACCOUNTABILITY/PHYSICAL PROTECTION/ PACKAGING AND TRANSPORTATION: PORTAL MONITORING SYSTEMS

Abstract #191 An Inverse Source Location Algorithm for Radiation Portal Monitor Applications
Karen A. Miller, William S. Charlton

Abstract #223 Determining the Effects of Construction Materials on Background Readings for Second Line of Defense Program Portal Monitoring Systems
Christopher Ryan, Craig Marianno, William S. Charlton, Alexander Solodov, Jake Livesay
Abstract #308 Performance of a Radiation Portal Freight Monitor Based on Integrated Germanium Detector Modules

Abstract #352 An Application of Control Charts to Radiation Portal Monitoring

Tom Burr, Mike Hamada

Abstract #363 Determination and Mitigation of Weather Effects on Portal Monitor Gamma Background Levels

Stephen M. Revis, Alexander A. Solodov, Jake Livesay, Jason Michael Crye

Abstract #617 Rain-induced Increase of Radioactive Background in Portal Monitors

Ronald J. Livesay, Christopher Blessinger, Paul Hausladen, Robbie York

NONPROLIFERATION AND ARMS CONTROL: MPC&A INFRASTRUCTURE II

Abstract #171 Implementation of the MPC&A Operations Monitoring (MOM) System at JSC “PO Sevmash”

Andrei Monogarov, Vladimir Tarasenko, Andrei Serov, Cristen Duncan, Lovlisee Brownell, William T. Pratt, Joseph F. Carbonaro, Robert M. White, James A. Coffing

Abstract #386 Main Aspects of the Automated Transportation Security System Development

Nikolai N. Shemigion, Yuri L. Dasydov, Vladimir M. Chernyshev, William J. Reich, Timothy D. Welch, William C. Brunsdon

Abstract #428 Enhancements of MC&A Inspections at Nuclear Fuel Recycling Plants

Dmitry Bokov, I. Zakharshchuk, I. Kirillova, Pierre Pank, Iuha Raatjarvi

Abstract #449 Developing Standard Performance Testing Procedures for MC&A Components at a Site

Victor Regouchevsky, Vladimir F. Efimenko, Anatoly Ilyanestev, Anatoly Y. Bashlya, Carolyn P. Scherer

Abstract #193 Practical Results of the Nuclear Material Physical Protection, Control and Accounting Conferences

Sponsored by the George Kuzmych Training Center

Vladimir I. Kirishchuk, Victor I. Gavriluk, Olena P. Romanova, Sergiy S. Drapey, Anna V. Gavriluk-Burakova, Pascual Daures, Omer Cramboom, Lily Dainslaeger, Debbie Dickman, Kenneth Ferguson, Jozef Kazminsky

Abstract #433 Implementation and Sustainability of the Russian Federation Ministry of Defense Nuclear Personnel Reliability Program

Vassily Lata, Cameron W. Coates

Abstract #449 Standing Up a Narcotic Confirmation Laboratory for the Russian Federation Ministry of Defense Nuclear Personnel Reliability Program

Victor Lukyanenko, Gerhard R. Eisele, Cameron W. Coates

NONPROLIFERATION AND ARMS CONTROL: PROLIFERATION RESISTANCE AND METHODOLOGIES II

Abstract #628 Evaluating Proliferation-Resistance and Nuclear Security

Jor-Shan Choi

Abstract #384 Update of the INPRO Methodology for Evaluating Proliferation Resistance

Hong-Lue Chang, Won Il Ko, Jeremy Whitlock, Keyuan Zhou, Filippo Severi, Eckhard Haas, Michael Zentner, Giacomo Cojazzi

Abstract #454 An Assessment of the Attractiveness of Material Associated with Thorium/Uranium and Uranium

Closed Fuel Cycles from a Safeguards Perspective

Abstract #178 Enhancing Nuclear Fuel Cycle Proliferation Resistance Assessment Through Direct Coupling with Nuclear Materials Characterization Analysis

Steven E. Skumin, Man-Sung Yim

Abstract #545 Expanding Input Variable Sets to Enhance Nuclear Proliferation Predictions

Jun Li, Man-Sung Yim, David N. McNelis

Abstract #523 The Role of Proliferation Resistance in Addressing Non-State Threats

Joseph F. Pilat, Kory W. Budlong Sylvester

Abstract #473 Using Economic Input/Output Tables to Predict a Country’s Nuclear Status

Mark B. Weimar, Don S. Dafy, Thomas W. Wood

Abstract #581 Possible Proliferation Risks of Future Tokamak Fusion Reactors

Matthias Englert, Wolfgang Liebert, Fabio Balloni

PACKAGING AND TRANSPORTATION: RADIOACTIVE MATERIAL - MANAGEMENT/OPERATIONS

Abstract #252 DOE Packaging Operations and Maintenance Course

Robert Watkins, Jeffery L. England

Abstract #485 Transport and Disposition Actinide Material

Robert Watkins, Daniel R. Leduc

Abstract #147 ORNL IntelligentFreight Initiative: Enhanced End-to-End Supply Chain Visibility of Security Sensitive Hazardous Materials

Randy M. Walker, Mallikarjun Shankar, Bryan Gorman, David Ressegue

Abstract #113 Advantages of the Shielded Payload Containers at the Waste Isolation Pilot Plant

Sean C. Dunagan, Roger A. Nelson

Abstract #683 Inexpensive Secondary Containment to Reduce Attrition and Improve Handling Costs

Dean K. Little, W. T. Rogerson Jr.
