2010 IEEE International Conference on Networked Embedded Systems for Enterprise Applications

(NESEA 2010)

Suzhou, China
25 – 26 November 2010
### TABLE OF CONTENTS

Composition Challenges and Approaches for Cyber Physical Systems ................................................................. 1  
K. Wan, D. Hughes, K. Man, T. Krilavicius

MobDSL: A Domain Specific Language for Multiple Mobile Platform Deployment .................................................... 8  
D. Kramer, T. Clark, S. Oussena

Extending Sensor Networks into the Cloud using Amazon Web Services ........................................................................ 15  
K. Lee, D. Murray, D. Hughes, W. Joosen

SenaaS: An Event-driven Sensor Virtualization Approach for Internet of Things Cloud .............................................. 22  
S. Alam, M. Chowdhury, J. Noll

Middleware for Resource Sharing in Multi-purpose Wireless Sensor Networks ..................................................... 28  
P. Cid, S. Michiels, W. Joosen, D. Hughes

Data Traffic based Route Selection for Real-time Data Delivery in Wireless Sensor Networks .................................. 36  
H. Park, Z. Mir, N. Kim, C. Pyo

Preserving Privacy and Assuring Integrity in Data Aggregation for Wireless Sensor Networks .............................. 41  
R. Bista, M. Song, J. Chang

A Pattern based Methodology for the Design and Implementation of Multiplexed Master-Slave  
Devices at the System-Level Use-case: Modeling a Level-2 Cache IP Module at Transaction Level .................. 49  
S. Menon, J. Suryaprasad

Low Power, Small Die-size PLL Using Semi-digital Storage Instead of Big Loop Filter Capacitance ............... 55  
M. Dietl, P. Sareen

Robust Optimization of Serial Link System for Signal Integrity and Power Integrity ............................................ 59  
J. Tripathi, R. Nagpal, R. Malik
