# TABLE OF CONTENTS

A Technique for SC Renewal Planning Considering Optimal Allocation and Life Cycle Cost .................................................. 1
Katsuyuki Kimura, Yuta Tanaka, Shinichi Iwamoto

Fuzzy Programming based Daily Dispatch of Power System with Wind Power ................................................................. 7
Hui Zhou, Changyun Chen

Design of Decentralized Biased Dual Mode Controller for Load Frequency Control of an Interconnected Power System with AC/DC Tie Lines .......................................................................................................................... 13
S.Selvakumar, V.Rajasekaran

Optimal Power Flow in Radial Distribution Systems .................................................................................................................. 18
B. Venkatish

Real-Time Distribution System State Estimation .......................................................................................................................... 22
I. Dzafic, S. Henselmeyer, H.T. Neisius

Multi-level Power Quality Assessment towards Virtual Testing of More Electric Aircraft ...................................................... 28
Yang Ji, Johann Bals

A Novel Half-Bridge LLC Resonant Converter for High Power DC Power Supply ................................................................. 34
Alpa Gopiyani, Vinod Patel, M.T.Shah

Simulation of Speed Sensor less Control of PMSM Based on DTC Method with MRAS ...................................................... 40
Ghalanfar Shahgholian, Mohammad Hosain Rezaei, Afshin Etesami, Mohammad Reza Youssefi

Modeling the Dynamics of a Circuit Containing Saturable Magnetic Cores Based on J-A Model ........................................ 46
Yitao Liu, Daming Zhang

Direct Torque Control of PMBLDC motor using Hybrid (GA and Fuzzy logic) controller ..................................................... 52
E.Kaliappan, C. Sharmeela, Sayee Krishna

Effects of Acidic and Salinity Level to the Water Treeing in Crosslinked Polyethylene Insulation Material ........................................ 57
H. Ahmad, M.H. Ahmad

Supply Cost Minimization for Distribution Systems with Multi-cost Multi-point Supply through Network Reconfiguration .................................................................................................................................................................................. 62
Allan C. Nerves, Ryan S. Morales

Influence of Terminal Components for Suppression of High-Frequency Transients in GIS ................................................... 68
Ahmad Tavakoli, Ahmad Gholami

Three-Phase Modeling of HTS Transformer in Distribution Networks .................................................................................... 72
M. A. Abdul Rahman, T. T. Lie, K. Prasad

Impulse Current Waveform Parameters Determination with ZnO Load ............................................................................... 78
S. Sato, Y. Okamoto, S. Nishimura

Power Ramp Rate Control for Grid Connected Photovoltaic System ....................................................................................... 83
Ruifeng Yan, Tapan Kumar Saha

Particle Swarm Optimized T-S Fuzzy Logic Controller for Maximum Power Point Tracking in a Photovoltaic System ............. 89
Lawrence K. Letting, Josiah L. Munda, Alex Hamam

Performance of Heterojunction with Intrinsic Thin Layer(HIT) PV Module in Singapore .................................................... 95
Fan Jiang, Albert Lim

Analog Control Algorithm for Maximum Power Tracker Employed in Photovoltaic Applications ......................................... 99
Sang-Keun Ji, Doo-Hee Jang, Sang-Kyoo Han, Chung-Wook Roh, Sung-Soo Hong

Optimal Coordination Control for Stand-alone PV System with Nonlinear Load .............................................................. 104
Xiong Liu, Peng Wang, Poh Chiang Loh

Design of Wind-Turbine Energy System .............................................................................................................................. 110
Fang Lin Luo

Security Constrained Unit Commitment with Multiple Wind Farms Integrated ................................................................. 116
Rong Ye, Haoyong Chen, Pan Chen

The Application of Wind Generation on Weak Networks – Equal Area Criteria Approach ................................................... 122
Rene Rossi, Mohammad A. S. Masoum

Output Power Smoothing of PMSG-Based Wind Energy Conversion System ............................................................... 128
Akie Uehara, Bungo Asato, Tomonori Goya, Tomonobu Senju, Atsushi Yone, Toshikatsu Funahashi, Chul-Hwan Kim

A Novel Method for Optimal Placing Wind Turbines in a Wind Farm Using Particle Swarm Optimization (PSO) ................. 134
Rasoul Rahmani, A. Khairuddin, Sam M. Cherati, H. A. Mahmoud Pesaran
G. Yesuratnam, N. Srilatha

Eiji Sakakibara, Kiyotaka Matsushita, Shinichi Iwamoto

A New Aggregation Approach for the Single Machine Equivalent to Calculate the Decelerating Energy of the Stable-Domain .................................................. 299
Ryoosuke Tabuchi, Shinichi Iwamoto, Hideo Hosogoe, Mitsuhiro Matsumoto

A Hybrid Framework for Coordinated Voltage Control of Power Systems .................................................. 304
Mohammad Moradzadeh, René Boel

A review of module inverter topologies suitable for photovoltaic systems .................................................. 310
Reshmi C. Vairathi, Michael A. E. Andersen, Ole Neis Nielsen, Anders Hylégård

Conducted and Radiated Noise Reduction using Circuit Balance on Double Switch Converter ......................... 317
Nimit Boonpirom

Evaluation of Thermally Efficient Mounting Techniques for Ferrite Cores .................................................. 323
J. D. Holmes, D. A. Stone, M. P. Foster, A. J. Skinner

A Solid State Fault Current Limiter Control Algorithm .................................................................................. 328
Yongfeng Feng, M. Saadah, Andres Escobar, J. C. Balda, Simon Ang, H. A. Mantooth

Modeling and Control of a Cascaded NPC/H-Bridge Inverter with LCL Filter in PV-Grid Application .................. 334
T. Wanjekeche, D.V. Nicolae, A.A. Jimoh

Multi Process Real-Time Network Applications in Distribution Management System .................................. 340
I. Dzafic, H.T. Neisius, D. Ablakovic

Neuro Fuzzy Recognition of Ultra-High Frequency Partial Discharges in Transformers .................................. 346
H. H. Sinaga, B.T. Phung, T.R. Blackburn

Development of the Temperature Monitoring System for Power Cable and Analysis on the Measured Data .................. 352
Yang Fan, Deng Yusheng, Chen Jun, Wang Xiangqiang, Peng Hui

Profit Maximization by Optimal Allocation of Capacitor in Radial Distribution System using Cultural Algorithm ................................................................. 356
Vivekananda Haldar, Kamal Krishna Mandal, Niladri Chakraborty

Diagnosis of Crack of Rotor Blades with Genetic Method ................................................................. 362
YinQuan Yu, Chao Bi, Abdullah Al Mamun

An Approach for Identifying Faulty Protection Devices in a Distribution System Using ANFIS .................................. 368
Rasli A Ghani, Azah Mohamed, Hossain Shareef

Precise Analysis of Power Swing Effects on Distance Relay Zones ................................................................. 373
H. Abniki, A. Salah Esfahani, R. Razzaghi, M. T. Nahavi Razavi

A Very Fast Unblocking Scheme for Distance Protection to Detect Symmetrical Faults during Power Swings ............................................................................... 378
Behnam Mahamedi

A Wavelet Based Protection Scheme for EHV Asymmetrical Teed Circuits .................................................. 384
Varma R. K. Bhuspatiraju, Ramana Rao V. Pulipaka

The Effect of Wind Generation on Weak Networks and Potential System Limitations .................................. 390
Rene Rossi, Mohammad A. S. Masoum

Power Grid is Getting Ready for the Development of Wind Power in China .................................................. 396
He Chen, Jun Li, Feng Han, Hong Bai

Determination of a Dispatch Strategy to Maximize Income for a Wind Turbine-BESS Power Station .................................................. 402
D. L. Yao, S. S. Choi, K. J. Tseng, T. T. Lie

Statistical Voltage Quality Evaluation of Wind Farm-connected Grid Network ........................................ 408
Q. Li, Y. Yuan, S. S. Choi, W. S. Wang

Drifters as Preliminary Site Assessment Tool for Ocean Current-Based Renewable Energy for Straits and Channels in the Philippines .................................................. 413
Michael Lochinvar, Sim Abundo, Laura David, Cesar Villanoy

An Electric Power Source Planning Method Aiming on Enhancing Reliability of System State Changing ................................................................. 418
Fang Cao, Lizi Zhang

Optimal Energy Storage Size of Thermal/Wind Power System Using Tabu Search Optimizer .................................................. 423
Shantanu Chakraborty, Tomonobu Senjyu, Atsushi Yona, Toshihisa Funahashi

A Comparison of Voltage Collapse Proximity Indicators ................................................................. 429
F. Karbalaei H. Soleymani, S. Afsharnia
Coordinated Design of PSS and TCSC Controller for Power System Stability Improvement ................................................................. 433
Mahdiyeh Eslami, Hussain Shareef, Azuh Mohamed
Co-Ordinated Tuning Of AVR-PSS Using Differential Evolution Algorithm .................................................................................. 439
B.Selvaraja, D.Devapri
Novel H-Bridge Multilevel Current-Source PWM Inverter with Inductor-Cells .................................................................................. 445
Toshihiko Nagoshi
A Particle Swarm Optimization Approach for Optimum Design of PID Controller in Linear Elevator .................................................. 451
M. B. B. Sharifian, H. Afsharvand, S. Galvani
Design, Modeling and Simulation of DC-DC Converter .................................................................................................................. 456
Subhash Chander, Pramod Agarwal, Indra Gupta
Vibration-induced Disturbance Compensation in HDD By Filtered-X RLS Acceleration Feedforward Control .................................................. 462
Jianyi Wang, Youyi Wang, Lihui Jin
A QPSO Based Parameters Tuning of the Conventional Power System Stabilizer ........................................................................ 467
Ebrahim Babaei, Vahid Hosseinzadeh
A Novel Equivalent Model to Analyze the Influence between the Parallel UHVDC and EHVAC Transmission Lines ................................................................. 472
PMU Based Monitoring and Estimation of Interarea Power Oscillation for Singapore-Malaysia Interconnection Power System .................................................. 476
Dikpride Despa, Yasunori Mitani, Changsong Li, Masayuki Watanabe
Decentralized Power System Damping Controller Design using H8 Loop-shaping Technique ................................................................. 481
Nilesh Modi, T. K. Saha, N. Mithulananthan
Extended Modular Multilevel Converters Suitable for Medium-Voltage and Large-Current STATCOM Applications .................................................. 487
H. Mohammad Pirouz, M. Tavakoli Bina, K. N. Toosi
Adaptive solutions for Distance relay settings .......................................................................................................................... 493
A. N. Sarwade, P.K. Katti, J.G. Ghodekar
Fault Locating Estimation Using Thevenin Equivalent in Power Systems .......................................................................................... 499
Matt C.-Y. Chuang, S.-J. Steven Tsai, Chia-Chi Chu
Classification of Power System Faults Using ANN Classifiers ........................................................................................................ 505
M. Karimi, M. Banerjee, H.Hassanpour, A. Moeini
Advanced Distance Relay Characteristics suitable for Dynamic Loading .......................................................................................... 509
A. N. Sarwade, P.K. Katti, J.G. Ghodekar
Greenhouse Gas Emission Reduction by Biomass Co-combustion with Lignite ............................................................................. 515
Magdalena Matei, Otilia Nedelcu, Lidia Alexandra Matei, Lucian Matei, Barbara Soare, Simona Mihalcescu, Cornel Salisteana, Iulian Udrișu
Model Predictive Control of a Novel Axial Flux Permanent Magnet Machine for Flywheel Energy Storage System .................................................. 519
Trong Duy Nguyen, King Jet Tseng, Chi Zhang, Shao Zhang, Hoan Thong Nguyen
Economic Dispatch of Electric Energy Storage with Multi-service Provision .................................................................................. 525
Shi You, Chresten Trekholm, Bjorn Poulsen
Hybrid Energy Storage Systems for Renewable Energy Sources Integration in Microgrids: A Review .......................................................... 532
I. Veciu, A. Etxeberria, J.M. Vinassa, H. Camblong
Equalization Chargers Using Capacitor-Diode Networks for Series-Connected Energy Storage Cells .......................................................... 538
Masatoshi Uno, Akio Kikita, Koji Tanaka
On-line Excitation Systems’ Parameters Identification based on Input-Output System and Hybrid Algorithm with PMU ............................................................................. 544
Ancheng Xue, Zhenbo Cao, Tianru Bi, Dong Yang, Gang Duan, Jingtao Wu
Security Constrained Unit Commitment Strategy for Wind/Thermal Units Using Lagrangian Relaxation based Particle Swarm Optimization .................................................................................. 549
Shantanu Chakraborty, Tomonombo Senjyu, Atsushi Yona, Toshihisa Funahashi
Comparison of CPF and Modal Analysis Methods in Determining Effective DG Locations ......................................................................... 555
Ardiaty Arief, Muhammad Bachtiar Nappu, Marcus Gallagher, Zhao Yang, Dong, Junhua Zhao
Under Voltage Load Shedding Incorporating Bus Participation Factor .................................................................................................. 561
Ardiaty Arief, Muhammad Bachtiar Nappu, Zhao Yang, Dong, Muhammad Arief
Sensorless Control of IM Based on Full-Order Luenberger Observer .................................................................................................. 567
M. B. B. Sharifian, N. Rostami, H. Hatami
Analysis and Comparison of Axial Flux PM Synchronous Motor and Induction Motor ................................................................ 572
C. Zhang, K. J. Tseng, T.D. Nguyen
Fuzzy Logic Based Reconfigurable Optimal Switching Controller for BLDC Motor for Reduced Harmonics ................................................................. 578
A. Albert Rajan, S. Vasantharathna
On Dynamic Diode Characteristics and EMI Performance of an Inverter with Undeland Snubber ......................................................... 584
Andreas Karvonen, Torbjörn Thöringer
Application of Flexible Control Methods for D-STATCOM in Mitigating Voltage Sags and Swells ................................................................. 590
Ebrahim Babaei, Amin Nazarzad, Seyed Hossein Hosseini
Operation, Modeling, Control and Applications of Static Synchronous Compensator: A Review ................................................................. 596
Gahzanfar Shahgholian, Javad Faei, Bahador Fani, Mohammad Reza Yousefi
A New Coordinated Voltage/Reactive Power Control Scheme for Interconnected Power Systems ................................................................. 602
Xinyu Su, Guangyu He, Xuejun Zhang, Pingchuan Ma, Wenyun Yin
Optimal Operation of Controllable Load and Battery Considering Transmission Constraint in Smart Grid .............................................................. 734
Tomonori Goya, Tomonobu Senjyu, Atsushi Yona, Naomi Nakasaki, Toshihisa Funabashi, Chul-Hwan Kim

Optimal Multi-Distributed Generation Location and Capacity by Genetic Algorithms ................................................................. 614
M.H.Moradi, M.Abedinie, H. Bagheri Tolabi
Predictive Var Management of Distributed Generators ................................................................. 619
M.Z.C. Wanik, I. Erlich, A. Mohamed, H. Shareef
Optimal Decision Making for Virtual Power Plant Operation ................................................................................................................................. 625
Malahat Peikherfeh, Hossein Seifi, M. K. Sheikh-El-Eslami
Study on Performance of HFCT and UHF Sensors in Partial Discharge Detection ................................................................................................. 630
Guomin Luo, Daming Zhang
Restraint Method of Voltage Total Harmonic Distortion in Distribution System by Power Conditioner Systems Using Measured Data from IT Switches ................................................................................................................................. 636
Shoji Kawasaki, Junya Matsuji, Yasuhiro Hayashi
Investigation On High Neutral Earthing Resistor Temperature When Islanded Generator Connected To Utility Grid ................................................................. 642
Mohd Farris bin Abdullah, Nor Hisham bin Hamid, Zuhairi bin Baharinuddin, Mohd Fatimie Irzaq bin Khamis, Nik Siti Rashidah binti Hashim, Sallehhudin bin Yusof
Investigation for Power Quality in a PWM AC Controller Feeding a 3-Phase 3-Wire Y-Wye Load ................................................................. 648
A. N. Arvindan
Reliability Evaluation of Power Systems with WTGs and Energy Storage ............................................................................................................. 654
Z. Y. Guo, Peng Wang
Comprehensive Voltage Control Scheme considering CO2 Emission and Fuel Cost ................................................................................................. 660
Hirohide Tanaka, Kenta Takeda, Shinichi Iwamoto, Masashi Tatsuno, Daigo Hiraoka, Hisanori Ito
The Indian Power Sector – A Sustainable Way Forward......................................................................................................................................... 666
Tarlochan Kaur
Challenges & Solution in Determination of Agriculture Consumption................................................................................................................................. 671
S. B. Modi, U.C. Trivedi, R. K. Goyal
Research on the Selection of Railway Traction Transformer ................................................................................................................................. 677
Hu Yu, Yuan Yue, Chen Zhe, Chen Zhifei, Tao Ye
Low power 60 kHz Electrodeless Fluorescent Lamp for Indoor Use ................................................................................................................................. 682
Chang-Shien Lin
Control of a High Power Factor AC/DC Converter with a Simple Load Current Estimator ................................................................................................................................. 687
Pisit Wisutmethaekorn, Viboonya Chumkag
Implementation of a ZVT based Power Factor Correction Converter ................................................................................................................................. 693
Matada Mahesh, A. K. Panda
Analysis and Simulations of Z-Source Inverter Control Methods................................................................................................................................. 699
B.Y. Husodo, M. Anwari, S.M. Ayob
Optimal Design of Two Level Inverters ................................................................................................................................................................. 705
Mo Wei, Loh Poh Chiang, Ding Yi
Effect of Uncertainty on Optimization of Microgrids ................................................................................................................................................................. 711
M. Q. Wang, H. B. Gooi
The Regional Wind Power Fluctuation in China and Potential Accommodation by PEV Charging ................................................................................................................................................................. 717
Yanhua Liu, Dayang Yu
Optimal Operation for DC Smart-Houses Considering Forecasted Error ................................................................................................................................. 722
Kenichi Tanaka, Kosuke Uchida, Masato Oshiro, Tomonori Goya, Tomonobu Senjyu, Atsushi Yona
Advanced Active Power Conditioner to Improve Power Quality in Microgrids ................................................................................................................................. 728
Ionel Vechiu, Gelu Gurguiatu, Emil Rosu
Optimal Operation of Controllable Load and Battery Considering Transmission Constraint in Smart Grid ................................................................................................................................................................. 734
Tomonori Goya, Tomonobu Senjyu, Atsushi Yona, Naomi Nakasaki, Toshihisa Funabashi, Chul-Hwan Kim
Distributed Generators Placement for Loadability Enhancement based on Reactive Power Margin
Tareq Aziz, T. K. Saha, N. Mithulananthan
740
A Hybrid AC/DC Micro-Grid
Xiong Liu, Peng Wang, Poh Chiang Loh
746
Modified NSGA-II for Day-Ahead Multi-objective Thermal Generation Scheduling
Anupam Trivedi, N. M. Pindoria, Dipi Srinivasan
752
A Switched-Boost Topology for Renewable Power Application
Sarabhan Upadhyay, Ravindranath Adda, Santantu Misra, Arvindash Joshi
758
Frequencies above the Harmonic Range – Challenge of the Future?
Christian Unger
763
Evaluation and Control of Heating Effect due to Harmonics in Motor Loads
J. J. Yang, M. Zuhdi, H. T. Nguyen, S. S. Choi
767
Estimation of the Power Quality Problem Caused by Large Wind Farm: A Real Case Study
Bowen Wu, Yue Yuan, Qiang Li, Zhenjie Li, Weisheng Wang
773
Single-Phase Shunt Active Filter for Customer Generated Harmonics and Reactive Power Compensation
R. D. Patidar, S. P. Singh
777
A Simple Algorithm For Fast Detection And Quantification Of Voltage Deviations Using Space Vectors
P. Meena, K. Uma Rao, Ravishankar Deekshit
783
Protective Device Problems and Solutions
Vassili Rozine, Max H. Adams
789
Composite Fault Location for Distribution Management Systems
I. Dzafic, P. Mohapatra, H. T. Neisius
795
A Fast Calculation Method for Tie-Line ATC with Transient Stability Constraints
Ryosuke Takahashi, Yujiro Hiraki, Shinichi Iwamoto, Hirobou Morita, Kunto Sakamoto
801
Prony Analysis of Electrical Transient Characteristics of AC System during HVDC Commutation Failure
Rulian Zhang, Chengyong Zhao
807
Survey and Report on Feed-in Tariff in Canada
Guangyu Zhu, Bala Venkatesh
813
Combination Approaches for Short Term Load Forecasting
Yogesh Bichpuriya, M. S. S. Rao, S. A. Soman
818
Forecasting the Electrical Energy Price in Iran Power Market: A Comparison between Single and Multi Hour Models
A. Esmaili, M. Eghlimer, M. Olomi, H. Shakouri, A. Sadeghi
824
Study on Congested Power System in Competitive Electricity Market: A Proposed Methodology
Muhammad Rocbiath Nappu, Tapan Kumar Saha
830
Comparison of Different Variants of Differential Evolution applied to Short-Term Economic Generation Scheduling of Hydrothermal Systems
Kamal Krishna Mandal, Vivekananda Halder, Niladri Chakraborty
836
Unit Commitment in Microgrids by Improved Genetic Algorithm
H.Z. Liang, H.B. Gooi
842
Thermal Effect on State Estimation in Microgrids
Vo Quoc Nguyen, Gooi Hoay Beng
848
A Flexible Data Acquisition System for Energy Information
Guang Wah Ung, Peng Hin Lee, Liang Mong Koh, Fook Hoong Choo
853
A Combination of Genetic Algorithm and Particle Swarm Optimization for Optimal DG location and Sizing in Distribution Systems
M. H. Moradi, M. Abedinie
858
Bidding Strategy for Price-Taker Distributed Genco in Competitive Electricity Market
G.B. Shrestha, Songbo Qiao
863
Dynamic Evolution Control of Interleaved Boost DC-DC Converter for Fuel Cell Application
Ahmad Saudi Samosir, Makkul Anvari, Abdul Halim Mohd Yatim
869
Efficiency and Economics Analysis of Proton Exchange Membrane Fuel Cell
Meiyappan Siva Pandian, Makkul Anvari, Budi Yanto Husodo, Ayong Hiendro
875
A simple PEM Fuel Cell Emulator using Electrical Circuit Model
Ahmad Saudi Samosir, Makkul Anvari, Abdul Halim Mohd Yatim
881
Design and Loss Analysis of A High Speed Flywheel Energy Storage System Based on Axial-Flux Flywheel-Rotor Electric Machines
886
Considerations when Modernizing Drives for Buildings Based on an Energy Efficiency and Cost Perspective .................................................................................................................. 892

Johan Aström, Torbjörn Thiringer

Simulation of an Energy Harvesting Circuit for Low Power Application .......................................................... 898
Mohd Sofwan bin Mohd Resali, Hanif Salleh

DQ Modeling Of Induction Motor For Virtual Flux Measurement .......................................................... 903
P. Sushma, Rajalakshmi Samagga, K. P. Vittal

A Real-Time Simulation Platform for Power System Operation .................................................................. 909
Jacob Østergaard, Quowei Wu, Francesco Mara, Seung Tae

Discrimination of Corona and Surface Discharge Patterns in Soy Seed-Based Transformers .............. 915
N. A. Muhammad, B.T. Phung, T.R Blackburn

An Algorithm to Detect Point on Wave Initiation of Voltage Sag Using Discrete Wavelet Transform .......... 921
N. N. Jangle, A.M. Jain, B. E. Kushare

Research on Protection Scheme for AC Micro-grid with Mobile Power Storage Units .................................. 927
Xiao-Xiao Zhao, Ming-Chao Xia

The Two-Stage Negotiation Mechanism Based on Multi-Agent Using Q-learning In Electricity .......... 930

Bilateral Contract

Hengxu Zhang, Yutian Liu

Voltage Control of the SVM-Modulated STATCOM Using the Average Model ........................................ 936
S. Haghnazari, M. Tavakoli Bina

Study for Thermal Power Enterprises’ Business Performance based on EVA ........................................ 941
Cui Bin, Wang Yanling

Speed Control of DC Motor Using PI and SMC ............................................................................................. 945

Activity Based Energy Model for Calibrated Simulation Approach in Retrofitting a Multi Use Facility .......................................................... 951
Y Avinash, T Geetha, Anand Sivasubramaniam

Effect of Point on Wave Angle on Sensitivity of AC Coil Contactor and SMPS to Voltage Sags .......... 957
S.M. Akiklar, B.E. Kushare

Offshore Wind Speed Forecasting by SVM and Power Integration through HVDC Light .................. 962
Pravin B. Dangar, Santosh H. Kaware, Pradeep K. Katti

Novel Microstepping Technique for Disc Rotor Type Stepper Motor Drive ......................................... 968
Archan Patel, K. S. Dempoja, A. N. Patel, S. H. Chetwant

24-Pulse Rectifier Topology with 3-Phase to Four 3-Phase Transformation by Novel Interconnection of Conventional 3-Phase and 1-Phase Transformers .......................................................... 973
A. N. Arvindan

A New Directional Relay Algorithm for the Protection of Transmission Network Systems Using Discrete Wavelet Transforms .......................................................... 980
A. Ngaopitakkul, S. Kaitwanidvilai

Coefficient Comparison Technique for identifying the Fault Types in Underground Cable .............. 984
A. Ngaopitakkul, S. Kaitwanidvilai, C. Apisit

Brain Emotional Learning Based Intelligent Controller for Permanet Magnet Synchronous Motor .......... 989
Fahimeh Tahvili Pour Fard, Ghaizanfar Shahgholian, Amin Rajabi, Mohammad Reza Habibollahi

Analysis and Design of PSS Based on Sliding Mode Control Theory for SMIB ........................................ 994
Amin Rajabi, Ghaizanfar Shahgholian, Bahram Karimi, Mohammad Reza Yosefi

Small Signal Modeling and Analysis of Control Speed for Two Mass Resonant System .................. 1000
Mohammad Reza Yousefi, Ghaizanfar Shahgholian, Afshin Etesami, Pegah Shafaghi

On-Line Tuning Variable Structure Adaptive Control for Wind Induction Generator System .......... 1004
Chih-Ming Hong, Ting-Chia Ou, Chiung Hsing Chen, Wei-Min Lin

R&D Tests of the Live Cleaning Machine of Whqs-500 Type at HVDC Convertor Stations .................. 1010
Hongtai Liu, Rui Lin, Guangqing Zuo

Analysis of Steady-State Operation of Bao’an Converter Station’s Y/Y Converter Transformer .......... 1014
Hongtai Liu, Rui Lin, Guangqing Zuo

Substitute Zhaooqing Converter Station’s Converter Transformer .......................................................... 1019
Yiding Jin, Qiang Song, Wenhua Liu, Weixin Sun

Cascaded Battery Energy Storage System Based on Dual Active Bridges and a Common DC Bus ........ 1025
Chaiyan Jettanasen

Passive Common-Mode EMI Filter Adapted to an Adjustable-Speed AC Motor Drive .......................... 1031
Hengxu Zhang, Yutian Liu
A Novel Method for Discrimination of Internal Faults and Inrush Currents by Using Waveform Singularity Factor .......................................................... 1035
Jing Ma, Zengping Wang, Jie Wu

Electricity Forecasting for Small Scale Power System using Fuzzy Logic ......................................................... 1040
Mohd Fattimie Izraji bin Khannis, Zahairi bin Baharudin, Nor Hisham bin Hamid, Mohd Farris bin Abdullah, Siti Sarah Md Yunus

Adaptive Neuro-Fuzzy Damping Controller Design for a Power System Installed with UPFC .................................. 1046
S.Y. Khatami, H. Soleymani, S. Afsharnia

Hu Yu, Yuan Yue, Chen Zhifei, Xiao Ling

Fuzzy Logic Based Power System Stabilizer Optimization Using C-means Clustering Method .................................. 1056
M. Banjead, A. Majid, Dejamkhooy

Ageing Studies on Transmission Line Glass Insulators Using Dielectric Dissipation Factor Test .................................. 1062
Nourudddeen Bashir, Hussein Ahmad, Mohd Shaffuan Suddin

Participation in Reactive Power Market Considering Generator Aging ................................................................. 1067
I. Niazy, J. Ebadi, S. Salezvari, A. Niazy, H. Morazavi, H.R. Poursoltani

Educational Project of an Interactive Model of a Photovoltaic Power Plant .......................................................... 1073
Martin Sirový, Jan Žák, Zdenek Peroutka

A Novel Method to Attain a Compromised Low Emission and Cost for Generation Scheduling .......................... 1077
M. Pourakbari-Kasmaei, M. Rashidi-Nejad

Siting and Sizing of Distributed Generation in Distribution Network to Improve of Several Parameters by PSO algorithm .......................................................... 1083
Mohsen Sedighi, Arazghelich Igderi, Amir Parastar

An Improved Performance of Cascaded Multilevel Inverter with Single DC Source by Employing Three-Phase Transformers .......................................................... 1088
Y. Suresh, A. K. Panda, Matada Mahesh

Mechanism Analysis of using Thyristor Controlled Serious Compensation to Mitigate Subsynchronous Resonance .................. 1094
Tang Yi, Yu Rui-qian

Optimal Operation of Smart Grid in Isolated Island ....................................................................................... 1100
Bungo Asato, Tomonori Goya, Kosuke Uchida, Atsushi Yona, Tomonobu Senjyu, Toshishisa Funabashi, Chul-Hwan Kim

Using Quadratic Programming for Power Flow Calculations .................................................................................. 1046
N. D. Duc, H. B. Gooi

High Order Contingency Selection based on Particle Swarm Optimization and Branch Reordering ....................... 1111
Ashwini Chegu, Fangying Li

Justified Distribution Factors Approach for Pool Modelling ................................................................................. 1117
N. H. Radzi, Z. Y. Dong, R. C. Bansal

Risk Assessment of Energy Trading for a Generation Company with Bilateral Contracts .................................. 1123
Allan C. Nerves, Likha Ma, D. Umalfi

Charles O. P. Marpaung, Atonobinud Soebagio, Edison Ambarita

Impacts of Solar Power Penetration on Nodal Prices and Nodal Reliability .......................................................... 1134
Qian Zhao, Peng Wang, Yi Ding, Lilat Kumar Goel

Knowledge-based Intelligent Energy Management Using Building Automation System .................................. 1140
Hendro Wicaksono, Sven Rogalski, Enrico Kusnady

Optimum Power Flow using Flexible Genetic Algorithm Model in Practical Power Systems .......................... 1146
Irfan Mulyawan Malik, Dipi Srivivasan

A Hybrid Contention-Polling Protocol for PLC-based AMR Systems ............................................................... 1152
B. Sivanesan, P. L. So, E. Gunawan

Artificial Neural Network based Automatic Generation Control scheme for Deregulated Electricity Market .................................................................................. 1158
Sandeep Bhongade, H.O. Gupta, Barjeev Tyagi

Power Flow Allocation Method with the Application of Hybrid Genetic Algorithm-Least Squares .......................... 1164
Hussain Shaweef, Mohd Herwan Sulaiman, Mohd Wazir Mustafà

Application of Optimal Reset Control Design on PMSG Wind Generation System ........................................ 1170
Si Wu, Youyi Wang, Dinhuy Dang, Shijie Cheng

Cascaded Impedance Networks for NPC Inverter ............................................................................................... 1176
Dong Li, Feng Guo, Poh Chiang Loh, Miao Zhu, Frede Blaabjerg
Silicon Nanowires Thermoelectric Devices.......................................................................................... 1181
Y. Li, K. Buddharaju, N. Singh, G. Q. Lo, S.J. Lee
Investigation of ANN Performance for Tracking the Optimum Points of PV Module under Partially Shaded Conditions.................................................................................................................. 1186
Syafaruddin, Takashi Hiyama, Engin Karatepe
Position Sensorless Control of a Novel Flywheel Energy Storage System............................................. 1192
Trong Duy Nguyen, King Jet Tseng, Chi Zhang, Shao Zhang, Hoan Thong Nguyen
Optimal Operation Strategy by Battery Energy Storage Systems in Distribution System.......................... 1199
Masato Oshiro, Tomonobu Senjyu, Atsushi Yona, Naomitsu Urasaki, Toshihisa Funabashi, Chul-Hwan Kim
High Power Low-Loss Resonant-Type Multi-Level Inverter .................................................................. 1205
Kyohei Kurohane, Kosuke Uchida, Hayato Yamauchi, Tomonori Goya, Tomonobu Senjyu, Atsushi Yona
A New Method of Interfacing Battery/Supercapacitor Energy Storage Systems for Distributed Energy Sources................................................................................................................................. 1211
S. D. G. Jayasinghe, D. M. Vilathgamuwa, U. K. Madawala
Design of a Wind Turbine – Battery Energy Storage Scheme to Achieve Power Dispatchability ............. 1217
K. W. Wee, S. S. Choi, D. M. Vilathgamuwa
