# TABLE OF CONTENTS

## VOLUME 1

### SESSION WA1: ADVANCES IN BIOMETRIC THEORY AND APPLICATIONS I

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sparse Representations and Random Projections for Robust and Cancelable Biometrics</td>
<td>1</td>
</tr>
<tr>
<td>Generating Cancelable Biometric Templates Using a Projection Line</td>
<td>7</td>
</tr>
<tr>
<td>A Pitfall in Fingerprint Features Extraction</td>
<td>13</td>
</tr>
<tr>
<td>MCC: A Baseline Algorithm for Fingerprint Verification in FVC-onGoing</td>
<td>19</td>
</tr>
</tbody>
</table>

### SESSION WA2: NEURO-FUZZY CONTROL I

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Globally Exponential Stability of Delayed Neural Networks with Impulses</td>
<td>24</td>
</tr>
<tr>
<td>Comparison of Different Subset Selection Algorithms for Learning Local Model Networks with Higher Degree Polynomials</td>
<td>30</td>
</tr>
<tr>
<td>Linear Discrete-time Systems with Fuzzy Parametric Uncertainty</td>
<td>36</td>
</tr>
<tr>
<td>A Cooperative Interaction Control Methodology of a Pair Independent Control System</td>
<td>42</td>
</tr>
<tr>
<td>An Intelligent Fault-Tolerant Satellite Attitude Control System with-out Hardware Redundancies</td>
<td>50</td>
</tr>
</tbody>
</table>

### SESSION WA3: MULTIDIMENSIONAL SYSTEMS MODELING AND SIGNAL PROCESSING

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sufficient LMI Conditions for H∞ Static Output Feedback Control of 2-D Systems</td>
<td>57</td>
</tr>
<tr>
<td>Hybrid Traffic Congestion Control Based on 2-D Hurwitz-Schur Stability</td>
<td>61</td>
</tr>
<tr>
<td>Stability Analysis for 2-D Discrete Systems with Varying Delay</td>
<td>67</td>
</tr>
<tr>
<td>2-D IIR Filter Bank Design by An LMI Approach</td>
<td>73</td>
</tr>
<tr>
<td>Linear Models for Plasma Current Control in Tokamak Reactors</td>
<td>78</td>
</tr>
</tbody>
</table>

### SESSION WA4: SENSOR NETWORK SYSTEMS

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Palm Size Charging Platform with Uniform Wireless Power Transfer</td>
<td>85</td>
</tr>
<tr>
<td>Distributed RSSI-Sharing for Two-Way Ranging Base Station Selection</td>
<td>90</td>
</tr>
<tr>
<td>A Lower Bound on Expected Localization Error in Wireless Sensor Network</td>
<td>96</td>
</tr>
<tr>
<td>Sensor Deployment Strategy for Random Field Estimation: One-Dimensional Case</td>
<td>104</td>
</tr>
<tr>
<td>Real Time Implementation of Modified Repetitive Control Strategy in a DC Motor</td>
<td>109</td>
</tr>
</tbody>
</table>

### SESSION WA5: MAN-MACHINE INTERACTIONS

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Intuitive Robot Tool Path Teaching using Laser and Camera in Augmented Reality Environment</td>
<td>114</td>
</tr>
<tr>
<td>An FSM Based GUI Test Automation Model</td>
<td>120</td>
</tr>
<tr>
<td>A Motion-based Visual Interface for 3D Visualization and Robotic Control Applications</td>
<td>127</td>
</tr>
<tr>
<td>Advanced Virtual Testbeds: Robotics Know How for Virtual Worlds</td>
<td>133</td>
</tr>
</tbody>
</table>
Service Discovery using Software Agents in Semantic Web ................................................................. 139
Nandini S. Sidnal, Ravi S Malasethty, Santikumar S. Mantri

SESSION WA6: MODELING AND IDENTIFICATION

Identification of the Parameters of Robot Manipulators Dynamics about an Operating Point using Perturbed Dynamics ................................................................. 144
Azeddien Kimshwek, Zahari Taha

Descriptor Modeling and Response Analysis of Two Rigid-Flexible Cooperative Arms .................................................. 149
E. Samiei, M. Shafiee

Topology Prpresentation and Analysis of Carton Manipulation ........................................................................ 157
Guowei Wei, Ruorui Zhang, Jian S. Dai

Finite Element Modelling of Rolling Indentation for Tissue Adomainty Identification ........................................... 163

The Narcissistic Robot: Robot Calibration Using a Mirror ................................................................................ 169
Matthias Ruther, Martin Lenz, Horst Bischof

SESSION WA7: ROBOT CONTROL I

A Learning Approach to Optimize Walking Cycle of a Passivity-based Biped Robot .................................................. 175
Nima Fatehi, Masoud Asadpour, Adel Akbarimajd, Laila Majdi

Bipedal Robot Walking Strategy on Inclined Surfaces Using Position and Orientation Based Inverse Kinematics Algorithm .................................................................................. 181
Faez Ali, Alza Che Aman, Atsuo Kawamura

Experimental Investigation of Fundamental Properties of Snake Robot Locomotion .............................................. 187
Pål Liljeback, Kristin Y. Petersen, Oyvind Stavdahl, Jan Tommy Gravdahl

NARMA-L2 Controller for 2-DoF Underactuated Planar Manipulator ........................................................................ 195
Adel Akbarimajd, Solmaz Kia

Cell Sorting with Combined Optical Tweezers and Microfluidic Chip Technologies ................................................ 201
Xiaolin Wang, Zuankai Wang, Dong Sun

SESSION WA8: VISION APPLICATIONS

On Line Quality Inspection in Tailor Welded Blank Based on Laws Texture Energy and Structured Light ...................... 207
Zhang Chengqiang, Xu Min, Zhao Mingyang, Luo Haibo

Computed Tomography Guided Laparoscopy: Proof of Concept .............................................................................. 213
Adrian Park, Erica Sutton, Raj Shekhar

Exposure Balancing and Difference Blurring to Eliminate Seam-lines in a Real-time Bird's Eye View Monitor ................ 216
Hong Sangseok, Lee JinSoo, Choi Sang-Bok

Correction of Paradoxical Vision by Simulated Depth Cue and Inverted Mirror Image for Laparoscopic Surgery ........... 222
Takuro Ishii, Chang-Ping Ku, Tatsumi Igarashi, Hirofumi Makino, Yukio Naya

Retinal Blood Vessel Segmentation via Graph Cut ................................................................................................. 225
Ana G. Salazar-Gonzalez, Yongmin Li, Xiaohui Liu

SESSION WM2: PROCESS CONTROL

Relative Gain Array for MIMO Processes Containing Integrators and/or Differentiators .............................................. 231
Wuhua Hu, Wen-Jian Cai, Guoxi Xiao

Overriding Control for Stability with Manifest Variables ......................................................................................... 236
Tri Tran

Output Feedback Control for Nonlinear System based on Local Linear Model Trees (LOLIMOT) .................................. 242
Yan Zhang, Linan Zuo, Peng Yang, Guolin Xing

Applications of Convex Optimization in Plant-wide Control of Membrane Distillation Bio-Reactor (MDBR) Water Recycling Plant ............................................................................... 246
Avinash Vijay, K. V. Ling, A. G. Fane

First and Second Moment Control of Linear Stochastic Discrete Time Systems .................................................. 252
Fateme Rohani, Hamid Kholoozadeh, Roys Amjedifard

Investigation of Thermal Effect in Permanent Magnet Linear Motor Stage ............................................................ 258

SESSION WM3: CO-OPERATIVE CONTROL

Asymptotic Synchronization and Collision Avoidance for Multi-agent Flocking ...................................................... 263
Zhiyong Chen, Hui-Tao Zhang, Chao Zhai

Weight Balance for Directed Networks: Conditions and Algorithms ........................................................................ 269
Yuan Fan, Gang Feng, Yong Wang
<table>
<thead>
<tr>
<th>Session WM4: Adaptive Control</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Well-Posedness of Two Classes of Singular Distributed Parameter Systems in Hilbert Space</td>
<td>299</td>
</tr>
<tr>
<td>Feedforward Multiple Harmonic Control for Periodic Disturbance Rejection</td>
<td>305</td>
</tr>
<tr>
<td>Adaptive Control of a Class of Nonlinear Systems using Support Vector Regression</td>
<td>311</td>
</tr>
<tr>
<td>A Sub-Region Boundary-Based Control Scheme with a Least-Squares Estimation Algorithm for an Underwater Robotic System</td>
<td>317</td>
</tr>
<tr>
<td>An Adaptive Region Boundary-Based Control Scheme for an Autonomous Underwater Vehicle</td>
<td>324</td>
</tr>
<tr>
<td>Decentralized Adaptive Practical Tracking of Nonlinear Interconnected Systems with Dynamic Input and Output Interactions</td>
<td>330</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Session WM5: Process Automation</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Optimization of Reclaiming Voxels for Quality Grade Target with Reclaimer Minimum Movement</td>
<td>341</td>
</tr>
<tr>
<td>Automated Modeling and Analysis of Agent-based Simulations using the CASE Framework</td>
<td>346</td>
</tr>
<tr>
<td>A FDD Method by Combining Transfer Entropy and Signed Digraph and its Application to Air Separation Unit</td>
<td>352</td>
</tr>
<tr>
<td>A Multi-Purpose Remote Controller Based on Bluetooth Mobile Phone</td>
<td>358</td>
</tr>
<tr>
<td>Speed Optimization for Micropipette Motion during Zebrafish Embryo Microinjection</td>
<td>364</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Session WM6: Mobile Robotics I</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Experiences with Online Local Model Predictive Control for WMR Navigation</td>
<td>370</td>
</tr>
<tr>
<td>A Robust Downward-Looking Camera Based Velocity Estimation with Height Compensation for Mobile Robots</td>
<td>378</td>
</tr>
<tr>
<td>Neuro-Fuzzy Based Autonomous Mobile Robot Navigation System</td>
<td>384</td>
</tr>
<tr>
<td>An Effective Collaborating Algorithm for Swarm Robots Communicating by Seamountic Stigmergy</td>
<td>390</td>
</tr>
<tr>
<td>X-band Radar Based SLAM in Singapore's Off-shore Environment</td>
<td>398</td>
</tr>
<tr>
<td>On Leader-Based Shape Coordination</td>
<td>404</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Session WM7: Localization, Navigation, and Mapping I</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>SLAM with Salient Line Feature Extraction in Indoor Environments</td>
<td>410</td>
</tr>
<tr>
<td>Role-Based Path Planning and Task Allocation with Exploration Tradeoff for UAVs</td>
<td>417</td>
</tr>
<tr>
<td>Line-based SLAM with Slow Rotating Range Sensors: Results and Evaluations</td>
<td>423</td>
</tr>
<tr>
<td>Large-Scale Monocular SLAM by Local Bundle Adjustment and Map Joining</td>
<td>431</td>
</tr>
</tbody>
</table>
Static and Dynamic Fusion for Outdoor Vehicle Localization ................................................................. 437
Optimal Transmission Power Selection under Energy Constraints for Sensor Network Localization ..................... 443

SESSION WM8: HUMAN CENTERED SYSTEMS

A Haptic Training Environment for the Heart Myoblast Cell Injection Procedure ........................................ 448
Vu Thanh Le, Sacid Nahavandi, Doug Creighton
Hierarchical Learning Approach for One-shot Action Imitation in Humanoid Robots ........................................... 453
Yan Wu, Yuanzhe Demiris
Saliency Ranking for Benthic Survey using Underwater Images ........................................................................... 459
Matthew Johnson-Roberson, Oscar Pizarro, Stefan Williams
On the Collaboration of an Automatic Path-planner and a Human User for Path-Finding in Virtual Industrial Scenes .......................................................................................................................... 467
N. Ladreveze, J-Y. Fournet
Automatic Gait Characterization for a Mobility Assistance System ................................................................. 473
Cong Zong, Mohamed Chetouani, Adriana Tapus
Just-in-time Cooperative Simultaneous Localization and Mapping .................................................................. 479
Adrian Martin, M. Reza Emaani

SESSION WP2: IDENTIFICATION AND ESTIMATION I

An Unscented Kalman Filtering Approach for Nonlinear Singular Systems ....................................................... 485
Shouwen Pan, Hongyu Su, Zhibin Liu, Pu Li
Identification of Wiener Systems Based on Fixed Point Theory ........................................................................ 491
Guoqi Li, Changyun Wen
Robust Tracking in Mixed LOS/NLOS Environments ....................................................................................... 497
Lili Yi, Chin-Heng Lim, Chong-Meng See, Sirajudeen Gulam Razul, Zhijing Lin
Convex Formulations for Data-Based Uncertainty Minimization of Linear Uncertainty Models ....................... 501
Kurt E. Haagblom
Noise Covariance Estimation using Dual Estimation for Disturbance Storm Time Index Application ................. 506
Boonsri Kaewkham-Ai, Kasemsak Uthaichana

SESSION WP3: COMPLEX SYSTEMS

Stability of Complex Systems with Mixed Connection Configurations under Shared Control ............................. 512
Tri Tran, Hung T. Nguyen, Q. P. Ha
Controllability of Fractional Impulsive Neutral Functional Integrodifferential Inclusions with Infinite Delay in Banach Spaces ................................................................................................................. 518
Zhixin Tai, Xingcheng Wang
Routing Strategy with Waiting Time on Scale-free Network .............................................................................. 523
Dan Wang, Yanping Li, Wenhui Liu, Liang Dong, Lin Li
Static Output Feedback Control for Continuous Descriptor Systems ............................................................. 527
Yu Zheng, Jun-e Feng, Lin Sun, Juan Yao
Active Sway Control of a Single Pendulum Gantry Crane System using Output-Delayed Feedback Control Technique ........................................................................................................................................... 532
Rajeeb Dey, Nishant Sinha, Priyanka Chaubey, S. Ghosh, G. Ray

SESSION WP4: NETWORKED SYSTEMS

Sensor Scheduling with Limited Communication Energy and Bandwidth .......................................................... 537
Ling Shi, Peng Cheng, Jioning Chen
Feedback Stabilization over Stochastic Multiplicative Input Channels: Continuous-Time Case ........................... 543
Nan Xiao, Lihua Xie
Graphic Interpretations of Structural Controllability for Switched Linear Systems .......................................... 549
Xiaomeng Liu, Hai Lin, Ben M. Chen
Particle Filter Based Human Motion Tracking ................................................................................................ 555
Zhenning Li, Dana Kulis
Convergence and Mean Square Stability of Optimal Estimators for Systems with Measurement Packet Dropping .............................................................................................................................. 561
Haanshui Zhang, Xumin Song, Ling Shi

SESSION WP5: SEARCH, RESCUE, AND FIELD ROBOTICS

Chiemela Onunka, Glen Bright
SESSION TA1: ROBUST CONTROL I

Extended Blending Techniques with Applications in Robust Tracking Control and Fault-tolerant Control ............................................................ 911
   Jun Xu, Lihua Xue, Kai Yew Lam
Nonsmooth μ Synthesis ........................................................................................................... 917
   Pierre Aperarian, Hoang Duong Tuan
Characterizing Approximated Differentiators in Digital Control .................................................. 923
   Hisaya Fajjoka
Mixed Nonlinear-Sliding Mode Control of an Unmanned Farm Tractor in the Presence of Sliding ................................................................. 927
   Alexey S. Matveev, Michael Hoy, Andrey V. Savkin
An Integral SMC Based Approach to Time-delay System Tracking .................................................. 933
   Gang Liu, Alan Zinobir, Yuri Shvess
Navigation of an Unmanned Helicopter in Urban Environments ......................................................... 939
   Michael Hoy, Andrey Savkin, Matt Garrott

SESSION TA2: INTELLIGENT SYSTEMS

Conditioned Switching between Two-Degree-of-Freedom Controllers for Plants with Changing Dynamics .............................................................. 945
   Joseph J. Yame, Guo Hanping
Estimation of Next Human Behavior and its Timing for Human Behavior Support ......................... 952
   Kae Doki, Kohjiro Hashimoto, Shinsa Doki, Shigeru Okama, Akiko Torii
A Metamodel for Background Ozone Level using Radial Basis Function Neural Networks ............................. 958
   Herman Whid, Q. P. Ha, Hiep Nguyen-Duc
Hardware-in-the-Loop Simulation of Automatic Steering Control: Outer-Loop and Inner-loop Control Design .......................................................... 964
   Em Poh Ping, Khisbullah Hadha, Mohd Hanif Bin Harun, Hishamuddin Jamaludin
Automatic Synthesis of Reactive Agents ....................................................................................... 970
   Inuo Song, Guido Governatori, Joachim Diederich
Generating Scenarios for a Mobile Robot with an Arm - Case Study: Assistance for Handicapped Persons ............................................................ 976
   P. Morignot, M. Soury, C. Leroux, H. Vorbrieva, P. Hede

SESSION TA3: LOCALIZATION, NAVIGATION, AND MAPPING II

Maintaining Visibility of a Moving Target: Maximizing Escape Time vs. Exposure Time ...................................................... 982
   Ibrahim Al-Bluwi, Ashraf Elnagar
An Omnidirectional Time-of-Flight Camera and its Application to Indoor SLAM ........................................ 988
   Katrin Pirker, Matthias Ruther, Horst Bischof, Gerald Schweighofer, Heinz Mayer
Ground-Plane Classification for Robot Navigation - Combining Multiple Cues Toward a Visual-Based Learning System ........................................................................ 994
   Tobias Low, Antoine Manzanera
Mapping Large Scale Environments by Combining Particle Filter and Information Filter ................................................................. 1000
   Mahesh Mohan, K. Madhava Krishna
Map-aided 6-DOF Relative Pose Estimation for Monocular SLAM using Sparse Information Filters ......................................................... 1006
   Zhaow Wang, Gaminidi Dissanayake
Robotic Mapping with Simple Sensing and Processing Hardware - Algorithm and Architecture .................................................. 1012
   Leena Vachhuni, K. Sridharan

SESSION TA4: INSTRUMENTATION SYSTEMS

A New Methodology of Continuous and Noninvasive Blood Pressure Measurment by Pulse Wave Velocity .............................................................. 1018
   Yan Chen, Chuangyun Wen, Guocai Tao, Min Bi
Mechanoinduction of Reduction in the Stiffness of Zebrafish Chorion ......................................................................................... 1024
   Joo Hoo Nam, Peter C. Y. Chen, Zhe Lu, Hong Luo, Ruowen Ge, Wei Lin
Approximate Entropy-based Leak Detection using Artificial Neural Network in Water Distribution Pipelines .......................................................... 1029
   Yang Jin, Wen Yame, Li Ping
Service-Provider Architecture for Dynamically Reconfigurable Virtual Instruments in Networked Environments ......................................................... 1035
   B. Sandaramurthy, P. Dananjayan
Unsteady Flow Rate Generating System for Gas using Isothermal Tank based on Disturbance Observer .................................................. 1040
   Xiaowei Wang, Tao Wang, Guangzheng Peng, Yanbing Tian
Prototype Development of Hybrid Temperature Recorder Monitoring System .................................................. 1045
   Olurn Wongwirat, Keelati Oonchom, Benjavorn Arnuttinanon
SESSION TA5: COLLABORATIVE UAV AND UGV SYSTEMS

Cooperative Ground Target Tracking with Input Constraints .......................................................... 1051
S. J. Abdullah, M. M. Ratnam, Z. Samad

Formation Control of Multi-robot Systems ................................................................................. 1057
Shuai Liu, Chunlin Chen, Lihua Xie, Yeong-Hwa Chang

Federated DyKnow, a Distributed Information Fusion System for Collaborative UAVs .................. 1063
Fredrik Heintze, Patrick Doherty

Generating UAV Communication Networks for Monitoring and Surveillance ........................... 1070
Per-Magnus Olsson, Jonas Kvarnstrom, Patrick Doherty, Oleg Bardukov, Kaj Holmberg

Automated Planning for Collaborative UAV Systems ................................................................... 1078
Jonas Kvarnstrom, Patrick Doherty

SESSION TA6: IMAGE/VIDEO ANALYSIS I

Focus Measure in a Liquid-Filled Diaphragm (LFD) Lens using Passive Auto-focus Method .......... 1086
S. J. Abdullah, M. M. Ratnam, Z. Samad

Online Background Learning for Illumination-robust Foreground Detection ............................... 1093
Dawei Li, Lihong Xu, Erik Goodman

An Automatic System for Multi-View Face Detection and Pose Estimation ................................. 1101
Yang Ying, Han Wang, Juan Xu

Nonuniformity Correction of Infrared Images based on Bivariate Quadratic Model ...................... 1109
Xiubao Sai, Qian Chen, Guohua Gu, Ning Liu

Preliminary Investigation of Thermal Hartmann Wavefront Sensing .......................................... 1116
Liping Zhao, Kelvin Jiau Aun Oei, Xiang Li, Lay Kee Ang

A Novel Fractional-order Signal Processing Based Edge Detection Method .................................. 1122
Haibo Tang, Tongqiang Ye, Danwei Wang, Bin Jiang

SESSION TA7: COMPUTER VISION & PATTERN RECOGNITION

License Plate Localisation based on Morphological Operations .................................................. 1128
Xiaojun Zhai, Faycal Bensoali, Soodamani Ramalingam

Edge Detection Comparison for License Plate Detection .............................................................. 1133
Zowena Musromy, Soodamani Ramalingam, Nico Bekoozy

Efficient Character Segmentation on Car License Plates .............................................................. 1139
Lihong Zheng, Junbin Gao, Xiangjian He

Human Detection Using Local Shape and Non-Redundant Binary Patterns ................................ 1145
Duc Thanh Nguyen, Wangqing Li, Philip Ogunbona

Graph Matching Based Hand Posture Recognition using Neuro-Biologically Inspired Features .... 1151
P. Pramod Kumar, Prabhaditya Vakapilk, Lek Ai Poh

Face Recognition using Discrete Cosine Transform and Fisher Linear Discriminant .................... 1157
V. Vaidhe, N. T. Nareesh Babu, H. Avinash, M. D. Vimal, A. Sumitra, P. Balanurasadhar, Girish Chandra

SESSION TM2: FEATURE EXTRACTION, GROUPING AND SEGMENTATION I

Detection and Segmentation of Near-duplicate Fragments in Random Images ............................. 1161
Andrzej Slezek, Mariusz Paradowski, Yang Duanduan

A Systematic Approach for Rapid 3D Reconstruction from Photosets ........................................ 1167
Hoai Nam Le Tran, Kablien Sornum, Hock Soon Seah, Wentong Cai, Malcolm Yoke Hean Low, Suiping Zhou, Michael Lees

Image Segmentation of UV Pattern for Automatic Paper-Money Inspection ............................... 1175
Keun-Ho Lee, Tae-Hyoung Park

Fruit Detection, Tracking, and 3D Reconstruction for Crop Mapping and Yield Estimation .......... 1181
Jednijpat Moonrinta, Supawadee Chaivivatrakul, Matthew N. Dailey, Mongkol Ekpanyapong

Applying Training Hidden Features to Joint Curve Evolution for Brain MRI Segmentation ........ 1187
Mahesh Fauzinfar, Eam Khwang Teoh, Zhong Xue

Designing Compact Gabor Filter Banks for Efficient Texture Feature Extraction ....................... 1193
Weitao Li, KeZhi Mao, Hong Zhang, Tianyou Chai

SESSION TM6: COMPUTATIONAL INTELLIGENCE IN VISION

Profit of Extending Standard Relational Databases with the Intelligent Cluster Index (ICIxs) ........... 1198
Sebastian Lenoth, Alexander Adam, Wolfgang Benn

Ensembles of Novel Visual Keywords Descriptors for Image Categorization ............................... 1206
Azizi Abdullah, Remco C. Veltkamp, Marco A. Wiering

Real-Time Dense Digital Elevation Map Estimation using Laserscanner and Camera SLAM Process ................................................................................. 1212
Florent Malartre, Pierre Delmas, Roland Chapuis, Christophe Debain
A New SOM-based Active Contour Model using Conscience and Archiving Mechanisms .................................................. 1219
Fereshteh Sadeghi, Hamid Izadimost, Reza Safakhatkhoh

Color Rank and Census Transforms using Perceptual Color Contrast ........................................................................ 1225
Guangming Xiong, Xin Li, Jianwei Gong, Huiyan Chen, Duh-Jye Lee

Federico Tombari, Stefano Mattocchia, Luigi Di Stefano

SESSION TP1: SENSOR NETWORKS

Consensusability of Discrete-time Multi-agent Systems via Relative Output Feedback .............................................. 1239
Keyou You, Lihu Xie

Analysis of Mutual Information for Informative Forecasting Using Mobile Sensors ................................................. 1245
Han-Lim Choi, Jonathan P. How

Scalable Fusion with Mixture Distributions in Sensor Networks ............................................................................. 1251
K. C. Chang, Wei Sun

Framework of WSN Based Human Centric Cyber Physical In-pipe Water Monitoring System ............................ 1257
Adnan Nasir, Boon-Hee Soong, Selvakumarun Ramachandran

SESSION TP2: ADVANCES IN BIOMETRIC THEORY AND APPLICATIONS III

A Projection Framework for Biometric Scores Fusion ................................................................................................. 1262
Kar-An Toh

Design and Implementation of a Contactless Palm Print and Palm Vein Sensor ......................................................... 1268
Goh Kiah Ong Michael, Tee Connie, Andrew Teoh Beng Jin

A Metric of Identification Performance of Biometrics based on Information Content ........................................ 1274
Seira Hidano, Tetsushi Okhi, Naohisa Komatsu, Kenta Takahashi

A Comparative Study of Local Feature Extraction for Age Estimation ................................................................. 1280
Sung Eun Choi, Yoon Joo Lee, Sang Joo Lee, Kang Ryoung Park, Jiahie Kim

Dynamic Detection Rate-based Bit Allocation for Biometric Discretization ........................................................... 1285
Meng-Hui Lim, Andrew Beng Jin Teoh

SESSION TP3: ROBUST CONTROL II

Reaching Law Based Sliding Mode Control for Discrete MIMO Systems ............................................................. 1291

Design of Multirate Output Sampling based Linear Functional Observer and State Feedback ............................ 1297
S. Janardhanan, N. Satyanarayana

Right/Left Inverses of Polynomial Matrices for Control, Communications and Vision .................................... 1302
Wojciech P. Hunek, Krzysztof J. Latatawiec, Mariusz Lukaszyn

Passivity-Preserving Frequency Weighted Model Order Reduction Techniques for General Large-Scale RLC Systems .................................................................................................................. 1310
Jan Mariam Wan Muda, Victor Seeraram, Herbert Ho-Ching Bu

Automotive Driveline Control by a Nonlinear Nonparametric QFT Method ......................................................... 1316
A. Abbas, A. T. Shenton

A Slightly Improved Robust Adaptive Observer for Actuator Fault Detection ....................................................... 1322
Kamel Menighed, Joseph J. Yame, Christophe Aubrun

SESSION TP4: INTELLIGENT DIAGNOSIS AND PROGNOSIS

An exTS based Neuro-Fuzzy Algorithm for Prognostics and Tool Condition Monitoring .................................. 1329
O. Massol, X. Li, R. Gouriveau, J. H. Zhou, O. P. Gun

A Knowledge Base System for Rotary Equipment Fault Detection and Diagnosis .............................................. 1335
Ming Yu, Danwei Wang, Ming Luo, Danhong Zhang

FDI and Fault Estimation based on Differential Evolution and Analytical Redundancy Relations .......................... 1341
O. Geramifard, J.-X. Xu, J.-H. Zhou, X. Li

Continuous Health Assessment using a Single Hidden Markov Model ............................................................... 1347
S. P. Chan, K. M. Goh, H. L. Chan, T. Y. Lim, K. V. Ling

Towards Machine Diagnostics on Chip .................................................................................................................... 1353
O. Geramifard, J.-X. Xu, J.-H. Zhou, X. Li

Flute based Analysis of Ball-Nose Milling Signals Using Continuous Wavelet Analysis Features ........................ 1359
Amin J. Torabi, Olivier Massol, Dr. Meng Joo, Li Xiang, Lim Beng Siong, Guo Oon Poo, Huang Sheng, Sudham Raj Gopalralkhan, Zhai Lianyin, San Linn

SESSION TP5: VARIABLE STRUCTURE CONTROL SYSTEMS

Natural Logarithm Sliding Mode Control (ln-SMC) using EMRAN for Active Engine Mounting System .................. 1365
Andika Aji Wijaya, Wahyudi Akmeliauwati, R. Akmeliauwati, Fadly Jashi Darsivan
Convergence Accuracy Analysis of Discretized Sliding Mode Control Systems ................................................................. 1370
Bin Wang, Xinghao Yu, Liqing Wang

Navigation of Four-Wheel-Steering Mobile Robots using Robust Fault-Tolerant Sliding Mode Control ...................................................... 1375
Mudashanka Nishan Dharmaweera, Sui Yang Khoo, Zhihong Man

Leader-follower Consensus Control of a Class of Nonholonomic Systems ................................................................................. 1381
Suiyang Khoo, Lihua Xie, Zhihong Man

Quantization of Optimal Control System & Synthesis of Optimal Controls of Quantum Diffusion Process .................................................. 1387
B. C. Roy

A Nonlinear Exponential Observer for a Batch Distillation .............................................................................................................. 1393
Amiya K. Jana

SESSION TP6: AUTONOMY OF VEHICULAR SYSTEMS I

A Real-Time Robust Global Localization for Autonomous Mobile Robots in Large Environments .......................................................... 1397
Jiaping Xie, Fawzi Nashashibi, Michel Parent, Olivier Garcia Favrot

The ArosDyn Project: Robust Analysis of Dynamic Scenes ............................................................................................................ 1403
Igor E. Paromtchik, Christian Laugier, Mathias Perrollaz, Mao Yong, Amaury Negre, Christopher Tay

Detection of Unfocused Raindrops on a Windscreen using Low Level Image Processing ................................................................. 1410
Fawzi Nashashibi, Raoul de Charette, Alexandre Lia

Visibility Distance Estimation based on Structure from Motion ....................................................................................................... 1416
Clement Bourlard, Nicolas Hautoire, Brigitte d’Andrea-Novel

Collaborative Multi-Vehicle Localization and Mapping in High Clutter Environments ................................................................. 1422
Moratunwage M. D. P., W. S. Wijerupage, B. Kalyan, Nicholas M. Patrikalakis, Peyman Moghadam

Hardware and Software Architecture for AUV based on Low-cost Sensors .................................................................................. 1428
Alain Martinez, Yidier Rodriguez, Luis Hernandez, Carlos Guerra, Ilhem Sahli

SESSION TP7: VISUAL SERVOING

Direct Visual Servo Control of a Robot to Track Trajectories in Supervision Tasks ........................................................................... 1434
Gabriel J. Garcia, Carlos A. Jara, Jorge Pomares, Fernando Torres

Visual Servoing using Triangulation with an Omnidirectional Multi-Camera System ........................................................................... 1440
Bernhard Weber, Kolja Kuhnlenz

Vision-Based Path Planning with Obstacle Avoidance for Mobile Robots using Linear Matrix Inequalities ............................................. 1446
Wei Feng Huang, Anan Osothsilp, Farzad Pourbohrat

An Intelligent Space for Mobile Robot Navigation with On-Line Calibrated Vision Sensors ............................................................ 1452
Wen-Chang Chang, Ping-Rang Chu

A Novel Position-Based Visual Servoing Approach for Robust Global Stability with Feature Points Kept within the Field-of-View ........................................................................................................... 1458
Haoyan Wu, Lei Lou, Chih-Chung Chen, Sandra Hirche, Kolja Kuhnlenz

A Framework of Networked Visual Servo Control System with Distributed Computation ................................................................. 1466

SESSION II: INTERACTIVE SESSION II

Simple Analytic Formulas for PID Tuning ........................................................................................................................................... 1472
Wu Hua, Guanxiao Xiao, Wen-Juan Cai

An Optimal Point-wise Control Method for Parabolic Distributed Parameter Systems ................................................................. 1478
Qun Li, Ning Li, Shuyuan Li

Decoupling the Control Variables of a Plant in Presence of Time Delay ......................................................................................... 1483
Julian Fuchs, Ulrich Konigorski

Modelling of a Hot Water Drum and Heat Exchanger Process Control Training System ................................................................. 1489
Belinda Chong Chiew Meng, Mohd Nor B. Mohd Than

Fractional-Order Generalized Predictive Control: Formulation and some Properties ......................................................................... 1495
Miguel Romero, Angel P. de Madrid, Carolina Manoso, Blas M. Fainagre

Harmonic Excitation Based Autotuning - Autotuning Usable for Control of Biomass Combustion Processes ................................. 1501
Stanislav Vrana, Bohumil Sale

On-line Identification and Control Methods for PID Controllers ........................................................................................................ 1507
Utkal Mehta, Somanath Majhi

Shaping Nonlinear Modal Manifold of Internal Resonance System .................................................................................................... 1512
Ta-Ming Shih

Analysis and Application of Trajectory in Discrete-time System ...................................................................................................... 1519
Fang Jianhui, Liu Kai

Two Flat Normal Forms for a Class of Nonlinear Dynamical Systems ............................................................................................. 1524
Bin Wang, Xinghao Yu, Liqing Wang

Nonlinear Disturbance Decoupling for a Nonholonomic Mobile Robotic Manipulation Platform .......................................................... 1530
Joel Jimenez-Locano, Bill Goodwine

Real-time INS/GPS Data Fusion using Hybrid Adaptive Network Based Fuzzy Inference .................................................................... 1536
M. Malleswaran, J. Mary Anita, S. N. Subreen, V. Vaidehi
SESSION FA1: NONLINEAR SYSTEMS

Robust Stabilization using Time-scaling and Lyapunov Redesign: The Ball-beam System ................................................................. 1661
T. R. Marathi, Arun D. Mahindrakar

Lyapunov Based H∞ Controller Design in Multimachine Power Systems ..................................................................................... 1667
Maryam Dehghani, Seyyed Kamaleddin Nikravesh

Multi Objective Evolutionary Programming to Solve Environmental Economic Dispatch Problem ...................................................... 1673
Bo-Yang Qui, P. N. Suganthan, V. R. Pandi, B. K. Panigrahi

Adaptive Control of Singular Nonlinear Systems with Convex/Concave Parametrization .......................................................... 1680
Fang Qingxiang, Cao Feilong

Multi-layer Moving-window Hierarchical Neural Network for Modeling of High-density Polyethylene Cascade
Reconstruction Process .............................................................................................................................................................................. 1684
Yuan Xu, Qunzhi Zhu

Vehicle Formation Analysis based on Zero Dynamics for Road Traffic System .............................................................................. 1688
Di-Hua Sun, Tong-Fu Li

SESSION FA2: NETWORKED CONTROL SYSTEMS

Synchronization of Networked Harmonic Oscillators under Nonlinear Protocols ................................................................. 1693
Shang Han Cho, Sangjin Hong

Inertial Sensor Data Compression using Modified ADPCM ........................................................................................................ 1699
Young Soo Suh, Young Shick Ro, Hae Jun Kang

Dense SIFT and Gabor Descriptors-Based Face Representation with Applications to Gender Recognition .......................................................... 1860
Jian-Gang Wang, Jun Li, Chong Yee Lee, Wei-Yun Yan

SESSION FA7: IMAGE/VIDEO ANALYSIS II

A Neural Network Model with Adaptive Structure for Image Annotation .......................................................... 1865
Zenghui Chen, Hong Fu, Zhrea Chi, Dagan Feng

Novel Gray-scale Watermarking Algorithm based on QFT ................................................................................. 1871
Chi Zhao, Weijiang Wang, Xiphei Huang

Vision-Based Lane Departure Detection System in Urban Traffic Scenes ......................................................... 1875
Yu-Chi Leng, Chieh-Li Chen

A Method for the Segmentation of Connected Handwritten Persian Digits .................................................. 1881
Fattansch Tahori Aslhiyani, Karim Faez

A 3D Reconstruction System based on Improved Spacetime Stereo ................................................................. 1886
Federico Tombari, Luigi Di Stefano, Stefano Mattoccia, Andrea Mainetti

SESSION FM1: CONTROL APPLICATIONS I

Precision Motion Control for the Parallel Mechanism of Virtual Axis Machine Tool .......................................................... 1894
Gao Guoping, Luo Yan, Jiang Daosgen, Liu Xinjun

Designing and Simulating of H∞ Controller for Flexible Aircraft ..................................................................... 1900
Meng Wen-Jie, Li Ai-Jun, Tan Jian, Wang Chang-Qing

Temperature and Humidity Control in Livestock Stables ......................................................................................... 1905
Jian Yao, Shuxia Ye, Weiqun Wang

Backstepping Based Nested Multi-Loop Control Laws for a Quadrotor ............................................................ 1911
Erik De Fries, Kamesh Subbarao

Nonlinear 3-D Trajectory Guidance for Unmanned Aerial Vehicles ........................................................................ 1923
Moussami Ahmed, Kamesh Subbarao

SESSION FM2: DELAY SYSTEMS

Sensor Fusion of Delay and Non-delay Signal using Ensemble Kalman Filter with Moving Covariance ...................... 1928
Yucheng Zhou, Jialie Xu

Synchronization of Non-autonomous Chaotic Systems with Time-Varying Delay via Delayed Feedback Control .......................................................... 1934
Thongchai Botmart, Piyapong Niamsup, Xinchi Liu

Impulsive Exponential Stabilization of Discrete Population Growth Models with Time Delays .................................................. 1940
Yu Zhang, Jiato Sun

Control of Unstable PDE with Long Input Delay ............................................................................................................. 1945
Yangyang Zhang, Chengfang Xie

Robust Stabilization of 2-D State-delayed Systems with Stochastic Perturbation .......................................................... 1951
Bruno Steux, Oussama El Hamzaoui

Decoupling MIMO Systems with Multiple Input/Output Time Delays ................................................................. 1957
Pedro Albertos, Pedro Garcia

SESSION FM3: MOBILE ROBOTICS III

A Novel Approach to Motion Modeling using Fuzzy Cognitive Map and Artificial Potential Fields .......................................................... 1963

Mobile Robot Localization using Feature Based Fuzzy Map Matching .............................................................. 1968
Haoming Xu, John James Collins

tinySLAM : A SLAM Algorithm in less than 200 Lines C-Language Program .......................................................... 1975
Bruno Steux, Oussama El Hamzaoui

A DSP FPGA Based Hardware-in-the-Loop Testing Platform .................................................................................. 1980
Ta-Ming Shih, Ho-Chung Chang

A Fast Scan Matching for Grid-based Laser SLAM using Streaming SIMD Extensions ............................................ 1987
Oussama El Hamzaoui, Bruno Steux

SESSION FM4: FACTORY MODELING AND SIMULATION

Generic Data Types for Planning and Control in Intermodal Freight Transshipment Applications .......................................................... 1991
Dieter Zoebel, Christian Weyand

Periodic Stable Robustness of Serial Production Line with Single Processing Parameter Perturbation based on Maxalgebra ............................................................................. 1997
Daoping Li, Xiaolan Yao, Qinghe Wu, Xiaodong Zhang
Ontology-Based Product Knowledge Integration in Mobile Environment ................................................................. 2001
Xao Li, Zongyu Xie, Kai Sun, Hong Liu, Yongjun Zheng

Model Simplification for Accelerating Simulation-based Evaluation of Dispatching Rules in Wafer Fabrication
Tsung-Che Chiang

Facilities ........................................................................................................................................................................ 2005

Binary Neural Network Classifier and it's Bound for the Number of Hidden Layer Neurons ........................................... 2012
Narendra S. Chaudhari, Aruna Tiwari

Predicting Amount of Saleable Products using Neural Network Metamodels of Casthouses ........................................... 2018
Abbas Khosravi, Saied Nahavandi, Doug Creighton, Bruce Gunn

SESSION FM5: HUMAN ROBOT INTERACTION

Experimenting Extended Neglect Tolerance Model for Human Robot Interactions in Service Missions .......................... 2024
Mohab Bajest Elara, Carlos A. Acosta Caldeiron, Changzhu Zhou, Wijerupage Sandha Wijesuma

Modelling of Human Motor Control in an Unstable Task through Operational Space Formulation .............................. 2030
Shou-Han Zhou, Denny Oetomo, Iven Marveels, Etienne Burdet

Using Common Motion Patterns to Improve a Robot's Operation in Populated Environments ..................................... 2036
Stephan Sehestedt, Sarath Kodagoda, Gamini Dissanayake

Thinking Head: Towards Human Centred Robotics .................................................................................................. 2042
D. C. Herath, Christian Kroos, Catherine J. Stevens, Lawrence Cavedon, Prashan Premaratne

Fuzzy Direct Adaptive Control for Robotic Manipulators ............................................................................................... 2048
Daoxiang Gao, Qingchun Wang, Dunmin Lu

SESSION FM6: TRACKING AND SURVEILLANCE

Head Plane Estimation Improves the Accuracy of Pedestrian Tracking in Dense Crowds ............................................. 2054
Irshad Ali, Matthew N. Dailey

Robust Object Tracking using Local Oriented Energy Features and its Hardware/Software Implementation .................. 2060
Ehsan Norouznezhad, Abbas Bigdeli, Adam Postula, Brian C. Lovell

Omnidirectional Video Stabilisation on a Virtual Camera using Sensor Fusion .......................................................... 2067
Abbas Khosravi, Saeid Nahavandi, Doug Creighton, Bruce Gunn

Square Patch Feature: Faster Weak-Classifier for Robust Object Detection ................................................................. 2073
Yasir M. Mustafaj, Abbas Bigdeli, Amelia W. Azman, Farhad Dadgostar, Brian C. Lovell

A Hybrid Computational Model for Spoken Language Understanding ........................................................................ 2078
Guanggu Huang, Meng Joo Er

Frontal Face Classifier using AdaBoost with MCT Features .......................................................................................... 2084
Jongmin Yoon, Daejin Kim

SESSION FM7: PATTERN RECOGNITION

3D Object Recognition via Multi-View Inspection in Unknown Environments .............................................................. 2088
Jamie Westell, Parvaneh Sezadi

Large Object Detection in Cluttered Background using Boosted Markov Chain Monte Carlo ....................................... 2096
Sungso Kim, Jungho Kim, Chaehoon Park, In So Kweon

Exploiting Feature Dynamics for Active Object Recognition ......................................................................................... 2102
Philipp Robbel, Deb Roy

Multiple Kernel Learning SVM-based EMG Pattern Classification for Lower Limb Control ........................................ 2109
Qingshan She, Zhizeng Luo, Ming Meng, Ping Xu

Classification of Abnormalities in Digitized Mammograms using Extreme Learning Machine ................................... 2114
G. Yani, S. Savitha, N. Sundararajan

A Divide-and-Distribute Approach to Single-Cycle Learning HGN Network for Pattern Recognition ......................... 2118
Anang Hudaya Mohammad Amin, Asad I. Khan

SESSION FP1: UNDERWATER ROBOTICS

Development of the Actuator Concentration Type Removable Underwater Manipulator .................................................. 2124
Fumiaki Takeamura, Reyes Tatsuura Shirokut

Adaptive Region Tracking Control for Autonomous Underwater Vehicle ................................................................. 2129
X. Li, S. P. Hou, C. C. Cheah

A Neuro-Fuzzy Controller for Underwater Robot Manipulators ...................................................................................... 2135
Shumugham R. Pandian, Norimitsu Sakagami

Design and Development of an Attitude Control System for a Human-sized ROV ..................................................... 2141
Norimitsu Sakagami, Takafumi Norimasa, Takeshi Ueda, Hideki Hashizume, Mizohe Shibata, Hiroaki Onishi, Shigeo Murakami, Sadao Kavamura
SESSION FP2: FEATURE EXTRACTION, GROUPING, AND SEGMENTATION II

A Unified 2D-3D Video Scene Change Detection Framework for Mobile Camera Platforms ................................................................. 2147
Wilson S. Leoputra, Tele Tan, Sutheva Venkatesh

Flying Vision System of Placement Machine for MEMS Microphone .................................................................................................. 2154
Liguo Chen, Jifeng Zhu, Weibin Rong, Lining Sun

Improve Library Shelf Reading using Color Feature Matching of Book-Spine Images ............................................................................. 2160
Spencer G. Fowers, Dah-Jye Lee, Guangming Xiong

A Fast and Robust Descriptor for Multiple-view Object Recognition .................................................................................................. 2166
Maja Rudinac, Pieter P. Jonker

Obstacle-Free Range Determination for Rail Track Maintenance Vehicles .............................................................................................. 2172
Frederic Maire, Abbas Bigdeli

Recognizing Human Motions from Surrounding Viewpoints Employing Hierarchical Eigenspaces ...................................................... 2179
S. M. Ashik Ejahab, Joo Kooi Tan, Hyounseop Kim, Seiji Ishikawa

SESSION FP3: NEURO-FUZZY CONTROL II

An Intelligent Control Approach for Blood Pressure System using Self-generating Fuzzy Neural Networks .................................................. 2185
Liu Fan, Er Meng Joo

Neural Network Based Minimal State-Space Representation of Nonlinear MIMO Systems for Feedback Control ........................................... 2191
Kristina Pasiciljeva, Eduard Pleskenko, Juri Bélion

Metrics for Measurement of Additive Noise to Weight in Sigmoidal FFANNs .................................................................................... 2197
Amit Prakash Singh, C. S. Rai, Pravin Chandra

Fuzzy Metering Control on the Auxiliary Road Signal of the Expressway Exit ..................................................................................... 2202
Yuan Changliang, Li Honghai

Designing a Fuzzy Logic Controller to Adjust the Angle of Tires in Four Wheel Steering Vehicles ......................................................... 2208
Ali Hakima, Sina Amei

An Enhanced Online Self-organizing Fuzzy Neural Network ................................................................................................................ 2214
L. Sun, M. J. Er, X. Li, L. Y. Zhai, A. J. Torabi

SESSION FP4: CONTROL APPLICATIONS

Improvement of Short-Span Seeking Performance in a Dual-Stage Hard Disk Drive Actuator ................................................................. 2221
Branislav Hredzak

Stabilization of a Circular Ball-and-Beam System ................................................................................................................................. 2227
Aakash A. Ravichandran, Arun D. Mahindrakar

Efficient Control System Development using Real-time Virtual Hardware-in-the-loop Simulation ................................................................. 2231
Jun Zhong, Yi Jin, Guang Lia, Guoliang Ding, Changan Zhu

Design and Development of a 4kW SMPS Power Supply with Long Term Short Circuit Capability ........................................................... 2237
Hai Li, Youyi Wang

A Unified Controller Design using two Different Types of Optimal Reset Control Laws for HDD Servo Systems .......................................... 2242
J. W. K. K. Jayasundara, W. T. M. S. Tennakoon

Model Predictive Control Based Efficient Operation of Battery Energy Storage System for Primary Frequency Control ...................... 2248
Muhammad Khalid, Andrey V. Savkin

SESSION FP5: IDENTIFICATION AND ESTIMATION II

Piecewise Linear Approximation of Sinusoidal Inputs for Process Identification .................................................................................. 2253
Salim Ahmed

Identification and Control of Nonlinear Systems using Piecewise Affine Models ................................................................................. 2259
Chun Yin Lai, Cheng Xiang, Tong Heng Lee

Nonparametric Modeling of Glucose-Insulin Process in IDDM Patient using Hammerstein-Wiener Model ................................................ 2266
Aparna Bhattacharjee, Amindita Sengupta, Ashoke Satradhar

Approximation by Discrete Hermite Interpolation ............................................................................................................................... 2272
Fengmin Chen, Patricia J. Y. Wong

Approximation by Discrete Spline Interpolation ................................................................................................................................. 2278
Fengmin Chen, Patricia J. Y. Wong

Optimal Estimation of the Central Normal of a Heliotstat using UKF .................................................................................................. 2284
Fen Xu, Wenfeng Liang

SESSION FP6: ROBOT SENSING, PERCEPTION, AND DATA FUSION

Sound Source Target Localization System of Mobile Robot .................................................................................................................. 2289
Zu Linan, Yang Peng, Sun Hao, Chen Lingling

Binaural Speaker Recognition for Humanoid Robots ........................................................................................................................... 2295
Karim Youssif, Sylvain Argentieri, Jean-Luc Zarader
SESSION FP7: ROBOT CONTROL II

Experimental Investigation of a Path Following Controller for Planar Snake Robots ............................................................... 2325
Phu L. Le Giabuck, Idar U. Haugstuen, Kristin Y. Pettersen
Centrifugal Force Compensation of a Two-Wheeled Balancing Robot .................................................................................... 2333
Michiaki Alrufaj, George Kantor
Design of Length Measuring System for Stewart Platform using New Forward Kinematics Solution .................................... 2339
Hamid Rezvani Dastgerdi, Mehdi Keshmiri
Robust Path Following Control of an Unmanned Boat .................................................................................................................. 2345
Zhenyu Yu
Dual-loop Adaptive Decoupling Control for Single Wheeled Robot - Based on Neural PID Controller ........................................ 2349
Xiaoyang Ruan, Qiyuan Wang, Naigong Yu
Trajectory Generation of Straightened Knee Walking for Humanoid Robot iCub .............................................................. 2355
Zhibin Li, Nikos G. Tsagarakis, Darwin G. Caldwell, Bram Vanderhorght

SESSION FI: INTERACTIVE SESSION III

Adaptive Generalized Minimum Variance Control for TCP/AQM ................................................................................................. 2361
Rooholah Barzamini, Masoud Shafiee
Variable Structure Control with Feedforward Compensator for Robot Manipulators subject to Load Uncertainties .......... 2367
Saolin Duan, Lanping Chen, Zhenghua Ma, Guirong Lu
Robust Coordinated Control of Hot Strip Mill Multivariable System .......................................................................................... 2373
Peng Kaxiang, Dong Jie
Nonlinear Sliding Mode Observers for Fault Reconstruction and State Estimations ................................................................. 2379
Kalyansa C. Velavolu, Yong Chai Soh
Sparse Structured H∞ Filter Design with for Linear Systems ....................................................................................................... 2385
Wei-Wei Che, Yan-Ping Li
Robust H∞ Model Reduction for a Class of Nonlinear Time-varying Systems with Time Delays ........................................... 2391
Mohammad Arif, Muhammad F. Mysorewala, Dan O. Popa, Lahouari Cheded, Mirza Salman Baig
Multi-objective Robust PID Controller Tuning using Multi-objective Differential Evolution ................................................. 2398
S.-Z. Zhao, B.-Y. Ou, P.-N. Suganthan, M. Willijuce Iruthayarajan, S. Barkar
Automatic Take-off Control System for Helicopter - An H∞ Approach ........................................................................... 2404
S. Suresh, P. Kashyap, M. Nabi
Self-learning Continuous Controllers ................................................................................................................................................ 2409
Otto Cerman, Petr Husek
A Comparative Analysis of LQR and Fuzzy Logic Controller for Active Suspension using Half Car Model ....................... 2415
Faried Hashbullah, Waleed F. Faris
Multidimensional Minimization Training Algorithms for Steam Boiler High Temperature Superheater Trip using Artificial Intelligence Monitoring System ................................................................. 2421
Firas Basim Ismail, Hussain H. Al-Kayiem
Integration of INS and GPS using Radial Basis Function Neural Networks for Vehicular Navigation .................................... 2427
M. Malleswaran, S. Anil Deborah, S. Manjula, V. Kumar
Environmental Monitoring and Air-conditioning Automatic Control with Intelligent Building Wireless Sensor Network .............................................................. 2431
Zheng Tao, Qin Yiquan, Gao Deyun, Zhang Hongke
Movement Persuit Control of an Offshore Automated Platform via a RAM-based Neural Network .................................. 2437
Horacio L. Franca, Joao Carlos P. da Silva, Massimo De Gregorio, Omar Lengerke, Max S. Dutra, Felipe M. G. Franca
Opportunistic 3D Trajectory Generation for the JPL Aerobot with Nonlinear Trajectory Generation Methodology .................. 2442
Wei均衡 Zhang, Tamer Inanc, Alberto Elfes
Surface-tracking of a 5-DOF Manipulator Equipped with Tactile Sensors .................................................................................. 2448
Jieguo Wang, Yangjun Li
Recurrent Neural Network Based Tracking Control .................................................................................................................... 2454
Zhao Xu, Qing Song, Danwei Wang
Distributed Control of Mobile Robotic Sensor Networks for Multi-level Barrier Coverage ...................................................... 2460
Teddy M. Cheng, Andrei V. Savkin
A Distributed Multi-robot Adaptive Sampling Scheme for Complex Field Estimation ........................................................... 2466
Muhammad F. Mysorewala, Dan O. Popa, Lahouari Cheded, Mirza Salman Baig
Interacting Multiple Models Based Classification of Moving Objects ...................................................................................... 2472
Julien Buret, Olivier Aycard, Qadeer Baig
