---

**Proceedings of the 2010 International Conference on Digital Manufacturing and Automation**

- A Fast Sea Interface Reverberation Suppression Method Based on Unitary Transformation .......................................................... 3  
  Yue-qin Li, Jin-ping Li, and Lei Han
- A Car-Steering Model Based on an Adaptive Cloud Neural Controller ................................................................. 7  
  Yu Shaowei, Li Xuhai, Liu Qingling, and Zhang Tongzhu
- A Category Theory Model for Learning and Memory of the Human Brain ................................................................. 11  
  Hong-jun Pan, Xiao-qi Yao, Chang-song Qi, and Hong-tao Chen
- A Cell Reconfiguration Method Based on Simulated Annealing Algorithm ................................................................. 15  
  Xu Dong, Hu Zhixin, Liu Shiping, and Ma Ning
- A Cooperative Making Multi-agent Model on Railway Daily Dispatching Plan Based on Blackboard ................................................................. 18  
  T. Zhu, G. Liu, and L.M. Jia
- A DC-DC Converter with New Symmetrical Clamp Circuit .................................................................................. 22  
  Xiaofang Wang
A Novel Recognition Approach Based on Multi-agent .................................................................92
Yong-mei Zhang, Li Ma, Qi Wei, and Yin-gang Yang

A Rational Cubic Spline Interpolation and Its Application ..........................................................96
Meng Tian and Qiuju Bian

A Real-Time Measurement Method of Temperature Fields and Thermal Errors in Machine Tools ..........................................................................................................................100
Chuang Chen, Jianfu Zhang, Zhijun Wu, Dingwen Yu, and Pingfa Feng

A Reconfigurable Video Moving Target Detection IP Core ..........................................................104
Liming Wu and Qi Wang

A Result on a Class of Nonlinear Switched Systems with Continuous-Time and Discrete-Time Subsystems .................................................................................................................109
Bai Xiaoming, Huimin Li, and Huimin Lu

A Robust Design Method for Fluid Line Dispensing ....................................................................113
Yi-Xiang Zhao and Xin-Du Chen

A Sequence Planning Approach of Models for Sequencing Mixed-Model Assembly Lines ................117
Zheng Yongqian, Wang Yongsheng, and Hu Bo

A Simulation Study on the Walking Hydraulic System for Tracked Nodule Collector for Sea Floor Mining on the Basis of AMESim Platform ...........................................................................121
Zeng Yihui, Liu Shaojun, Zhang Xiaojian, and Zeng Yihui

A Study of Safety Third-Party Logistics Information Management Model Based on Data Mining .................................................................................................................................127
Wanhua Meng

A Study on Biogas from Anaerobic Digestion with the Distiller’s Grains via Lactic Acid Fermentation ...........................................................................................................................132
Li-Hong Wang, Wang Qunhui, Sun Xiaohong, and Xin Zhao

A Study on the Measurement Model of China’s Forest Carbon Sinks Accounting ...........................................135
Zhang Ying

A Super High-Quality Roller Automatic Comprehensive Measuring System ................................141
Zhai Hua, Zhong Huayong, and Zhao Han

A Systematic Method for Identifying Contradiction of Casting Process .........................................145
Liu Feng and Yang Yi

A Unified Framework of Postprocessor for Multi-axis Machine Tools .............................................152
Liang Zhimin, Li Jiangang, Lou Yunjiang, and Li Zexiang

Adaptive Depth Measurement System of Bi-component Insulating Glass Sealing Robot ................156
Zhang Congpeng, Luo Xueke, and Wang Li
Analysis of Micro-segment Gear’s Contact Stress Based on Catia and Ansys ...........................................227
    Chen Qi, Zhao Han, and Huang Kang

Analysis of the Hydro-geochemical and Isotope Characteristics in Bangnanzhang-huangcaoba Hot Spring .................................................................................................................................231
    Hou Xinwei, Li Xiangquan, Zhou Zhichao, Liu Lingxia, Jiang Liangwen, Du Yuben, and Deng Hongke

Analysis on Energy Efficiency and Pollutant Reductions of Direct Sewage Source Heat Pump System .................................................................................................................................236
    Qian Jianfeng

Analysis on Moisture Stress in Building Walls of Porous Media .......................................................................240
    Long Jibo, Li Nianping, and Su Lin

Analysis on Servo Control of High-Quality Servo System ..................................................................................244
    Jiang Weihua and Wan Hao

APDL language-based optimization of tower crane ..................................................................................248
    Song Shijun, Li Lei, Wang Jiyong, and Mao Ruinian

Application of a Disturbance Rejection Method Based on Equivalent-Input-Disturbance on a Sealing Machine .............................................................................................................................252
    Jie Zhang, Min Wu, Jianqi An, and Jin-hua She

Application of Front-mounted Water Separation Propeller ...........................................................................256
    Qi Xiangyang, Chang Xin, Cheng Xiangru, and Wang Chao

Application of Genetic Algorithm-Based Artificial Neural Network in Prediction of Aircraft Engine Wear .................................................................................................................................260
    Jiang Xufeng, Guo Changying, Zhang Yuan, and Wang Jianbo

Application of Grey Correlation Method in Energy Consumption Analysis of Crude Oil Gathering System .................................................................................................................................263
    Zhou Yingming, Wang Shuwei, Li Dong, and Wu Guozhong

Application of Multi-domain Collaborative Modeling and Simulation Techniques to Shearer Reliability Analysis ..................................................................................................................267
    Li-juan Zhao and Xu-nan Liu

Application of Reduced-Order Extended Kalman Filter in Permanent Magnet Synchronous Motor Sensorless Regulating System ..................................................................................................271
    Wang Wenjie, Zhang Min, and Wu Qinghai

Application Research of Evaporative Cooling in the Waste Heat Recovery ......................................................275
    Zhijiang Wu, Nan Wang, and Gongsheng Zhu

Application Research of the Rosette Packing in Sodium Alkali Flue Gas Desulfurization ......................................................278
    Wei-zhi Wang, Chun-guang Yang, and Jin-rui Zhang

Cross Covering Algorithm Based on Simulated Annealing ..................................................454
  Zhang Yanping and Liu Chao

Data Processing Technology of Virtual Logic Analyzer Based on FPGA ..................................458
  Zhao Zengrong

Design and Application of Buttress Thread Buckle Marine Conductor ....................................461
  Li Zhong, Zhang Laibin, Fan Jianchun, Yan De, Li Xiaogang, Tan Shuying, and Jia Haiyan

Design and Application of Multi-point Water Temperature Measurement and Control System for Thermal Discharge Model .................................................................465
  Wu Xinsheng, Lin Musong, Yao Shiming, Liao Xiaoyong, and Huang Weidong

Design and Finite Element Analysis on Self-compensating Coaxial OCSR (Oblique-Cone-Slid-Ring) Assembly Seal Device ...............................................................469
  Hu Yong, Wen Huabing, and Wang Jia

Design and Implement on Intelligent Ship Handling Simulator .............................................473
  Yang Shenhua, Wang Xinghua, and Chen Guoquan

Design and Realization of Special Hybrid Intelligent Power Module Based on Thyristor ..................478
  Shen Jinrong, Song Jiacai, Liu Chunyan, and Wang Qinghua

Design and Realization of the Level-Two Control System for Rotary Reheating Furnace ..................482
  Fu-yong Su and Zhi Wen

Design and Research of a Corneal Grafting Robotic System ...........................................486
  Yang Yang, Deng Shijing, Xiao Jingjing, and Xu Cunliang

Design and Research of Hooke’s Joints and Gear Mechanism Assembled Driving Systems of Differential Velocity Vane Pump .................................................................491
  Ming Hu, Changzu Chen, Yongping Jin, Wenhua Chen, Miaomiao Zhang, Ming Chen, and Ping Qian

Design and Simulation Research on New Tamper Based on ADAMS ..................................494
  Chaoqing Min, Guofang Gong, and Yi Liu

Design of an Eddy Current Detector .................................................................................499
  Lanzhen Chen, Longshi Gao, and Chunyang Jia

Design of Automatic Lock Devices Based on the MCP2515 CAN-Bus .................................503
  Zhang Haifeng, Wang Jingdong, and Tong Yao

Design of Micro WEDM Pulse Generator Based on Fuzzy Control .....................................506
  R.N. Huang, B. Liu, and T. Wang

Design on a Wall-climbing Robot for Test of Large-Capacity Tank Volume ...........................510
  Liguo Zhang, Shizhong Tong, Guizeng Fu, and Xi Luo

Design for Control System of Wastegate Valve Actuator in Turbocharger ..........................514
  Liu Xinghua, Yu Lei, Liu Fushui, Wu Wenfeng, and Wang Ruwei
Determining Intrinsic and Pose Parameters of Camera Based on Concentric Circles ...............................................................518

Zhu Bin

Detoxification of Wheat Straw Hydrolysis in Formic Acid Reaction System by D311 Ion-exchange Resin .......................................................................................................................522

Junping Zhuang, Lu Lin, Chunsheng Pang, Zhen Wu, and Ying Liu

Develop on On-line Test System of Cutting Force Base on Single-Chip Computer ...........................................................................526

Weihua Li and Qinjian Yang

Developing Linear Viscous-Elastic Material Construction in ANSYS with UPFs ..................................................................................530

Wu Yi, Lei Jinsong, Zeng Xianwu, and Chen Chunhui

Development Detector for Field Flow Fractionation Based on Wavelet Analysis ..........................................................537

Zhang Xuejun and Chen Xiangwei

Development of Application Software of Principles of Selecting a Reference System ......................................................................................541

Nie Xiaofan and Li Jian

Development of Lengthening I-beam Steel-Work Automatic Welder Based on Open CNC System ................................................................544

Cao Shukun, Wang Changlei, Qian Yuxia, Chen Xiusheng, and Zhang Fangyou

Development of Portable Data-Acquisition and Signal Analysis Instrument Based on ARM and DSP ..............................................................................548

Zhang Pan, Wang Taiyong, and Wan Jian

Developmental Toxicity of Triadimefon in Embryo-Larval Stages of Zebrafish ................................................................................552

Shaoying Liu, Juhua Chang, and Guonian Zhu

Digitally Adjustable Tooling Technology for Manufacturing of Aircraft Panels ..................................................................................556

Liu Chunguo, Li Mingzhe, Cai Zhongyi, Yan Aimin, and Su Shizhong

Direct Vermicomposting of Fresh Sewage Sludge by Using Two Epigeic Earthworm Species ..........................................................560

Xuemin Chen and Xiaoyong Fu

Discussion of Steam Loss Prediction Methods in the Development of Oil Sand with SAGD Technique ..................................................................................................................564

Li Zhiming, Zhao Pengfei, Wang Yong, and Wu Jing

Distribution and Mobility of Heavy Metals in Soil of Sewage Irrigation Area in Pearl River Delta, China ..................................................................................569

Guanxing Huang, Jichao Sun, Ying Zhang, Jingtao Liu, Yuxi Zhang, Jihong Jing, and Jincui Wang

Dynamic Analysis and Control of an Energy Storage Flywheel Rotor with Active Magnetic Bearings .............................................................................573

Zhang Kai, Dai Xingjian, and Zhang Xiaozhang
Dynamic Analysis of Flexible Large Displacement Beam System with Second-Order Effect
Zhao Xin, Lu Nianli, and Luo Bing

Dynamic Characteristics Rebuilding of HIL Simulation System and Its Validation
Tongli Chang

Dynamic Energy Absorption of Circular Honeycomb Under In-plane Impact Loading
Fan Weili and Zhang Xinchun

Dynamic Impacts on Energy Intensity from Energy Price, Technological Progress, and ICT Investment Changes
Maoqing Fan, Xiaojin Li, Ruoen Ren, Zheng Haitao, and Sun Linlin

Dynamical Weather Radar Beam Blockage Correction
Yaping Zhang and Minghu Cheng

Dynamics and Simulation of Underwater Glide Vehicle
Xiao-xu Du, Bao-wei Song, and Guang Pan

Economical Analysis of Waste Tires Disposal Using Thermal Plasma Technology
Lan Tang, Jianxin Xiong, Xiaoming Wang, Huan Wang, Haiqing Hao, Yunhe Wang, Chihui Zhu, and Haitao Huang

Effect of COD/NH4+-N and Influent pH on the Simultaneous Nitrification and Denitrification by Using a Sequencing Batch Reactor
Yanping Jia, Shuxia Lv, Tao Yang, Lanhe Zhang, and Guiquan Jiang

Effect of Relative Humidity on Adsorption Capacity of Organic Vapors on Activated Carbon and Prediction by Modified D-R Equations
Cao Li, Huang Xuemin, Feng Fangning, and Ji Fengli

Effect of Thermal Properties of Building Glass on Cooling Energy Consumption of Buildings
Huan Wang, Huijun Wu, Yunfei Ding, and Xiaoqing Zhou

Effects of Alkali and Steam Coupling Pretreatment on L-lactic Acid Yield in Vinasse Fermentation
Wang Shuang, Wang Qunhui, Liu Jianguo, and Li Juan

Effects of Defects on the In-plane Dynamic Energy Absorption of Metal Honeycombs
Fan Weili and Zhang Xinchun

Effects of Light Intensity and H2O2 on Photocatalytic Degradation of Phenol in Wastewater Using TiO2/ACF
Jia Guozheng, Wang Guoxiang, Zhang Yong, and Zhang Linsheng
Electron Theory Research on Biphasic Ceramics of Al2O3/TiB2 ................................................................. 627
Zhang Jianwu, Luo Zhen, and Lin Peng

Electro-Pneumatic Pressure Servo-Control for a Miniature Robot with Rubber Actuator ................................................................. 631
Yu Lianzhi, Lu Yuesheng, Hu Zhongying, and Cheng Jian

Emergy Analysis for Circular Economy Utilization System with Coal Industry ................................................................. 635
Jia Yanchun and Wang Lingmei

Emission Characteristics of Diesel Engine Fueled with Ethanol-diesel Blends in Different Altitude Regions ................................................................. 639
Ji-Lin Lei, Ze-fei Tan, Shao-hua Liu, Yu-Hua Bi, and Li-Zhong Shen

Energy Saving and Influencing Factors Analysis for a New Kind Coal Slime Drying System ................................................................. 644
Jinfeng Mao, Jing Li, Jintian Li, Huiliang Lian, and Fusheng Peng

Energy Saving Bottleneck Analysis in Iron and Steel Plant Based on Decomposition Model of Energy Consumption Index ................................................................. 648
Ma Yang, Bai Hao, Zhao Lihua, Ma Yan, and Cang Daqiang

Energy Saving Economic Analysis of the Oil Pipeline in Gaosheng When the Second Heat Station Stops Heating ................................................................. 652
Tian Na, Chen Baodong, He Linin, Chen Qisheng, and Wu Qi

Enhanced Thermoelectric Performances of Oxalic Acid-treated Poly(3,4-ethylenedioxythiophene): Poly(4-styrenesulfonate) Free-Standing Films ................................................................. 655
Kong Fangfang, Liu Congcong, Jiang Fengxing, Xu Jingkun, Lu Baoyang, Yue Ruirui, and Chen Shuai

Enzymatic Activities in Soils Contaminated with Diesel Oil ................................................................. 659
Li Yuying and Li Bing

Establishment of Air Quality Assessment Model with Weight Based on Extension Theory ................................................................. 663
Zhao Xiaoliang, Qi Qingjie, Zhou Yang, and Zheng Jiao

Estimating Natural-Ventilation Potential Considering Thermal Mass ................................................................. 666
Xiaoqin Sun, Junli Zhou, Wei Shen, Chang Peng, Guoqiang Zhang, and Ling Zhang

Evaluation of Micro-pore Ceramic Filtration and UV Radiation Combination on Ballast Water Treatment ................................................................. 670
Zhang Manxia, Liu Shengjie, Tang Xiaojia, Li Xiang, and Zhu Yimin

Evaluation on the Binary Joint Toxicity of Phenol with Substituted Phenols to photobacterium phosphoreum Using Four Evaluating Methods ................................................................. 674
Yu Ruilian, Xu Jiaqing, and Lei Junjun
Exergy Analysis of Biomass Gasification with Steam/Air: A Comparison Study ........................................678
   Zhang Yaning, Li Bingxi, Li Hongtao, and Liu Hui

Experiment Study on Adsorption Characteristics of SO2, NOx by Biomass Chars .................................................................682
   Fei Lu and Ping Lu

Experimental Analysis of Acoustic Signal Detection Using Extensional Stress Wave Along the Periodic Simulated Drillstring ..........................................................686
   Li Cheng and Ding Tianhuai

Experimental Analysis on the Characteristics of Two-Actuator Controlled Fuel Injection System ..............................................690
   Wang Yupeng, Liu Xinghua, Chen Yuhang, and Liu Fushui

Experimental Research on the Reflection Characteristics of Guided Waves from Defects in Steel Wires ..........................................................694
   Hongfen Xiong, Xinjun Wu, Jiang Xu, and Huan Tang

Experimental Researches on the Characteristics of Dense Spray of Diesel Engine ........................................................................698
   Wang Changyuan, Liu Fushui, and Li Xiangrong

Experimental Study on Acoustic Agglomeration of Fine Particles from Coal Combustion .............................................................702
   Houtao Chen, Wulin Liu, Jingbo Li, Xin Xun, and Xianglin Shen

Experimental Study on Heat Dissipation Performance of Forced Convector with U Shaped Fin-Tube ..................................................706
   Xiaozhou Wu and Jianing Zhao

Experimental Study on Plateau Matching Performance of Turbocharger and Vehicle Diesel Engine ..................................................710

Experimental Study on Solar Drying of Lignite ..................................................................................................................714
   Lulin Luo, Jianzhong Liu, Jing Cheng, Jianfei Xi, Junhu Zhou, and Kefa Cen

Fast Face Detection in Field Programmable Gate Array ..........................................................................................719
   Zheng Yutong, Yang Guosheng, and Wu Licheng

Fast Inspection of Food Packing Seals Using Machine Vision ..............................................................................................724
   Zheng Shuangyang

Feasibility Study of Reapplication of Waste Propellants as Welding Heat Source ........................................................................727
   Wen-ping Chang, Jin-yong Jiang, Shi-guo Du, and Gui-e Lu

Feedrate Profile Planning Based on Sensitive Points Identification in NURBS Interpolation ........................................................................729
   Lin Feng and Shen Xiaoan
Finite Element Simulation and Control Method on Springback of Stretch Flanging in Rubber Forming .................................................................734
Chen Lei, Liu Yingwei, and Li Shanliang

Finite Element Simulation for the Surface Flaw in Tube Open-die Cold Extrusion Process .................................................................738
Pei Weichi and Li Yaogang

Flow-Field Numerical Simulation of Gas-Solid Cyclone Separator Based on FLUENT .................................................................740
Qing-fang Deng, Dongyi Zhou, and Ai-ling Shen

FPGA-Based Control System for 6-UPS Medical Parallel Robot .................................................................744
Dongmei Wu, Zhijiang Du, Heqiang Tian, Zhenyu Jiang, and Lining Sun

Frequency Measurement Using Dynamics .................................................................749
Ouyang Qin and Yi Jiliang

Functions of Bacillus Subtilis BS7.29 in Wasterwater Treatment .................................................................753
Jun-Xun Li, Jie Gao, Xue-Gang Luo, Yu Guo, Jing Xiao, and Tong-Cun Zhang

Fuzzy Control Scheme for Vector-controlled Multiphase Induction Motor Drive .................................................................757
Jia-kuan Xia, Lu Min, and Kun Liu

Fuzzy Iterative Learning Control of Ring Permanent Magnet Torque Motor .................................................................761
Yi-biao Sun, Guang-xin Liu, Cheng-yuan Wang, and Jia-kuan Xia

Fuzzy Modeling and Compensation of Scale Factor for MEMS Gyroscope .................................................................766
Li Jianli and Du Min

Fuzzy-PID Control System Simulation of the Semi-active Vehicle Suspension .................................................................772
Yang Jianwei, Li Jie, Jia Zhixuan, and Zhang Huigang

Geodesic Connected Graph Representation of 3D Prismatic CAD Models .................................................................776
XuTang Zhang, XiaoFeng Chen, PengYu Yang, KuanQuan Wang, and WangMeng Zuo

Green Ramjets Based on Metal/Water Reaction .................................................................780
Yang Yajing and He Maogang

Grey Relation Analysis on Agriculture Energy Consumption and Its Affecting Factors .................................................................786
Tao Aixiang

Groundwater Quality Evaluation in Yang Village by Fuzzy Mathematics Method .................................................................790
Ying Xu and Wen-hua Shao

Heavy Metal Contamination and Potential Ecological Risk Assessment of Sediments in Yangzonghai Lake .................................................................795
Yuxi Zhang, Jichao Sun, Jingttao Liu, Guanxing Huang, Xiaoping Xiang, Xi Chen, Jihong Jing, and Haiwei Cui
