SPE Middle East
Unconventional Gas Conference
and Exhibition 2011

(UGAS)

Muscat, Oman
31 January – 2 February 2011

ISBN: 978-1-61782-359-6
# TABLE OF CONTENTS

**Advancing Reservoir Simulation Capabilities for Tight Gas Reservoirs**  
Yafes Abacioglu, SPE, and Herbert M. Sebastian, SPE, BP America Inc., and Jubril B. Oluwa, SPE, BP Canada Energy Company .........................................................................................................................1

**Application of Artificial Intelligent Systems in ROP Optimization: A Case Study in Shadegan Oil Field**  
M. Bataee, S. Mohseni, Department of Petroleum Engineering, Ahwaz Faculty of Petroleum Engineering, Petroleum University of Technology, Abadan, Iran..................................................................................................................13

**One Well Evaluation in Low Permeability Gas Sandstones from Nuclear Magnetic Resonance (NMR) Logs**  
Tang Wen, School of Petroleum Resource, Xi’an Shiyou University, Xi’an, Shaanxi, P.R. China.................................................................................................................................23

**Leveraging Experience to Make the Extraordinary Ordinary: Hydraulic Fracturing Tight Gas under HPHT Conditions**  
Mark E. Keller, Mark Machala, and Stephen Drylie, SPE, Halliburton.................................................................................................................................29

**Comparison and Limitation Analysis of Approaches for Porosity Evaluation from NMR and Three Porosity Logs in Low Permeability Gas Sands with Bad Borehole**  
Tang Wen, School of Petroleum Resource, Xi’an Shiyou University; Xu rui and Zhi ling-ling, Tuha Division of CNPC Well Logging Company Ltd.; Wang Xiao-gang, China Oilfield Services Limited..................................................................................................................54

**Modelling and Simulation of a New Dual Porosity CBM Reservoir Model with an Improved Permeability Model through Horizontal Wells**  
Zheng Shiyi, SPE, London South Bank University, and Xue Lili, Heriot-Watt University.................................................................................................................................62

**Successful Application of Formation Pressure Testing While Drilling in High Temperature Tight Gas Field in South Sea China**  
Shusheng Guo, CNOOC CCLZ, Yuqiang Niu, SPE, Ju Song, SPE, Lee Chin Lim, SPE, Xingwang Yang, SPE, Jiasheng Zhou, SPE, Schlumberger, Renyi Wang, Wenfeng Peng, CNOOC CCLZ..................................................................................................................73

**Critical Evaluation of Shale Gas Reservoir Simulation Approaches: Single- Porosity and Dual-Porosity Modeling**  
James Li, SPE, C. Mike Du, SPE, and Xu Zhang, SPE, Schlumberger.................................................................................................................................83

**Innovative Reservoir Modeling and Simulation of Unconventional Shale Gas Reservoirs Powered by Microseismic Data**  
Waleed Fazelipour, IFP, Beicip.................................................................................................................................98

**A New Approach to Identify Breakout Zones in Tight Gas Shale**  
Hamed Soroush, Abdelaziz Khlaifat, Hani Qutob, SPE, Weatherford; Vamegh Rasouli, Behzad Tokhmechi, SPE, Curtin University of Technology..................................................................................................................112

**Optimization of the Design of Transverse Hydraulic Fractures in Horizontal Wells Placed in Dual Porosity Tight Gas Reservoirs**  
S.E. Gorucu and T. Ertekin, SPE, the Pennsylvania State University.................................................................................................................................119

# Table of Contents continued...

A Better Understanding of Finite Element Simulation for Shale Gas Reservoirs through a Series of Different Case Histories  
R. Jayakumar, V. Sahai, and A. Boulis, Object Reservoir Inc.................................................................245

Application of High Resolution Micro-CT Imaging and Pore Network Modeling (PNM) for the Petrophysical Characterization of Tight Gas Reservoirs - A Case History from a Deep Clastic Tight Gas Reservoir in Oman  
L. Riepe, SPE, M. H. B. Suhaime, PETRONAS CARIGALI SDN. BHD., Malaysia, M. Kumar, SPE, M. A. Knackstedt, SPE, Digitalcore Pty. Ltd., Canberra, Australia......................................................262

Damage Mechanisms in Unconventional Gas Well Stimulation - A New Look at an Old Problem  
Josef Shaoul, StrataGen Delft, Lars van Zelm, TU Delft, C.J. de Pater, StrataGen Delft..................................275

Drilling Waste Management: A Case Study of the Drilling Waste Management and Environmental Control in one of the Iranian Offshore Fields  
Seyed Mohsen Razmigir, Iranian Offshore Oil Company (IOOC), Meisam Afsari, Iranian Offshore Oil Company (IOOC), and Mahmod Amani, Texas A&M University..................................................291

Analysis of Geomechanical Data for Horn River Basin Gas Shales, NE British Columbia, Canada  
Queena Chou, SPE, and Jordan Gao, SPE, Weatherford Geomechanics Services; Mick Somerwil, SPE, Quicksilver Resources Canada Inc.................................................................300

Drilling Optimization in Unconventional and Tight Gas Fields: An Innovative Approach  
Keith R. Holdaway, SPE, SAS Institute Inc.................................................................312

First Multi-Stage Swell Packers Open Hole Completion in Rub’ Al-Khali Empty Desert: Case Study  
Joseph Ekpe, SPE, Andrey Kompantsev, Jamal Al-Thuwaini, Emad Mohammad SPE, Ayman Ashoor Lukoil Saudi Arabia Energy Ltd.................................................................331

Well Engineering for Oman Deep Gas: Planning and Drilling the Deepest Well in the Sultanate of Oman  
Khamis bin Mohammed Al-Saadi, Matt Smith, Sandeep Dhawan, Salim Al-Mawali, Ibrahim Al-Shidani, Petroleum Development Oman.................................................................338

Technical Limits of Tight Gas Fracturing in Oman – An Innovative Exploration Approach that Incorporates Global Practices  
Joe Curtino, SPE, PDO; Rudi Harianta, SPE; Winarsa Lie, SPE; and Tobias Judd, SPE, Schlumberger.................................................................348

Detailed Modeling of the Complex Fracture Network of Shale Gas Reservoirs  
Bin Gong, Peking University, Guan Qin, Craig Douglas, University of Wyoming, and Shiyi Yuan, PetroChina.................................................................370

# Table of Contents continued…

Seismic Technologies for Unconventional Reservoir Descriptions: Wamsutter Field Case Study  
*Brian Hornby and Rosemarie Geetan, BP America Inc.* ................................................................. 517

Petrophysical Rock Typing of Tight Gas Sands - Beyond Porosity and Saturation: Example from the Cotton Valley Formation, East Texas  
*David R. Spain, Shujie Liu, BP America, and Chuck Devier, PTS Laboratories* ........................................ 521

Aspects of Seismic Prospecting in Tight Gas Reservoirs  
*Neil Philip, Emma Sheard, Fiona Sutherland, Barnaby Roome, Brian Taylor, Richard Margesson* .................. 535

Enhanced Geomechanical Modeling with Advanced Sonic Processing to Delineate and Evaluate Tight Gas Reservoirs  
*Kanithorn Adisornsupawat, Chee Phuat Tan, Leo Anis, Aurifullah Vantala, Reayad Juman, SPE, Schlumberger, Barry Boyce, APICO (Thailand)* .......................................................... 546

Application of IFOT in Tight Gas as a Reservoir Surveillance Technique  
*E. Pinto, J. R. Adams, SPE, BP* ........................................................................................................ 555

Tight Gas Modeling Frameworks for Improved Reservoir Management and Its Application to the Moxa Development Area  
*Felipe Gallego, SPE, BP America, Inc.* ......................................................................................... 569

Improving In-Situ Horizontal Stress Profile Accuracy Using Multi-Mode Sonic Measurements: A Case Study in a Deep Tight Gas Well in Saudi Arabia  
*MaoLin Luo, SPE, Schlumberger, Haojie Wu, SPE, Sino Saudi Limited, and Mohammed A. Mohiuddin, SPE, Schlumberger* .............................................................................. 582

A New Method for Low Permeability Gas Well Performance Prediction Using Pressure Transient Analysis: Theory and Practices  
*Sun Hedong, SPE, Xu YanMei, Langfang Branch, Research Institute of Exploration and Development, PetroChina* .................................................................................. 596
