AN INTERNATIONAL STRATEGY FOR EXPLORATION: DEVELOPMENT STATUS OF THE ISECG GLOBAL EXPLORATION ROADMAP .......................................................................................................................... 370
Bernhard Hufenbach
DEVELOPING A COMMON SET OF HUMAN LUNAR EXPLORATION GOALS AND OBJECTIVES .................................................. 379
Jennifer Bhatnagar

B4.2 SMALL SPACE SCIENCE MISSIONS SESSION #6

FOCUSING ON SCIENTIFIC RETURNS THROUGH RESULT-BASED MANAGEMENT OF SMALL SPACE SCIENCE MISSIONS .................................................................................................................................................................................. 388
Richard Giroux
ADITYA – 1, INDIAN MINI SATELLITE SPACE CORONAGRAPH ................................................................................................... 398
V. Koteswara Rao
SMALL SATELLITE REIMEI FOR AURORAL OBSERVATIONS ........................................................................................................ 406
Hiroshi Saito
MEASUREMENT OF TOTAL ELECTRON COUNT OF THE IONOSPHERE AND THE SOCIAL GOAL OF PRATHAM, INDIAN INSTITUTE OF TECHNOLOGY BOMBAY’S FIRST STUDENT SATELLITE ........................................................................... 419
Saptarshi Banerjee
THE MICRO ROENTGEN SATELLITE INSTRUMENT ............................................................................................................................ 427
Elias Breunig
NEAR INFRARED CAMERA FOR ASTRONOMY IN THE SMALL SATELLITE STSAT-3 ........................................................................ 428
Dae-Hee Lee
DEVELOPMENT OF A HIGH AGILITY SMALL SATELLITE MISSION .............................................................................................. 429
Andrew Catlin
THE UK’S TECHNOLOGY DEMONSTRATION SATELLITE .................................................................................................................. 438
S. Wokes
FLIGHT RESULTS FROM PRISMA FORMATION FLYING AND RENDEZVOUS DEMONSTRATION MISSION ............................................................................................................................................................................... 446
Design Synthesis of Tethered Nano-Satellites to Observe the Solar Corona ................................................................................ 458
Nicole Viola
EVALUATING AIS DATA QUALITY FOR SPACE BASED SHIP MONITORING USING THE AAUSAT3 PROTOTYPE ...................................................................................................................................................................... 459
Ulrik Wilken Rasmussen
DEVELOPMENT OF THE MICROSATELLITE RISING-2 BY TOHOKU UNIVERSITY AND HOKKAIDO UNIVERSITY ........................................................................................................................................................................... 469
Yuji Sakamoto

C1.1 ORBITAL DYNAMICS SESSION #7

ANALYTIC EXPANSIONS OF LUNI-SOLAR GRAVITY PERTURBATIONS ALONG ROTATING AXES FOR TRAJECTORY OPTIMIZATION: PART2: THE MULTIPLIERS SYSTEM AND SIMULATIONS .................................................................................................................. 474
Jean Kechichian
NEW NUMERICAL METHODS FOR DETERMINING PERIODIC ORBITS IN THE CIRCULAR RESTRICTED THREE-BODY PROBLEM .......................................................................................................................................................... 499
Mauro Pontani
EXTENSION OF LOW THRUST PROPULSION TO THE COPLANAR CIRCULAR RESTRICTED FOUR BODY PROBLEM WITH APPLICATIONS TO FUTURE TROJAN ASTEROIDS MISSIONS .................................................................................. 510
Maria Cecconi
ON THE LOW-ENERGY TRANSFERS BETWEEN Icy Moons of Jupiter ........................................................................................ 520
Elena Fantino
ELECTRIC DELTA-V IN SOLAR ELECTRIC PROPULSION (SEP) AND FLYBY FOR NEAR-EARTH-OBJECTS ........................................................................................................................................................................... 521
Denilson Paulo Souza Dos Santos
SHORT-PERIOD BALLISTIC OUT-OF-ECLIPTIC TRAJECTORIES VIA MULTIPLE VENUS & EARTH SWING-BYS AND VEGA-DRIVEN MULTIPLE EARTH SWING-BYS .................................................................................. 531
Junichiro Kawaguchi
TRAJECTORY EVOLUTION IN MULTI-BODY REGIMES WITH APPLICATIONS IN THE SATURNIAN SYSTEM ................................................................. 539
Diane Davis

ACCURACY ANALYSIS OF ORBIT DETERMINATION AND PREDICTION FOR LOW ORBIT LUNAR SATELLITES .......................................................................................................................... 552
Jiasong Wang

ELECTROSTATIC FORCE MODEL FOR TERRESTRIAL EXPERIMENTS ON THE COULOMB TESTBED ........................................... 557
Carl Seubert

ORBIT PERTURBATIONS AND ECCENTRICITY VECTOR CONTROL IN LOW-ALTITUDE MOON ORBITS .................................................................................. 566
Slim Locoche

HOW TO ESTABLISH AND KEEP ORTHOGONAL CONSTELLATION BY TWO ORBITERS UNDER PERTURBATION ........................................... 567
Yeong-Moo Yi

SPACECRAFT RENDEZVOUS THROUGH MOTION CAMOUFLAGE .................................................................................. 571
Tao Yang

C2.1 SPACE STRUCTURES I – DEVELOPMENT AND VERIFICATION (SPACE VEHICLES AND COMPONENTS) SESSION #8

KEY CRYOGENIC TECHNOLOGIES ENHANCEMENT AND VERIFICATIONS WITHIN HXG MACRO DEMONSTRATOR .................................................................................................................. 572
Yves Prell

DEVELOPMENT AND VERIFICATION OF POLYMER-LINED COMPOSITE LIQUID HYDROGEN TANK FOR REUSABLE VEHICLE .................................................. 581
Shinsuke Takeuchi

DEVELOPMENT OF PROPELLANT TANK STRUCTURE FOR KOREAN SPACE LAUNCH VEHICLE .................................................. 589
Yeong-Moo Yi

STRUCTURAL LOAD TEST PROGRAMME FOR LVM3: TEST CONFIGURATIONS AND LESSONS LEARNED .................................................................................................................. 593
Somanath Sreedharan Panicker

DESIGN, REALISATION AND TESTING OF A LARGE DIAMETER SOLID BOOSTER MOTOR CASE .................................................................................. 594
Thomas Kurian

ADVANCED STRUCTURAL ANALYSIS OF FLEX NOZZLE FOR SOLID ROCKET BOOSTER .................................................................................. 595
Yuanjie Zou

STRUCTURAL ANALYSIS AND PRELIMINARY SPACE CHARACTERIZATION OF A Prototype HOLLOW LASER RETROREFLECTOR.................................................................................................. 609
Claudio Cantone

A STRATEGY FOR FINITE ELEMENT MODEL VERIFICATION OF COMPLEX SPACECRAFT .................................................................................. 619
Jifeng Ding

A NOTCHING METHOD FOR RANDOM VIBRATION ACCELERATION SPECTRA DERIVED FROM THE FORCE LIMITING TECHNIQUE .................................................................................. 633
Yuanjie Zou

LOW SHOCK NON-PYRO SEPARATION SYSTEM FOR SMALL SATELLITE FROM LAUNCH VEHICLE .................................................................................. 642
Seiya Nagano

STRUCTURAL ANALYSIS AND VERIFICATION OF A RECOVERY SUBSYSTEM FOR THE ATMOSPHERIC REENTRY SATELLITE .................................................................................. 643
Artur C. Arantes-Filho

TECHNICAL STUDY ON THE STRUCTURAL DESIGN OF KOREAN LUNAR EXPLORER .................................................................................. 644
Sun-Won Kim

DEVELOPMENT OF THE ACCELEROMETER SENSOR HEADS FOR THE GOCE SATELLITE: ASSESSMENT OF THE CRITICAL ITEMS AND QUALIFICATION .................................................................................. 650
Guillaume Bodoville

OPTIMIZATION AND THERMAL CONTROL OF A MULTI-LAYERED STRUCTURE FOR SPACE ELECTRONIC DEVICE .................................................................................. 656
Riccardo Monti

C4.1 PROPULSION SYSTEMS I SESSION #9

OVERVIEW OF CURRENT STATE OF ACTIVITIES RELATED TO ROCKET PROPULSION R&D IN RUSSIA .................................................................................................................. 666
Dmitry Babkin

RESEARCH PROGRESS OF REUSABLE LIQUID ROCKET ENGINE IN JAXA .................................................................................. 667
Makoto Yoshida

REGENERATIVE COOLING CYCLE LOX/METHANE ENGINE AND SOME OTHER HYDROCARBON FUELED ROCKET ENGINE STUDIES .................................................................................. 671
Kimihito Obuse
DEVELOPMENT OF A 35KN-THRUST-CLASS CLOSED-CYCLE HYDROGEN PEROXIDE / KEROSENE ENGINE ..........................................................681
Mengwei Zheng

PROGRESS OF THE VINCI ENGINE DEVELOPMENT ..................................................................................................................682
Philippe Caisso

AEROJET HIGH-PERFORMANCE BIPROPELLANT APOGEE ENGINES .............................................................................692
Alfred Wilson

HISTORY AND STATUS OF AEROJET MARS LANDER PROPULSION ..................................................................................700
Alfred Wilson

REGULATION SYSTEMS OF THE CYCLONE-4 LV UPPER STAGE MAIN LIQUID ROCKET ENGINE .....................................713
Vladimir Shnyakin

ROCKET PROPULSION USING UNITARY PASTE-LIKE PROPELLANT. EXPERIMENTAL INVESTIGATIONS OF PASTE-LIKE PROPELLANT AND RESULTS OF PRM FIRE TESTS ........................................718
Yulian Protsan

HOT-FIRE TEST OF A TURBOPUMP FOR A 30 TON CLASS ENGINE .............................................................................719
Soon-Sam Hong

FIRST RESULTS FROM TP-X TURBINE TESTS AND VERIFICATION RESULTS FROM VINCI TURBINES IN ENGINE TESTING .......725
Tomas Damgaard

D1.1 INNOVATIVE AND VISIONARY SPACE SYSTEMS CONCEPTS SESSION #10

STUDY ON TECHNICAL APPROACH FOR MANNED DEEP SPACE EXPLORATION BASED ON SPACE RENDEZVOUS AND DOCKING ........................................................................................................726
Yang Liu

CONCEPTUAL DESIGN OF AN ACTIVE DEBRIS REMOVAL STRATEGY FOR SUN-SYNCHRONOUS LOW EARTH ORBIT ..................................................................................................................727
Stijn Van Autrève

PROMISING TECHNOLOGIES AND ASSOCIATED CONCEPTS FOR FUTURE MISSIONS .................................................................741
Xavier Roser

DESIGN CONCEPTS FOR A MANNED ARTIFICIAL GRAVITY RESEARCH FACILITY ........................................................................746
Joseph Carroll

ROBOTIC ON ORBIT SERVICING MISSIONS FOR MULTIPLE SATELLITE MAINTENANCE AND RECOVERY ..............................................................768
Fabio Santoni

IN-ORBIT SERVICING AND DE-ORBITING CONCEPTS AND A GERMAN DEMONSTRATION MISSION ......................................769
Joachim Thaeter

AN L1 POSITIONED DUST CLOUD AS AN EFFECTIVE METHOD OF SPACE-BASED GEO-ENGINEERING ..............................................................778
Russell Bewick

ASSESSMENT OF VISIONARY GEOENGINEERING OPTIONS AND THE IMPACTS OF FREQUENT LAUNCHES WITH A GLOBAL ATMOSPHERIC MODEL ........................................................................792
Leopold Summerer

HELIODROMUS: RENEWABLE ENERGY FROM SPACE ............................................................................................................793
J. M. Kuiper

VOYAGE CONTINUES - LIGHTSAIL-1 MISSION BY THE PLANETARY SOCIETY ........................................................................802
Tomas Svitek

ROOT’S LIKE NATURAL BEHAVIORS APPLIED TO GUIDANCE ALGORITHMS FOR SPACE EXPLORATION MISSIONS ..............................................................811
Marco Sabatini

D2.1 LAUNCH VEHICLES IN SERVICE OR IN DEVELOPMENT SESSION #11

LAUNCHER ACTIVITIES OF THE EUROPEAN SPACE AGENCY .................................................................................................820
Toni Tolker-Nielsen

ARIAINE 5 ECA PERFORMANCE IMPROVEMENT PLAN PERFORMANCE IMPROVEMENT PLAN ........................................................................833
Sylvain Guédron

A5 ME: STATUS OF THE “PREPARATORY ACTIVITIES” ...........................................................................................................839
Catherine Poucheval

OPERATIONAL STATUS OF THE SPACEX FALCON 1 AND FALCON 9 LAUNCH VEHICLES ..................................................................................849
Aaron Dinardi

UNITED LAUNCH ALLIANCE – ESTABLISHING HEAVY LIFT CAPABILITY ON THE WEST COAST ......................................................858
Michael Berglund

VOLUME 2

GSLV MK-III (LVM3) DEVELOPMENT CHALLENGES AND PRESENT STATUS .................................................................................864
S. Somanath

LONG-TERM SUSTAINABILITY OF SPACE ACTIVITIES – WIDENING THE DEBATE .......................................................... Peter Martinez 3788
ASSESSING THE CURRENT DYNAMICS OF SPACE SECURITY .......................................................................................... Ray A. Williamson 3789
RESPONDING TO THE THREAT OF POTENTIALLY-HAZARDOUS NEAR EARTH OBJECTS .......................................................... B. Corbin 3803
IMPLEMENTING ADVANCED TECHNOLOGIES AND MODELS TO REDUCE UNCERTAINTY IN A GLOBAL, COST-EFFECTIVE ASTEROID MITIGATION SYSTEM .......................................................................................................................... Mariel John 3809
SPACE APPLICATIONS FOR INTERNATIONAL DEVELOPMENT .......................................................................................... Mariel John 3819

E3.2 POLICY AND ECONOMIC ASPECTS OF SPACE WEATHER SESSION #48

IAA STUDY GROUP ON INTERNATIONAL COOPERATION ON SPACE WEATHER .......................................................................................................................... Werner R. Balogh 3831
ECONOMIC AND POLICY CONSIDERATIONS FOR THE DEVELOPMENT OF A COORDINATED EUROPEAN SPACE WEATHER INFRASTRUCTURE .......................................................................................................................... Alexi Glover 3836
A TEST FOR THE IMPACT OF RADIATION ON HUMAN RETINAL FUNCTION .................................................................Daniela Petrova

A3.2C MOON EXPLORATION – PART 3 SESSION #53

UNMANNED LUNAR EXPLORATION: FROM SCIENTIFIC NEEDS TO A PRELIMINARY MISSION
STUDY FOR THE ITALIAN LUNAR ROVER ..................................................C. Del Vecchio Blanco

THERMAL CONCEPTS FOR SMALL SURFACE STATIONS, HOW TO SURVIVE THE LUNAR NIGHT. ......................Stephan Ulamec

CAPABILITIES OF A LUNAR LANDER BASED ON ARIANE 5 SHARED LAUNCH OPPORTUNITY ............................Maren Homeister

ESTIMATING LANDING SITE DISPERSION AND SAFETY FOR LANDING SYSTEMS WITH HAZARD DETECTION AND AVOIDANCE CAPABILITY .................................................................Lars Witte

REIPOS - RELATIVE INTERFEROMETRIC POSITION SENSOR ..................................................................................Daniel Bindel

DYNAMIC MODELLING OF A WHEELED LUNAR MICROROVER ..................................................................................Giancarlo Genta

THE CHALLENGES OF DESIGNING A LIGHTWEIGHT SPACECRAFT STRUCTURE FOR LANDING ON THE LUNAR SURFACE .........................................................Timothy Cole

TRACTION PERFORMANCE EVALUATION OF COMPLIANT LUNAR WHEELS IN LUNAR SOILS .........................Michele Faragalli

SENSORIMOTOR CONTROLS AND DISPLAYS FOR SAFE AND PRECISE LUNAR LANDING ........................................Lawrence R. Young

THE GERMAN SPACE AGENCY’S MOON EXPLORATION ACTIVITIES ...................................................................Friedhelm Claasen

VALIDATION OF A LIDAR-BASED HAZARD DETECTION AND AVOIDANCE SYSTEM FOR AUTONOMOUS PLANETARY LANDING ..............................................................Jean-François Hamel

FIELD TESTING A MULTIPURPOSE 3D SENSOR FOR PLANETARY ROVER MISSIONS ..............................................Ross Taylor

A METHOD OF CRATER DETECTION AND MATCHING FOR NAVIGATION OF LANDING ON MOON .................................Jiang He

A COMPARATIVE STUDY OF LUNAR MISSION REQUIREMENT AND ONBOARD PROPULSION SYSTEM PERFORMACE .................................Kyun Ho Lee

STRUCTURE OPTIMIZATION OF A LUNAR ROVER WHEEL USING THE DISCRETE ELEMENT METHOD ..............................................Yuhui Zhao

STUDIES ON THE RE-ENTRY ANGLE OF LUNAR PROBES ..........................................................................................Rahul Briend

THE PAYLOAD MANAGEMENT AND CONTROL FOR CHANG’E-3 LANDER ..........................................................Xiaomin Chen

HAZARD RECOGNITION METHODS FOR PLANETARY LANDER WITH SINGLE CAMERA ...........................................Yoshifusa Demizu

A4.1 SETI I: SETI SCIENCE AND TECHNOLOGY SESSION #54

SETI PAST, PRESENT, AND FUTURE: 50 YEARS IN 15 MINUTES .............................................................................4272
H. Paul Shuch

A SETI SEARCH IN THE ANTI-SOLAR DIRECTION USING THE ALLEN TELESCOPE ARRAY ....................................4278
Seth Shostak

INSTRUMENTATION AND METHODS FOR THE SEARCH FOR EXTRA-TERRESTRIAL INTELLIGENCE ..................4283
Andrew Siemion

SETI BACK ENDS MADE INEXPENSIVE .....................................................................................................................4284
Stelio Montebugnoli

TECHNOLOGIES DRIVING SETI .............................................................................................................................4289
Curtis Mead

A NEW BELT BEYOND KUIPER’S: A BELT OF FOCAL SPHERES BETWEEN 550 AND 17,000 AU FOR SETI AND SCIENCE .........................................................Claudio Maccone

A MULTILEVEL MODEL OF INTERSTELLAR COMMUNICATION .............................................................................4303
Steve Trimberger

LARGE-SIZE MESSAGE CONSTRUCTION FOR ETI - INTERPRETATION OF PROCESSES IN LINGUA COSMICA .................................................................Aldo D. Ollongren
GIANT/RED-DWARF BINARIES: NEW SETI TARGETS AND IMPLICATIONS FOR INTERSTELLAR MIGRATION
Gregory L. Matloff

SIGNATURES OF UNIVERSAL COMMUNICATION: RHYTHM, SYNCHRONY AND TEMPORAL PATTERNS OF DOLPHIN COMMUNICATION AS A MODEL
Denise Herzing

A6.3 HYPERVELOCITY IMPACTS AND PROTECTION SESSION #55

SHUTTLE POST FLIGHT MMOD INSPECTION HIGHLIGHTS
James Hyde

VOLUME 6

A STUDY OF PLASMA ACCELERATOR USING PULSE POWER FOR HYPERVELOCITY IMPACT TEST
Tomohiro Narumi

THE CHARACTERISTIC OF HONEYCOMB SANDWICH WITH MULTI-LAYER INSULATION UNDER HYPERVELOCITY IMPACT
Jie Huang

OBLIQUE HYPERVELOCITY IMPACT EXPERIMENT FOR SPACECRAFT DEBRIS SHIELD
Koji Tanaka

FRAGMENTATION OF HYPERVELOCITY ALUMINUM PROJECTILES ON FABRICS
Martin Rudolph

EXPERIMENTAL COMPARISON OF AL SPHERE HYPERVELOCITY IMPACT ON AL-FOAM SANDWICHED SHIELD AND AL-FOAM STUFFED SHIELD
Bin Jia

THE HYPERVELOCITY IMPACT TEST INVESTIGATION AND ANALYSIS ON THERMAL CONTROL INSTRUMENT IN SATELLITES
Yuhua Huo

STUDY OF HYPERVELOCITY IMPACT ON ELECTRODYNAMIC TETHER FOR TETHER LIFETIME EVALUATION
Shannon Ryan

A BALLISTIC LIMIT ANALYSIS PROGRAM FOR SHIELDING AGAINST MICROMETEOROIDS AND ORBITAL DEBRIS
Bintao Liu

NUMERICAL MODELING AND PARAMETER IDENTIFICATION FOR KEVLAR LAMINATE ON THE CONDITION OF HYPERVELOCITY IMPACT
Shin-Ichi Takeda

B1.3 EARTH OBSERVATION SENSORS & TECHNOLOGY SESSION #56

IN-ORBIT DATA OF THE ACCELEROMETERS OF THE ESA GOCE MISSION
Jean-Pierre Marque

USE OF THE HIGH SENSITIVE ELECTROSTATIC ACCELEROMETER FOR ORBIT PERTURBATION EFFECTS INVESTIGATION ON BOARD OF LEO SPACECRAFT
Radek Peresty

THE SGR-RESI – A SMALL SATELLITE INSTRUMENT FOR SENSING THE EARTH USING GNSS SIGNALS
Peter Coppo

THE SEA & LAND SURFACE TEMPERATURE RADIOMETER (SLSTR) TECHNOLOGIES
Timo Stoffers

OPTICAL THIN FILM TECHNOLOGY APPLIED IN SPACE
Duoshu Wang

PRELIMINARY DESIGN AND TESTING OF ON-ORBIT SPECTRAL CALIBRATION EQUIPMENT BASED ON LEDS WITH BANDPASS FILTER FOR THE HYPERSPECTRAL SENSOR HSC-III
Yoshihide Aoyanagi
STAND-ALONE ASSEMBLY OF IR CAMERA ................................................................. 4428
Ho-Soon Yang

DEVELOPMENT OF AN INSTRUMENT PERFORMANCE SIMULATION CAPABILITY FOR AN
INFRARED CORRELATION RADIOMETER FOR TROPOSPHERIC CARBON MONOXIDE
MEASUREMENTS FROM GEO
Doreen Neil ................................................................. 4432

GEOSTATIONARY IMAGING FABRY-PEROT SPECTROMETER (GIFS) FOR THE MEASUREMENT OF
TRACE GASES AND CLOUDS ............................................................... 4437
Jeng-Hwa Yee

MONITORING OF GREENHOUSE GASES USING INFRARED GRATING SPECTROMETER ......................... 4448
Himanshu Shekhar

B2.2 FIXED AND BROADCAST COMMUNICATIONS SESSION #57

AN HDTV DIRECT-TO-HOME BROADCASTING SATELLITE SYSTEM IN KA-BAND OVER EUROPE ........ 4449
Jean-Didier Gayrard

MEASURED SATELLITE AND SYSTEM PERFORMANCE VERSUS IMPLEMENTATION TARGETS FOR A
SDARS HYBRID CONSTELLATION ............................................................. 4454
Joseph Foust

OPTIMIZING SDARS SYSTEM PERFORMANCE IN A HYBRID CONSTELLATION .............................. 4467
Christopher Groome

SURVIVABILITY APPLICATION DEMONSTRATIONS VIA WIDEBAND INTERNETWORKING
ENGINEERING TEST AND DEMONSTRATION SATELLITE “KIZUNA” (WINDS) ......................... 4468
Ryutaro Suzuki

INDIA AND CHINA – NEW VOICES IN THE SATCOM ARENA ............................................................. 4474
Norbert Frischaug

SATELLITE BASED IP SERVICES IN MOBILE ENVIRONMENT .................................................. 4487
Venugopal Dharaju

INDIAN TELEMEDICINE PROGRAM FROM CONCEPT TO COMPLETION - TOWARDS NATIONAL
ADAPTATION ................................................................. 4492
Murthy L. N. Remilla

DESIGN AND EVALUATION OF A RECEIVER SYSTEM FOR A CONICAL BEAM TRACKING
ALGORITHM .................................................................................. 4493
Philipp Rosenberger

AN OPTICALLY CONTROLLED BEAM FORMING NETWORK FOR KA-BAND ANTENNA .................. 4494
Akira Akashi

A NEW ALGORITHM FOR THE SELF-CALIBRATION OF THE AMPLITUDE AND PHASE ERROR OF
THE MULTIPLE BEAM ANTENNA IN THE SATELLITE COMMUNICATION ......................... 4500
Jian Wang

SOYUZ LAUNCHER'S TELEMETRY SYSTEM BY DASSAULT AVIATION .................................. 4501
Michel Dupas

DESIGN OF A CIVIL COMMUNICATION SYSTEM ON HIGH ALTITUDE PLATFORMS .................. 4506
Jinchang Guo

B3.3 ISS OPERATIONS AND UTILIZATION SESSION #58

ACHIEVEMENTS, PLANS AND OUTLOOK OF THE EUROPEAN ISS UTILISATION PROGRAMME ............ 4507
Martin Zell

EFFECTIVENESS OF THE LONG-TERM PROGRAM OF SCIENTIFIC AND APPLIED EXPERIMENTS ON
THE ISS RUSSIAN SEGMENT .................................................................. 4523
Boris Zagreev

DAWN OF THE KIBO UTILIZATION RESULTS FROM UTILIZATION PLANNING AND INTEGRATION .......... 4533
Nobuyoshi Fujimoto

CSA PLANNING TO USE ISS TO MEET THE FUTURE ................................................................. 4540
Nicole Buckley

INTERNATIONAL SPACE STATION PAYLOAD OPERATIONS: THE CHALLENGE OF MANAGING
PAYLOAD ACTIVITIES FOR A SIX PERSON CREW IN MULTIPLE PARTNER LABORATORIES .......... 4541
Michael Fawcett

SCIENTIFIC PAYLOAD IMPLEMENTATION ONBOARD THE INTERNATIONAL SPACE STATION ........... 4542
Vic Cooley

THE IMPLEMENTATION OF TWO YEARS OF ESA UTILISATION OF THE ISS ................................ 4548
Carlo Mirra

ISSUES AND SOLUTION KNOWLEDGE FROM ISS/KIBO LIFE SCIENCE EXPERIMENT OPERATIONS .......... 4553

B6.2 NEW OPERATIONS CONCEPTS SESSION #117

DEVELOPMENT, IMPLEMENTATION AND VERIFICATION OF A NOVEL GROUND STATION ARCHITECTURE FOR REAL-TIME APPLICATIONS ...................................................... 8335
Sebastian Herzig

AUTONOMOUS CONTROL OF OPERATIVE CONSTRAINS DURING REAL-TIME TELEOPERATION OF SPACE ROBOTS ................................................................. 8344
Markus Pietras

GROUND SEGMENT AND OPERATIONAL CONCEPT FOR LUNAR AND PLANETARY ROBOTIC MISSION ....................................................................................... 8351
Chiara Maria Lombardi

AUTOMATION OF OPERATIONAL ROUTINE TASKS IN ESOC EARTH OBSERVATION MISSIONS ................................................................. 8359
Michael Koller

MULTIFACETED NATURE OF ATV OPERATIONS ................................................................................................................. 8368
Kris Capelle

ON-ORBIT SERVICING MISSIONS AT DLR/GSOC .................................................................................................................. 8376
Bernard Cabrieres

SATELLITE END OF LIFE CONSTRAINTS : TECHNICAL AND ORGANISATIONAL SOLUTIONS ................................................................. 8383
Jan Koekemoer

SUMBANDILA OPERATIONS - A COOPERATIVE APPROACH ................................................................. 8393

C1.7 GUIDANCE, NAVIGATION, AND CONTROL (3) SESSION #118

REGULARIZATION TECHNIQUES IN LEO SPACECRAFT ORBIT CONTROL STRATEGIES ................................................................. 8401
Arturo Intelisano

MULTIRATE SENSOR DATA FUSION FOR SPACECRAFT STATE ESTIMATION ................................................................. 8402
G. V. P. Bharat Kumar

A SIMULATION ENVIRONMENT FOR TELEPRESENT ORBITAL MANEUVERING ......................................................................................... 8412
Markus Wilde

EFFECT ANALYSIS OF THRUSTER CONFIGURATION TO CONTROL ERROR AND FUEL CONSUME ................................. 8413
Xiaokai Yue

DIRECT TRANSCRIPTION OF LOW-THRUST TRAJECTORIES WITH FINITE TRAJECTORY ELEMENTS ................................................................. 8420

PREDICTION OF LANDING POINT OF CHANG‘E-1 LUNAR PROBE USING SHORT-ARC USB AND VLBI TRACKING DATA ......................................................................................... 8431
Jianrong Chen

VISUAL NAVIGATION SYSTEM FOR ORBIT AND ATTITUDE DETERMINATION OF FAILED/DEAD SATELLITES ON ORBIT ......................................................................................... 8436
Gilberto Avantes Jr

HIGH FREQUENCY VIBRATION ISOLATION OF CONTROL MOMENT GYROSCOPE ON SATELLITES ................................................................. 8444
Zhang Yao

PROBLEMS OF NAVIGATIONAL TRACKING OF TETHER SYSTEM DEPLOYMENT ON AN EXAMPLE OF YES2 EXPERIMENT ON SPACE VEHICLE "FOTON-M3" ................................................................. 8453
Igor Belokonov

NEMO: AN ADVANCED CROSS-APPLICATION VISION-BASED GNC SW PLATFORM AND SIMULATOR ................................................................. 8459
Igor Yukman

A LABORATORY FACILITY TO TEST VISION-AIDED DOCKING STRATEGIES WITH NO-COOPERATIVE TARGETS ................................................................. 8475
Nicola Cortigiani
A STUDY OF THE NAVIGATION FOR A SPACECRAFT BY USING MODIFIED ORBIT ESTIMATOR .......................................... 8490
Tsutomu Ichikawa

C2.7 SPACE VEHICLES – MECHANICAL/THERMAL/FLUIDIC SYSTEMS SESSION #119

CDR-LEVEL STRUCTURAL MODELLING AND OPTIMIZATION OF THE MERCURY SODIUM ATMOSPHERE SPECTRAL IMAGER (MSASI) ........................................................................................................... 8495
Joao Ricardo

COMPUTATIONAL FLUID DYNAMICS ANALYSIS AND FLOW TEST OF MANNED SPACECRAFT ........................................... 8508
Wei Lu

COMPUTATIONAL MODELLING OF HEAT TRANSFER IN A SPACECRAFT HEAT PIPE .................................................................................................................. 8514
Kio Michael

COUPLED AEROASSISTED ORBITAL PLANE CHANGE MANOEUVRE AND THERMAL PROTECTION SYSTEM OPTIMIZATION .................................................................................................................. 8523
Antonio Mazzaracchio

DESTRUCTIVE MATERIALS THERMAL PROPERTIES DETERMINATION WITH APPLICATION FOR SPACECRAFT STRUCTURES TESTING .......................................................................................... 8541
Oleg Alifanov

ENABLING TECHNOLOGIES FOR HOT STRUCTURES OF NEXT GENERATION RLV’S - THE ASA PROGRAM SUMMARY ......................................................................................................................... 8549
F. A. Fossati

EXPERIMENTAL AND NUMERICAL STUDIES OF SPALLATION PARTICLES EJECTED FROM A LIGHT-WEIGHT ABLATOR .............................................................................................................. 8554
Sohey Nozawa

EFFECTIVE PARAMETERS ON CALCULATION OF EFFECTIVE THERMAL CONDUCTIVITY OF MULTILAYER PRINTED CIRCUIT BOARDS IN SPACE APPLICATION ........................................................................ 8568
Esmaeil Moeini

IBDM: THE INTERNATIONAL BERTHING DOCKING MECHANISM FOR HUMAN MISSIONS TO LOW EARTH ORBIT AND EXPLORATION .......................................................................................... 8569
Marco Caporicci

OPTICAL SENSOR SYSTEM APPLICABILITY FOR SPACECRAFT TESTS .................................................................................. 8577
Alfonso Giusti

RESEARCH ON THE THERMAL CONTROL HARDWARE COMBINED WITH HEAT PIPE AND PHASE CHANGE MATERIAL .................................................................................................................. 8584
Taig Young Kim

SURFACE HEAT FLUX ESTIMATION AND NEW CALIBRATION METHODS FOR GROUND-BASED TESTING IN HYPERSONIC ENVIRONMENTS ..................................................................................... 8590
Jay Frankel

WING LEADING EDGE ABLATION TESTS IN ARC TUNNEL .................................................................................................................. 8591
Ai Bangcheng

RESULTS FROM THE THERMAL BALANCE TESTING OF THE CBERS 3-4 SATELLITE TM .................................................................................................................. 8597
Marcio Bueno Dos Santos

C4.7-C3.5 NUCLEAR PROPULSION AND POWER SESSION #121

ADVANCED RADIOISOTOPE HEAT SOURCE & PROPULSION SYSTEMS FOR PLANETARY EXPLORATION .................................................................................................................. 8608
Robert O’Brien

RECENT ACTIVITIES AT THE CSNR FOR DEVELOPING NUCLEAR THERMAL ROCKETS .................................................................................................................. 8616
Steven Howe

SCALING LAWS FOR PLASMA JET MAGNETO-INERTIAL FUSION .......................................................................................... 8626
Milen Stanic

SAFETY AND NUCLEAR POWER SOURCES FOR SPACE SYSTEMS .................................................................................. 8639
Corinne Ségalas

FISSION SURFACE POWER SYSTEM TECHNOLOGY DEVELOPMENT ACTIVITIES AT THE NASA MARSHALL SPACE FLIGHT CENTER .................................................................................. 8640
Roger X. Lenard

HYBRID NUCLEAR PROPULSION SYSTEM FOR A MANNED MARS MISSION (M3) .......................................................................................... 8641
Federica Ferraro

D1.6 SYSTEM ENGINEERING TOOLS, PROCESSES AND TRAINING (2) SESSION #122

MICROSATELLITE OPTICAL PAYLOAD FOR IN-SITU SPACE DEBRIS MONITORING .................................................................................................................................................. 8642
Fabrizio Paolillo

CONCEPT SELECTION FOR A PLANETARY REFLECTION-SEISMOLOGY SYSTEM WITH MULTIPLE END-USER REQUIREMENTS AND MISSION CONSTRAINTS ............................................................................... 8653
Peter Batenburg
