61st Annual Meeting of the American College of Veterinary Pathologists and 45th Annual Meeting of the American Society for Veterinary Clinical Pathology 2010

Baltimore, Maryland, USA
30 October-3 November 2010

ISBN: 978-1-61782-375-6
TABLE OF CONTENTS

ASVCP TEACHING CLINICAL PATHOLOGY

Writing Good Test Questions ...................................................... 1
Jared Danielson

ASVCP EDUCATION SYMPOSIUM: COMPARATIVE ONCOLOGY

A Comparative Approach to Cancer Biology and Therapy ................. 10
Chand Khanna
Comparative Clinical Genomics .................................................. 13
Matthew Breen
Integrative Molecular Approaches to Cancer .................................. 17
Jaime F. Modiano

CAREER DEVELOPMENT

From Government to Industry to Academia (and the Mergers, Near Mergers, Consolidations and Deconsolations in Between) .................. 27
Keith Harris
Skills Sets and Obstacles Common to Successful Careers Across Professions and Organizations: An Executive Coach’s Perspective ............ 28
Brian C. Arnold
From Academia to Big Pharma: It’s More than Looking at Slides .......... 45
Glenn H. Cantor, Evan B. Janovitz
Consulting Following a Career in Big Pharma ................................ 47
Hugh E. Black

CHARLES CAPEN MEMORIAL SYMPOSIUM ON ENDOCRINE DISEASE

The Legacy of Charles Capen: from the Global to the Personal ............ 48
Steven E. Weisbrode
Heritable Medullary Thyroid Carcinoma Syndromes: A Current Perspective .......... 52
Ronald A. DeLellis
The Adrenal Medulla and Extra-adrenal Paraganglia: A Current Perspective on Models and Mechanisms ............................................. 65
Arthur Tishcler
Calcium-Regulating Hormones: From Fish to Man and Back Again .......... 81
Thomas J. Rosol
Four Forms of Growth Hormone Excess in the Dog ......................... 91
Ad Rijnberk

NATURAL DISEASE FOCUSED SCIENTIFIC SESSION I

Anatomy and Physiology of the Lymph Node: An Immunophotojournalist’s POV ................................................. 98
A. O. Anderson

EMERGING DISEASE FOCUS SEMINAR

Tasmanian Devil Facial Tumor: The Emergence of a Transmissible Cancer .............................................. 116
Stephen Pyecroft
ASVCP VETERINARY LABORATORY PROFESSIONALS SESSION I

Immunocytochemistry: Getting Started ......................................................................................................................... 121
Anne M. Burger

Immunocytochemistry: Technique and Interpretation of Hematopoietic Conditions ......................................................... 126
Rose Raskin

Evaluating Hemolymph: Clinical Pathology in the American Lobster ...................................................................................... 132
Andrea L. Battison

CLINICAL PATHOLOGY FOCUSED SCIENTIFIC SESSION I

Urinary Biomarkers of Chronic Kidney Disease in Veterinary Medicine: Where Do We Stand? ........................................... 139
M. Nabity

EXPERIMENTAL DISEASE FOCUSED SCIENTIFIC SESSION I

Mouse Models of Skeletal Disease .................................................................................................................................. 145
M. Horowitz

INDUSTRIAL AND TOXICOLOGIC PATHOLOGY FOCUSED SCIENTIFIC SESSION I

Review of Recent Proposals on Global Training Practices and International Recognition for Toxicologic Pathologists ............................................................................................................................... 150
B. Bolon

Metabonomic Technology and Early Drug Discovery: Assessment of Toxicity, Biomarkers and Mechanisms of Toxicity ............................................................................................................................... 159
D. G. Robertson

NATURAL DISEASE FOCUSED SCIENTIFIC SESSION II

Smallpox: Update on an Ancient Scourge .......................................................................................................................... 165
J. L. Chapman

Elephants on the Brink: Novel Herpesvirus a Threat to Survival ............................................................................................ 174
L. K. Richman

ACVP AND ASVCP JOINT PLENARY SESSION

The Role of Astrocytes in the Biology and Therapy of Brain Metastasis .................................................................................. 176
Isaiah J. Fidler

Inflammation and Cancer: Reprogramming the Immune Microenvironment as an Anti-Cancer Therapeutic Strategy .............................................................................................................................. 181
Lisa Coussens

Bone Microenvironment and the Pathogenesis of Bone Metastasis ............................................................................................. 184
Thomas J. Rosol

ASVCP VETERINARY LABORATORY PROFESSIONALS SESSION II

Platelet Counting and Interpretation Mythology ..................................................................................................................... 193
Harold Tvedten

VIN Quality Control Material Study: Quality of In-Clinic and Reference Laboratory Testing .................................................. 198
Mark Rishniw, P. Pion, T. Maher

CONCURRENT SESSION I: INFECTIOUS AND TRANSMISSIBLE CANCERS

Clonally Transmissible Cancers in Dogs and Tasmanian Devils ............................................................................................ 199
Elizabeth Murchison
Papillomaviruses, Polyomaviruses and Combinations Thereof in Papillomas and Carcinomas of Australian Marsupials
Amanda O’Hara, L. Woolford, M. Bennett, A. Rector, M. Van Ranst, K. Warren, P. Nicholls

Vaccines to Prevent Papillomavirus Infection and Associated Cancers
Richard Roden

CONCURRENT SESSION II: AQUATIC ENVIRONMENTAL PATHOLOGY

Fish Kills, Intersex, Other Histopathological Abnormalities and Contaminants of Emerging Concern in Tributaries of the Chesapeake Bay
Vicki S. Blazer

A Hop on the Wild Side: The Use of Frogs in Basic Research, Toxicological Testing, and Environmental Monitoring
Jeffrey C. Wolf

The Tides They are A-Changin': Fish Models and the New Paradigm in Toxicology
Mac Law

CLINICAL PATHOLOGY FOCUSED SCIENTIFIC SESSION II

Veterinary Cancer Biomarkers: A Specifically Sensitive Topic
C. J. Henry

EDUCATION FOCUSED SCIENTIFIC SESSION

Continuous Curricular Progress in Veterinary Medical Education: How to Tell if Your Curriculum is Working and Keys to Making it Work Better
Jared Danielson

ASVCP VETERINARY LABORATORY PROFESSIONALS SESSION III

Anatomy and Pathology of the Fish Eye
Brent Whitaker

Elasmobranch Medicine (Sharks, Skates, and Rays)
Katherine Hadfield

Amphibian Clinical Medicine: Anuran Edema
Leigh Ann Clayton

ASVCP CASE REVIEW SESSION

ASVCP Case Review Session
Marilyn S. Whitney

EXPERIMENTAL DISEASE FOCUSED SCIENTIFIC SESSION II

Use of Immunohistochemistry in Phenotyping Genetically Engineered Mice
Miriam Anver, Diana Haines

Bovine Tuberculosis Vaccine Efficacy Studies: Neonatal Calves and White-tailed Deer
W. Ray Waters, Mitchell V. Palmer, Tyler C. Thacker

INDUSTRIAL AND TOXICOLOGIC PATHOLOGY FOCUSED SCIENTIFIC SESSION II

Globalization of Toxicologic Pathology - Current State and Future Needs
Kevin B. Donnelly

Animal Models of Cancer in the National Toxicology Program
D. E. Malarkey
CONCURRENT SESSION IV: HEMOPARASITES

Dissecting the Mechanisms of Tick Transmission ................................................................. 284
Susan M. Noh

Understanding Piroplasmosis .......................................................................................... 289
Donald P. Knowles

Bartonellosis: A Hidden Epidemic .................................................................................... 292
Edward Breitschwerdt

Panola Mountain Ehrlichia in the US and Its Relation to Heartwater ............................... 299
Amanda D. Loftis

MINI-SYMPOSIUM

Recommended Guidelines for the Conduct and Evaluation of Prognostic Studies in Veterinary Oncology .................................................................................................................. 305
Joshua Webster

Review of the Prognostic Evaluation of Canine Mammary Carcinomas .......................... 313
Michael H. Goldschmidt

Review of the Prognostic Evaluation of Canine Melanomas .......................................... 324
Rebecca C. Smedley

Review of the Prognostic Evaluation of Canine Cutaneous Mast Cell Tumors .............. 333
Matti Kiupel, Nicholas Bacon, Renee Laufer Amorim, Nicole Northrup, Timothy Scase, Dodd Sledge, Douglas Thamm, Joshua Webster

Establishing Prognostic Factors for the Treatment of Canine Lymphoma ...................... 343
Victor E. Valli, San Myint, A. Durham, M. Breen
