Hua Yin, Ting Cai, Xian Meng
Research on Fault Line Detection and Restraining Transient Over-voltage Under Arc-suppression Coil with Paralleled Resistance Grounding Mode ................................................................. 165
Hu Junyi, Lu Rong
Framework Design of Smart Power Utilization System .............................................. 171
Lijian Luo, Shaofeng Huang, Mengna Liu
Reactive Power Optimization of Distribution Network Based on Improved Artificial Fish Swarm Algorithm ................................................................. 176
Yuan Yuan, Zhu Hong, Zhang Ming, Zha Hongqin, Wang Xuyan, Wang He, Chen Juncao, Zhang Junfang
Discussion on the Planning and Optimization Strategies of MV Distribution Network in Typical Districts of Cities ............................................................ 181
Pan Peng
Optimal 110/10KV Substations Planning ................................................................. 186
Zhou Man, Huang Minxiang, Yin Jianhong
Introduction of Security Assessment System Based on Grid Technology in Power Network ................................................................. 192
Junyi Hu, Rong Lu
Technical-Economic Analysis on Application of Conductor Carbon Fiber Reinforced Polymer Cores on Newly Constructed Line and Reconstructed Line ................................................................. 195
Jian-Cheng Wan, Jian-Ping Yang, Zhen Liu, Jun-Ke Han, Lei Li, Xiang-Min Hou, Sheng-Chun Liu
Protection Configuration Research in Distribution Network with Distributed Generation ................................................................. 205
Luo Xiaochu, Wang Puangong, Luo Jian, Zhang Lin
Research About Online Security Warning and Risk Assessment of Power Grid Based on Energy Management System ................................................................. 209
Wang Hanyun, Wang Kangyuan, Zhang Yunxian, Mei Guoqiang, Wu Mingming
Based on the Problems of Extra(ultra) High Substation Digitalization and Smart Grid ................................................................. 212
Ran-Hua Wang
The Analysis of Specific Grounding Fault and Petersen on ARC Grounding Out Arc ................................................................. 221
Run-Hua Wang
Study on Control Method of Cascade H-bridges Active Power Filter for Distribution System ................................................................. 225
Rong Lu, Junyi Hu
Research on Conduction Mechanism of Cross-regional and Cross-provincial Transmission Price ................................................................. 229
Cheng-Ren Li, Yue-Jin Wang, Hai-Ying He, Yong-Xiu He
Energy Based Contact Burning Diagnosis and Research of On-Load Tap Changers ................................................................. 234
Chunning Wang, Wei Chen, Lin Chen, Hongzhong Ma, Peng Gao, Chunliang Wang
Diagnosis for Loose Switching Contact Fault of On-load Tap-changer in Transformer ................................................................. 238
Chunning Wang, Lin Lu, Hongzhong Ma, Ji-Ping Jin, Huijeng Zhang
A Load Shedding Method Based on the Power Vacancy Sensitivity Analysis ................................................................. 244
Shan Xu, Zhe Tang
The Research and Design of Communication Network Construction for Nanjing Distributing and Consuming Communication Network ................................................................. 249
Lei Wei, Hong Zhu, Qin Jia, Zaichao Huang
ChRDB: A High Performance RTDB System with Object-Oriented Data Representation Architecture ................................................................. 271
Shu Jin, De-Mei Bao, Zhi-Min Jia
Research on the High Reliable Integrated Power Utilization Information Real-time Collection System ................................................................. 281
Kai Chen, Shaozhao Yang, Yadong Qian
The Research of the Information Interaction Technology About Intelligent Electricity Utilization Between the Power Supply Company and the Big Customers ................................................................. 287
Kai Chen, Shaozhao Yang, Yadong Qian
The Improvement and Analysis of Anti-mistake Device of Switchgear Cabinet ................................................................. 292
Mei Zhgngnan, Zhang Yingqi, Zhang Youyun
Study of Increasing the Usage of Decentral Co-generation System by Use of Cooling or Heat Water Storage ................................................................. 299
Jian Ma, Jun Peng, Jinglei Dong
Resource Management Model of Electric Power System Based on Grid Technology ................................................................. 304
Lisha Gao, Yang Hu, Dahong Zhu
A New Fault Location Algorithm for Distribution Network with DG ................................................................. 309
Ning Wu
High Voltage Distribution Network Planning Based on Integrated Model ................................................................. 316
Yue Yuan, Chen Zhu, Chen-Jie Li, Dongli Cao, Jian-Zhong Meng, Feng-Gang Liu
Research and Application of a Reliability Growth Model for 220 kV Power Transmission and Distribution Installations ................................................................. 322
Qing Shi
Implementation of the Interface to Electronic Transducer in Digital Substation ................................................................. 327
Zhi-Liang Yin, Zhen-Dong Gong, Ming Chen
Analysis the Electricity Load and the Summer Air-conditioning Load in Taizhou ................................................................. 332
Xiang Yuan
A Preliminary Study on the Business Model for Electric Vehicle Charging Stations ................................................................. 348
Yue Xin, Yongmei Sheng, Yuewu Li
The Evaluation Method of Feeder Automation Algorithm Robustness under the Condition of Communication Failures ................................................................. 353
Ling Wanshui, Liu Dong, Liu Jingsong
The Stability Analysis of Parameter Uncertainties in Power Systems ................................................................. 541
   Meizhao Liu, Baoxin Yao
Study on the Measurement of Power-transmission-line Parameters with Induced Voltage ........................................ 547
   Hui Fu, Zhicheng Zhou, Xu Wei, Fengbo Tao
Simulation and Analysis of Wind Farm Reactive Power and Voltage Problems Based on Detailed Model .................. 553
   Yuan Xiaodong, Wu Zhi, Li Qun, Liu Jiankun, Zhao Jingbo, Gu Wei
Study on Evaluation System and Power Supply Scheme for Large-scale and Extra-high Power Electric Arc Furnace Connected to the Grid .............................................................. 560
   Zhen-Jian Xie, Hai-Quan Wang, Zhi-Wei Wang, Jun-Hui Huang
   Research on the Impact of Electrified Railway on Power Grid .............................................................. 566
   Yu Hu, Jun-Hui Huang, Zhi-Wei Wang, Ye Tao
Discussion on Dynamic Var Compensation Scheme of Wind Power Station ................................................ 575
   Wang Hui, Liu Xia, Xu Wenchao
10000MW Wind Power in Jiangsu Power System in 2020 .................................................................. 580
   Qian Zhang, Zhi-Wei Wang, Zhen-Jian Xie, Hu Li
Protection Performance Analysis and Settings during Power Black-start of Northern Jiangsu District ................. 585
   Yu Cui, Guo-Ping Yan, Jin-Guan Liu
Analysis on Active Output Characteristics of Wind Farms in Concentrated Areas of Wind Power .......................... 589
   Liu Jiankun, Zhang Liudong, Li Qun, Zhou Qian, Zhao Jingbo, Yuan Xiaodong
Case Analysis of Yangzhou Energy Mechanism Conservation ...................................................................... 595
   Ge Ping, Chen Dehua, Shen Li
The Wind-Power Converting System Design with Application of Model Hamiltonian Controller ..................... 600
   Hao Chen, Tao Ran, Bing Wang
Research on Online Monitoring of Arrester .................................................................................. 603
   Jun Ju, Yu Wang
Analysis and Management Research on the Impact of Shanghai-Nanjing Intercity Railway Traction Load on Power Grid .................................................................................................................. 609
   Fan Li, Zhen-Yu Yang
Prospect and Discussion on the Relay System Configuration of Intelligent Substation ...................................... 615
   Lan Junbo, Qian Guoming
An Object-Oriented Real-Time Database Storage Scheme Armed with Dual Efficient Indexes .......................... 620
   Hong B. Dai, Shu Jin
A Communication Middleware Based on Concurrent Real-time Database ..................................................... 626
   Chao Zhu
Medium-voltage Distribution Feeder Model and Network Topology ............................................................... 631
   Guo-Zheng Han, Bing-Tin Xu
Power Harmonic Analysis Based on Orthogonal Trigonometric Functions Family ........................................... 637
   Yueyi Wang, Yuepeng Zhang, Jinghong Guo
Investigation and Practice of an Intelligent System for Power Transformer .................................................. 644
   M. Dong, Dai-Yong Yang, Hai-Bin Zhou, Z. Yan
Application of Cooperative Game Analysis in Combination Evaluation of Power Quality ................................. 650
   Guodong Li, Gengyin Li, Ming Zhou
A Power Cable Fault Location Method Combining with Wavelet Analysis and Curve Fitting ............................ 656
   Qi-Neng Jiang, Shu-Tao Zhao, Jun Zhao, Chen-Guang Zhao
Power Transmission Tower Type Determining Method Based on Aerial Image Analysis ................................ 661
   Jun Zhao, Shu-Tao Zhao, Qi-Neng Jiang
Measurement Based on the "Group Linear Regression Method" of Harmonic Impedance ................................ 666
   Lei Wang, Bo Yu
The Research on Under-Voltage Load Shedding Based on Voltage-reactive Power Sensitivity in Power System .. 672
   Haifeng Liang, Gengyin Li, Jintong Han
Integration of Large Scale Wind Farm Into Electrical Grids ........................................................................... 679
   Meiqi Yao, Liangchang Yao
System Voltage Regulation of Power Grid Based on Synchronous Generator’s Leading Phase Operation .......... 684
   Cheng-Liang Wang, Hong-Hua Wang, Gang Xu
Fault-Tolerant Control System Research Based on Dual CPU Redundancy for High-Voltage Inverter ............... 688
   Hu Xuan, Li Bing, Hao Lijie
Design and Implementation of the Object-oriented EMS Real-time Database ................................................ 691
   Li Jingxia, Zhong Yun
Abnormal Voltage Flicker Analyze at the Point of Common Coupling ......................................................... 694
   Zang Hong Zhi, Wang Xing Zhao
High Quality Inverter-Based Distributed Power Supply System Collocating SVC ........................................ 697
   Zhipeng Lv, An Luo, Yao Shen, Lu Guo
Cause Analysis on the Break of Isolator Helical Spring ................................................................................. 705
   Qiong-Xu Yang, Chao Yang, Jian-Guo Zhang
The Research and Exploiture of Subharmonic Injection Scheme for Generator Stator Ground Protection ........... 709
   Xiaobo Liu
Chaotic Artificial Neural Network in Reactive Power Optimization of Distribution Network ........................ 714
   Xue Wei
Transmission Network Expansion Planning Under Interval Load ..................................................................... 718
   Wu Peng, Liu Chuanquian, Li Jie, Huang Cheng
Research and Implementation on Power System Stabilizer PSS4B Model .......................................................................................................................... 724
Research on the Power Transmission and Distribution Cost Model of the Allocation Wholesale Electricity Business at a Provincial Level ................................................................. 728
Ye Tian, Junhui Xin, Du Zhi, Tao Lin, Jian Cao
Economic Loss Assessment of Voltage Sags ............................................................................................................. 734
Zejun Ding, Yongqiang Zhu, Caishong Chen
The Research of Distribution Network Communication Method ................................................................................ 739
Yu Li, Shuang Huang
Research of APF Based on Fuzzy-Sliding Mode Variable Structure Control Strategy ....................................................... 743
Zhong Tang, Yong Yan, Youhua Jiang, Chunyue Yang
Research on a Fault Diagnosis Method for Power Distribution Grids ....................................................................... 748
Kuang Ye, Lei Ming
Centralized Management Platform of Distributed Recording System Based on IP Network ........................................... 753
Lizhehen
Damping Subsynchronous Oscillation by Static Var Compensator ......................................................................... 759
Shan Gao
Energy-saving Control Device for Substation Air-conditionings and Remote Management System ......................... 764
Wen-Bin Wang
Analysis of the Phenomenon of False Ground in Small Current Grounding System .................................................. 769
Lan Senlin
A Method of Flicker Measurement Based on Pisarenko Harmonic Decomposition ................................................. 772
Xiaoqiao Duan, Yan Qiang, Zhifeng Su, Song Fu, Zhirui Liang, Haifeng Su, Xin Miao, Xi Chen
Research of Distributed Photovoltaic Power Supply Access Simultaneous Power Quality Monitoring System ........... 777
Xiaoqiao Duan, Zhirui Liang, Xiaoming Li, Shengguo Niu, Wen Zhou
Power System Harmonic State Estimation based on PMU and Ridge Estimation ......................................................... 781
Shengguo Niu, Zhirui Liang, Haifeng Su, Xiaoqiao Duan
Research on Power Quality Monitoring and Analyzing System Based on Embedded Technology .......................... 787
Hong-Tao Zhang, Ying Ye, Qing An
Analysis of Failures and “Blind Spots” of ZYQ-11S/12S Voltage Switching Box for PXR-831/801E Protection Screen ............................................................................................................. 792
Wei Guo, Hong-Tao Zhang, Jin-Sheng Si
Research of Flexible Wide-area Measurement and Analysis System in Power System ........................................................ 798
Zhirui Liang, Shengguo Niu, Haifeng Su, Xiaoqiao Duan
Research on Remote Data Acquisition and Monitoring System of Distribution Transformers Based on Broadband Technology .............................................................................................................. 802
Hong-Tao Zhang, Ying Ye, Jun-Xia He, Shuanggui
The Application of End-users’ Harmonic Control Installation .................................................................................. 806
Yao Zhou, Shen, Xie-Ping Chu
The Research on the Method of Condition Estimate of Power Transformer Base on Support Vector Machine ........... 811
Weizheng Zhang, Lanjun Yang, Limin Du
Very Fast Over Voltage Simulation and Analysis in 500kV GIS Substation of Xiangshuijia Pumped Storage Power Station ............................................................................................................. 815
Shajie Sun, Meiqi Yao
Voltage Stability and Optimum Energy Saving Control of Distribution Power Network ........................................... 821
Xing-Tao Xu
The Application of Distributed Power Supply System and CCHP in China’s Rural Areas ........................................... 830
Caishong Chen, Yongqiang Zhu, Dong Zejun
Research on IPv6 Transition Evolvement and Security Architecture of Smart Distribution Grid Data Communication System ........................................................................................................ 835
Xin Miao, Xi Chen
A Method for Online Calculation of Line Loss in Distribution Networks Based on CIM ........................................... 840
Jun-Yang Tian, Yun Zhu, Zhen-Cheng Liang, Hua Wei
Gridless Net Routing of Integrate Circuit with Particle Swarm Optimization Algorithm ........................................... 844
Xun-Cheng Huang, Zhiying Liu
Research Into Possibility of Smart Industrial Load Participating Into Demand Response to Supply the Power System ...................................................................................................................... 850
Ye Tang, Fei Xu, Lei Chen
Prevention and Treatment to Over-voltage of Low Voltage Distribution Network ......................................................... 855
Song-Ping Li, Hong-Min Zhang
The Research on Loss Allocation Methods in Electricity Market .................................................................................. 861
Zhang Jing
An Alternative Energy Research on Hot Water Supply System in Colleges and Universities ....................................... 869
Dong-Li Cao, Zhi-Xiang Li, Yue Yuan
Chuandian Liu, Peng Wu, Yihong Huang
On the Strategy of Distribution System Service Restoration Considering Distributed Generation .................................. 881
Ye Tian, Junhui Xin, Du Zhi, Tao Lin, Jian Cao
Application of CDM in China Wind Power Generation

Zhou Dong

Empirical Research on Development of China’s Wind Power Industry

Zhou Dong

Random-neighbor-search Based Optimal Planning for Distribution Networks with Wind Power

Zhendong Wan, Haichong Cheng, Liangchong Yao, Zhipang Wan, Guoqin Yu

Research on the Parallel Hybrid Active Power Filter

Chao Zhang, Xuezong Zhang, Zhihong Zhang, Hongqi Zhang

Analysis on Reliability Indices of Wind Farm and its Influencing Factors

Yu Xu, Yong-Quing Zhu, Ze-Jun Dong

Application of Neural Network and DS Evidence Fusion Algorithm in Power Transformer Fault Diagnosis

Xingang Chen, Xiaoxiao Tian

The Selection Strategy on the Main Parts of Transformer and Its Performance Parameters

Mai Weiping, Ma Liuxue, Cheng Fangxia, Ao Ming

Subsynchronous Oscillations Study of Non-parallel Operating AC/DC System with Series Capacitor

Zhang Rui, Xiao Xiangning, Jin Wang

Application of JAVA Technique on the Report Form Management System of Distribution Management Systems in Power Network

Yu Xia, Fang Yuan, Peng Gao

Reactive Power Optimization in Power System Based on Chaos Ant Colony Algorithm

Zhe Liu, Xiaohua Wang, Chaowei Li

The Game Analysis in the Policy-Processing of Grid Construction

Liang Ye, Xing-Hua Shi

Operation Economy Analysis of the Chilled Water Storage Reform Programs on Central Air Conditioning System of a Building

He Wang, Ling-Ling Yang, Hong-Ji, Hong-Mei Wang, Zhao-Mao Zhou

Control Strategy of Shunt Hybrid Active Power Filter in Distribution Network Containing Distributed Power

Ke Zhou, Zhipeng Lv, An Luo, Lu Liu

Design of Intelligent Terminal Unit for Smart Distribution Grid

Qingle Pang, Houlaizi Guo, Minjiang Xiang

Distributed Generation and Demand Side Management

Caihong Chen, Yongqiang Zhu, Yu Xu

Operation Scheme for the Weak Structure Power Grid

Zhaoyuan Fu, Qing Chen, Zhanjun Gao

Application of Power Supply Company Decision Support System under Smart Grid

Qi-Ming Cui, Hong-Jian Pan, Wen-Tao Sun

Study on Network Design of Automation System in Smart Substation

Yuanqiu Gao, Bingxin Xu

Overcurrent Fault Fast Isolation Technology in Distribution Line Based on Network

Mengyou Gao, Bingxu Xu

Comprehensive Application of Signal Injection Method in Protection and Control of MV Distribution System

Fan Shuxian, Xu Bingxu

Research on Control Method of Two Single-Phase B2B STATCOM in Traction System

Ke Wang, Guiping Zhu, Qizhi Wu, Jianguo Chen

Study on Selection Theory of Shanghai 110kV Power Grid Connection Mode and Its Application

Jian Wang, Jingping Yu, An Chen

A Micro Power Quality Management Technology Based on Grid-connected Inverter

Yu Li, Luo An, Tu Chunming, Rong Fei, Peng Shuangjian

A Study on Optimal Placement of Voltage Sag Monitors

Cai Wei, He Huimin

Research on the Line Redundancy Protection of GOOSE Digital Network Substation

Zhou Dong

Discussion of the Testing Technology for Protection Device Used in Digital Substation

Kai Ma, Shu Huang, Jiongcong Chen, Yingyang Yang

Effects of Advanced Metering Infrastructure (AMI) on Relations of Power Supply and Application in Smart Grid

Zhang Luhua, Yi Zhonglin, Wang Stsong, Yuan Ruiming, Zhou Hui, Yin Qingduo

Testing System Research Based on Virtual Electricity Meter Software

Kun-Quan Wang, Hai Zhou, Jin-Sha Yuan

Electricity Intensity Analysis of Key Industries in East China Region Based on Grey Relational Analysis

Jie Gu, Zong-Lin Yang, Hao-Zhong Cheng, Liangchong Yao, Zhipang Wan, Masoud Bazargan

Application Comparison of Rogowski-type and Optical-type Electronic Current Transformer

Lijing Cao

Design and Implementation of an Integrated Micro-grid System

Bo Zhao, Xuecong Zhang, Hangwei Tong, Li Guo, Yanbo Che, Bin Li

The Research and Development of Comprehensive Evaluation and Management System for Harmonic and Negative-sequence

Lu Liu, Ke Zhou

An Asynchronous Iterative Distributed Power Flow Algorithm Based on the Boundary Bus Injection Power

Jin-Quan Zhao, Peng Xu, Zhong-He Gao, Zhi-Hong Yang
Research on Model for Photovoltaic System Power Forecasting

Zhelong Li, Chao Yang, Zhiqiang Cao, Jichun Liu

Research on Smart Grid Application and Its Design in Building the New Beichuan County

Qian Li, Xiaojun Li, Yongkai Xue, Xiaoyong Zhang, Weilong Xu

The Application of CPU Card in the Electricity Sales Management

Jiao-Jiao Zhang, Zhi-Jie Sun, Yu-Hong Song, Ying-Hui Kong

China MV Distribution Network Benchmark for Network Integrated of Renewable and Distributed Energy Resources

Fan Yang, Ming Tian Fan, Zu-Ping Zhang, Jian Su

Research on Harmonic Control Device of Low Voltage Distribution Network

Yu Lu

The Prospect for the Relay Protection Work in the Smart Electric Distribution Network

Xie Bangzeng, Shen Guangmin, Sun Yangsheng, Nie Peng Chen

Intelligent Control Strategies and Devices of Line Reactive Power Optimization for Smart Rural Power Grid

Piao Zaitian, Tan Dongming

Design of Intelligent Demand Side Management System Respond to Varieties of Factors

Xiang-Ting Chen, Yu-Hui Zhou, Wei Duan, Jie-Hui Tang, Yu-Xiao Guo

Research on Combined Methods of Harmonics Filtering

Xiaoping Du, Xiaoli Jiang, Chenggang Yang, Taotao Ma, Daoshuo Jiang

Study on Selection of Transformer Capacity and Conductor Cross-section Related to 20kV Network in High Voltage Distribution Network

Zhenqiu Wu

Study on Reactive Power Optimal Control of Distribution Systems Based on Hybrid Control Theory

Hongtao Tian, Bijing Guan, Wangjun Zhang, Xinyu Su, Haoxin Xu, Guanfeng He

Power Quality Online Monitoring System Based on Transparent Forwarding

Jiang Xialou, Chen Weiling

Harmonic Characteristic Analysis of Capacitor Commutated Converter in HVDC System

Jun Wang, Jun Wen, Xue-Ling Ma, Chao Wang, Wei-Yang Yin, Bao-Hong Liu

Circuit Loss Analysis and Application Development of Three-phase Unbalanced Load of Low Voltage Distribution Network

Yangyang Yao, Tao He

Applications of Intelligent Tuning Technology in Passive Power Filters

Li-Chun Liao, Xiao-Li Jiang, Zhi-Wei Shu

The Realization for On-line Examination System of Relay Protection in Power System

Hongzhi Li, Jinru Guo, Yiting Wang, Ningxia Wang, Xiaolan Xi, Zhiyi Yuan

Service-Oriented Provincial-Centralized Transmission and Distribution GIS Platform

Jian Chen, Yan He, Rong Zeng

New Polymer Insulation Material in the Application of Clamping Insulator as Insulation cover

Wei Xin, Yuanfeng Zhang, Taoran Hui

Research on Complex Multi-state Distribution System Reliability Modeling and Assessment Methods Based on Bayesian Networks and Random Set Theory

Xu Hua, Zouhuangiang

Key Technologies and Test Method of Remote Terminal in Intelligent Distribution Automation System

Shu Huang, Xiao-Bing Liang, Xin-Hua Gao

A Wind Turbine Simulation System Based on Switched Reluctance Motor

Zhang Yanqiu, Xu Bingxin, Xiong Lixin, Bian Dunxin

Background Harmonic Voltage Test and Evaluation

Yingjie Tian, Xingang Yang, Qinchang Gu, Aiqiang Pan

Research on Calculation Model of Voltage Sags Due to High Voltage and Great Power Motor Starting

Xingang Yang, Qinchang Gu, Yingjie Tian, Aiqiang Pan

Contrast Analysis of Voltage Deviation Assessment in IEC EN and GB Standards

Tao Shen, Xiao Xiangming

Voltage Control Scheme of Nanjing Distribution Grid Based on 10kV Voltage Regulator

Xia Niu, Lianguang Liu, Guannin Mao, Huiyong Lin

Research on Distribution System Restoration Considering Distributed Generation

Yongsheng Shi, Shujian Yao, Yan Wang

Simulation and Realization of Closed Loop Control System of SSSC Based on RTDS

Wei Xu, Xiangyan Xiao, Jinmeng Chen

Research and Application of the Fault Information Integration and Intelligent Analysis in Distributed Grid

Peng Zhao, Chenxin Xu, Jiyuan Zhao

The Development of Monitoring and Analyzing System of Voltage Sag

Chengqian Xiao

The Research and Practice of High Voltage Cubicle Early Warning Based on Gas Component Analysis

Yan Shi, Jian-Li Wei, Sheng-Tao Sun

The Impact of Large-scale Offshore Wind Farm on the Power System

Yuancheng Miao

Updated Distance Protection Makes Distribution Network More Intelligent

Du Ming, Wang Juntian

On Service Restoration Considering Frequency Property of Distributed Generation

Lu Zhao, Tao Lin, Xialing Xu, Yue Bi
Simulation Study on Converter Transformer Saturation Characteristics due to GIC ..............................................................1273
Zhi Li, Wei Huang, Xue Liang Ma, Jianguo He, Li Juan Yang
Research on submodule Capacitance Voltage Balancing of MMC Based on Carrier Phase Shifted SPWM 
Technique .................................................................................................................................1279
Xin Zhao, Guanghui Li, Chengyong Zhao
Research on Doubly-Fed Wind Power Generator Modeling .................................................................................................1285
Fengfeng Ding, Xueliang Huang, Ruijin Zhu, Zenghai Yang
Research on the Key Technology of Shared Modeling between Digital Substation and Control Centre .............................1291
Chunhui Dong, Chen, Xue Liang Lin, Huahong Peng, Ding, Huahong
The Analysis of Electric Arc Suppression Coil on Transient Signals Method in Non-solidly Earthed Network .................1297
Hua-Rui Huang, Yong-Duan Xue, Bing-Yin Xu, Lin-Li Zhang
Investigation and Application of Double Mode Technology for Automatic Meter Reading ...............................................1302
Xueming Zheng, Qinou Liao
The Distribution Electric Price with Interruptible Load and Demand Side Bidding .................................................................1305
Ying-Chen Liao, Li Chen
Modeling and Simulation of Grid-connected Hybrid Photovoltaic/Battery Distributed Generation System ......................1311
Xiaohui Ge, Weixue Xu, Baoxun Huang, Fei Gao, Chengdi Ding, Chengchao Wang
The Influence of Low Resistance Grounding System in Delta Side of Transformer on Differential Protection and Its Solutions .................................................................................................................................1317
Xu Guangfu, Guo Jinxue, Zhang Chunhe, Yu Qunbing
Investment Decision-making of Power Distribution Transformers Transformation Based on Life Cycle Cost Theory .................................................................................................................................1327
Chen Li, Wei Huang, Xue Liang Ma, Jianguo He, Li Juan Yang
Research, Development and Application on the Key Technologies of Intelligent Dual-interactive Power System ..................1333
Jie Yu, Wei Li, Yao Li, Yao Fu, Huijiao Sun
Impact of Abnormality of Bus Coupler TWJ on Dead-zone Protection of Bus Coupler ..........................................................1338
Hai-Tao Su, Qun-Bao Hou, Xiao-Ping Dong
The Application Analysis of Intelligent Alarm Expert System for Qingdao Power Grid .........................................................1341
Qiang Wang, Chao Wang, Yuanlong Liu
Research on Utilization Ratio of Grid-Connected Distributed Solar Photovoltaic Sources ......................................................1345
Yan Xia, Li Hao, Song, Haobao
Impacts of Grid-connected Photovoltaic Generation on Distribution Networks ........................................................................1351
Shengchuan Zhao, Yuanlong Liu, Wenbing Li, Shuangguang Song
The Research for Network Model of Distribution Management System ..................................................................................1355
Kanggeng Pengxin
Optimization Design of All-vanadium Redox Flow Battery Energy Storage System ..............................................................1360
Xueqing Zhang, Yi Wei, Shenchu Xu, Yu Zhang
Study on the Icing Process of Transmission Lines and the Local Meteorological Parameters ..................................................1364
Lei Hong, Jingying, Liu Jinying
Dynamic Characteristics of HVDC Primary Frequency Regulation ........................................................................................1368
Chang Lu, Yong-Jun Zhi, Shao-Hua Li
Design of the Communication Module of Smart Handheld Terminal in Power Marketing .........................................................1374
Yan Sun, Si-Tong Wang, Bai-Ming Yuan, Qing-Duo Yin, Zhi-Yuan Xie
Modeling of AC Arc Furnace and Its Influence on the Relay Protection .................................................................................1379
Zhaowei Peng, Zheng Tao, Xu Chenjing
The Research on the Voltage Sag Problems in the Distribution System Based on the Hybrid Analysis Method ................1385
Shen Guang, Su Yifang, Le Jian, Wang Dongxu
Construction Risks Based Energy-Saving Reconstruction of Distribution Transformers ........................................................1391
Yang Lijun, Huang Wei, Yang Jingyan, Li Le, Ge Jiangbei
Study on Lightning Protection of Cables and Transformer in Microgrid ................................................................................1397
Hong-Qiao Yu, Shui-Ming Chen, Peng-Cheng Yang
Ferro-resonance Over-voltage and Power Frequency Over-voltage on the Neutrals of 220kV Power Transformer 
and Corresponding Protection Strategy .................................................................................................................................1402
Hua-Peng Yu, Shui-Ming Chen, Hong-Qiao Yu, Peng-Cheng Yang, Hua Yin, Gaolian Wu
Application and Research of RDID Technology in Power Energy Measurement .................................................................1408
Hui Wang, Pin-Xiao Liu, Ming Fang, Yuan Cao
A Method of Voltage Flicker Estimation Based on Interharmonic Pairs .................................................................................1412
Fei-Fei Li, Mao-Qing Ye, Hong-Geng Yang, Jin Hai
Research on Emulation Operating Characteristics of GuiLin Isolated Power System based on RTDS .................................1418

Reactive Power Optimization and Voltage Control Using a Multi-Objective Adaptive Particle Swarm Optimization Algorithm

Studies on the Influence of Loads on Voltage Stability in the Urban Power Grid

An Improved Enhanced Phase-locked Loop Based Method for the Measurement of Harmonics/inter-harmonics

Two Methods of Data Synchronization in Optical Fiber Differential: Improved Interpolation and Clock Relay

Research on Assessment Method for the Reliability of the Urban Power Grid Based on Multi-Model Technology

Experiment and Simulation of PTC Used in Fault Current Limiter

A Solution for Monitoring and Controlling the Micro-grid with REN&DER and CCHP based on CSPA-2000(FDCS)

The New Real-time Control System of Reactive Power Optimization

Analysis and Modification of a 500kV Transmission Line Overvoltage Problem

Reactive Power Optimization Control Considering Actual Operating Mode Transfer

Design of Intelligent Fault Diagnosis System for Energy Remote Terminal Unit Based on Agent Technology

Proportional-Resonant Current Control of Single-Phase Grid-Tied PV Inverter System

Adaptive Controller Design Based on Neural Network

IEC 61970 CIM / CIS in Power Dispatching Automation System Standard Conformance Test Technology

Odd-Harmonic Repetitive Control of Single Phase Active Power Filter

Study on Simulation and Testing of FLISR

Wide Area Travelling Wave Fault Location in the Transmission Network

A Novel State Estimation Method based on Topological Contraction for Distribution Networks

Intelligent Scheduling Based on Supply and Storage Feature Indicator for Distribution Networks

The Key Technologies Research of Power Network Model Combination Based IEC61970

Not Neutral Earthing System Voltage Imbalance Analysis and Treatment

Power Distribution Network Planning Optimization Based on Life Cycle Cost (LCC)

Application of IEC 61850 Proxy in Seamless Communication between Digital Substation and Control Centre

The Research on Communication Standard Framework of Smart Grid

Application of Small Capacity Single-pole-mounted Transformers to the Complicated Environmental Districts in Shanghai Central Urban Area

Discussion on Low-voltage Transient Impulse Test Access System

Application of Pole-mounted Transformer Monitoring System in Reducing the Electric Loss in LV Distribution Network

How to Solve the Problems About the Development and Reformation of Urban Grid

The Study on Evaluating Indicator System of the Pilot Project of Smart Grid

Research on Underground Power Planning Based Virtual Reality

Ultrasonic Partial Discharge Detection Using Negentropy-based Matched Filter
