50th Annual Conference of the Australasian Corrosion Association 2010

Corrosion & Prevention 2010

Adelaide, Australia
14-17 November 2010

ISBN: 978-1-61782-479-1
# TABLE OF CONTENTS

<table>
<thead>
<tr>
<th>Paper</th>
<th>Title</th>
<th>Authors</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paper 001</td>
<td>AI 2003™ (S32003) Lean Duplex Case Study: Flexible Flowlines for an Offshore Oil Field Development</td>
<td>J J Dunn, T Mackenzie, D R Hasek</td>
</tr>
<tr>
<td>Paper 006</td>
<td>Use of Impedance Spectroscopy to Study the Integrity of the Aluminium Oxide Passive Films in Mercury Embrittled Aluminium</td>
<td>R E Clegg, A Srivastava, M Amoghavarsha</td>
</tr>
<tr>
<td>Paper 007</td>
<td>Mitigating Flow-accelerated Corrosion in Combined-Cycle and Cogeneration Plants - Best Available Practice</td>
<td>L Carvalho</td>
</tr>
<tr>
<td>Paper 008</td>
<td>Corrosion of Building Assets - Problems and Prevention</td>
<td>L Boulton</td>
</tr>
<tr>
<td>Paper 009</td>
<td>In-Situ Re-Lifing of a CO₂ Absorber Tower Using Welding Robots</td>
<td>M Cooper</td>
</tr>
<tr>
<td>Paper 010</td>
<td>Inhibition of Copper Corrosion in Domestic Water Applications</td>
<td>M S Romano, M G Mena</td>
</tr>
<tr>
<td>Paper 011</td>
<td>Variability of Corrosion of Mild Steel Coupons in Tidal, Splash and Atmospheric Marine Environments</td>
<td>R Jeffrey, R Melchers</td>
</tr>
<tr>
<td>Paper 012</td>
<td>Representativeness of Small Coupons for Corrosion of Large Plates</td>
<td>R Melchers, R Jeffrey, G Simundic</td>
</tr>
<tr>
<td>Paper 013</td>
<td>On Predicting Long-Term Corrosion Behaviour from Short-Term Tests</td>
<td>R Melchers, R Jeffrey</td>
</tr>
<tr>
<td>Paper 014</td>
<td>Tomography of Inclined SCC Cracks</td>
<td>E Gamboa, G Sneddon</td>
</tr>
<tr>
<td>Paper 015</td>
<td>Overview of Stress Corrosion Cracking of Magnesium Alloys</td>
<td>A Atrens, N Winzer, W Dietzel</td>
</tr>
<tr>
<td>Paper 016</td>
<td>Corrosion of Magnesium-Yttrium Alloys</td>
<td>M Liu, P Schmutz, P J Uggowitzer, A Atrens</td>
</tr>
<tr>
<td>Paper 017</td>
<td>Review of Weld Heat Tint and Weld Corrosion of Stainless Steels</td>
<td>M Dimon</td>
</tr>
<tr>
<td>Paper 018</td>
<td>Economic Evaluation of Corrosion Control of a Sour Gas Transmission Pipeline</td>
<td>V Afshari, N Sarkari, F Esmaeelpour</td>
</tr>
<tr>
<td>Paper 019</td>
<td>Hot Water Systems Maintenance in Remote Communities, Northern Territory</td>
<td>R Everett</td>
</tr>
<tr>
<td>Paper 020</td>
<td>Effect of Copper on Coking and Dusting of Fe-Ni Alloys</td>
<td>J Zhang, D J Young</td>
</tr>
<tr>
<td>Paper 021</td>
<td>The Effect of Environment on Intergranular Corrosion Kinetics in Aircraft Aluminium Alloys</td>
<td>S P Knight, M Salagaras, A M Wythe, A J Davenport, A R Trueman</td>
</tr>
<tr>
<td>Paper 022</td>
<td>Galvanic Anode Specifications - A Manufacturer’s Perspective</td>
<td>B Linde</td>
</tr>

</table>
Paper 028: Active Zinc Corrosion in Near-Neutral Aerated Salt Solutions ................................................................. 252
  H J Flitt, D P Schweinsberg, G Will
Paper 029: Corrosion Resistance of NanoBainitic Steel ................................................................................................................. 264
  D Mason, E Ozberk, R K Singh Raman, S Khoddam, S Al Saadi, H Beladi
Paper 030: Anode Performance in Service Case Studies .............................................................................................................. 270
  P Noyce, P A J Gibbs
Paper 032: Durability Guidelines for Materials in Aggressive Brine Exposures ............................................................................ 286
  F Blin, S Firman
Paper 033: The Inhibition of Corrosion and Hydrogen Embrittlement in SA4 3430 Steel with the Rare Earth Compound Lanthanum 4 Hydroxy Cinnamate ................................................................................................................. 299
  M Behrouzcavizi, M Forsyth, R B R W Hinton, P Bushell
  H Li, J Zhang, D J Young
  Y Tan, Y Fwu, K Bhardwaj

Paper 036: Assessing and Managing the Risk of Interference from ICCP Systems .................................................................................... 325
  P Hart
Paper 037: Improving the Corrosion Resistance of Magnesium Alloy AJ62 by a Plasma Electrolytic Oxidation (PEO) Coating Process ................................................................................................................................. 331
  R Hussein, P Zhang, D O Northwood, X Nie

Paper 038: Studies on the Degree of Sensitization of Welded 2507 Super Duplex Stainless Steel Using a Modified DL-EPR Test Procedure ................................................................................................................................. 343
  M Bassiouni, L P Ward, R K Singh Raman, A P O’Mullane, B Gideon, S Bhargava

Paper 039: Study on the Microstructural Changes and Impact on the Pitting Corrosion Behaviour of 2507 Duplex Stainless Steel Weld Regions ................................................................................................................................. 355
  M Bassiouni, L P Ward, R K Singh Raman, A P O’Mullane, B Gideon

  B Probert

Paper 041: MIC of Galvanized Steel: Corrosion by Pure Culture Isolate Biofilms .................................................................................. 376
  N F Bolton, M Critchley, R Fabien, N J Cromar, H J Fallowfield

Paper 042: High Temperature Corrosion Resistance of Fe-Cr-Ni Alloys in CO2-H2O Atmospheres .................................................................... 384
  T Gheno, J Zhang, D Young

Paper 043: Corrosion and the Role of Blistering at the Coating/Substrate Interface .................................................................................. 393
  B Cherry

Paper 044: Oxidation of Low Carbon Steel in N2- H2-H2O Gas Mixtures with Fixed H2O/H2 Ratio ........................................................................ 399
  H Yin, S L I Chan, D J Young, R Y Chen

Paper 045: Practical Considerations for Electrochemical Testing of Soils ................................................................................................. 410
  M Daftor

Paper 047: Demonstration of Corrosion-Resistant Retrofit System to Upgrade Fire Hydrants ................................................................. 419
  E D Smith, M D Ginsberg, V L Van Blaricbum, V F Hock, A E Moren

Paper 048: Corrosion of Mg Alloy ZE41 and its Mitigation Using Ionic Liquids ....................................................................................... 431
  W Neil, M Forsyth, R B R W Hinton

Paper 049: Corrosion Management Strategy for Key Elements of the Tugin Bypass Tunnel and Approach Ramps ................................................................................................. 446
  P Karajayli, H Khera, L Holloway, N Critchley

Paper 050: Dymocks Building, Sydney – Corrosion and Conservation ................................................................................................. 456
  P Johnson

Paper 053: Relining of Potable Water Tanks for Strength and Corrosion Resistance .................................................................................. 469
  R Francis, G Mattioli, S Smith

Paper 054: Container Materials for the Disposal of High-activity Nuclear Waste .................................................................................. 479
  F King

Paper 055: Guidelines for Locating SCC on Underground Pipelines ................................................................................................. 492
  F King, M Piazza

Paper 057: CP System Delivers 25kW and Monitors 220 Reference Cells with Remote Control ........................................................................ 504
  P Berry

Paper 059: Coatings for Use in Insulated Service ................................................................................................................................. 512
  M MeLampy

Paper 060: Continual Remote Monitoring for Verification of AC Mitigation ................................................................................................. 522
  J Hilleary

Paper 061: Soil Models: From CP to LFI ........................................................................................................................................ 532
  G Gummow
Paper 062: CCTV Inspection of the Spencer Gulf Crossing of the Morgan-Whyalla No 2 Pipeline ........................................... 540
  D Mavros, G Millsom

Paper 064: Directions for the Future: A Case for a Critical Review of ICCP of Steel in Concrete........................................ 550
  R Sukcevic

Paper 065: Investigation of Corrosion Process at Sand-Deposited Surfaces in Carbon Dioxide Environment ................................................................. 568
  K Lepková, V Pandarinathan, R Guhner

Paper 068: Effectiveness of Cathodic Protection System on Constructed Tanks Over Bituminous Sand Mix Layer ................................................................. 578
  A W Al-Mithun, S Al-Sulaiman, H Sabri, A A Faraj, R Rahim

Paper 069: Effectiveness of the Cathodic Protection System when Anodes Installed in Periphery vs. Beneath the Tanks ........................... 588
  S Al-Sulaiman, H Sabri, B Al-Harbi, B Lenka

Paper 070: Assessment of Pipeline Integrity: Indirect Inspection vs. In Line Inspection ................................................................. 601
  A Wahab Al-Mithin, H Sabri, A Jaragh, E D’Souza

Paper 072: Structural and Corrosion Monitoring of a Steel Bridge ................................................................. 614
  S Sweeney, R Lampo, V Hock, R Mason

Paper 074: Moisture Control Using Intelligent Single-Well EO Dewatering Systems ................................................................. 625
  O Marshall, S Morefield, C Grey, C Weiss Jr, P Malone

Paper 075: Performance of FRP Connectors for Seismic Rehab of Michie Stadium ................................................................. 633
  O S Marshall, D Stevenson, A Kumar

Paper 077: Characterization of Pit Growth in Al Alloys by Neural Networks ................................................................. 640
  M K Cavanaugh, R G Buchheit, N Birbilis

Paper 078: An Introduction to Composite Abrasives ................................................................. 648
  S Hunt, J Dingley

Paper 080: Screening of Green Inhibitors Used During Acid Cleaning of Heat Exchanger Tubes in the Alumina Industry ................................................................. 656
  J N Connor, A Xavier, L Voss, D Druskovich

Paper 081: ALWC Management of Newcastle Port Structures ................................................................. 667
  W Green, S Masia, C Garnham, D Purser, B Dockrill

Paper 082: Concrete CP of Marine Wharf Structures - Case Study Experiences in Newcastle Port ................................................................. 677
  W Green, S Masia, C Garnham, B Dockrill

Paper 083: Impressed Current Cathodic Protection of Pipe Internal Surfaces ................................................................. 688
  G J Davies

Paper 084: Phosphate Conversion Coatings for Magnesium and its Alloys ................................................................. 695
  X B Chen, N Birbilis, T Abbott

Paper 087: Corrodere. The Use of Directed Corrosion to Show Time in Architecture ................................................................. 705
  G Harrison, P Farinha

Paper 091: Use of Enamel-Coated Rebar in Continuously Reinforced Concrete Pavement ................................................................. 718
  Y Hock, S Morefield, O Marshall, M McInerney, C Weiss Jr, P Malone, M Koenigstein

Paper 094: Influence of pH of Deposition of n-octadecyltrimethoxy Silane Coating on the Corrosion Resistance of a Magnesium Alloy ................................................................. 725
  P Banerjee, R K Singh Raman, Y Durandet, G McAdam

Paper 095: The Effect of ECAP and Grain Size on Corrosion Resistance of AA 2024-T3 ................................................................. 733
  K D Ralston, N Birbilis

Paper 096: Electrochemical Performance of Zinc in Acidic Chloride Solutions ................................................................. 739
  S Thomas, M Venkatraman, I Cole, N Birbilis

Paper 098: Zinc Loading and Performance of Zinc Silicate Primers ................................................................. 749
  M Winter, S J A Hesselnk

Paper 102: Kinetic Stability of Aluminium ................................................................. 755
  X Zhou, N Birbilis, D D Macdonald

Paper 103: Corrosion Maps for Aluminium Alloys ................................................................. 762
  N L Sukiman, N Birbilis, R G Buchheit

Paper 104: A Field Investigation of Pitting Corrosion of Welded Pipeline Steels ................................................................. 768
  I A Chaves, R E Melchers, E Fontaine

Paper 106: Corrosion of Stainless Steel Fittings in Concrete Barrages ................................................................. 776
  B Erdmann, P Vince

Paper 107: Design of Concrete Bridge Deck Slabs Using Different Types of Non-Corrodible Glass FRP Reinforcing Bars ................................................................. 788
  E Ahmed, B Bennikae
Paper 108: Characterization and Long-term Durability Performance of Noncorrodible Glass FRP Reinforcing Bars Embedded in Moist Concrete.............................................................................................................. 799
B Benmokrane, M Robert

Paper 110: Fatigue Cracking of PVC-U Pipework – A Case Study................................................................. 810
G Sussex, D Connelly

Paper 111: A Structured Approach to Protective Coating Asset Maintenance Management........................................ 820
A Shepherd

Paper 113: Stress Corrosion Cracking of Gas Pipelines – Effect of Surface Profile ........................................... 833
P J Kentish

Paper 114: Practical Aspects and On-site Quality Requirements for Installation of Concrete ICCP Systems ............................................................................................................................. 844
S Laphai

Paper 115: Working in an Alliance Contract – Tank Refurbishment........................................................................ 850
M Harrington

Paper 116: Sustaining Army Mission-Critical Facilities and Infrastructure............................................................. 856
I Adiguzel, V F Hock, M K McInerney, H Johnson

Paper 117: Condition Assessment of High Voltage Box Steel Transmission Poles................................................ 863
S Zhou, B McMahon, M Battaini

Paper 118: Influence of Manganese, Zirconium and Iron on the Corrosion of Magnesium.................................... 875
D S Gandel, N Birbilis, M A Easton, M A Gibson
