# TABLE OF CONTENTS

## VOLUME 1:

### A1-1: IC ENGINES, GOALS AND DEVELOPMENT:

A Contribution to Designing Efficient Cooling Fans for Modern Engine Compartments .............................................. 1  
Gregor Tesch, Rainer Demuth, Nikolaus A. Adams

Turbocharging to Extend Hcci Operating Range in a Multi Cylinder Engine- Benefits and Limitations ............................................................... ............................................ 12  
Thomas Johansson, Bengt Johansson, Per Tunestal, Hans Aulin

HCCI-Combustion in the Z Engine............................................................... ..... 26  
Timo Janhunen, Leankuja Aumet Oy

Trends in Patenting Diagnostic Systems for Internal Combustion Engines ............................................................... ......................... 36  
Marcus Doring, Michael Boye, Frank Van der Stuay, Jorge Raposo, Chava Jucker, Miguel Marales, Sjoerd Hermens

### B3-1: DEVELOPMENT OF STEERING AND SUSPENSION SYSTEMS:

Active Rear Steering System and Controller Design to Improve Vehicle Driving and Handling Behavior ............................................................... ................................................ 49  
Gilberto Burgio, Alberto Girelli Consolaro, Diego Alessandri, Jacopo Palandri

Innovative Suspension With Wheel-Guiding Transverse Leaf Spring ............................................................................ 58  
Gabriele Fruhmann, Christoph Elbers, Andreas Vossel, Klaus Stretz, Tobias Keller, Stephan Lohr

Evaluation (of the steering behaviour) of Electromechanical Steering Systems ............................................................... ............................................. 67  
Lars Frommig, Torben Pawellek, Durukan Beduk, Ferit Kucukay, Orhan Atabay

Application of Fuel And Cost Efficient Steering Technology - Variable Displacement Pump - To Suv/Suts ............................................................... ................................................. 78  
Jinghong Yu, Edward Hosni, Jon Haskell

### C3-1: VEHICLE PERFORMANCE TESTS AND SIMULATIONS:

Simplified Reaction Modelling of Automotive Catalytic Converters .............................................................................. 88  
Martin Weilenmann, Dimitrios Tsinoglou, Jan Stilli

Hybrid System Response Convergence (HSRC): An Alternative Method for Durability Hybrid Simulation ............................................................... 98  
Dave Fricke

Cost and CO₂ Efficient Vehicle Simulation by Means of Dynamic Driving Test Stand ............................................................... 110  
Rudiger Tiemann, Frank Brectius, Christoph Kalina, Zafer Kulualp

Multibody Simulation of Curvelinear Dynamics While Engineering Superlong Highway Multilink Trucks ............................................................... 121  
Mikhail Vysootski, Andrei Kalesnikovich, Sergei Kharytonchyk, Sergei Kochetov, Sergei Susha

Advances in the Development of Vehicle Refinement Using Virtual Test Rig Applications Based on Real World Test Data ............................................................... 131  
Jonathan Webb, Laetitia Rodier

Estimation of Road Information From Running Vehicle .............................................................................. 140  
Shigeyuki Yamabe, Ryazo Hayashi, Kinshiko Nakano, Yoshihiro Suda

A Study on the Effectiveness of the Door Trim BSR Test Methods ............................................................... 149  
Hyunghyun Na, Hyunmin Park, Hyunchul Lee, Jongsoo Kim, Ohhwan Jeon, Ikkeun Jang

### C5-1: TOOLS AND METHODS FOR VEHICLE SYSTEMS:

Virtual Testing of Traction Control Systems By Means of a Motorcycle Riding Simulator ............................................................... 154  
Vittore Cossalter, Alberto Doria, Stefano Rota, Roberto Sartori
Simulation Process Development of Radiation Noise and Application on the Exhaust Muffler ................................................. 164
Ki Chul Park, Dong Sun Kim, Young Tae Lee, Hee Chang Lim
Implementation Of A Vehicle-In-The-Loop Development And Validation Plattform ........................................ 173
Albert Albers, Tobias Daser
Nonlinear Static Analysis Of An Exhaust System Using Optimal Neural Network ........................................ 183
Javier Asensio, Angela Bernardini, Jorge Biera
Objectification Of Shift Quality – Requirement For Effective Transmission Calibration .................................................. 191
Simon Jenko, Artur Plotner, Gunther Alvermann, Ferit Kaucuk
Method For Model Based Monitoring Of Complex Mechatronic Systems .................................................. 200
Albert Albers, Achim Seifermann

D2-1: INJURY MECHANISM, INJURY REDUCTION:

Cause Of Death For Children Involved In A Road Accident As Car Passenger: French Study ........................................ 210
Philippe Levire, Sophie Cony, Annie Langlois
A Study of Injury Analysis Model for Hybrid III Type and Thoracic Injury Criteria for Elderly ........................................ 220
Han Wanhee, Kim Kiseong, Youn Younghan, Youn KyoMyun
Development Of Crash Test Dummies – Requirements Of The Automotive Industry ........................................ 228
Klaus Bortenschlager, Christian Gehre, Markus Hartlieb, Philipp Wernicke
Vehicle Safety Testing: Are People Really Dummies? .................................................................................. 238
Robyn Richmond, Christine Burke, Taysseer Aldaghas, Louis Brown, Anne Rizzo, Margaret Griffen
Intestinal Injuries In Motor Vehicle Crashes: The Forgotten Injury .................................................................................. 244
Taysseer A. Aldaghas, Christine Burke, Jeffrey Jenkins, Anne G. Rizzo, Ranjit Pullarkat, Margaret M. Griffen
Safe4U™: Valeo Active Front End Module for Pedestrian Protection .......................................................... 253
Laurence Marechal, Jean-Louis Lanard, Frederic Vaccia

E3-1: INTELLIGENT TRANSPORTATION SYSTEMS:

An In-Vehicle System For Traffic Violations Alert .................................................................................. 254
Aliane Nourdine, Javier Fernandez, Maria Mata, Sergio Bemposta, Veronica Egido
Ecocdrive: Driver Behaviour Evaluation System To Reduce CO2 Emissions ........................................ 261
Luigi Orofino, Luis Cilimingras, Eugenio Morello
Evaluating Human Machine Interaction of In-Vehicle Information Systems ........................................ 277
Yukiyo Kuriyagawa, Ichiro Kageyama, Satohiko Watanabe, Hideharu Kurokawa, Sachi Mizobuchi, Kazunari Nawa, Ko Koga, Hitoshi Kamon

F1-1: BUSES:

Non-Linear Simulation Modeling Of Flexural Bending For Bus And Coach Structural Joints ........................................ 288
Enrique Alcala, Angel Martin, Rocio Grimaldi
Stress Calculation And Estimation Of Bus Structure In Case Of Transient Displacement Excitation ........................................ 297
Dezso Szoke, Sandor Vincze-Pap
A Study On The Development Process Of Bus Super Structure For Rollover Safety ........................................ 309
Jongchun Park, Jaewoo Park, Seungwon Yoo, Wookjin Na
Fatigue Life Prediction of a Bus Body Structure Using CAE Tools .......................................................... 319
Cagri IyiDiker, Izzet Cokal, Anil Yilmaz, Naimik Kicil, Turkey Otakar Otobus Karoseri
Analysis Of Bus Accident Statistics .................................................................................. 330
Matoscsy Matyas
Virtual Techniques For Bus Roof Strength Test, The Conditions Of VT Application ........................................ 346
Sandor Vincze-Pap

H1-1: EFFICIENT PRODUCTION AND OPERATION OF VEHICLES AND COMPONENTS:

Digital Factory, Methods And Applications In AUDI Hungaria Motor Ltd. ........................................ 347
Jano Josival, Jozsef Perger

C5-2: TOOLS AND METHODS FOR VEHICLE SYSTEMS:

Improving Passenger Compartment Thermal Comfort By Measuring And Controlling Equivalent Temperature .......................................................... Allen Curran, Scott Peck, Mark Hepokoski 530

Compact High-Efficiency Blower Fan for HVAC ................................................................. Sakai Masaharu, Ochiai Toshinori, Mitsuishi Yasushi 536

A Low Fidelity Nonlinear Model Of 4WD Torsional Stiffness At Tip-In/Tip-Out ............. Raja Mazuir Raja Ahsan Shah, R. Peter Jones, Caizhen Cheng, Gunwant Dhadyalla, Jasjit Pawar, Sean Biggs 546

Interactive Knowledge Discovery In Recordings From Vehicle Tests .......................... Andreas Theissler, Daniel Ulmer, Ian Dear 554

D2-2: INJURY MECHANISM, INJURY REDUCTION:

Consumer Whiplash Ratings – Have They Influenced Seat Designs In Helpful Ways? ....... David S. Zuby, Adrian K. Lund 574

Multi-Variable Experimental Matched-Pair Comparison Of Rear Impact Occupant Protection Performance Of Strong Belt-Integrated Vehicle Seats Versus Weaker Non-Belt-Integrated Types .................. Kenneth Saczalski, Mark Pozzi, Joseph Burton, Todd Saczalski 593

E3-2: INTELLIGENT TRANSPORTATION SYSTEMS:

Faster To Vision Zero Via Santayana: The Recessionary Evidence .................................. Al Gullon 610

Birdeye Visualization For Assisting Prospective Driving .................................................. Markus Duschl, Gundrun Klinker, Darya Popiv, Florian Laquai, Rakic Mariana 620

Development Of Ecological Driving System Using Model Based Prediction Of Traffics And Information Of Road Shapes ......................................................... 630

Assessment of Impacts of Advanced Driver Assistance Systems within the Large Scale Field Test euroFOT .............................................................................. N/A

F1-2: BUSES:

Quantification Of The Environmental Impact In The City Of Madrid Depending On Technical Measures Applied To Bus Fleet ............................................. 640

CAE Based Certification for Safety Regulations: Bus Rollover – A Case Study ............... Anil Kumar Chigullapalli, Rahul S. Mahajan, Abhay V. Manmikar, S. Raju 649

A New Front Structure For Coaches To Improve Their Crashworthiness ..................... Gregor Steinmetz 659

H1-2: EFFICIENT PRODUCTION AND OPERATION OF VEHICLES AND COMPONENTS:

Research On The User’s Costs In Motor Vehicles Life Cycle .......................................... Kristina Jakimovska, Todor Davev, Igor Gjurovski 668
Metallurgical Design And Fatigue Endurance Of TS 780 MPA Grade ERW Steel Tube For Automotive Suspension Parts ................................................................. 675
Shunsuke Toyoda, Masatoshi Aratani, Yuji Hashimoto, Saiji Matsuoka, Yoshikazu Kanabata, Akio Sato

Integration Of A Honing Tool Into A Combination Machining Centre .................. 684
Kai-Uwe Paffrath, Dirk Biermann

Trains, Planes, And Automobiles In The 21st Century – How Digital Prototyping Enables Design At The “Speed Of Thought” ................................................................. 691
Edward Martin

A1-3: IC ENGINES, GOALS AND DEVELOPMENT:

Heat Transfer Measurements Inside A Gas Fuelled Spark Ignited Engine For Model Validation ............................................................. 698
Joachim Demuyneck, Michel De Paepe, Roger Sievens, Sebastian Verhelst

Influence Of Diesel Biofuels On Engine Oils Deterioration – Extended Methods Of Engine Oils Assessment ................................................................. 708
Wiesława Urezdowska, Zbigniew Stepień, Stanisław Oleksiak

The PCCI Combustion Process For Diesel Engine. A Key Element For Upcoming Euro 6 ................................................................. 718
A. Vanegas, B. Kerschgens, N. Peters

Optimization Of The Glow Plug – Spray Interaction For Robust Low-Temperature Startability In Low Compression Ratio Diesel Engines By Means Of Combined 3D-CFD And Design For Six Sigma ................................................... 727
Cornel Stan, Soeren Taebert, Giovanni Cipolla, Alberto Vassallo

Vladimir Merzlikin, Svyatoslav Cheranev, Oleg Sidorov, Robert Retberg

Enhancement Potential Of The Thermal Conversion Efficiency Of Ice Cycles By Using Of A Real Atkinson Cycle Implementation And (Very) High Pressure Turbo Charging ................................................................. 750
Victor Gheorghiu

A2-1: CONSUMPTION AND EMISSION REDUCTION:

Experiences Of Retrofit Particulate Filters For Diesel City Buses And Passenger Cars ................................................................. 766
Tamas Meretei, Peter Bodor

A Study On AT Damper Clutch For Improving Fuel Efficiency And Driveline Vibration ................................................................. 776
Sung Yeol Kim, Sung Yop Lee, Kwang Min Won, Jin Hyan Kim

Feasibility Study Of NOx Reduction Using An Active Exhaust Control System ................................................................. 785
Jun Iwamoto, Katsuji Wada, Ryosuke Shiraiishi, Hitoshi Mikami, Go Motohashi, Hiroshi Ohno

Potential Of Natural Gas Powered Vehicles In Reducing CO2 And Pollutant Emissions Under Real-World Driving Conditions ................................................................. 797
Robert Alvarez, Martin Weilenmann, Christian Bach

Effects Of LPG - Air Enrichment With HRG Gas On Performance And Emissions Of A SI-Engine ................................................................. 807
Adrian Birtas, Iulian Voicu, Gheorghe Niculae, Alexandru Racovitza, Rada Chiriac, Nicolae Apostolescu, Cristian Petcu

Comparative Analysis Of Transmission Efficiency For One Mode And Two Mode Power Split Transmission ................................................................. 816
Jaeyoung Kang, Jungmin Kim, Yongha Kim, Hyunsu Kim

Effects Of Hydrogen Addition To Intake Gas On Exhaust Emission Of A Diesel Engine With EGR ................................................................. 826
Toru Miyamoto, Hikazu Hasegawa, Naoya Kojima, Masato Mikami, Hajime Kabashima, Yasuhiro Urata

The Prospects Of Reducing Fuel Consumption With Automobile Basic Efficiency ................................................................. 834
Tetsunori Haraguchi

A4-1: NOISE AND VIBRATION REDUCTION:

Adaptive Controllers For Active Noise Reduction Of A Stripped Engine ................................................................. 842
Tommy Luft, Stefan Ringwelski, Ulrich Gabbert, Wilfried Henze, Helmut Tschoke

Analysis And Control Of Inverted Tooth Chain Vibration ................................................................. 852
Masao Ishihama, Hiroshi Watanabe

Study Of Chain Meshing Noise Using Multi-Body Dynamics Simulation ................................................................. 862
Motoyasu Sakaguchi, Masaki Aguro, Shinji Yamada, Yuji Matsumochi, Naoko Machida
An Experimental Investigation Into The Effects Of Injection Pressures And Swirl Ratio Using Cluster Nozzle Configurations In A Di Diesel Engine

Hyun Woo Won, Seung Eun Moon, Vivak Luckhchoura, Sung Wook Lee, Norbert Peters

B3-3: DEVELOPMENT OF STEERING AND SUSPENSION SYSTEMS:

The Impact Of Nonlinear Steering Systems On Objective And Subjective Steering Evaluation

Rob Kraaijeveld, Klaus Wolff, Theodor Vockrodt

Design And Implementation Of An Active Suspension System With Terrain Preview

David Purdy, Sanjay Mehrishi, Larbi Berrouila

VOLUME 2:

Toward eCORNER: Energy Efficient Design Of Mechatronic Suspension Systems

Haym Niederkofer, Andres Eduardo

Driving Torque Transfer System For Fwd With Steering Wheel Torque Compensation

Kiyoshi Wakamatsu, Takashi Nishimori

Handling Analysis of a Passively Suspended Vehicle Influenced by Ride Motions

Javad Arab, Torabi Amir, Tabatabai Kourosh, Fahmeh Amiri Majid

C2-1: METHODS OF STRENGTH AND LIFE ESTIMATION:

Fatigue Life Estimation Of Joints In Vehicle Body Development Based On A Local Approach And Mesh-independent Modelling

Franz Ruprechter, Matthias Martin, Andreas Ralf, Reinhard Weisser, Gerhard Kepplinger, Michael Hofer, Johannes Steiner

Analytical Life Prediction Modeling For Diesel Fuel Filters Optimization

Mathieu Petiteaux

Thermal Fatigue Lifetime Prediction For Exhaust Manifold

Kyung Wook Baek, Soon Cheol Park, Chung Kwan Kim, Yong Jun Oh, Byung Hoon Min, Won Wook Jung

Fatigue Life Prediction Method Of Wire Harness System In The Automotive Vehicle's Door

Sang-kyo Lee, Heung-shik Lee, Eun-young Choi, Chongdu Cho, Ji-hye Won, Young-gil Kim, Sea Hiroyuki, Sung-dam Kim, Hyoung-joo Seo

The Thermal Fatigue Test And Analysis For Development Of Railway Brake Disk Material

Choonghwan Lim, Byeongchoon Goo

C4-1: TESTING AND SIMULATION OF VEHICLE AND COMPONENT DYNAMICS:

Driver-Less Chassis Dynamometer Testing For EV Power-Trains

Vaidya Vishwas, Bhere Haresh

Vehicle Vibration – Field Complaint Analysis

Thummeti Buchi Reddy, Vishnu C. Dixit, Hemant Potphode

Gear Rattle Modelling And Meshing Gear Teeth Behaviour Estimation Considering Lubrication Influence

Kazuhide Togai, Hiroki Yamaguchi, Hiroki Yamaura, Jamie Pears, Theo Potter

Look-Up Based Synchronizer Logic For The Effective Actuation Of The Countershaft Brake In A Heavy Duty Amt With Face Dog Clutch

Gergely Boka, Balazs Trencseni, Huba Nemet

Examination of Manual Transmission Gear Jump-Out Behavior

Takanori Nakata, Akihiro Fujii, Hideaki Koga, Tomohiro Ishikawa, Katsura Naito

Methodology of Service Life Estimation for Automotive Rubber Component

Siu Woo Chang, Doo Kim Wan, Song Park Hyan, Gil Kim Young, Hoon Lee Seong

MBS Quarter Vehicle Test Rig – Influence Of Damper Modelling On Simulation Quality

Georg Klose, Mario L. Bergmann, Perit Kacukay
D3-1: ACTIVE SAFETY ISSUES:

Benefit Analysis Of An Advanced Emergency Braking System Based On End User Tests In A Driving Simulator ............................................................... 1031
Neli Ovcharova, Stefan Benz, Werner Uhler, Frank Gauterin, Firas Lathaus, Dino Silvestro

A Rear-End Collision Warning System With Online OneClass Support Vector Machine ................................................................. 1039
Yuta Inoue, Kazushi Ikeda, Hiroki Mima, Tomohiro Shibata, Naoki Fukaya, Kentaro Hitomi, Takashi Bando

New Methodologies To Check The Wheel Alignment With A Sideslip Tester .......................................................................................... 1046
Manuel Perez-Ray, Daniel Garcia-Pozuelo, Maria Jesus L. Bouada

The Ability Of People To Estimate Distances Along A Roadway And How Their Education, Hobbies And Occupation Affect Accuracy ................................................................. 1055
Mark Strauss, James Carnahan

Xenon Car Lighting As Safety Device ............................................................................................................................. 1065
Walter Schlager, Lex Krzyzanowski

Design And Assessment Of Informative Auditory Warning Signals For ADAS ...................................................................................... 1071
Frederik Diederichs, Claus Marberger, Philipp Jordan, Vivien Melcher

A Test Programme For Active Safety Systems – Latest Developments Of The E-Value Project ................................................................. 1080
Micha Lesemann, Jorn Latzow, Adrian Zlochki

Vision-Based Safe Backing-Up Maneuvers With Obstacle-Free Space Detection .................................................................................. 1086
Christophe Vestri, Remy Bendahan, Frederic Abad, Sebastien Wybo, Dzmitry Tsishkou, Sylvain Bougnoux

E1-1: INTELLIGENT VEHICLE SYSTEMS:

Collision Damage Mitigation System Using Millimetre-Wave Radar ........................................................................................................... 1095
Hyok-jin Chong, Dae-youn Um, Seung-hyeon Lee, Jong-kap Kim

Development And Validation Of Manoeuvre-Based Driver Assistance Functions For Conduct-By-Wire With IPG Carmaker ................................................................. 1102
Stephan Hakuli, Matthias Klein, Sebastien Geyer, Hermann Winner

Individual Adaptation Of ADAS In Car-Following State Based On Naturalistic Driving Behavior Modeling ..................................................................................... 1112
Pongsathorn Raksincharoensak, Shintaro Saigo, Masao Nagai, Masamichi Shimosaka, Tomomasa Sato

Real-Time Driver Assessment ......................................................................................................................................................... 1121
Peter Miller

An Adaptive Neuro-Fuzzy Integrated Control Approach For Improving Vehicle Handling And Stability .................................................................................. 1128
Rana R. Farag, Maria-Jesus L. Boada, Vicente Diaz, Beatriz L. Boada

Intelligent Transportation Systems - Demands And Needs For Security Supply Chain In The Brazilian Market ........................................................................................................... 1137
Eduardo Mario Dias, Andre De Souza Carvalho, Alberto Toshio Kotsuka Jr., Graciellen Silva Alves, Caio Fernando Fontana, Fabio Mori

Intelligent Transport Systems – Standardization For Brazilian Market.................................................................................................................. 1148
Eduardo Mario Dias, Andre De Souza Carvalho, Alberto Toshio Kotsuka Jr., Graciellen Silva Alves, Caio Fernando Fontana

A1-4: IC ENGINES, GOALS AND DEVELOPMENT:

Development Toward “Diesel Revolution” Using Ultra High Pressure CRS With Closed-Loop Control System For Heavy Duty Engine ..................................................................................... 1154
Xiumei Wang, Takashi Kikutani, Katsuhiko Takeuchi, Noriaki Nakane

Model Based Calibration Methodology for Application on Non-Road Diesel Engines .................................................................................. 1164
Rolf Dreisbach, Thomas Cartus, Hanno Bachler, Martin Schubler

How to Maximize Transport Efficiency... the MAN Solution ............................................................................................................................. 1174
Ralf Marquard

Advanced Design Of Gas Engines .................................................................................................................................................. 1175
Alberto Boretti

Effect Of Ethanol And Lead Gasoline Mix On Characteristics Of Lubricants ........................................................................................................ 1194
Snezana Petkovic, Pero Dugic, Omer Kovac, Miroslav Pecanac
### Variable Valve Actuation: Performance Evaluation And Optimization Tools

*I. Montalto, A. Guzzo, A. Riegel, F. De Cristofaro, A. Casavola, S. Bova*

Lluis Sans, Hee Koo Lee, Kedar Kshirsagar, Steve Yun, Nickel Ni

B2-2: NEW MATERIALS, CONCEPTS IN BODY DESIGN:

Structural Design Method Of A Control Arm With Considering Of Strength .................................................. 3220
Jong-kyu Kim, Hwan-jung Son, Hyeong seok Lee, Young-Jun Kim, Sung-Hwan Kim, Young-Chul Park, Kwon-Hee Lee

A Parametric Structure For The Evaluation Of Vehicle Concepts At A Very Early Stage Of Concept Draft .................................................. 3231
Alexander Prinz, Thomas Gansicke

The Application Of Structural Optimization Technology To The Design Of Plastic Parts .................................. 3240
Ayumi Sugiyama, Yoshio Sugimoto

C1-5: ADVANCED ENGINEERING TECHNOLOGIES AND TOOLS:

A Racing Car Setup Evaluation Support System Based On Nonlinear Model Predictive Control .................. 3248
Antonini Pierluigi, Luca Fulimeni, Sauro Longhi, Andrea Monteri

An Experimental Evaluation Of The Thermal Effects On Engine Valve Model ........................................... 3258
Adrien Piton, David Chalet, Pascal Chesse

Development Of Virtual Sunroof Buffeting Test Process Using DFSS Approach ........................................... 3267
Seong Ryong Shin, Kang Duck Ih, Jihyuk Kim Cho, Sang Moo

D1-2: MIXED TOPICS IN SAFETY:

Safety Strategies For Small Cars ............................................. 3276
Thomas Schwarz, Ulrich Widmann, Martin Neff

Challenges In Design For Safety Of Small Cars ............................................. 3291
Marica Paurevic, Karl-Heinz Baumann, Michael Muckner
Polymeric-Based Solutions For Safety Improvement In Small Vehicles
Padraig Naughton, Alexander Droste

G1-2: VEHICLE STANDARDS, REGULATIONS, LEGISLATION:

A Joint Suppliers Approach For Standardized Adas Test Catalogues
Oliver Scherf, Stefan Bischoff, Christian Hermann, Hendrik Kurzawa, Uwe Kuhnau, Thomas Schuler

Technological Trends In The Standardisation Of Model-Based Software Development
Jens Zimmerman, Daniel Woste

LNG Applications And Standards Development In Europe
Jose Burgos

ENVIRONMENTALLY FRIENDLY VEHICLES:

Exhaust Emission Results From Light Duty Diesel In A Road Tests
Jerzy Merkisz, Jacek Pielecha, Wojciech Gis

Cylinder Surface Laser Treatment In Diesel Engines As A Way To Make Road Transport More Environmentally Friendly
J. Merkisz, M. Bajerlein, A. Suchecki

Aero-Engine Emission Testing Under Real Operating Conditions Of A Small Aircraft
Jerzy Merkisz, Jarawal Markowski, Babiak Maciej

Kenneth Saczalski, Lanny Mudlin, Todd Sczalski, Mark Pozzi

Research Regarding The Development Of A Plug-In Hybrid Electric Vehicle
Danut Gabriel Marinescu, Stefan Tabacu

Research On The Diffusion Characteristics Of The Hydrogen Gas For The Hydrogen Fuel Cell Vehicle In The Closed Space
Hyungjin Chang, Gyu Hyun Kim, Geejung Yong, Jae Moon Lim

C. Yang, K. Theinnoi, S. Hemmings, A. Megaritis, A. Tsolakis, H. Zhao

Analysis Of The Exhaust Emissions And Performance Of A Modern Vehicle Fuelled With Petrol And Cng In Turn
Piotr Bielaczyc, Andrzej Szczothka, Michalina Wojnarowicz

The Effect Of Biodiesel Blends With Differing Rme Content On Exhaust Emissions From A Light Duty Vehicle With Diesel Engine Compared To Standard Diesel Fuel And Pure RME
Piotr Bielaczyc, Andrzej Szczothka, Gyzynski Piotr, Bedyk Ireneusz

Discrete Vva-Based Model Of Single Cylinder HCCI Engine: Effects Of Transition In Engine Speed
Varun Tandra, Nilabh Srivastava, Ahmed Soliman

VEHICLE DESIGN AND DEVELOPMENT:

Fuel Spray Parameter Analysis For Different Common-Rail Injectors
Krzysztof Wslocki, Ireneusz Pielecha, Jakub Czajka, Dmitrij Maslennikov

A Study on the Development of Automotive Front Lower Arm by Using Hybrid Manufacturing Process
Sang-Woo So, Jae-Chul Kim, Hyun-Tae Hwang, Dong-Ok Kim, Jong-Hyun Lee

The Parametric Study Of The Development Of Magnesium Seat Frame For Passenger Vehicle By Design Of Experiments Method
Kim Kiseong, Han Wanhee, Hwang Beomjin, Youn Younghan

Vehicular Management System
Suk-Hyun Seo, Jin-Ho Kim, Sang-Ho Hwang, Key Ho Kwon, Jae Wook Jeon

An Evaluation Of The FlexRay–CAN Gateway-Embedded System In The Ev Test Bench
Suk-Hyun Seo, Yong-Han Jeon, Sang-Jin Cho, Sang-Ho Hwang, Key Ho Kwon, Jae Wook Jeon

Comparison Of Two Types Of Osek Network Management
Suk-Hyun Seo, Jin-Ho Kim, Sang-Ho Hwang, Key Ho Kwon, Jae Wook Jeon
TEST, SIMULATION AND CALCULATION METHODS OF VEHICLES AND COMPONENTS:

Design And Experimental Evaluation Of Predictive Engine Air-Ratio Control Based On Online Neural Network
Hang Cheong Wong, Pak Kin Wong ................................................................................................................. 3476

The Human Thermal Comfort Evaluation Inside The Passenger Compartment
Mariana Ivanscu, Catalin Neacsu, Stefan Tabacu, Ion Tabacu ........................................................................ 3484

Thermo-Oxidative Degradation Analysis Of A Carbon Black Compounded EPDM rubber Hose For Automotive Radiator
Seung-Bum Kwak, Nak-Sam Choi ....................................................................................................................... 3497

On-Board Diagnostics Of Combustion In Diesel Engines Of Non-Road Vehicles With The Use Of JTFA Vibration Signal Analyses
Jerzy Merkisz, Marek Waligorski, Maciej Bajerlein .......................................................................................... 3506

The Investigations Into Vehicle Exhaust Emissions With The Use Of PEMS
Wojciech Gis, Jerzy Merkisz, Jacek Pielucha .................................................................................................... 3517

Evaluation of Quality of The System for Control Of Mixture Composition In Si Engine By The Method Of Dynamic Simulation
Jozef Mita ............................................................................................................................................................ 3526

Method And Tool Of Human Sensation Modeling For Comfort Evaluation Of Nvh Phenomenon On The Example Of Gear Rattle
Albert Albers, Saravut Lerspalungsanti .............................................................................................................. 3536

Measurement and Analysis of FlexRay Synchronization Performance
Kim Jin Ho, Seo Suk-Hyun, Yoon Seung-Hyun, Kwon Key Ho, Jeon Jae Wook, Hwang Sung-Ho
Compensating Inconsistency of the Retransmission Data in CAN Network (Withdrawn)
Seung-Ki Min ..................................................................................................................................................... 3555

Stationary And Simulating Researches With Input Sinus Signal On Turbine’s Shaft Of Hydrokinetic Torque Converter Zm130
Zbigniew Pawelski, Marek Wozniak, Tomasz Palczynski .................................................................................. 3556

The Information Content Of The Automatic Gearboxes Of Buses Of The Vehicle During An Operation
Ferenc Szauter, Vince Nagy, Zoltan Varga ........................................................................................................... 3565

SAFETY ON ROADS:

Assignment Process Of The Emergency Services In The E-Call Project
D. Gallegos Diez, F. Liesa Mestres, M. Mateo Doll .............................................................................................. 3567

Evaluation Of Systems For Active Vehicle Safety Regarding Their Influence On Safety Particularly For Senior Driver
Q. Huang, F. Christen, M. Haberstroth, M. Klingender ....................................................................................... 3573

Methodology To Test The Steering System Of An
D. Garcia-Pozuelo, V. Diaz, M. J. L. Boada ......................................................................................................... 3586

Parameters That Influence The Measurement With A Sideslip Tester
Manuel Perez-Rey, Daniel Garcia-Pozuelo, Maria Jesus L. Boada, Vicente Diaz
Establishment Of Side Pole Impact Test Procedures In KNCAP
Jae Moon Lim, Hyungjin Chang, Gyu Hyun Kim, Taehan Song ........................................................................ 3605

Research On Incident Analysis Using Drive Recorder Part4: Analysis On Driving Behavior Based On Near-Miss Incident Data While Crossing Non-Signalized Intersection
Motoki Shino, Takuya Abiru, Minoru Kamata, Masao Nagai, Yohei Michitsugi, Katsumi Moro
Reconstructon Analysis Of Extraordinary Vehicle Accidents Utilizing 3-D Visual Effects
Seung-Bum Park, Inhuwan Han
Analysis Of Geometric Variables Of The Bumper In The Pedestrian Protection
D. Gallegos Diez, F. Liesa Mestres
INTELLIGENT SYSTEMS IN ROAD TRAFFIC

Classification Of Driving Skills Based On Machine Learning ................................................................. 3635
Naiwala P. Chandrasiri, Kazunari Nawa, Ichiro Kageyama

A Study On The Motion Control of The 6x6 Electric Vehicle With Skid Steering Part 2: Autonomous Navigation ............................................................................................................................ 3645
Dong-Hyung Kim, Chang-Jun Kim, Soon-Woong Hwang, Ashfaq Ali Mian, Young-Ryul Kim, Chang-Soo Han

Driver Specific ACC Speed Profile For Curved Roads .................................................................................. 3655
Dezhao Zhang, Qing Xiao, Meng Lu, Jianqiang Wang

Design Of A Reconfigurable Global Chassis Control .................................................................................. 3665
Peter Gaspar, Zoltan Szabo, Jozsef Bokor, Olivier Sename, Lue Dugard

BUSES, TRUCKS AND HEAVY VEHICLES:

Dimensional Analysis Of A Bus Structure .................................................................................................. 3672
V. Diaz, A. Gauchia, E. Olmaeda, M. J. L. Boada, B. L. Boada

Concept Of A Lightweight Heavy Truck Frame For Increased Transportation Efficiency ......................... 3680
Martin Winter, Klaus Puchner, Klaus Prenninger, Gregor Schwarz

EFFICIENT PRODUCTION AND OPERATION OF VEHICLES AND COMPONENTS:

The FlexRay Diagnosis System on the Basis of ARM .................................................................................. 3685
Seung-Hyun Yoon, Suk-Hyun Seo, Jin-Ho Kim, Key Ho Kwon, Jae Wook Jeon

A2: CONSUMPTION AND EMISSION REDUCTION:

Multiaxis All-Wheel Drive Hybrid Vehicle Mathematical Model And Simulation ......................................... 3694
Cheraney Svyatoslav

Spark-Ignition Stability of Natural-Gas Jets with Impingement on Cavity Wall ......................................... 3702
Senoo Takashi, Sasuki Masanori, Shioji Masahiro

Power Control Algorithm For A High Mobility Hybrid Electric Vehicle ...................................................... 3711
Youngkwan Ko, Hyunsup Kim, Yuseok Jung, Soonekyu Jeong, Hyengchel Lee

Study On Development Of Compressed Air Car For A Practical Use ......................................................... 3721
Yuki Kato, Kiochi A. Hayashi, Eiisuke Yamada

Increasing The Efficiency Of An Experimental Solar Energy Driven Vehicle ............................................. 3731
Illes Lorincz, Istvan Szeczenyi

Alternative Engines - Advantages and Drawbacks for the Environment ...................................................... 3739
Marinescu Gabriel Catalin, Octa Victor Oana

Self-Reported Seat Discomfort Among Dutch Commercial Truck Drivers .................................................... 3743
CheeFai Tan, Matthias Rauterberg, Wei Chen

A Study On The Optimal Brake Force Distribution Of A High-Speed Railroad ............................................ 3749
Songchul Kim, Kiyeol Jang, Jeeho Lee, Hyeongcheol Lee

A2: CONSUMPTION AND EMISSION REDUCTION:

Modeling The Combustion Of Light Alcohols In Si Engines: A Preliminary Study ...................................... 3757
Jeron Vancoillie, Sebastien Verhelst

Sliding Mode Controller Design For Optimal Slip Control Of Electric Vehicles Based On Fuzzy Vehicle Velocity Estimation Logic .................................................................................................. 3769
Nam Kanghyun, Hori Yoichi

Evaluation Of Electric Driveline System With Modelling And Simulation .................................................... 3779
Laszlo Farkas

Control-Oriented Modeling Of Three-Way Catalytic Converters Using Chemical Equilibrium ....................... 3786
Pascal Kiwic, Christopher Onder, Lino Guzzella
B4: DEVELOPMENT OF VEHICLE PARTS AND SYSTEMS:

An Intelligent Wiring System Of The Electric Vehicle ................................................................. 3794
   Heikki Hakala

Surface Morphing Method For Manifold Shape Optimisation .................................................. 3802
   Arpad Veress, Tibor Gallina, Attila Felfoldi

Integrated Design And Simulation Methods In Conceptual Suspension Development ........................ 3812
   Bohm David Ferenc, Hirz Mario

Intellige Automotive Lighting Distribution As A Comfort And Safety Feature? Innovations For
Today A Tomorrow....................................................................................................................... 3821
   Heiko Marko, Christooph Stiller, Christian Koelen

Systematic Height Control Of An Air Suspension System ....................................................... 3830
   Hyunsup Kim, Youngil Kim, Hyeongcheol Kim

Dual-Hybrid Lubrication System ............................................................................................... 3837
   Sanjaat Jain

Investigation Of Novel Linkage Mechanism For Antilock Effect In Cam Actuated Drum Brakes .......... 3847
   Shashwat Kushwaha, Prateek Chavan, Mihir Saojil

B4: DEVELOPMENT OF VEHICLE PARTS AND SYSTEMS:

Easy Access And Manoeuvring Vehicle ...................................................................................... 3854
   Sanjaat Jain

Development And Production Of An Advanced Composites Monocoque Structure For A Solar
Powered Race Vehicle ............................................................................................................... 3861
   Diederik Van Tricht, Brecht Van Hooreweder, Guido Ceulemans

Optimization Of Sandwich Panel Structure And Lay-Up Regarding Hic Minimalization ............... 3870
   Michal Vasicek

Car Design As A New Conceptual Solution And CFD-Analysis In Purpose Of Improving
Aerodynamics ............................................................................................................................... 3877

Development Of An Intelligent Air-Cushion System For A Swamp Tracked Vehicle ....................... 3886
   Altab Hossain, Ataur Rahman, A. K. M. Mohiuddin, Yulfian Aminanda, Muhidin Arifin

Development Of A Monoblock Titanium Steering Wheel For A Solar Powered Race Vehicle Using ................................................................. 3895
   Thomas Gielis, Mario Fleurinck, Jos Bornans, Brecht Van Hooreweder

E1: INTELLIGENT VEHICLE SYSTEMS:

IYashi Arousal System For Driver Using Automatic Facial Expression Recognition ........................... 3905
   Toshiki Kambayashi, Luis A. Diago, Tetsuko Kitaoka, Ichiro Hagiwara

DS-UWB Packet Structure For The Hybrid Of Communication-Base-Ranging And Radar .................. 3913
   Sumito Nishikawa, Ryuji Kohno

Intelligent Vehicle Control Based On Predictive Urban Traffic Information ................................... 3921
   Philipp Schuricht, Bernard Baeker

Integrated Safety Speed Model For Curved Roads ........................................................................ 3929
   Xiaolei Chen, Meng Lu, Dezhao Zhang, Ruijuan Chi, Jianqi Wang

A New Guidance Method For The Collision Avoidance Of Intelligent Road Vehicles ...................... 3936
   Mohammad Behroozi, Behrooz Mashadi, Nima Najafi, Behzad Najafi, Samaneh Arabi

Mynosa - Motorcycle Accident Simulation In LMS VirtualLab .................................................. 3944
   Leonard Ciubotaru, Nicola Cofelice, David Moreno Giner, Machal Manka, Jian Kang

Numerical Simulation Of A Motorcycle-Rider System With Laser Sensor For Collision Avoidance ................................................................. 3954
   T. Alessandro, K. Jian

Two Degree Of Freedom Yaw Rate Control Based On Cornering Stiffness Using Planetary Gear
Steering System .......................................................................................................................... 3962
   Ryo Minaki, Yoichi Hori
C3: VEHICLE PERFORMANCE TESTS AND SIMULATION:

Effects Of Varying Moisture Content And Settlement On Internal Friction, Load Capacity And Cohesion In Loam Soil ................................................................. 3968
Laszlo Mathe, Gyorgy Pillinger, Peter Kiss

A Physical 0D Diesel Combustion Model Using Tabulated Chemistry With Presumed Probability Density Function Approach: For Engine Pre-Mapping ................................................................. 3973
Nicolas Bordet, Christian Caillol, Pascal Higelin

Modelling And Analysis Of The Electro-Hydraulic And Driveline Control Of A Dual Clutch Transmission ................................................................. 3984
Rashad Mustafa, Tobias Kassel, Gunther Alvermann, Ferit Kucukay

Dynamic Analysis Of The Commercial Vehicles With Leaf Springs ................................................................. 3994

Combined Method For The Simulation Of Gear Whine Effects ................................................................. 4002
Gerrit Knabe, Ferit Kucukay

Self-Energizing Clutch Actuator System: Basic Concept And Design ................................................................. 4009
Jinsung Kim, Seihum B. Choi

Redesign Of The Intake Cams Of A Formula Student Racing Car ................................................................. 4017
Vass Sandor

A Numerical And Experimental Study Of The Factors That Influence Heat Partitioning In Disc Brakes .............................................................................. 4025
Andreas Loizou, Hong-Sheng Qi, Andrew J. Day

Development Of An AI-Based Model To Determine Vehicle Tire Design Configuration ................................................................. 4034
Oluremi Olatunboum, Xiaoguang Yang, Mohammad Behrouzi, Daniel Garcia-Pozuelo

A1: IC ENGINES, GOALS AND DEVELOPMENT:

Effect Of Fuel Temperature On Spray Properties Using Local-Contact Microwave-Heating Injector ................................................................. 4042
Thi Thu Huong Tran, Hiroshi Enomoto, Motoki Kashita, Takaaki Sakitsu

Hybrid Systems Controller Design Methodology .............................................................................. 4049
Michal Pluska, David Sinclair

Roads To Respect - Cyprus Case Study .............................................................................. 4059
Marios Philippou

Challenges Of The Product Management Of Military Vehicles ................................................................. 4068
Tina Barth

ADDITIONAL PAPERS:

Effect Of Injector Spray Angle To The Performance Of A Compressed Natural Gas Direct Injection Engine .............................................................................. 4074
Rashid A. Aziz Firmansyah, Shahzad H. Raja

Heat Recovery System For Continuous Regeneration Of Diesel Particle Filter ................................................................. 4087
Wladyslaw Mitaniec

Application Of Dioxane In Diesel Engine As Additive With Ethanol And As Alternate Fuel - A Comparative Analysis .............................................................................. 4097
Sundar Raj Chockalingam, S. Arul, S. Sendivelvan

Developed Technologies Of The New Rotary Engine With Modern Two-Stroke Cycle (Annular Rotary Engine) .............................................................................. 4111
Abolfazl Khatib, Hussein Ghomashi

Vehicle Valve Regulated Lead Acid Battery Modeling And Fault Diagnosis .............................................................................. 4124
Nabil Hammad

Study Of The Automotive Wings With Coanda Effect .............................................................................. 4134
Angel Huminic, Gabriela Huminic

Vehicles Aerodynamics While Crossing Each Other On Road Based Computational Fluid Dynamics .............................................................................. 4144
Yihng-Chao Zhang, Zhe Zhang, Jie LI

Multipurpose Four-Axle Vehicle With Electric Transmission .............................................................................. 4154
Nikolay Kulakov, Syvyatoslav Cheranev

Isolating Hydraulic, Mechanical And Aerodynamic Noise Of Vehicle Air Condition Systems .............................................................................. 4158
Nabil Hammad
