# TABLE OF CONTENTS

**VOLUME 1**

## SESSION 1: WELCOMING PLENARY
**Co-Chairs:** Myles W. Scoggins, Jeremy Boak

- **A Colorado Viewpoint on the Development of Oil Shale Resources** .................................................. 1  
  Bob Randall
- **Energy is Important to Utah and Utah is Important to Energy** .................................................... 5  
  Alan Walker
- **Oil Shale and Global Energy Needs** .................................................................................................. 33  
  Richard Lowe

## SESSION 2: PROGRAM OVERVIEW PLENARY
**Co-Chairs:** Jeremy Boak, Dag Nummedal

- **A New Improved Solid Heat Carrier Technology (Enefit 280) for Processing of Oil Shale with Different Grades** .......................................................... 45  
  Indrek Aarna, Andreas Orth
- **New Generation Shale Oil Plant: Design, Construction and Commissioning** .................................. 62  
  Jaanus Purja
- **Developing a US Oil Shale Industry — Overcoming the Challenges** ................................................ 63  
  Sandor Liive
- **U.S. Oil Shale Task Force Education and Outreach Activities** .......................................................... 79  
  Andrew Browning

## SESSION 3: IN SITU PROCESSING
**Co-Chairs:** Carl Palmer, Bill Symington

- **Spatial Distribution of Geochemical Changes About an Oil Shale Retort** ........................................ 91  
  Carl Palmer, Earl Mattson, Robert Perkins, Mitchell Plummer, Thomas Wood
- **Construction and Testing of Shell’s Freeze Wall** ............................................................................. 111  
  Wolfgang Deeg, Sepher Arbahi, Richard Mykitta, Jeffrey Smith, Larry Crump
- **Field Testing of Electrofrac™ Process Elements at ExxonMobil’s Colony Mine** ............................... 126  

## SESSION 4: PYROLYSIS
**Co-Chairs:** William Taciuk, Neil Bostrom

- **Realistic Oil Shale Pyrolysis Programs: Kinetics and Quantitative Analysis** .................................. 159  
  Neil Bostrom, Gabriela Leu, Malka Machlus, Andrew E. Pomerantz, Robert L. Kleinberg
- **Test Results Relating to Changes in Oil Yield and Gas Compositions of Oil Shale Samples Subjected to Short-to-Medium Time and Temperature Exposure at Atmospheric Pressure** .................................................. 175  
  William Taciuk
- **Effect of Oil Shale Particle Size on Oil Yield, Sulfur and Distillation Fractions** ............................... 236  
  Omar Al-Ayed, Zaid Al-Anbar
- **Permeability Changes of Fractured Oil Shale Cores During Retorting** ........................................... 264  
  Earl Mattson, Carl Palmer, Erik Johnson, Hai Huang, Tom Wood

## SESSION 5: RESEARCH DEVELOPMENT & DEMONSTRATION UPDATE
**Co-Chairs:** Glenn Vawter, James Patten

- **White River Oil Shale Project 2009 update** ..................................................................................... 286  
  Gary Aho
- **AMSO’s Colorado Oil Shale RD&D Lease Tract: Progress and Plans** ............................................. 307  
  Roger Day
- **Field Test Results: EcoShale In-Capsule Technology** ................................................................. 325  
  James Patten
SESSION 6: MODELING
Co-Chairs: Richard Sherritt, Milind Deo

Interaction Between Reactivity and Flow in the In-situ Production of Oil from Oil Shale .................................................. 371
Jacob Bauman, Milind Deo

Massively Parallel Modelling of Coupled Thermal-Hydro-Mechanical Processes During In-Situ Oil Shale Retorting ................................................................. 401
Hai Huang, Thomas Wood, Carl Palmer, Earl Mattson, Zhijie Xu

Advances in the Steady-State Process Modeling of Oil Shale Retorting Processes ................................................................. 427
Rick Sherritt, Meilani Purnomo, Jimmy Jia, Jim Schmidt

Oxygen Combustion Application and Simulation Analysis in SJ – Pyrolysis Retort Process ...................................................... 462
Jimmy Jia, Rick Sherritt, Jim Schmidt, Wenchi Shang

SESSION 7: RESOURCE CHARACTERIZATION
Co-Chairs: Ronald Johnson, Matthew Sares

Albert County Oil Shale – Resource Characterization and Preliminary Assessment of Development Concepts .................................................. 484
Roland Butler, Lawrence Winter, Carol Seymour, J. Dean Thibault, Tim McKeen, Stephanie Scott

Potential Benefits of Minerals and Metals As Added Value to Oil Shale in Jordan .......................................................... 530
Musa Resheidat, Jan Krason

An Assessment of In-place Oil Shale Resources in the Green River Formation, Piceance Basin, Colorado .................................................. 565
Ronald Johnson, Tracey Mercier, Michael Brownfield, Michael Pantea, Jesse Self

Assessment of In-place Nahcolite Resources in the Green River Formation, Piceance Basin, Colorado ........................................ 610
Michael Brownfield, Tracey Mercier, Ronald Johnson, Jesse Self

SESSION 8: SURFACE PROCESSING
Co-Chairs: Gary Aho, Douglas Smoot

Hydrogen Firing for a High-Capacity Rotary Kiln .................................................................................................................. 643
Ralph E. Coates, L. Douglas Smoot, Kent E. Hatfield

Hydrogen and Water Requirements for the Clean Shale Oil Surface (C-SOS) Process .................................................. 668
Kent E. Hatfield, Ambar M. Ochoa, L. Douglas Smoot, Craig Eatough

SESSION 9: US PROGRAM & POLICY
Co-Chairs: James Killen, Khosrow Biglarbigi

Profiling Oil Shale Research and Development in the United States ........................................................................................................... 693
James Killen, Emily Knaus

Advances in Oil Shale Technologies for Potential Application in U.S. Oil Shale Resources .................................................. 711
Peter Crawford, James Killen, Emily Knaus

The Current Understanding of U.S. Oil Shale Economics ........................................................................................................... 737
Khosrow Biglarbigi, James Killen, Marshall Carolus

Shale Oil, the New Strategic Petroleum Reserve, and Why the US Should Pursue This Strategy ........................................ 761
Stephen Sewalk, Paul Chinowsky

SESSION 10: OIL SHALE PROPERTIES
Co-Chairs: Mike Batzle, Matthew Holman

Determining Oil Shale Porosity Using Borehole Gravimetry ........................................................................................................... 782
Katia Pronina, Matthew Holman

Elastic Properties of Source Rocks ........................................................................................................................................ 800
Ramil Ahmadov, Jack Dvorkin, Gary Mavko

Spectroscopic and Microscopic Characterization of Oil Shale ................................................................................................. 824
Tracy Elizabeth McEvoy, Michael Batzle, Jeremy Boak, Earl D. Mattson, John Scales, George Radziszewski
VOLUME 2

Pore-Scale Analysis of Pyrolyzed Oil Shale Cores ................................................................. 858
Chen Lu Lin, Jan Miller, C.H. (Ken) Hsieh, Pankaj Tiwari, Milind Deo

SESSION 11: SURFACE & GROUND WATER
Co-Chairs: Harry Posey, Kathy Wilson

Interpreting Groundwater Characteristics in Eocene Aquifers by Isotopic Measurements: Piceance Basin, Colorado......................................................... 879
Harry Posey, Jim Finley, Konrad Quast

Assessing Surface Water Resource Availability for Oil Shale Development Using the WARMF Model ................................................................. 896
Daniel Levitt, Al-Aziz Edeebbarh, Cathy Wilson, Andrew Wolfberg, Joel Herr

GIS- and Web-Based Water Resource Geospatial Infrastructure for Oil Shale Development in the Western United States .................................................. 919
Wei (Wendy) Zhou

How Does Colorado Water Rights Administration Affect Oil Shale Production? .................................................. 945
Timothy A. Crawford, Christopher J. Sanchez, Daniel O. Niemela

SESSION 12: INTERNATIONAL PROGRAMS
Co-Chairs: Privanka Bakaya, Balesh Kumar

Energy Independence for Europe from the Cambrian Alum Shale of Sweden: Oil and Uranium - A Two-Fold Energy Resource ........................................ 976
Edward Godin, Stewart Jackson, Patricia Sheahan, Michael Bromley-Challenor, Sven Snaell

India’s Initiative Towards Exploration of Shale Gas & Oil Shale and Development of Underground Coal Gasification ........................................ 989
Baleshwar Kumar

Oil Shale, Tar Sand and Asphalt Deposits of Buton Island, Southeast Sulawesi Province, Indonesia ................................................................. 1037
M. Hadiyanto, S. Tobing, H. Fujiono

Progress of Oil Shale Exploration in Thailand in Phase 2 .................................................. 1085
Apiradee Suwannathong, Pornchai Pongkorn

SESSION 13: ENERGY, WATER, CO2
Co-Chairs: Earl Mattson, Benjamin Harding

Energy Development Water Needs Assessment and Water Supply Alternatives Analysis .................................................. 1112
Benjamin Harding

Water Use for In-Situ Production of Oil from Oil Shale .................................................. 1135
Jeremy Boak, Earl Mattson

Saline Water Disposal Into the Birds Nest Aquifer in Uintah County, Utah: Implications for Potential Oil Shale Development .................................................. 1163
Michael Vanden Berg

Determinants of Carbon Dioxide Emissions from Oil Shale-Derived Fuels .................................................. 1184
Adam Brandt, Jeremy Boak, Alan Burnham

SESSION 14: EVALUATION OF OIL SHALE OPTIONS
Co-Chairs: Jim Bunger, Richard Snow

Advanced Hybrid Energy System to Integrate Oil Shale Gasification Technology with Coal Fired Electric Power Generation to Reduce Carbon Footprint and Minimize Emissions .................................................. 1201
Joseph D. Smith, Richard D. Boardman, L. Douglas Smoot, Khalid Omar, Ralph L. Coats, Kent E. Haasfield

Wind Power Storage to Produce Wind Clean Fuels and to Stabilize the Grid .................................................. 1220
Richard Snow, Jack Bridges

Potential By-Products from Oil Shale, Piceance Basin, Colorado .................................................. 1241
Glen Miller

Thermodynamics Govern Future Trends in Energy Production Economics .................................................. 1261
James Bunger, Christopher Russell
SESSION 15: GEOLOGY & STRATIGRAPHY  
Co-Chairs: Gerry Daub, Alan Carroll

Spatial Variability of Oil Shale Grade Within Rich and Lean Oil Shale Zones, Green River Formation, Piceance Basin, Colorado ................................................................. 1280  
Jesse Yeakel, Nasser Mansoor

Oil Shale Deposits of Jordan: Genesis and Mode of Occurrences Through Petroleum Geochemical Signatures ................................................................. 1301  
Hazem Ramini

Aspects of Oil Shale and Other Geologically Associated Energy Sources for the Piceance, Uinta, and Green River Basins in the Western United States ................................................................. 1303  
Paul Quinn

SESSION 16: HEALTH & ENVIRONMENTAL RISK  
Co-Chairs: Thomas Wood, David Olsen

Sustainability Assessment of Estonian Oil Shale Mining Using Advanced Technology ................................................................. 1328  
Sergei Sabanov

A Preliminary Study for Revegetation of Spent Shale from the Clean Surface Oil Shale (C-SOS) Process Spent Shale in Utah ................................................................. 1361  
Nathan Cline, Bruce Roundy, Robert Jackson

Reclamation and Revegetation of Lands Disturbed by Oil Shale Development in Colorado ................................................................. 1382  
Jack Clark

A First Order Evaluation of Atmospheric Emissions from a Hypothetical In-Situ Oil Shale Retort ................................................................. 1436  
Thomas Wood, Robert Podgornay, Arthur Rood, Hai Huang, Carl Palmer, Earl Mattson

SESSION 17: RESPONSIBLE DEVELOPMENT OF OIL SHALE  
Co-Chairs: Anton Dammer, Michele Thomas

Fossils Can Still Deliver! the Surprising Public Support for Fossil Fuels Development ................................................................. 1458  
John Parsons, Simon Eldridge, Larry Lukens

The Case for an Australian Shale Oil Industry ................................................................. 1482  
John Parsons, Simon Eldridge

Responsible Development of Oil Shale ................................................................. 1538  
Michele M. Thomas

Why the United States Needs a Strategic Unconventional Fuels Program ................................................................. 1560  
Anton Dammer

SESSION 18: WASTE TREATMENT  
Co-Chairs: Michael Vanden Berg, Robert Ryan

Oil Shale Pyrolysis Water Treatability Study ................................................................. 1578  
Robert Ryan, Rahul Patel, Sudini Padmasiri

Thermal Processing of Oil Shale Industry Waste with Production of Energy, Construction Materials, Chemicals and Gases, and Recovery of Nonferrous Metals and Trace Elements ................................................................. 1595  
Andrey Tarasov, Valery Paretsky, Erki Unn

Is Retorted Oil Shale Hazardous Waste? ................................................................. 1633  
Jaan Habicht

The Vertical Tube Reactor System Produces Clean Water from Contaminated Oil Shale Waste Water ................................................................. 1667  
Jay McGrew, Keith Miller

SESSION 19: POSTER SESSION TITLES

Oil Shale Pyrolysis: Characterization and Compositional Analyses ................................................................. 1679  
Pankaj Tiwari, Kyeongseok Oh, Milind Deo

Combined Oil Shale Liquefaction ................................................................. 1680  
Jari Soone, Milhail Kaev

Chattanooga Process, a Process Using Heated and Pressurized Hydrogen in a Fluidized Bed to Produce High Grade Synthetic Crude Oil from Oil Shale, Oil Sands and Bitumen ................................................................. 1681  
Marty Karpenski, Tony Howarth, Larry McEvey, Bill Poist
