**SESSION 1 PROCESS AND MATERIAL OPTIMIZATION (PO) PART 1**

| ALD-SiO₂ Deposition and CD Slimming Techniques for Double Patterning and a Heater-less Batch Tool | Tetsuya Shibata, Jun Satoh, Jun Ogasawara, Toshihiro Abe, Toru Ishii, Kazuhide Hasebe | 39 |
| Crystallographic Grain Size of Nickel-Platinum Silicide Films and Their Impact on Device Characteristic | Yoshiki Yamamoto, Tatsuya Futase, Naotoshi Akamatsu, Yutaka Inaba, Hisanori Tanimoto | 42 |
| Methods to Eliminate Pattern Collapse in Mass Production by the Resist Replacement without Changing Model-based Optical-Proximity-Correction | Yoshihiro Matsui, Takayuki Yaguchi, Masafumi Fujita, Kazuho Yamauchi, Tomoya Yamazaki, Tadahiko Uchiyama, Masaharu Takizawa | 46 |
| Hydrogen Concentration Effect during RIE Process for Piezo Resistor of MEMS Pressure Sensor | Shin Egami, Shinya Nakagawa, Tetsuya Toda | 49 |
| Improvement of Gate Critical Dimension for 40nm Node Device | Hiroyuki Tazawa, Atsushi Nishizawa, Takeshi Akimoto | 53 |
| Defect Reduction in Cu Chemical-Mechanical Polishing | Thor Eusner, Namaji Saka, Jung-Hoon Chun | 56 |
| Methods to Eliminate Pattern Collapse in Mass Production by the Resist Replacement without Changing Model-based Optical-Proximity-Correction | Yoshihiro Matsui, Takayuki Yaguchi, Masafumi Fujita, Kazuho Yamauchi, Tomoya Yamazaki, Tadahiko Uchiyama, Masaharu Takizawa | 46 |

**SESSION 2 MANUFACTURING CONTROL AND EXECUTION (MC) AND ENVIRONMENT, SAFETY AND HEALTH (ES)**

| Apply Neighborhood Search on Optimization Heuristic for Scheduling of Foundry Fabrication | Yih-Yi Lee, Chien-Lun Chang, Hsiao-Fen Wu, Hsin-Hon Hsieh, T. C. Fang | 67 |
| Input Plan Optimization for the High Mix Low Volume Factory of the Semiconductor Manufacturing | Koji Kamoda, Toshiharu Mise, Shoichiro Fujimura, Takafumi Chida, Nobuaki Nishihara | 70 |
| Effective WIP Flow Estimation for Daily Fab Production Target Setting with Consideration of Variability | Yu-Ting Kao, Shu-Cheng Chang, Peter B. Luh, Simon Wang, Hsuan Chuang, Joey Chang | 73 |
| Design of Standard Modeling Process for Tool Sequencing Optimization under Given Robot Control Logics: A PVD Case | Pi-Min Hsu, Ji-Lun Chen, Joey Chang, Shien-Chiang Chien, Jen-Hsuan Ho, Shi-Chung Chang, Liang-Liang Sun, Peter B. Luh | 77 |
| Smart PM Automatic Control System | Cheng-Sheng Chang, Hsi-Lo Lo, Cheng-Chung Pan, De-Lung Wu | 85 |
| Improve Fab Performance by Using a Unique System that Support Overall Equipment Efficiency Methodology | Maya Bakshi, Tomer Segal, Sylvain Boubnek | 89 |

**KEYNOTE SPEECH SESSION**

| 3D-TSV Overview | Sitaram Arkalgud | 96 |
| Relentless Innovation: The Case for Agility in Semiconductor Manufacturing | Thomas Sonderman | 135 |
SESSION 3 PROCESS AND MATERIAL OPTIMIZATION (PO) PART 2

Advances on NiPt SALICIDE Process Optimization for 28nm CMOS Manufacturing ................................................................. 178
Yi-Wei Chen, Nien-Ting Ho, Jenarder Lat, J. F. Lin, C. C. Huang, J.-Y. Wu, James M. M. Chu, Jeffery W. Butterbaugh
Optimal Fabrication Process for MEMS Pressure Sensor by 8Inch CMOS ................................................................. 182
Tadashi Koi, Katayuki Inoue, Yoshihiko Adachi
Process Optimization with the Dynamic Response Analysis ................................................................. 186
Nobuchi Kuramochi, Noriaki Katagiri
Effects of Surface Conditions of the Focus Ring on Etching Uniformity ................................................................. 190
Ayuta Suzuki, Nobutoshi Terasawa, Tsuyoshi Moriya, Song-Tun Kang

SESSION 4 FINAL MANUFACTURING (FM) AND CONTAMINATION CONTROL AND ULTRACLEAN TECHNOLOGY

High Productivity Multiple DUT CV Test for MEMS Microphone Wafer with Automatic Correction ................................................................. 193
Shin Inoue
Influence of Airborne H2S on Haze Generation in ArF Lithography ........................................................................ 197
Masaki Takamaki, Eri Uemura, Kazuhiro Nishiki, Masayuki Hatano, Fumihiko Aiga
Outdoor Airborne Contamination Control for Semiconductor Manufacturing Process .................................................. 201
Chia-ching Wan, Jang-Jang Lee, Lien-fang Wu

SESSION 5 FACTORY DESIGN (FD) AND MANUFACTURING STRATEGY AND OPERATION MANAGEMENT (MS)

Enhance Transfer Performance for High Throughput Tools by Control Scenario ................................................................. 205
Yu-Jen Chen, Hsi-Lo Lo, Cheng-Chang Pan, Nian-Wei Chan
Mathematical Model for Estimating Direct Tool to Tool Transport Ratio ................................................................. 209
Hiroshi Kondo
The Secret of Manufacturing Excellence : Lean Maintenance ................................................................. 213
Tan Lin Sheng, Joan Tofoya

SESSION 6 MANUFACTURING CONTROL AND EXECUTION (MC)

Focus Estimation using Scatterometry for 65/45-nm-node Hole Processes ................................................................. 217
Kana Nemoto, Hideaki Sasazawa, Shunichi Matsumoto, Toshiharu Mio, Seiji Hama, Yoshio Morii, Shota Tazawa, Koichiro Narimatsu
Root Cause Identification in Yield Degradation Due to Nickel-silicide Disconnection ................................................................. 221
Hiroshi Kondo, Kazuaki Tsukamoto, Shin-ichi Inoue
Using Actual Equipment Data for Process Prediction in High-Mix Production ................................................................. 225
Hiroyuki Tsuchiyama, Hiroki Nakata, Koetsu Sakai

SUMMARY PRESENTATION FOR INTERACTIVE POSTER SESSION

Enabling 18nm-particle Detection on Si Surfaces by Conventional Laser Scattering ................................................................. 229
Akihiko Tamura, Shigeru Kawamura, Misako Saito
Optimization of Test Parameters for the Thermal Resistance ........................................................................ 233
Shigenobu Tsuchida, Stigegor Yamasaki
Defect Spatial Signature Analysis for Semiconductor Process ........................................................................ 237
Katsu Imai, Masami Ichikawa, Yoshihide Shiroyama
Potential Technologies for Next Generation Defect Inspection ........................................................................ 241
Dilip Patel
Parallel Plate Wet Denuder Coupled Ion Chromatography for Near Real Time Monitoring of Acids, Ammonia and Amines in Clean Room and Equipments ................................................................. 246
Masaki Takahashi, Yoshimi Shiramizu, Masao Tanaka, Hiromichi Tsunoda, Hideki Tanaka, Norikazu Namiki, Shuji Fujii
Effective Cleaning of Si by the Dry Ice Blasting for Future Dry Process Technology ................................................................. 250
Ultra Thin Silicon Substrate for Next Generation Technology Nodes ................................................................. 254
Stress-based Inspection System for Detecting Microcracks on CMP Surfaces ................................................................. 257
Kazutomi Sakai, Shinohata Ito, Naohara Nishi, Kazumi Hino, Kazuhiro Nomura
Variable Frequency Drive using Nonresonant Ultrasonic Motor for Wear Reduction ................................................................. 260
Yuki Sato, Koichi Kasai, Hiroshi Kubota
Non-destructive Inline Evaluation Method for the Gate Insulator in the Nodes Beyond the 22nm Generation ................................................................. 263
Yuya Nishi, Toshimasa Hirano, Kazumiti Tanaka, Yuki Soh, Masao Yoshioka, Hiroshi Kubota, Kazuhiro Kobayashi, Yoshiyuki Yamashita, Akira Yoshino
Optimizing Return On Inspection Trough Defectivity Smart Sampling .................................................................................................................. 267
Mohamed Saboun, Philippe Vialletelle, Samuel Bassotten, Soendri Basnione, Michel Tollemaere

Application and Effect Verification of EES to Old Generation Resist Coater ................................................................................................................. 271
Takahiro Shimosojh, Masahiro Shimbo

Bottleneck Elimination for Efficiency Improvement in Equipment Engineering Data Use Activities ................................................................. 275
Masahiro Shimbo, Masatoshi Ikeda, Masahiko Minamide, Hiroshi Matsumura, Junichi Uchida, Hidetaka Nishimura

Optimization of CVD CIF3 Non-plasma Cleaning Condition with Advanced Endpoint Detection Tool ......................................................... 279
Yohei Hamaguchi, Kazuyuki Fujii, Kenji Shirakawa, Minoru Hanazaki, Katsuuru Katayama, Masato Toyota

Demand Forecasting System Using Customer Behavior to Optimize Foundry Manufacturing .................................................................................. 283
Bong-Shin Jeang, Edwin D. Liu, Kuo-Lan Chen, Chan-Sheng Su, Chih-Young Hung

The Method of Modeling of Cycle Time and Consumable Cost of Batch Tool ............................................................................................... 287
Hiroyuki Tsukahara, Tadashi Imai, Yoshiaki Mamiokai, Hisashi Hosoe

Automatic Engineering Lot Handle System ..................................................................................................................................................... 291
Hung-Lung Lin, Hsi-Lo Lo, Cheng-Chung Pan, Nian-Wei Chan

Advanced Automatic Transportation on Twin-FAB by Conveyor System ....................................................................................................... 295
Chia-Cheng Kuo, Chia-Yang Lin, Chien-Chih Chiu

ISSM 2010 a High Availability Multi-layered MCS System ................................................................................................................................. 299
Chia-Yang Lin, Ming-Tang Yeh, Chia-Cheng Kuo

CMP Oxide Slurry Recycle System Implementation ................................................................................................................................. 303
Jack Hsu, Y. J. Wann, J. R. Pai

KEYNOTE SPEECH SESSION

Technologies and Trends Related to Power Module ........................................................................................................................................... 306
Katsumi Satoh

More-than-Moore Reinvented ..................................................................................................................................................................... 340
George Liu

INVITED SPEECH SESSION

Perspective of CMOS Technology ........................................................................................................................................................................... 359
Tohru Mogami

SESSION 8 PROCESS AND MATERIALS OPTIMIZATION (PO), YIELD ENHANCEMENT METHODOLOGY (YE), AND DESIGN FOR MANUFACTURING (DM)

A Novel Electron Beam-inspection Technique for High impedance Contact Plugs .................................................................................................................. 387
Yusuke Omimami, N. Tsuno, M. Nozoe, J. H. Oh, H. W. Yoo, J. P. Lee, D. Y. Mun

Methodology for N% Recovery Post PM for Aged/non-annealed SPA Oxynitride Gate without XPS Referencing .......................................................... 391
JaeHyun Kim, ChangHwan Lee, SeongJun Heo, HyungWon Yoo, ChulHong Kim, Sangeul Yoo, Nam Hee Yoon, Zhiming Jiang, Hwan Seong Moon

Direct Correlation Between Electrical Failure and Haze Signals of DF (Dark Field) Inspectors .................................................................................. 395
Katsuyoshi Fujisaki, Tomoko Isaka, Kyoko Sakahara, Hiroshi Nagasaki, Koichi Sakurai

Self-aligned Critical Line for LSI Yield Improvement ........................................................................................................................................... 399
Masaki Sugimoto

Yield Model for Estimation of Yield Impact of Semiconductor Manufacturing Equipment ................................................................................. 403
A. Nutsch, R. Oechsner, U. Schepka, L. Pfizter

Optimizing and Applying a Scribe VC-TEG for the Shortloop Monitoring of Cu-via Open Failures ................................................................. 407
Jiro Imase, Hiroshi Nagasaki, Koichi Sakurai

Virtual Equipment Engineering: A Continuous Simulation Chain Leveraging Development of New Semiconductor Manufacturing Equipment ........................................................................... 411
Andreas Matthes, Matthias Koitzsch, Martin Schellenberger, Lothar Pfizter

SESSION 9 PROCESS AND MATERIALS OPTIMIZATION (PC)

Compensation of High-Speed Drift by Cu-CMP APC in Continuous Input of High-Mix Products ........................................................................ 415
N. Miyashita, K. Yamaki, H. Tsuchiyama, N. Uchida, K. Sakai, K. Yamamoto

Prediction of Slip Generation during Rapid Thermal Processing .................................................................................................................. 419
Naoyuki Fujii, Hiroshi Matsumura, Shinji Watanabe, Seiichi Kishiguchi

Advanced FD System for COC Reduction and Quality Improvement by using Pad Height Sensor for CMP Process ...................................................... 423
Katsuhiro Sakai, Hirofumi Tsuchiyama, Masaru Nogase, Hiroyuki Matsuda, Katsuhide Watanabe, Takashi Kurosuawa, Tetsuya Tabaru

Productivity Improvement through Systematic Process Window Identification .................................................................................................. 427
Allen Park, Ellis Chang

Reduction of Si Residues for Trench Etching ..................................................................................................................................................... 431
Koichi Komishi, Kazumi Saito, Takeshi Akimoto
Immersion Lithography Process Improvements by Wafer Edge Inspection at 300mm DRAM Manufacturing Fab .......................... 435
Marlene Strobl, Calvin Hsu, Yu Chen Lin, Howard Chen, Damian Chen, Alex Cheng, WonGun Lee, Steve Lin, Oreste Donzella, Ribli Leung, Jennifer Kopp, Becky Pinto

Analysis of Gate CD Drift by EES .............................................................................................................................................. 439
Keiichi Harashima, Makoto Ajima, Takeshi Akimoto

Optimized Design of Control Plans Based on Risk Exposure and Resources Capabilities .............................................. 443
Belgacem Bettayeb, Philippe Vialletelle, Samuel Bassette, Michel Tollenaere

Author Index
