# TABLE OF CONTENTS

SPE 138907 First MPD Automated System Application in Offshore Gulf of Mexico Well Confirms Method, Huge Benefits ................................................................. 1  
S. Ramirez, R. Aguilar, R. Herrera, V. Vallejo, E. Perez, L. Girul, G. Castiblanco, H. Sanchez

SPE/IADC 139623 Drilling Fluid Design Enlarges the Hydraulic Operating Windows of Managed Pressure Drilling Operations ................................................................. 11  
Doug Oakley, Lee Conn

IADC/SPE 143093 Managed Pressure Drilling Enables Drilling Beyond the Conventional Limit on an HP/HT Deepwater Well in the Mediterranean Sea .................................................. 18  
F. Kernche, D. Hannegan, C. Pena, M. Arnone

IADC/SPE 143094 Alternative Shut-In and Pump Start-Up Procedures for Kicks Taken During MPD Operations .................................................................................. 35  
J.E. Chirinos, J.R. Smith, D.A. Bourgoyne

IADC/SPE 143095 Well Control When Drilling With a Partly-Evacuated Marine Drilling Riser ................................................................. 45  
K. Falk, B. Fossli, C. Lagerberg, A. Handal, S. Sangesland

IADC/SPE 143096 Offshore Underbalanced Drilling With a Closed-Loop Circulating System ................................................................. 55  
G. Gough, S. Tulbot, H. Moos

IADC/SPE 143097 Intelligent Estimation of Downhole Pressure Using a Simple Hydraulic Model ................................................................. 64  
G. Kaasa, O.N. Stamnes, L. Inslund, O.M. Aano

IADC/SPE 143098 Experimental and Theoretical Study of Control Strategies for Constant Bottomhole Pressure While Drilling Oil Wells ................................................................. 77  
M.P. Vega, F.R.B. Vieira, M.G. Folsta, A.M. Leibsohn, R.A. Gandelman

IADC/SPE 143099 Kick Detection and Well Control in a Closed Wellbore .............................................................................................. 93  
Steve Nas

IADC/SPE 143100 MPD Application With CBHP Technique in Horizontal Well Drilling for the Development of an HP/HT and Sour-Environment Gas Field: A Case History .............................................................................................. 103  

IADC/SPE 143101 A Proposed Method for Planning the Best Response to Kicks Taken During Managed Pressure Drilling Operations .............................................................................................. 117  
J.R. Smith, B.M. Patel

IADC/SPE 143102 The Challenges and Results of Applying Managed Pressure Drilling Techniques on an Exploratory Offshore Well in India - A Case History .............................................................................................. 130  
A. Ray, B. Vudathu, P. Vieira, F. Torres

IADC/SPE 143104 MPD Makes Possible to Drill and Trip Out of the Hole in a Gas Well With a Combination of a Narrow Mud Weight Window and a Serious Ballooning Effect .............................................................................................. 152
