# TABLE OF CONTENTS

A Modified Method for Fractional Numerical Differentiation ........................................................................ 1  
   Ailin Qian, Yan Li

Notes on a Liénard Type Equation .............................................................................................................. 5  
   Guohua Chen, Zhaoling Tao

On a Laxity-based Real-time Scheduling Policy for Fixed-priority Tasks and its Non-utilization Bound ..................................................................................................................... 7  
   Guangyi Chen, Wenfang Xie

Notes on Type II Codes over Finite Rings .................................................................................................. 11  
   Xiaoyan Zhang, Hualu Liu, Xiusheng Liu

The Design and Implementation of Power Earth-Line Monitoring System .................................................. 14  
   Dasong Sun, Jie Zhou, Xianhe Qin

Positive Solution to a Semipositone m-point Boundary Value Problem of Impulsive Differential Equations ...................................................................................................................... 18  
   Dehong Ji, Weigao Ge

Oscillation of Solutions for Even Order Partial Differential Equations with Distributed Deviating Arguments ................................................................................................................................. 22  
   Shizhong Lin, Shuxin Lin, Yuanhong Yu

Modified Regularization Method for a Cauchy Problem of the Laplace Equation .............................................. 27  
   Jianfeng Mao, Guangfu Wang

Imprecise Domain-specific Modeling for C4ISR Capability Requirements Analysis ......................................... 33  
   Zhitao Wang, Qinghao Dong, Hongxue He, Fengke Fu

Maximal Operator of Dyadic Derivative on Vilenkin Group ........................................................................... 39  
   Xueying Zhang, Chuanzhou Zhang

Weak Orlicz Spaces Generated by Concave Functions .................................................................................. 42  
   Xueying Zhang, Chuanzhou Zhang

Optimization of Pseudo-boolean Satisfiability Algorithm for FPGA Routing .................................................. 45  
   Yulan Tang, Zhan Liu, Jian-hui Chen

A Median Filter FPGA with Harvard Architecture ......................................................................................... 50  
   Zhao Junxia, Zhen Bota, Liu Hongjun

A Fast Placement and Global Routing Integrated Algorithm for Hierarchical FPGAs .................................... 52  
   Limin Zhu, Jinian Bian, Qiang Zhou, Yici Cai

The Effect of Initial Conditions on Atmospheric General Circulation Model .................................................. 58  
   Y.H. Guan, W.S. Liu, G.Q. Zhou

The Individual Knowledge Model Supporting Web-based Instruction based on Cloud Computing .................. 63  
   Xiaojun Wang, Jun Shen

A Novel Boot-Trappping Algorithm of Enhancing Gnutella Cluster ................................................................ 67  
   Yi Zhu

Coexistence and Local Stability of Multiple Equilibria in Competitive Neural Networks with Nondecreasing Activation Functions .......................................................................................... 70  
   Xiaobing Nie, Jinde Cao

Numerical Simulations and Diagnostic Analysis of the Interaction of Three Tropical Cyclones in 2009 ............ 77  
   Zhizhong Ding, Yong Gao

Improve on Frequent Access Path Algorithm in Web Page Personalized Recommendation Model .................. 83  
   Yuhua Chen, Xin Chen, Haoyi Chen

SCN: Modeling and Simulation of Resource Constrained Workflow under Cloud Computing Environment ................................................................................................................................. 87  
   Jiantao Zhou, Rong Liang

Stability Analysis of Impulsive Stochastic Neural Networks with Reaction-Diffusion Terms ......................... 92  
   Yutian Zhang, Qi Luo

NDOD: An Efficient Neighboring Dependent Outlier Detector for Bias ........................................................... 97  
   Yan Hu, Junyuan Xie, Caishua Li

Numerical Simulation and Analysis of a Pushover of a Full-scale Two-story Model ....................................... 103  
   Yang Zhang, Junjin Liu, Jiuren Qian

Exact String Matching With Variable Length of Don’t Cares Based on Suffix Tree ......................................... 109  
   Chi Wang, Hao Wang, Zhao Xie, Jun Gao

Structure of Space Vector Field & Inevitability of Weather Disaster ............................................................. 114  
   Meifen Fu, Dafeng Xia, Weican Zhou
A New Approach to Computing Two-dimensional Manifolds

An ANFIS-Based Dispatching Rule for Complex Fuzzy Job Shop Scheduling Problem

Degree Centrality in Scientific Collaboration Supernetwork

The Optimal Convergence Analysis for An Immersed Finite Element Method

Mixed Finite Element Method with Interface-fitted Grids for the Interface Problems

A Novel Method for People and Vehicle Classification Based on Hough Line Feature

An Improved Feature Selection Approach Based on ReliefF and Mutual Information

A Novel Method for People and Vehicle Classification Based on Hough Line Feature

Resource Discovery in the Grid based on Virtual Organization

Function Point Analysis to Knowledge Representation of Software Size Measurement

The Relationship between the Cold Surge over the NSCS & the ENSO events

A New Albedo Model Constructed for Stochastic Resonance Simulation on 100ka Climate Cycle

Mencen Deng

On Reliable Unicast and Broadcast in Bijective Connection Networks with the Restricted Node/Edge Faults

A Low Time Complexity Defect-Tolerance Algorithm for Nanoelectronic Crossbar

Diversity Mapping Scheme for Defect and Fault Tolerance in Nanoelectronic Crossbar

On Software Engineering and Software Methodologies A Software Developer’s Perspective

A Q-learning Method Based on Quantum-behaved Particle Swarm Optimizer

An Immersed Finite Element Method for Anisotropic Flow Models in Porous Medium

A New Nonlinear Classification Model Based on Cross-Oriented Choquet Integrals

The Research on Virtual Micro-otosurgery

On the Matching of Images Containing Repetitive Patterns by Pairs of Interest Points

A New Hash Algorithm Based on MQ Problem and Polymorphic Cipher

The Threshold Voltage Property Research and Structure Design of MOSFET with Stack-gate

Generalized Laguerre Function Spectral Method for Second Order Ordinary Differential Equation

Global Asymptotic Stability of A General Class of Hopfield Neural Networks with Time-Varying Delays

A 1.8 mW 2 MHz Signal Bandwidth Continuous-Time Sigma-Delta Modulator

Research on the Generating Mechanism of Strong Tropical Storm Etau Numbered as 0909

A New Convergence Property of Online BP Learning

Studies on the Positive Operator Solutions to a Class of Operator Equation

A Novel Method for People and Vehicle Classification Based on Hough Line Feature

An Improved Feature Selection Approach Based on ReliefF and Mutual Information

Mixed Finite Element Method with Interface-fitted Grids for the Interface Problems

The Optimal Convergence Analysis for An Immersed Finite Element Method

Degree Centrality in Scientific Collaboration Supernetwork

An ANFIS-Based Dispatching Rule for Complex Fuzzy Job Shop Scheduling Problem

A New Approach to Computing Two-dimensional Manifolds
Anonymizing High Dimensional Data by Taxonomy Free Grouping

An Efficient Algorithm for Near Field RCS of Electrically Large Dynamic Targets

Research and Practice of Information Portal System for Digital Campus

Implementation and Comparison of Location-triggered Greeting System

Temperature and Power Control in Microwave Drying of Molybdenum

Higher Order Differential Cryptanalysis Framework and its Applications

An Evaluation on Circularly Orthogonal Moments for Image Representation

From Chord Length Distributions to Chord Power Integrals

An Evaluation on Circularly Orthogonal Moments for Image Representation

Best Approximation in Asymmetric Normed Linear Spaces

Temperature and Power Control in Microwave Drying of Molybdenum

Implementation and Comparison of Location-triggered Greeting System

Research and Practice of Information Portal System for Digital Campus

An Efficient Algorithm for Information Portal System for Digital Dynamic Targets

Anonymizing High Dimensional Data by Taxonomy Free Grouping
Research on Tree Scanning and Data Processing Based on 3D Laser Scanning System .......................................................... 421
Tang Xuehai, Chen Ying, Feng Zhongke, Guo Xiaoxiao, Wang Haiping, Tang Yi

Let’s Enforce a Simple Visualization Rule in Software Architecture ..................................................................................... 427
Binghui Helen Wu

Design and Development of Enterprise CRMS Based on MapGIS K9 .......................................................... 434
Chun Yang, Qing Li

Least-square Solutions of Inverse Problems for Reflexive Matrices ......................................................................................... 438
Lianghao Liu

An Empirical Study on Features and the Preventive Strategies of Tourism Crime in China’s Small and Medium-Sized Cities .......................................................... 441
Xia Sun, Chuanyi Li, Wenbin Shang

Researching the EPON Technology in the Intelligent Communication Network .......................................................... 446
Zhang Hongyin, Shan Rong

Design of QR Codebased Mall Shopping Guide System ......................................................................................... 450
Lei Fu

The Grey-Information-Entropy-Based Performance Evaluation Model.................................................................................. 454
Jun Shi, Entao Huang, Caiyun Sun, Xia Huang

Multi-scale Analysis of Warm Extremes over China ................................................................................. 458
Jian Zhu, Danqing Huang, Xueyuan Kuang

Intermittent Intensity Clutter Removal of Wind Profiling Radar Based on TFR .......................................................... 462
Jiaqiang Li, Yuansheng Zhang, Jie Zhou

Effect of Low Frequency Oscillation of Monsoon on the Heavy Rainfall from the Landing Typhoon Based on the Wavelet Analysis .......................................................................................... 465
Lijuan Wang, Hui Gao, Shan Lu

Seasonal Variation of Middle East Jet Stream and Its Thermal Mechanism .......................................................... 472
Aoda Pan, Donghong Ni, Zhaobo Sun, Zhongxian Li, Gang Zeng

Malay Speaker Identification Using Neural Networks ................................................................................. 476
J.D. Tan, H.N. Ting

An Improved Inverse Distance Weighted Interpolation Method for InSAR Tropospheric Delay Error Corrections ......................................................................................... 480
Haibin Luo, Xiufeng He

Application of Histo-variogram Method in Spatial Matching of Satellite Data Validation ......................................................................................... 483
Liu Ruxia, Chen Hongbin, Shi Chunxiang, Liu Jie

A Novel Wireless Network Architecture and Its Radio Frequency Assignment Mechanism for WLAN Based on Distributed Antenna System Using Radio over Free Space Optics ......................................................................................... 488
Peng Yue, Xiang Yi, Zeng-ji Liu

Study on a Kind of Land-use Change Detection Based on Patch Objects of Remote Sensing Image ......................................................................................... 493
Qingzhou Luo, Peifu Wang, Yong Wang

Least-squares Frequency Invariant Beamforming Robust Against Microphone Mismatches ......................................................................................... 496
Jing Li, Huawei Chen

Enhancement of the Security of RBS for Wireless Sensor Networks ......................................................................................... 500
Liang Tao, Junjie Chen, Wentao Ge, Ting Lin

Image Enhancement based on Quality Pre-assessment and Weighted Wavelet Fusion for WSN Nodes ......................................................................................... 506
Ting Liu, Jun-jie Chen, Liang Tao

Filtering Behavior of Iterated Symmetric Weighted Threshold Filters for Bounded Sequences ......................................................................................... 511
Wanzhou Ye, Chengfeng Yu

Development and Application Control Network Based on DeviceNet ......................................................................................... 516
Guohong Li, Cheng Xiao, Zhuang Wu

Measuring and Method of Informatization Level for Manufacturing Enterprise ......................................................................................... 520
Kexin Bi, Wei Gao

A Joint Method of Moments and Network Analysis Approach for Cavity-backed Resistor-loaded Bow-tie Antenna ......................................................................................... 528
Zhang Kang, Xu Xiaowen, He Mang

Hybrid PMM-MOM Method for Analyzing the RCS of Finite Array ......................................................................................... 532
Jianxun Su, Xiaowen Xu, Mang He

CC2430 ZigBee Chip Based on Photovoltaicpower Generation System Design Research ......................................................................................... 536
Jianjun Tan

Experimental Analysis of Strength of Foundation Soil-rock Using Wave Speeds ......................................................................................... 539
Xianmin Zhang, Yiming Zhao, Yuhui Zhang, Chunxiang Qi

The Ambiguity Function of PN-chirp Pulse Signal ......................................................................................... 543
Jing Liu, Huichang Zhao, Yanping Zhu
Fault Feature Extraction Based on Optimal Energy Using Lifting Wavelet Packet ......................................................... 548  
Xiaoli Xu, Tao Chen, Shaohong Wang

MIMO Performance with Circular Antenna Array Using the Approximate Spatial Correlation Functions ................................................................. 552
Jie Zhou, Weixi Zhang, Bo Lv

Characteristics of Chinese Economic Cycles: A Wavelet Analysis of Chinese GDP Series .................................................. 556
Shao Li

Application of ILI/IRS to Retrieve Water Surface Temperature in Lake Taihu, China ......................................................... 560
Shaomong Li, Guoqin Dong, Deyong Sun, Qiaohua Zhao, Yunmei Li, Jiacheng Huang

A Study on Wind Spectra Identification of the WPR Based On Orthogonal Polynomials Fit .................................................. 566
Lei Wu, Xuhai Zhou

Improved Reachability Analysis on Retiming of Dsp Algorithms with an Efficient Cell Enumeration Method .................................................. 572
Shen Sheng Gu

Image Fusion Using a Hybrid Representation of Empirical Mode Decomposition and Contourlet Transform ................................................................. 577
Youzhi Zheng, Yuli Wu, Hua Zhang

Uniform Bounds of Truncation Error for Shannon Sampling Expansion .............................................................................. 583
Peixin Ye

An United Algorithm for State Space Reconstruction .............................................................................................................. 589
Jing Zhang, Yang-yu Fan, Hui-min Li, Pengyi Sun, Meng Jia

EBPSK Modulation with Very High Bandwidth Efficiency .............................................................................................................. 592
Shikai Zhang

A New Method of Stereo Positioning for Airborne SAR Image ............................................................................................... 596
Lianfei Duan, Zhancao Wang, Jing Wang, Wenjun Lu

Application of the WK Hybrid Filter Algorithm in the Processing of Radar Information .................................................. 600
Tingya Yang, Zhenyu Lu

The Application of Entropy in the Urban Green Information Extraction of High Resolution Remote Sensing ................................................................. 604
Haonan Zhao, Xueyi Feng, Shuhua Zhao

Study on the Effect of Corridor Structures on Urban Heat Island in Nanjing by Remote Sensing .................................................. 608
Runping Shen, Sulin Tao, Chen Yang

Primary Analysis of the Comparison Test of Wind Profilers Made in China ............................................................... 613
Lei Wu, Xiaohui Zhou, Furong Wang

A Study of M-band Minimum-energy Frames on the Interval ............................................................................................... 619
Yi Yuan, Ping Zhao

Fingerprint Acquisition for the Criminal Investigation by Digital Holography .............................................................................. 623
Tingting Yang, Dayong Wang, Xueyao Li, Yichao Zhang

An Interleaver Scheme for TD-SCDMA Compatible GEO Satellite Communication System .................................................. 627
Yong Si, Xiu Luan, Shubo Ren, Jianjun Wu

The Seasonality and Locality of Low Frequency Oscillation by Wavelet Analysis .......................................................... 631
Wen Chen, Xiefei Zhi, Hao Yang, Jianjun Liu

The Research on Climate Change Features and Affecting Factors of Linyi Pan Evaporation in Recent 48 Years .................................................. 636
Xiaoxiao Zhang, Hongxin Pei

An Image Segmentation Method Based on Measure of Medium Truth Degree ............................................................... 643
Tingting Yang, Ningning Zhou, Xiaobin Yang

A New Objective Function and Its Characteristic to Search for Accurate Parameters of HRTEM Image ................................................................. 647
F. Lin, Z.L. Pang, H. Li, Fang Lin, Hai Li, Zhechang Pan

The Characteristics and Variation Trends of Temporal and Spatial Distribution of Thunderstorms in the Area of Linyi .................................................. 652
Xiaoxiao Zhang, Hongxin Pei

Application of the Multi-model Ensemble Forecast in the QPF ............................................................................................... 657
Xiefei Zhi, Ling Zhang, Yongqing Bai

Aircraft Type Recognition Based on Shortwave Speech Communication with PLP .......................................................... 661
Xinyu Zhang, Ping Li, Xueyao Li, Ruibo Zhang

Low Complexity Image Compression for Wireless Multimedia Sensor Networks .................................................. 665
Zhe-yuan Xiong, Xiao-ping Fan, Shao-qiang Liu, Zhi Zhong

Design and Realization of Improved LZW Algorithm for Wireless Sensor Networks .......................................................... 671
Huan Zhang, Xiao-ping Fan, Shao-qiang Liu, Zhi Zhong
Realization of Robust Control for the Optical Ultra-precision Vibration Isolation Platform
Zhengyu Lu, Qi Luo ........................................ 807

Adaptive Sliding Mode Controller for Vehicle Suspension System
Mingyuan Xin, Juntao Fei .......................................... 811

Stochastic Differential Equation with Pth Linear Growth Condition
Baosheng Lian, Fen Yang ........................................ 817

Positive Irregular Solutions for a Semilinear Elliptic Equation
Fen Yang, Baosheng Lian ........................................ 821

On Structure Complexity and Behavior Complexity of Naval Warfare
Rui Guo, Baoyun Wang ........................................ 825

Weapon Systematic Safety Evaluation Model Based on Genetic Algorithm and BP Neural Network
Cheng Kai, Zhang Hong-jun, Xu Bo, Shan Li-li ........................................ 830

ZigBee based Wireless Sensor Networks for Service Robot Intelligent Space
Baoye Song, Guohui Tian, Guodong Li, Fengyu Zhou, Dongyu Liu .......................... 834

Error Passivation to Filtering for a General Class of Switched Recurrent Neural Networks with Noise Disturbance
Jiqing Liu, Jinhua Huang ........................................ 839

The Summary for Global Optimization and Control Theory of Electric Vehicles' Energy System Based on V2G Mode
Zhenpo Wang, Xiaohui Sun ........................................ 843

Non-fragile Control for Neutral Stochastic Hybrid Systems with Time-varying Delay
Guici Chen, Shengchun Yu ........................................ 847

Formalization of Multi-Resolution Modeling Based on Dynamic Structure DEVs
Yuan Li, Bo Hu Li, Xiaofeng Hu, Xiaodong Chai ........................................ 852

Output Feedback Stabilization for a Class of Distributed Parameter Switched Systems
Xueping Dong, Rui Wen, Hongling Liu ........................................ 865

Study on Improved Slotted ALOHA Algorithm to Vehicle Identification
Zhang Kai, Yang Niuming ........................................ 870

An Adaptive Control of Web QoS Based on Online Identification
Ji Zhao, Juan Mei, Xiaoqian Yang ........................................ 876

Covariance-Assignment Based Control Performance Assessment
Dengfeng Zhang, Bingrui Bao, Dexiao Xie, Baochun Lu ........................................ 881

Robust Control for Stochastic System by Delay Feedback Controller
Zhiming Wang, Yunliang Zhang ........................................ 887

Matching Decision Model for Self-adaptability of Knowledge Manufacturing System
Yufang Wang, Hongsen Yan, Xiangang Meng........................................ 891

Application of Robust Control Theory in the Urban Operation and Management
XING Tao ........................................ 897

Adaptive Dynamic Surface Control for Perturbed Nonlinear Time-delay Systems Using Neural Network
Geng Ji, Xuebing Hua ........................................ 900

Positive Solutions for a Class of Three-Point Boundary Value Problem
Yitao Yang, Fanwei Meng ........................................ 905

Bias Compensation Based Parameter Estimation for Dual-rate Sampled-data Systems
Jie Ding, Heqiang Han, Feng Ding ........................................ 907

Fengxin Chen, Huazhen Chen ........................................ 913

Resistance-temperature Characteristic Measurement System for Automotive Temperature Sensor Based on µC/OS-II
Hui Chen ........................................ 921

Parameter Optimization of Adaptive Time-Delay Filtration System Based on GAOT
Bisheng Shi, Hong Li, Qi Luo ........................................ 925

A Gray Theory Prediction Model of Asphalt Pavement Performance
Tian Xiaoge, Yao Fei1 ........................................ 929

Overlay Routing to Avoid BGP Path Inflation
Xiao Chen, Nianzu Liu ........................................ 932

Overlay Multicasting at A Path-level Granularity for Multihomed Service Nodes
Nianzu Liu, Xiao Chen ........................................ 939

Studying of Energy Coordination on Transparent Theory
Xiangchao Li, Zhongjiang Yang, Hongke Tang ........................................ 947
