International Symposium on Oilfield Chemistry 2011

The Woodlands, Texas, USA
11-13 April 2011

Volume 1 of 2

ISBN: 978-1-61782-742-6
### TABLE OF CONTENTS

**Volume 1**

SPE 139815 Sandstone Acidizing Using a New Class of Chelating Agents ................................................................. 1  
  M. A. Mahmoud, H. A. Nasr-El-Din, C. A. De Wolf, A. K. Alex

SPE 139816 Reaction of GLDA with Calcite: Reaction Kinetics and Transport Study .................................................. 18  
  Ahmed I. Rabie, Mohamed A. Mahmoud, Hisham A. Nasr-El-Din

SPE 140141 Effects of Injected Water Chemistry on Waterflood Sweep Efficiency via Induced Fines Migration ............................................................................................................................... 38  
  Phillip Lemon, Abbas Zeinijahromi, Pavel Bedrikovetsky, Ibrahim Shahin

SPE 140177 Laboratory and Field Studies of Long-term Release Rates for a Solid Scale Inhibitor .................................... 55  
  J. Mike Brown, Dong Shen, D. V. Satya Gupta, Grahame Taylor, Richard W. Self

SPE 140401 The Laboratory Evaluation and Optimization of Hydrogen Sulphide Scavengers Using Sulphur Specific Flame Photometric Gas Chromatography ............................................................................................................................... 62  
  Grahame N. Taylor, Ron Matherly

SPE 140439 An Example of Chemical Recycling in the Oil and Gas Industry - A By-product from Hydrogen Sulphide Scavenging is Identified, Isolated and Formulated into a Highly Effective Corrosion Inhibitor ............................................................................................................................... 73

SPE 140571 Enhancing Production by Removing Zinc Sulfide Scale from an Offshore Well: A Case History .......................................................... 85  
  Sandra L. Berry, Joel L. Boles, Ajay Singh, Imran Hashim

SPE 140779 Injectivity of Hydrophobically Modified Water Soluble Polymers for IOR: Controlled Resistance Factors vs. Flow-Induced Gelation ............................................................................................................................... 113  
  Guillaume Dupuis, David Rousseau, René Tabary, Bruno Grassl

SPE 140817 High-Efficiency Boron Crosslinkers for Low-Polymer Fracturing Fluids ................................................. 142  
  Hong Sun, Qi Qu

SPE 140838 Optimizing Paraffin and Naphthene Wax-Treatment Options Using Cross-Polarized Microscopy ............................................................................................................................... 151  
  Mark M. Bacon, Laura B. Romero-Zerón

SPE 140845 Improvements to Hydrophobically Modified Water-Soluble Polymer Technology to Extend the Range of Oilfield Applications .......................................................... 158  
  Larry Eoff

SPE 140860 Selection of the Right Demulsifier for Chemical Enhanced Oil Recovery ............................................ 170  
  D. T. Nguyen, N. Sadeghi

SPE 140868 Development of Water-Based Drilling Fluids Customized for Shale Reservoirs ............................. 182  
  Jay P. Deville, Brady Fritz, Michael Jarrett

SPE 140892 Controlled Release of Colloidal Particles and Remediation: Experimental Investigation and Modelling ............................................................................................................................... 192  
  A. Gravelle, Y. Peysson, R. Tabary, P. Egermann

SPE 140959 A Novel Fluid to Improve the Hydraulic Cracking Stress of Rock ......................................................... 203  
  Brian Grady, Shuqing Wu, Gary P. Funkhouser

SPE 140965 Preparation of Novel Amphoteric Flocculant and Its Application in Oilfield Water Treatment .......... 211  
  Hui Song

SPE 140977 Field Study of the Physical and Chemical Factors Affecting Downhole Scale Deposition in the North Dakota Bakken Formation ............................................................................................................................... 224  
  Lawrence M. Cenegy, Clyde A. McAfee, Leonard J. Kalfayan

SPE 141005 Chemical Modification of Biopolymers to Design Cement slurries with Temperature-Activated Viscosification ............................................................................................................................... 236  
  B. R. Reddy, Rahul Patil, Sandip Patil

SPE 141007 Viscosification-on-Demand: Chemical Modification of Biopolymers to Control Their Activation by Triggers in Aqueous Solutions ............................................................................................................................... 247  
  B. R. Reddy
SPE 141016 Experimental Study of Spreading and Wettability Effects by Surfactants in Condensate Reservoirs at Reservoir Conditions
Y. Zheng, D. N. Rao ................................................................. 264

SPE 141025 Development and Application of Foamers to Enhance Crude Oil Production
Saet Syal Deborah, Scott Lehrer, Nancy Means, Simon Crosby .................................................. 280

SPE 141031 Carbon Dioxide, Geochemical, and Rate-of-Dissolution Simulation for Deep Storage Environments
.................................................................................................................................................. 293

SPE 141033 The Impact of Organic Acid on Scale Inhibitor/Corrosion Inhibitor Interaction, A Case Study from West Africa

SPE 141037 Biphasic Viscosity Reducers as Production Aids for Viscous Oils
M. Faust Jr., Thomas Weathers Jr. ........................................................................................................ 318

SPE 141099 Environmentally-Acceptable Replacement of 2-Butoxyethanol: A High Performance Alternative for Fracturing Applications
Jonathan J. Wylde, Bill O’Neil ........................................................................................................... 326

SPE 141100 Scale Inhibitor Application in Northern Alberta - A Case History of an Ultra High Temperature Scale Inhibition Solution in Fire Tube Heater Treater
Jonathan J. Wylde, Keith Allan, Jeff McMahon, Steve Mayner .......................................................... 342

SPE 141107 Hydrophobic Associative Copolymer with Favorable Properties for the Application in Polymer Flooding
Roland Reichenbach-Kline, Björn Langlotz, Benjamin Wenzke, Christian Spindler, Gregor Brodt .................................................. 356

SPE 141113 Shear Stability of EOR Polymers

SPE 141145 Evaluation of Scale Inhibitors in Marcellus Waters Containing High Levels of Dissolved Iron
Dong Shen, David Schohn, Randall Perkins, Graham Taylor, J. Mike Brown .................................................. 374

SPE 141146 Method for Identification and Analysis of Polysaccharide-Based, Hydraulic-Fracture Flowback Fluid
Kurt Hoeman, Scott Klasner, Arron Karcher ......................................................................................... 386

SPE 141148 Predicting Asphaltene Precipitation in Oilfields via the Technology of Compositional Reservoir Simulation
Waleed Fazelipour ................................................................................................................................ 391

SPE 141166 Rheology and Stability of Non-Aqueous Micro Bubble Based Drilling Fluids
S. Shivhare, E. Kuru .................................................................................................................................. 407

SPE 141179 Study on Admixtures for Calcium Aluminate Phosphate Cement Useful to Seal CCS Wells
......................................................................................................................................................... 417

SPE 141182 Formation of Colloidal Polymer Associates from Hydroxyethyl Cellulose (HEC) and Their Role to Achieve Fluid Loss Control in Oil Well Cement
D. Buelichen, J. Plank ................................................................................................................................ 429

SPE 141202 New Steam Resilient Cement: Evaluation of Long-term Properties Under Extreme Conditions
Alice Chougnet-Sirapian, Elena Pershikova, Anthony Loiseau ................................................................. 440

SPE 141211 Case Study: Evaluation of an Oxidative Biocide During and After a Hydraulic Fracturing Job in the Marcellus Shale
Shawn M. Rimassa, Paul Howard, Bruce Mackay, Kristel Blow, Noel Coffman .................................................. 455

SPE 141217 Treatment of Mercaptans in Canadian Condensate
Joseph Arensdorf, Darin Horaska ......................................................................................................... 465

SPE 141226 The Effect of Surfactants on the Kinetics of Hydrate Formation
Divya Ramaswamy, Mukul M. Sharma .............................................................................................. 469

SPE 141242 Development of New Chemical Additive Detection Methods Inspired by the Life Sciences
Anne-Marie Fuller, Fiona Mackay, Cameron Mackenzie, Catherine Rowley-Williams, Emma Perfect ........................................................................................................ 484

SPE 141258 Liquid Screen: Pickering Emulsion Templating as an Effective Route for Forming Permeable and Mechanically Stable Void-Free Barriers for Hydrocarbon Production in Subterranean Formations
V. O. Ikem, A. Menner, A. Bismarck, L. R. Norman ............................................................................. 496

</table>
SPE 141434 Understanding the Souring at Bakken Oil Reservoirs.................................................. 803
Yevhen I. Holubnyak, Jordan M. Bremer, Blaise A. F. Mibeck, John A. Hamling, Benjamin W. Huffman, Ryan J.
Klapperich, Steven A. Smith, James A. Sorensen, John A. Harju

SPE 141435 Corrosion-Inhibitor Design for Compatibility with Acid-Gelling Polymers ................. 809
Juanita Cassidy, Chad Kiser, Chris Smith

SPE 141447 Stabilizing Viscoelastic Surfactants in High Density Brines ........................................ 830
Ryan Van Zanten

SPE 141449 Studies on the Chemical Stability of Glutaraldehyde in Produced Water ...................... 841
Heather R. McGinley, Michael V. Enzien, Gary Jenneman, Jennifer Harris

SPE 141451 Minimizing Scale Precipitation in Carbonate Cores Caused by Alkalis in ASP Flooding in
High Salinity/High Temperature Applications........................................................................... 849
M. A. Bataweel, H. A. Nasr-El-Din

SPE 141459 Surface Energy of North American Shales and its Role in Interaction of Shale with
Surfactants and Microemulsions.............................................................................................. 864
Andrei S. Zelenev

SPE 141462 Wettability Alteration and Foam Mobility Control in a Layered 2-D Heterogeneous System.................................................................................................................. 871
Robert F. Li, George J. Hirasaki, Clarence A. Miller, Shehadeh K. Masalmeh

SPE 141471 Silicon-Based Foamants For Foam Assisted Lift Of Aqueous-Hydrocarbon Mixtures............... 888
Kalman Koczko, Oleg Tselnik, Benjamin Falk

SPE 141472 Enzymatic Synthesis of a Non Ionic Biosurfactant Derived from Ricinoleic Acid and D-glucose: Stability of its Surface Action Properties .................................................. 899
Suzan I. G. De Medeiros, Carlos R. O. Souto, Fabio P. Fagundes, Marta Costa, Avenida Senador Salgado-Filho

SPE 141513 Chemical Additives for Improving Compatibility of Drilling Fluid, Completion Fluid, and Other Well-Treatment Fluids for Deepwater Wells ............................................................ 911
Suzan I. G. De Medeiros, Carlos R. O. Souto, Fabio P. Fagundes, Marta Costa, Avenida Senador Salgado-Filho

SPE 141528 Engineered Nanoparticles for Hydrocarbon Detection in Oil-Field Rocks .................. 929
Jacob M. Berlin, Jie Yu, Wei Lu, Erin E. Walsh, Lunliang Zhang, Ping Zhang, Wei Chen, Amy T. Kan, Michael S.
Wong, Mason B. Tomson, James M. Tour

SPE 141551 Scale Control and Inhibitor Evaluation of an Alkaline Surfactant Polymer Flood .............. 954
Sho-Wei Lo, Gordon T. Shahin, Gordon Graham, Caroline Simpson, Sam Kidd

SPE 141575 Analysis of Sulphonated Polymers in Oilfield Brines .................................................. 964
Kirsty Marshall, Mark Kyle, Gordon Graham

SPE 141583 Modeling the Effect of Triazine Based Sulphide Scavengers on the in situ pH and Scaling
Tendency ........................................................................................................................................ 975
N. Goodwin, J. M. Walsh, R. Wright, S. Dyer, G. M. Graham

SPE 141590 Modeling and Simulation of Nitrate Injection for Reservoir Souring Remediation ............ 986
Mehdi HaghiShenas, Kamy Sephrnoori, Steven L. Bryant, Mohammad Ali Farhadinia

SPE 141597 Polymer Chemistry Improves Productivity in Tight Gas Hydraulic Fracturing .............. 1001
Rick Hutchins, Sylvie Daniel, Agustinus Yudho Wirajati, Hemant Ladva, Don Williamson
