2011 IEEE Electric Ship Technologies Symposium

(ESTS 2011)

Alexandria, Virginia, USA
10 – 13 April 2011
# TABLE OF CONTENTS

* Presentation only, no paper appears in the proceedings

## All Electric Ship

**Chair:** Tim McCoy, *PEO Ships*

### Implementing Quality of Service in Shipboard Power System Design
Norbert H. Doerry, John V. Amy Jr.

### Quick Charging Plug-In Electric Boat “RAICHO-I”
Tomoji Takamasa, Tsuyoshi Oode, Hiroyasu Kifune, Etsuro Shimizu, Tatsuya Hazuku

### Navigation Support System for Electric Boat
Etsuro Shimizu, Masato Nishimura, Tsuyoshi Oode, Hiroyasu Kifune, Tomoji Takamasa, Tatsuya Hazuku

### Invariant based Ship DC Power System Design
I. Kondratiev, R. Dougal

### Navy Electronic Motor Operator
Rajesh S. Chawla, Timothy L. Stanford, Sylvia A. Wrate

## Analysis

**Chair:** Mischa Steurer, *Florida State University*

### Software-Interface Structure for Grid-Stability Assessment in Complex Naval Converter Applications Using DLL
Roman Bartelt, Martin Oettmeier, Carsten Heising, Volker Staudt, Andreas Steimel

### Power System Stability Analysis of Synthesized Complex Impedance Loads on an Electric Ship
Jonathan R. LeSage, Raul G. Longoria, William Shutt

### Dynamic Assessment of Thermal Management Strategies Aboard Naval Surface Ships
Thomas M. Kiehne

### Modelling of IM with Double-Star Stator Windings for Assessing Machine Controls in Case of Faults
Jie Fang, Carsten Heising, Volker Staudt, Andreas Steimel

## Electrical Machines

**Chair:** Stephen Kuznetsov, *Raytheon*

### Implementation of Sine-Wave Input/Output BLDC Inverter for Low Inductance Shipboard PM Motor Drives Using Modular Power Platform

### Implementation of a Virtual Induction Machine Test Bed Utilizing the Power Hardware-in-the-Loop Concept
Oleg Vodyakho, Fletcher Fleming, Michael Steurer, Chris Edrington
A Magnetic Equivalent Circuit for Automated Design of Wound-Rotor Synchronous Machines ................................. 56
Michelle L. Bash, Steve Pekarek

Flux-Based Control Approach for Anisotropic PMSM for Naval Applications .......................................................... 62
Martin Oettmeier, Carsten Heising, Jie Fang, Volker Staudt, Andreas Steimel

System Architecture
Chair: Herbert Ginn, University of South Carolina

Flexible Test Bed for MVDC and HFAC Electric Ship Power System Architectures for Navy Ships .................. 66
John D. Herbst, Angelo L. Gattozzi, A. Ouroua, Fabian M. Uriarte

Analysis of Various All-Electric-Ship Electrical Distribution System Topologies .................................................. 72
J.S. Chalfant, C. Chryssostomidis

Cross-Platform Validation of Notional Baseline Architecture Models of Naval Electric Ship Power Systems .... 78
Hasan Ali, Roger Dougal, Abdelhamid Ouroua, Robert Hebner, Mischa Steurer, Mike Andrus, James Langston, Karl Schoder, Rob Hovsapian

High-Frequency Power Generation and Distribution in Multi-Megawatt Power Systems .................................. 84
J.H. Beno, R.E. Hebner, A. Ouroua

Modeling and Simulation I
Chair: Roger Dougal, University of South Carolina

Integrated Power System Modeling and Simulation ................................................................................................. 90
L. Qi, J. Pan, Z. Wang, J. Daniel, O. Apeldoorn

A Parallel Based Real-Time Electromagnetic Transient Simulator for IPS .......................................................... 96
Yuan Gong, Laijun Chen, Ying Chen, Yin Xu

A Low-Cost High-Speed Real-Time Simulator for Ships Power Systems ......................................................... 102
R.E. Crosbie, J.J. Zenor, D.A. Word, R. Bednar, N.G. Hingorani

Development of a Multicore Power System Simulator for Ship Systems .................................................. 106
Fabian M. Uriarte, Robert Hebner

Power Conversion I
Chair: Robert Cox, UNC Charlotte

Power Sharing Analysis of Double-Input Converters based on H-Bridge Cells .................................................. 111
Reza Ahmadi, Nima Yousefpour, Mehdi Ferdowsi

A Transformer-Flux-Balance Controller for a High-Frequency-Link Inverter with Applications for Solid-State Transformer, Renewable/Alternative Energy Sources, Energy Storage, and Electric Vehicles ...... 121
Alireza Taffar, Sudip K. Mazumder
10 kV/120 A SiC DMOSFET Half H-Bridge Power Modules for 1 MVA Solid State Power Substation .......... 131
David Grider, Mrinal Das, Anant Agarwal, John Palmour, Ravisekhar Raju, Michael Schutten,
Scott Leslie, John Ostop, Al Hefner

Modeling and Simulation II
Chair: John Amy, ASN RDA Cheng

A PC-Based Test Bed for NG IPS for Ships in PSCAD™ ................................................................. 135
Hung-Ming Chou, Fred A. Ituzaro, Karen L. Butler-Purry

VPNET: A Co-Simulation Framework for Analyzing Communication Channel Effects on Power Systems .... 143
W. Li, A. Monti, M. Luo, Roger A. Dougal

Soo-Nam Kim, Philip Stone, Y. Zhang, Yong-June Shin, Roger Dougal

Simulation of a DC-DC Boost Converter with Measurement Delays ........................................ 156
Saichol Chudjarjeen, Juan C. Jimenez, Sachi Jayasuriya, Chika O. Nwankpa, Karen Miu,
Anawach Sangswang

Control Volume based Thermodynamic Modeling Applied to the
Thermal Management of a Notional All-Electric Ship ................................................................. 161
J.A. Souza, J.C. Ordonez, J.V.C. Vargas, R. Hovsapian

Reconfiguration and Survivability
Chair: Rob Hovsapian, Florida State University

A Two-Step Method for Reconfiguration of Shipboard Power System ........................................ 167
Wenqin Xue, Yong Fu

Analysis of Various Partitioning Strategies for Multi-Agent System-Based Real-Time
Load Management for NG IPS Ships .................................................... 173
Xianyong Feng, Karen L. Butler-Purry, Takis Zourntos

Analysis of Robustness for Shipboard Power System with Non-Radial Power Flow ..................... 181
Sayak Bose, Bala Natarajan, Caterina Scoglio, Sanjoy Das, Noel N. Schulz

T. El-Mezyani, S.K. Srivastava, D.A. Cartes, D. Dustegor

Evolutionary Programming based Multi-Objective Optimization for a Heterogeneous System ........ 193
Thabendra Thevarajan, Sanjeev K. Srivastava, Dave A. Cartes

Design Tools
Chair: Sudip Mazumder, University of Illinois

Linear Network Design for AC Shipboard Distribution Systems .............................................. 199
Joshua A. Taylor, Eric Gilberston, Julie Chalfant, Franz S. Hover

M. Sattler, C.S. Edrington
Advancements in Generalized Immittance based Stability Analysis of DC Power Electronics based Distribution Systems ................................................................. 207
Scott D. Sudhoff, Jonathan M. Crider

Integration of the ESRDC Notional All-Electric Ship Visualization with Paramarine ................................................................. *
J. Souza, J. Chalfant, S. Motiwalla, C. Chryssostomidis, R. Hovsapian, J. Vargas, J.C. Ordonez

The Use of Real Time Digital Simulation and Hardware in the Loop to De-Risk Novel Control Algorithms ...... 213
S. Lodick, U. Mupambireyi, S. Blair, C. Booth, X. Li, A. Roscoe, K. Daffey, J. Watson

Advanced Electrical Design for the Next Generation MV Integrated Power System Converter .................. 219
Kathleen Lentijo, Nick Benavides

Protection
Chair: Steve Pekarek, Purdue

Ambient-Temperature Fault Current Limiter for Electric Ship Power Systems ................................................................. 223
Prafulla Rajabhau Deo, Tushar Pritamlal Shah, Robert Chong

High Speed Protection Concept to Minimize the Impacts of Arc-Flash Incidents in Electrical Systems of Ships ............................................................................................................................... .............. 228
Lauri Kumpulainen, Toni Harju, Heinz Pursch, Sven Wolfram

Branch Circuit Protection for DC Systems .......................................................................................................................... 234
Ugo Ghisla, Igor Kondratiev, Roger A. Dougal

A Sensor Failure Resilience Metric for Ship-Board Power System ................................................................................................. 240
Dilek Dustegor, Touria El Mezyani, Peter G. McLaren

Soft Reclosing of Fault Current Limiters in Electric Ship Power Systems ................................................................. 244
Yucheng Zhang, Hasan M. Ali, Roger A. Dougal

Power Semiconductors
Chair: Enrico Santi, University of South Carolina

Design Comparison of 6.5 kV Si-IGBT, 6.5kV SiC JBS Diode, and 10 kV SiC MOSFETs in Megawatt Converters for Shipboard Power System ................................................................................................................. 248
Hesam Mirzaee, S. Bhattacharya, S. Ryu, A. Agarwal

Solid-State Circuit Breakers for Medium Voltage DC Power ................. 254
M. Kempkes, I. Roth, M. Gaudreau

Assessment of Encapsulants for High-Voltage, High-Temperature Power Electronic Packaging ...................... 258
Yiying Yao, Guo-Quan Lu, Zheng Chen, Dushan Boroyevich, Khai D.T. Ngo

Thermal Modeling and Simulation of the Chilled Water System for Future All Electric Ship ................................................................. 265
Ruixian Fang, Wei Jiang, Jamil Khan, Roger Dougal

Shipboard Power Systems
Chair: Noel Schulz, Kansas State University

Nonlinear Observability Formulation for Shipboard Power Systems Incorporating Converter Dynamics ........ 272
Juan C. Jimenez, Chris J. Dafis, Karen Miu, Chika O. Nwankpa
Considerations when Diode Auctioneering Multiple DC Buses in a Non-Isolated DC Distribution System .......... 277
Robert M. Cuzner, Ashish R. Bendre, Jarrod D. Widmann, Kelly A. Stonger, Stephen M. Peshman, Jesse S. Carlton, Jeffrey A. Fischer

**Propulsion**

Chair: Chris Dafis, Naval Surface Warfare Center

Design of Multiphase Induction Motor for Electric Ship Propulsion ........................................................................ 283
Archana S. Nanoty, A.R. Chudasama

Diesel Electric Propulsion on ΣIGMA Class Corvettes ............................................................................................... 288
Christina Vossen

Optimized Energy-Efficient Drive System for Ship Propulsion ................................................................................. 292
Carsten Heising, Volker Staudt, Andreas Steimel

A Transformerless Full Redundant Electrical Propulsion Solution to Enhance Power Density, Availability and Low Noise Signature ........................................................................................................................... 296
Loic Leclere, Christophe Galmiche

**Fault Detection**

Chair: Boris Jacobson, Raytheon

Management of Ground Faults in an Ungrounded Multi-Terminal Zonal DC Distribution System with Auctioneered Loads ............................................................................................................................... 300
Robert M. Cuzner, Thomas Sielicki, Andrew E. Archibald, Douglas A. McFarlin

An Examination of Mutual Influences Between High-Voltage Shore-Connected Ships and Port Earthing Systems During Phase-to-Ground Faults ............................................................................................. 306
G. Sulligoi, D. Bosich, A. Da Rin, F. Tosato

Fault Location for a DC Zonal Electrical Distribution Systems Using Active Impedance Estimation ............................... 310
Edward Christopher, Mark Sumner, David Thomas, Frans de Wildt

Fault Current Reduction Using Inverter Controlled Energy Storage for Shipboard MVAC Power System .......... 315
Asif Anwar, Yucheng Zhang, Roger A. Dougal

Fault Protection and Ride-Through Scheme for MVDC Power Distribution Systems Utilizing a Supervisory Controller ............................................................................................................................... 319

**Electrical Components**

Chair: Giorgio Sulligoi, University of Trieste, Italy

A Magnetic Gear with Passive Transient Suppression Capability ................................................................................. 326
Nicolas W. Frank, Siavash Pakdelian, Hamid A. Toliyat

Permanent Magnet Inductor Design ............................................................................................................................. 330
G.M. Shane, S.D. Sudhoff

Structure and Analysis of the Z-Source MVDC Breaker ......................................................................................................................... 334
Keith A. Corzine, Robert W. Ashton
Electromechanical Ballistic DC Breaker for Use on Ships ................................................................. 339
Roger W. Faulkner, Robert Karnes

Integrated Main Reduction Gears for Hybrid Drive Surface Ship Applications .................................. 345
Dwight Alexander, Tommy Lo, James Bravo, Yakov Fleytman

Testing and Certification
Chair: Yuri Khersonsky, Consultant to ONR, USA

Electrical Aging Phenomena of Medium Voltage EPR Cable Energized by AC Voltage with Switching Impulses Superimposed ................................................................. 353
L. Cao, A. Zanwar, S. Grzybowski

Improving the Control-Design Process in Naval Applications Using CHIL ........................................ 357
Matthias Gorski, Roman Bartelt, Martin Oettmeier, Carsten Heising, Volker Staudt

On-Board Permanent PD Monitoring for Propulsion, Distribution and Generation Systems in Marine Applications ................................................................. 361
M. Tozzi, L. Testa, M. Busi, M. Marotta, M. Kennerly, G.C. Montanari

Evaluation of SiC Devices in Converter Phase-Leg at High Temperature ............................................ 366
Dong Jiang, Fred Wang

Rapid Prototyping CHIL Methodology for Advanced Converter Studies ........................................... 370
C.S. Edrington, Y. Liu, J. Leonard, S. Henry, S. Balathandayuthapani

Generation and Propulsion
Chair: Mohamed Belkhayat, Northrop Grumman

New Challenges Emerged from the Development of More Efficient Electric Energy Generation Units .......... 374
J.M. Prousalidis, G.J. Tsekouras, F. Kanellos

Dual Voltage DC Generator for Compact Light-Weight Ship Electrical Systems ................................ 382
Rui Zhou, Ravishekhar Raju, Luis Garces

Design, Implementation and Testing of a Ship-Board Medium-Voltage DC Generation System Based on a Ultra-High Speed 12-Phase Alternator ................................................................. 388
G. Sulligoi, A. Tessarolo, V. Benucci, A. Millerani Trapani, M. Baret, F. Luise

Megawatt-Scale Hardware-in-the-Loop Simulation of Power Generation with a Hybrid Electric Drive System ........ *
Michael Sloderbeck, Tim Chiocchio, Mischa Steurer

Energy Storage and Management
Chair: Volker Staudt, Ruhr-Universität Bochum, Germany

Simulation of an Energy Storage System to Compensate Pulsed Loads on Shipboard Electric Power System .... 396
Franck Scuiller

An Approach to Optimally Allocate Energy Storage in Naval Electric Ships ........................................ 402
Ricky R. Chan, Scott D. Sudhoff, Edwin L. Zivi

Energy Considerations for a Long Range Diesel Electric Submarine ................................................... 406
David Williams, Anders Folbert
Power and Energy Management in Integrated Power System
Quyning Shen, Bhuvaneswari Ramachandran, Sanjeev K. Srivastava, Michael Andrus, David A. Cartes

Advanced AC to AC Power Conversion Techniques for Naval Ship Propulsion Drives
Stephen Kuznetsov

Electric Ship Standards
Chair: Nari Hingorani, Consultant

New IEEE Standards for Ships
Yuri Khersonsky

IEEE-45 Dot Standard Development for Shipboard Electrical Systems – A Bold Step Forward for the Industry
Moni Islam, Dwight Alexander

Voltage Deviation Factor Analysis and Meaning for Warship Electric Power System
Franck Scuiller, Bernard Keruel, Marc Richard

Requirements for Deterministic Control Systems
Michael Roa, David Cartes, Mark Nelson, Wayne Cantrell

Power Quality
Chair: Yong-June Shin, University of South Carolina

Adaptive Limited Lookaheads Controller for Minimizing Power Losses in Flexible Active Compensators
Ranjit Amgai, Jian Shi, Sherif Abdelwahed, Ahmad Albanna, Herbert L. Ginn

Design and Control of Series DC Active Filter (SDAF) for Shipboard Medium-Voltage DC Power System
Hesam Mirzaee, Babak Parkhideh, Subhashish Bhattacharya

Study on Converter Topologies for Capacitive Pulse Forming Network and Energy Storage Units in Electric Ship
S. Balathandayuthapani, C.S. Edrington, S. Henry

Real-Time Wavelet Transform in an Electric Ship Simulation
Rui Guo, M. Sloderbeck, L. DeBrunner, M. Steurer

Scenario-Based Stability-Assessment of Converter-Fed DC-Ship Grids Loaded with Pulsed Power
Roman Bartelt, Martin Oettmeier, Carsten Heising, Volker Staudt, Andreas Steimel

Power Conversion II
Chair: Chris Edrington, Florida State University

Control/Protection Architecture for Power Electronic Converters
Narain Hingorani, Herbert Ginn III, Joseph Sullivan

Pole-Restraining Controlled Active Infeed Converter with Integrated Power-Quality Improvement for AC-Ship Grids
Volker Staudt, Carsten Heising, Roman Bartelt, Martin Oettmeier, Andreas Steimel
High Density Modular Multilevel Cascade Converter for Medium-Voltage Motor Drive ........................................ 482
   Dong Jiang, Jing Xue, Fred Wang

Dynamic Modeling of Short-Circuit Behavior of a Six-Pulse Rectifier ................................................................. 486
   Pandarinath Murali, Surya Santoso

An On-Line Fault Diagnosis Method for Power Electronic Drives ........................................................................... 492
   Jason M. Anderson, Robert W. Cox, Jukkrit Noppakunkajorn
