2011 IEEE/PES Power Systems Conference and Exposition

(PSCE 2011)

Phoenix, Arizona, USA
20 – 23 March 2011
**TABLE OF CONTENTS**

### ADVANCED CONCEPTS FOR STABILITY CONTROL

**Decentralized Synergetic Control of Multimachine Systems** ................................................................. 1  
Taoridi Adenoye, Ali Feliachi

**Mechanism of Impact of Governor Control on Power System Dynamics and Introduction of Boundary Frequency** ................................................................. 9  
Xiangyu Tao, Guanhong Wang, Wenfeng Li, Zenghuang Liu, Chu Liu

**A Novel Approach to Dynamic Stability Enhancement Using PID Damped Fuzzy Susceptance Controlled SVC** ................................................................. 15  
Durgam Harikrishna, R.S. Dhekekar, Nandiraju Venkata Srikanth

**PMU Based Transient Stabilization Using FACTS** ........................................................................... 21  
Milos Cvetkovic, Marija Illic

**Application of STATCOM for Power Quality Improvement** ................................................................. 27  
Sercan Teleke, Atousa Yazdani, Taleb Moazzeni, Bhavya Gudimela, Johan Enslin

### COMMUNICATIONS FOR THE SMART GRID – THEORY

**A Channel Model for Power Line Communication in the Smart Grid** .................................................. 33  
Mehdi Korki, Nasser Hosseinzaadeh, Taleb Moazzeni, Hai Le Vu, Chuan Heng Fo

**Practical Architecture Considerations for Smart Grid WAN Network** ............................................. 40  
Yenu Gobena, Arvind Durai, Matt Birkner, Venkat PothamsenTy, Vikram Varakantam

### DYNAMIC REACTIVE COMPENSATION

**Dynamic Reactive Compensation: Reactive Power Fundamentals** ................................................... 46  
Ani Gole

**Applications of FACTS** .................................................................................................................. 49  
Brian Johnson

**Concepts of FACTS Controllers** ....................................................................................................... 51  
Rajiv Varma

**Recent and Future Dynamic Reactive Devices in New England** ....................................................... 57  
Michael Henderson, D. Bertagnolli, D. Ramey

### EMERGING TECHNOLOGIES

**Smart Meters for Power Grid - Challenges, Issues, Advantages and Status** .................................................. 61  
Soma Shekara Sreenadh Reddy Depuru, Lingfeng Wang, Vijay Devabhaktuni, Nikhil Gudi

**Identification of Power System Topology from Synchrophasor Data** ..................................................... 68  
Katherine Rogers, Rebecca Spadoni, Thomas Overbye

**A Framework for Assessing the Impact of Plug-in Electric Vehicle to Distribution Systems** .................. 76  
Le Xu, Mike Marshall, Luther Dow

**A Dynamic Model of Plug-in Electric Vehicle Markets and Charging Infrastructure for The Evaluation of Effects of Policy Initiatives** .................................................................................. 82  
Daichi Yamashita, Takahide Niinuma, Hiroshi Takamori, Ryuichi Yokoyama

**Steady State Analysis of Three Phase Unbalanced Distribution Systems with Interconnection of Photovoltaic Cells** ................................................................................. 90  
Vaidyanath Ramachandran, Sarika Khushalani Solanki, Jignesh Solanki

**Authentication and Authorization for Smart Grid Application Interfaces** ............................................ 97  
Sitarasan Lakshminarayanan

**VSC-HVDC System Protection: A Review of Current Methods** ......................................................... 102  
Jared Candelaria, Jaedo Park
GERMINATION AND TRANSMISSION PLANNING

Optimization of On-site Renewable Energy Generation for Industrial Sites ................................................................. 109
  Suriya Ruangpattana, Diego Klabjan, Jorge Arinez, Stephan Biller

Value Propositions for Utility-Scale Energy Storage ...................................................................................................... 117
  Devan Manz, Jeff Keller, Nicholas Miller

Evaluating the Impacts of Generation Capacity Cycles in New Zealand ................................................................. 127
  Thahirah Syed Jalal, Pat Bodger

Existing Transmission Charging Practices in India: Discouraging for Power Market .................................................. 133
  Niranjan Kumar, Devadatta Das, N.P. Padhy

Market-Based Transmission Expansion Planning .......................................................................................................... 140
  Yang Gu, James McCalley

Improving Hydrogeneration Representation in a Production Cost Model Used for Long-Term Transmission Studies in the Western Interconnection ................................................................. 149
  Christie Dennis, Robert Walish, Heidi Pacini, Tom Chisholm, Tom Acker

Marginal Unit Generation Sensitivity and its Applications in Transmission Congestion Prediction and LMP Calculation ............................................................................................................................... 157
  Rui Bo, Fangxing Li

HALF A CENTURY OF COMPUTER METHODS IN POWER SYSTEMS - A TRIBUTE TO THE MEMORY OF GLENN STAGG & JORGE DOPAZO

Half a Century of Computer Methods in Power System Analysis, Planning and Operations - Part I:
  Glenn W. Stagg - His Life and His Achievements ........................................................................................................... 166
    Anthony Gabrielle, Arun Phadke

Half a Century of Computer Methods in Power System Analysis, Planning and Operations - Part II:
  Glenn W. Stagg and His Contributions to Advancing the Technology ............................................................................... 170
    Savu Savulescu, Sudhir Virmani, Jorge F. Dopazo ........................................................................................................... 178
    Mayer Sasson, Hyde Merrill

HARMONIC ANALYSIS OF HYSTERESIS CONTROLERS, DIGITAL SIGNAL CONTROLERS, ARMATURE LAB MODELING, SHORT CIRCUIT SIGNATURES AND DC GRID CONNECTIONS OF WIND MACHINES

A Digital Signal Controller for High Frequency-Based Grid-Tie Inverter Connected to Wind Emulator System: Design and Implementation .................................................................................................................. 186
  Mahmoud Amin, Armando Herrera, Jose Seijo, Osama Mohammed

Short Circuit Signatures from Different Wind Turbine Generator Types ........................................................................... 194
  Jorge Martinez, Philip C. Kjær, Pedro Rodriguez, Remus Teodorescu

Grid Connected DC Distribution System for Efficient Integration of Sustainable Energy Sources .................................... 201
  Mohamed Elshaer, Ahmed Mohamed, Osama Mohammed

INSULATED CONDUCTORS POSTER SESSION

Influence of Phase Order on Losses and Outer Magnetic Field of Grouped Underground Cables ........................................... 210
  Balazs Novak, Laszlo Koller

INTELLIGENT GRID COORDINATING COMMITTEE POSTER SESSION

Architecture of a Smart Microgrid Distributed Operating System .......................................................................................... 216
  Bruce McMillin, Ravi Akella, Derek Ditch, Gerald Heydt, Z. Zhang, Mo-Yuen Chow

Example Results of an Intelligent Power Controller for Small Grid Systems .................................................................. N/A

A Novel Dynamic Power Limiter for a Smart Micro Grid .................................................................................................... 221
  Jalpa Shah, Rashmi Prasad, Shahari Nath, Ned Mohan

Advanced Volt/VAr Control Element of Southern California Edison??s Irvine Smart Grid Demonstration ................................................. 226
  Russell Neal, Richard Bravo

</table>
Capacity Standardization of Shunt Power Reactors in Mexico ........................................... 354
Jorge Quintana, Federico Ibarra

Sub-Cycle Ground Fault Location ?? Formulation and Preliminary Results ......................... 361
Charles Kim, Tom Bialek

Towards a Holistic Perspective of the Existing Overhead Line Power Network to Facilitate its Flexible Expansion ................................................................. 369
Konstantinos Kopsidas, Ian Cotton, Simon Rowland

Neutral Grounding in Wind Farm Medium Voltage Collector Grids ........................................ 376
Christian Feltes, Robert Van De Sandt, Friedrich Koch, Fekadu Shewarega, Istvan Erdlich

Prediction of Voltage Sag in The Transmission System of Vietnam, A Case Study .................. 383
Bach Quoc-Khanh, Nguyen Hong-Phuc

A Methodology to Coordinate Solid-State Fault Current Limiters with Conventional Protective Devices ................................................................. 390
Andres Escobar, Mahmood Saadeh, Juan Balda, Jack Bourne, Alan Mantoosh, Yongfeng Feng

Impact of Green Power Generation on Distribution Systems in a Smart Grid ......................... 396
Charles Mozina

WIND POWER – EDPGC

A FPGA Simulation and Implementation of a Wind Energy Conversion System ..................... 404
Kadir Atilla Toker, Numan Sabit Cetin

Advanced Control Strategies for Wind Energy Systems: An Overview ................................ 411
Hoa Nguyen, Desineni Naidu

Parameter Estimation of Doubly Fed Induction Generator Driven by Wind Turbine .................. 419
Quan Chen, Yaoyu Li, John Seem

A Study on the Optimal Participation of Wind Generator in Electricity Market ...................... 427
Govinda Shrestha, Songbo Qiao

NERC CIP VERSION 4: BACKGROUND AND IMPACT

NERC CIP Version 4 Background .................................................................................. 433
John Lim

A Small Utility's Perspective on CIP "Version 4" ................................................................. 434
Richard Burt

CIP Version 4 Background and Impact-Large Utility Perspective ....................................... 435
Charles Abell, P.E.

COMMUNICATIONS FOR THE SMART GRID – APPLICATIONS

Resilient Wireless Data Communication for Critical Infrastructure ..................................... 436
Matthias Van Doorn

Applications of IEC 61850 in Distribution Automation ...................................................... 441
Salman Mohagheghi, Jean-Charles Tournier, Jacob Dall, James Stoupis, Laurent Guise, Claus Andersen, Thierry Coste

Cyber Intrusion of Wind Farm SCADA System and Its Impact Analysis ............................... 450
Samaksh Kumar, Venkatesh Mahadevan

DISTRIBUTION SYSTEM MODELING

Analysis of Distribution Level Residential Demand Response ............................................. 456
Kevin Schneider, Jason Fuller, D. Chassin

Effect of Line Modeling Methods on Neutral-to-Earth Voltage Analysis of Multi-Grounded Distribution Feeders ................................................................. 462
Randy Horton, Wes Sunderman, Bob Arritt, Roger Dugan

The Application of Carson??s Equation to the Steady-State Analysis of Distribution Feeders ................................................................. 468
William Kersting, Bob Green

Smart Inverter Volt-Var Control Functions for High Penetration of PV on Distribution Systems ................................................................. 474
Jeff Smith, Wes Sunderman, Roger Dugan, Brian Seal
A Test Feeder for DG Protection Analysis .................................................................................................................. 480
Tom McDermott

ENERGY STORAGE APPLICATIONS FOR RENEWABLE INTEGRATION

An Evaluation of the NaS Battery Storage Potential for Providing Regulation Service in California ....................... 487
Ning Lu, Mark R. Weimar, Yuri V. Makarov, Clyde Loutan

Energy Storage for Power Systems Applications: A Regional Assessment for the Northwest Power Pool (NWPP) .................................................................................................................................................. 496
Michael Kintner-Meyer, Chunlian Jin, Francis Tuffner, Vilayunur Viswanathan, Patrick Balducci, Marcelo Elizondo, Tony Nguyen

A123 Systems' Advanced Battery Energy Storage for Renewable Integration ............................................................ 503
Charles Vartanian, Neil Bentley

Application of Virtual Energy Storage to Partially Mitigate Unscheduled Interchange Caused by Wind Power ............................................................................................................................................... 509
Pengwei Du, Yuri V. Makarov, Ning Zhou, Pavel Etingov

How is Advanced Storage Being Used to Integrate Large Percentages of Renewables Into the Grid .................... 514
Richard Fioravanti

EXPERIENCE WITH IMPLEMENTING DEMAND-SIDE MANAGEMENT

Experience with Implementing Demand Response in ISO Markets .............................................................................. 516
Khai Le

ISO New England Experience with Implementing Demand Response ........................................................................ 517
Ronald Coutu, Eugene Litvinov

Demand Response in the NYISO Markets ..................................................................................................................... 518
Rana Mukerji

Can Demand Response Receive Comparable Treatment to Traditional Generation? ............................................ 520
Todd Hillman

FACTS/POWER ELECTRONICS INSTALLATIONS

Advanced Control Methods and Strategies for the Oncor Electric Delivery Renner SVC ........................................ 521
Marta Marmiroli, Yukitoki Tsukamoto

A New 500MW Frequency Converter Station to Exchange Power between Uruguay and Brazil ...................... 530
Christopher Horwill, Norman Macleod, Daniel Castagna, Rafael Bonchang, Mauro Croce, Michel Artenstein

Novel Application of a PV Solar Plant as STATCOM During Night and Day in a Distribution Utility Network .......................................................... 536
Rajiv Varma, Shriram S. Rangarajan, Jurie Asente, Vinay Sharma

Design, Testing and Operation Experiences with SVCs in Ontario Power System .................................................. N/A
Tomasz Kalicki, Behdad Biglar, Chester Li, Donna Jablonsky

INTERACTION BETWEEN ELECTRICAL SMART GRID WITH DISTRIBUTION GENERATION AND THE EXISTING INFRASTRUCTURE

Computer Power Consumption and Management ....................................................................................................... 544
Emily Reinhard, Ben Champion, Noel Schulz, Rebecca Gould, Nicholas Brown, Ernie Perez

Sustainability and Resilience of Electric Energy Supply in Urban Environment ......................................................... 552
George Karady, Xianjun Zhang

Valuing the Resilience of the Electrical Power Infrastructure ...................................................................................... 555
Charles Perrings, Elisabeth Larson, Paul Maliszewski

An Infrastructure Ecology Approach for Urban Infrastructure Sustainability and Resiliency ................................. 558
Arka Pandit, Hyunju Jeong, John C. Crittenden, Ming Xu

Simulation of Urban Water Distribution System for Distributed Power Generation ............................................... 560
Preethi Rao, Ke Li

Distributed Renewable PV Generation in Urban Distribution Networks ................................................................. 563
Miroslav Begovic, Insu Kim
OPERATIONAL IMPACTS OF WIND AND STORAGE

Support Vector Machine-Based Short-Term Wind Power Forecasting
Jianwu Zeng, Wei Qiao ................................................................. 566

Effect of Generator Notification Time on the Cost of Wind Integration
Jeff Pavlovic ........................................................................ 574

Associating Weather Conditions with Ramp Events in Wind Power Generation
Chandrika Kamath ................................................................. 582

Optimal Power Flow Analysis of Energy Storage for Congestion Relief, Emissions Reduction, and Cost Savings
Zhouxing Hu, Ward Jewell ......................................................... 590

Optimal Storage Scheduling for Minimizing Schedule Deviations Considering Variability of Generated Wind Power
Sudipta Dutta, Thomas Overbye ................................................ 598

POWER SYSTEM DYNAMIC PERFORMANCE COMMITTEE MEETING AND POWER SYSTEM MODAL ANALYSIS AND CONTROL PAPER SESSION

Wide-Area PMU Data Monitoring Using Spatio-Temporal Statistical Models
Arturo Roman Messina, Pedro Esquivel, F. Lezama ................................................................. 605

A Frequency-Domain Parallel Eigenvalue Search Algorithm of Power Systems Based on Multi-Processing
Song Han, Zheng Xu, Zheng Xiang, Jing Zhang ................................................................. 612

POWER SYSTEM RELAYING COMMITTEE PAPER SESSION

A Directional Current Differential Protection Against CT Saturation in Two Sides Fed Networks
Jing Ma, Tong Wang, James Thorp ........................................... 619

Interconnection Control of Distributed Generation With Time-Synchronized Phasors
Michael Mills-Price, Mesa Scharf, Steve Hummel, Michael Ropp, Dij Joshi, Greg Zweigle, Krishnanjan Gubba
Ravikumar, Roy Moxley, Bill Flerchinger ........................................... 624

Testing the "Smarts" in the Smart T & D Grid
Peter McLaren, Om Nanaak, James Langston, Mischa Steurer, Rick Meeker, Sloderbeck Xi Lin, Ming Yu Michael,
Paul Forsyth .................................................................................. 632

TRANSFORMERS

Neural Networks on Transformer Fault Detection: Evaluating the Relevance of the Input Space Parameters
Ishmael Msiza, M. Szewczyk, Adrian Halinka, Jan-Harm Pretorius, P. Sowa, Tshilidzi Marwala ........................................... 640

WIDE AREA MEASUREMENTS

An Improved Model in Optimal PMU Placement Considering Sensitivity Analysis
Etham Makram, Zheng Zhao, Adly Girgis ........................................... 646

Identification of Power Quality Events Using Inverse Properties of S Transform
Ashwani Kumar, P. Srikanth, K.A. Naik ........................................... 652

PMU Placement Considerations - A Roadmap for Optimal PMU Placement
Vahid Madani, Mamu Parashar, Jay Girj, Surya Durbha, Dewey Day, Gerald Sheble Mark Adamiak, Farnoosh Rahmatian ........................................... 659

WIND GENERATION DYNAMICS AND CONTROL

Description and Technical Specifications for Generic WTG Models ?? A Status Report
Abraham Ellis, Yuriy Kazachkov, Eduard Muljadi, Pouyan Pourbeik, Juan Sanchez-Gasca ........................................... 666

Comparative Stability Analysis of DFIG-Based Wind Farms and Conventional Synchronous Generators
Juan Carlos Munoz, Claudio Canizares ........................................... 674
Improved Inertia and Frequency Support from Grid-Connected DFIG Wind Farms

Islam Azmy, Amr El-Zawawi, Mahmoud El-Gammal

Supplementary Control for Damping Power Oscillations Due to Increased Penetration of Doubly Fed Induction Generators in Large Power Systems

Durga Gautam, Vijay Vittal, Raja Ayyanar, Terry Harbour

A Study on the Impact of Control on PV Curve Associated with Doubly Fed Induction Generators in Large Power Systems

Chensui Lin, John Jiang, Choon Tang, Thorarinn Arnolfsson

Comparison of Two Voltage Control Strategies for a Wind Power Plant

Jorge Martínez, Philip C. Kjær, Pedro Rodríguez, Remus Teodorescu

VAr Reserve Concept Applied to a Wind Power Plant

Jorge Martínez, Philip C. Kjær, Pedro Rodríguez, Remus Teodorescu

DYNAMIC MODELING, VALIDATION, AND SIMULATION

New Mixed Integral Algorithm for Unified Dynamic Power System Simulations of Transient, Medium- Term and Long-Term Stabilities

Song Xinli, Tang Yong, Liu Wenzhuo, Zhong Wazhi, Liu Tao, Wu Guoyang

Modeling of Protective Relay Systems for Power System Dynamic Simulations

Wu Guoyang, Song Xinli, Tang Yong, Zhong Wazhi, Liu Tao

An Adaptive Power System Equivalent for Real-time Estimation of Stability Margin using Phase-Plane Trajectories

Kai Sun, Stephen T. Lee, Pei Zhang

Power Plant Model Validation for Achieving Reliability Standard Requirements Based on Recorded On-Line Disturbance Data

Pouyan Pourbeik, Christopher Pink, Ron Bisbee

Application of Kalman Filter to Improve Model Integrity for Securing Electricity Delivery

Pengwei Du, Zhenyu Huang, Ruisheng Diao, Barry Lee, Kevin K. Anderson

Multiple-Fault Circuit Simulation in Unified Dynamic Electric Power System Simulation Software

Tang Yong, Liu Wenzhuo, Wu Guo-Yang, Song Xin-li

ELECTRICITY GENERATION FROM RENEWABLE RESOURCES

ANN-Based Voltage Dip Mitigation in Power Networks with Distributed Generation

Oluwafemi Ipinnimo, Sunetra Chowdhury, Shyama Pada Chowdhury

A Methodology for Biomass Cogeneration Plants Overall Energy Efficiency Calculation and Measurement - a Basis for Generators Real Time Efficiency Data Disclosure

Andre Paro, Eliane Fadigas

Power Control of Single-Phase Voltage Source Inverter for Grid-Connected Photovoltaic Systems

Supansa Samerchur, Suttichai Premrudeepreechacharn, Yuttana Kumsuwun, Kohji Higuchi

A Reliable Low Cost Power Electronics Interface for Photovoltaic Energy Systems Using a Single DSP Controller

Wajiha Shireen, Adarsh Nagarajan, Sonal Patel

Feed-Forward Transient Current Control for Low-Voltage Ride-Through Enhancement of DFIG Wind Turbines

Ahmed Kassem

Fault Ride Through Performance of Wind Energy Converters with FACTS Capabilities in Response to Up-to-Date German Grid Connection Requirements

Markus Fischer
