International Topical Meeting on Probabilistic Safety Assessment and Analysis 2011

(PSA 2011)

Wilmington, North Carolina, USA
13 – 17 March 2011

Volume 1 of 3

ISBN: 978-1-61782-8478
# TABLE OF CONTENTS

## VOLUME 1

### Abstracts

N/A

### ADVANCED PSA METHODS

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Performance And Importance Analysis Of Power Systems Based On Bayesian Networks</td>
<td>85</td>
</tr>
<tr>
<td>Fast Calculation Methods of Importance Measures in the Fault Tree Analysis</td>
<td>95</td>
</tr>
<tr>
<td>Utilizing Degradation Monitoring for Operational Risk Assessment</td>
<td>107</td>
</tr>
<tr>
<td>Quantitative Risk Assessment Using Hybrid Causal Logic Model</td>
<td>121</td>
</tr>
</tbody>
</table>

### AGING IN PSA

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Development of Core Damage Frequency Evaluation Code for NPP Due to Components Aging Degradation</td>
<td>134</td>
</tr>
<tr>
<td>Inclusion of Passive Failures in a PRA System for Long Term Operation Considerations</td>
<td>146</td>
</tr>
<tr>
<td>Investigation of Ageing Impact on Safety Systems’ Reliability</td>
<td>153</td>
</tr>
<tr>
<td>Multi-State Physics Models of Aging Passive Components in Probabilistic Risk Assessment</td>
<td>161</td>
</tr>
<tr>
<td>Evaluation Of Pipe Rupture Frequency For NPP Goesgen Using Markov Models</td>
<td>173</td>
</tr>
</tbody>
</table>

### COMMON CAUSE

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>A Stochastic Transition Model for Evaluating the Effects of Common Cause Failure Events on System Reliability</td>
<td>185</td>
</tr>
<tr>
<td>Finding A Minimally Informative Dirichlet Prior Using Least Squares</td>
<td>200</td>
</tr>
<tr>
<td>Adjustment of a Dirichlet Prior Distribution for Multiple Greek Letter Parameters Estimation in Bayesian Approach at EDF</td>
<td>207</td>
</tr>
<tr>
<td>Development of an Integrated Program and Database System for the Estimation of CCF Probabilities</td>
<td>221</td>
</tr>
<tr>
<td>Investigations of Inter-System Common Cause Failures: An Update</td>
<td>230</td>
</tr>
<tr>
<td>Common Cause Failure Data Exchange (ICDE) Project</td>
<td>244</td>
</tr>
</tbody>
</table>

### COMPUTER METHODS

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>A Dynamic Flowgraph Methodology Approach Based on Binary Decision Diagrams</td>
<td>267</td>
</tr>
<tr>
<td>Use of Advanced Cutset Upper Bound Estimator (ACUBE) Software to Avoid Limitations Due to Use of Non-Rare Events</td>
<td>279</td>
</tr>
<tr>
<td>Data for Equipment and System Reliability (DESREL)</td>
<td>290</td>
</tr>
<tr>
<td>Quantifying Truncation Errors and Approximation Errors in PSA Quantification</td>
<td>302</td>
</tr>
</tbody>
</table>

### APPLICATIONS

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Applications Guidance Document for the MAAP4 Accident Analysis Code</td>
<td>314</td>
</tr>
</tbody>
</table>
Conversion of Fault Tree and Event Tree Models for PSA .......................................................... 331
Johan Sörman, Ola Bäckström

CONFIGURATION RISK MANAGEMENT

Development of Risk Communication Sheet for Daily Operational Focus Meetings at STP ......................................................... 337
George C. R. Granton, Fatma Yilmaz, Ernie Kee

Nuclear Power Plant Configuration Risk Management: Recent EPRI CRMF Research .......................................................... 346
Thomas A. Morgan, Diane M. Jones, Doug Hance

Naoki Chigusa, Yoshiyuki Narumiya, Takahiro Kuramato

Licensee Experience With the ATWS Vulnerability ........................................................................................................... 369
Robert W. Fosdick, Ross C. Anderson

Lessons Learned in (A)(4) Compliance ............................................................................................................................. 373
Ross C. Anderson, Robert W. Fosdick, Gerry W. Kindred

Use of U.S. On-Line Maintenance Experience with Non-U.S. Utilities ............................................................................. 382
Ken Hoffman, Stephen Hess

Optimizing Planned Maintenance and On-Line Risk ........................................................................................................... 395

On Crediting a 10CFR50.54(X) Proceduralized Operator Action in SONGS PRA Used for Maintenance Rule (A)(4) Risk Assessments ........................................................................................................... 401
Parviz Moieni, Michelle P. Carr, Dean R. Goodwin

PSA DATA ANALYSIS

Experiences from Implementation of Updated Reliability Data for Piping Components Using the R-Book .................................. 407
Anders Olsson, Vidar Hedjärn Svaling, Bengt Lydell

Component Failure Rate Refinement Using RADS/EPIX/IEDB for Prairie Island PRA ............................................................... 420
S. Eide, A. Peterman, D. Malek, J. Ritter

PSA Generic Component Failure Rate Database Update Methodology .................................................................................. 429
Aaron M. Lee

Use of RADS/IEDB To Refine Initiating Event Prior Distributions for the Calvert Cliffs PRA ....................................................... 441
R. Marlow, S. Eide, J. Stone, J. Landale

DIGITAL I&C IN PSA

Modeling the Impact of Digital System Failure Into Probabilistic Safety Assessment .......................................................... 454
Gopika Vinod, Santosh, V. V. S. Sanyasi Rao, K. K. Vaze, A. K. Ghosh

Critical Digital Review Procedure Proposal and Its Preliminary Experience ........................................................................ 463
Hsu-Wen Huang, Tsu-Mu Kao, Ming-Hsiu Chen

Estimating Failure Probabilities in High Reliability Digital Systems ......................................................................................... 472
Dave Blanchard, Thuy Nguyen, Ray Yorosk

Sergio B. Guarro, Michael You, Scott Dixon

David S. Teolis, Stacy A. Zarzewczynski, Heather L. Detar

DYNAMIC PSA

Reliability of the EPR Fuel Pool Cooling System Using a Dynamic Approach ........................................................................ 509
Marie Sørdelet, Mohamed Hbi

Data Processing Methodologies Applied to Dynamic PRA: an Overview ................................................................................ 523
Diego Mandelli, Alper Yilmaz, Tunc Aldemir

A Monte Carlo Algorithm for Dynamic PSA Based on the Concept of Stimulus ......................................................................... 535
A. Jouardun, P. E. Laheau

Bayesian Network Representing System Dynamics in Risk Analysis of Nuclear Systems .......................................................... 547
Mohamed Pourgol-Mohammad, Kamrun Sepanlou, Kaveh Karimi

Development and Application of a Genetic Algorithm Based Dynamic PRA Methodology to Plant Vulnerability Search ................................ ................................ .................................................. 559
Yury Vorobyev, Pavel Kudinov, A. Jourdain, P. E. Labeau

Hybrid Fault Tree Markov Chain (HFT-MC) Probabilistic Risk Assessment Methodology with Application ................................ 574
Mohamed Pourgol-Mohammad, Kamrun Sepanlou, Kaveh Karimi

Research Activities of Germany’s GRS in the Field of Dynamic PSA ................................................................................... 584
Martina Kloos

Online State Estimation in Dynamic Event Trees for a Level Controller Dataset ..............................................................598

Dannysa Zamaaliev, Aliper Yilmaz, Tunc Aldemir

Discrete Dynamic Event Tree Analysis of MLOCA Using Ads-Trace .............................................................................610

Durgaa R. Karanika, Vinh N. Dang, Tae-Wan Kim

Dynamic Event Tree Analysis of Competing Creep Failure Mechanisms in a Station Blackout Accident .................................623

Kyle Metzroth, Richard S. Denning, Tunc Aldemir

Extension of CAFTA with Dymonda Module To Analyze Dynamic Accident Scenarios .......................................................635

Scott Dixon, Michael Yau, Sergio Guarro

Heartbeat Model for Component Failure Time in Simulation of Plant Behavior .................................................................646

OTHER EXTERNAL EVENTS

Treatment of the Loss of Heat Sink initiating events in the IRSN PSA .............................................................................655

F. Corenwinder

An Assessment of Large Dam Failure Frequencies Based on US Historical Data .................................................................666

F. Ferrante, S. Sancaktar, J. Mitman, J. Wood

Application of FRANX Software to External Events ........................................................................................................679

Jeff Riley

PANEL: FIRE PSA IMPROVEMENTS

Roadmap for Attaining Realism in Fire PRAs .......................................................................................................................689

Brent Doug True, Ken Canavan, Rick Wachowick, Jim Chapman

FIRE PSA METHODS

Estimating Fire-Induced DC Circuit Hot Short Duration ........................................................................................................698

Dennis Henneke, James Young, Jonathan Li

Lessons Learned From Electrical Circuit Analysis in Support of a Fire Probabilistic Risk Assessment ................................711

Cyrus N. Vadoli

Concurrence Probability and Duration for Fire-Induced Cable “Hot Shorts:” Alternating (AC) Vs. Direct Current (DC) ...............721

Raimond H. V. Gallucci

Fire Induced Multiple Spurious Operation Review Methodology Developed for Application to Fire PRAs ..............................732

Gregory P. Rozga, Paul D. Knowaple, John R. Olvera

A Comparison of the MQH Method and CFAST for Scoping Fire Modeling ........................................................................743

Tom Elicson

Development and Application of a Large Scale Fire Dynamics Simulator Model for BWR Reactor Building Fire Scenarios ....755

Jeffrey Miller

Post-Processing Franc Results to Determine Fire Risk Importance Measures and Uncertainty .............................................766

David Moskiewicz

Progress Energy Fire PRA: Putting Our Tools to Work Use of Linked Databases in Development of the Progress Energy HNP Fire PRA ...........................................................................................................774

Ricardo Davis-Zapata

Cooper Nuclear Station Fire Risk Evaluations – Insights and Challenges ..............................................................................785

Ole Olson, Stephen P. Meyer, Jim Chapman

Summary of Fire PRA Development Activities at Kewaunee Power Station .........................................................................791

John Spaargaren, Francisco Joglar

How Immature and Overly Conservative is Fire PRA? - A Comparison of Early Vs. Contemporary Fire PRAS and Methods ............807

Raymond H. V. Gallucci.

Fire Modeling in PSA with EdF/EPRI Magic Code ................................................................................................................825

Isabel Viniegra, Mariano J. Fiol, Miguel A. Celaya

VOLUME 2

Mapping of Fire Events to Multiple Internal Events PRA Initiating Events ..............................................................................831

Richard C. Anaba

Applying Hierarchical Bayes Methods to Fire Ignition Frequency Estimation ........................................................................843

Patrick Baranowsky, Krisnanadito Haridipko, Corvin Atwood

Use of Computational Fluid Dynamic Fire Models to Evaluate Operator Habitability for Manual Actions in Fire Compartments ..................................................................................................................855

Robert L. Ladd

NON-REACTOR PSA

Challenges Developing a FECA For a Supporting System During Conceptual Design .................................................. 1458
Stanley H. Levinson, Michael W. Kelly, Salvatore J. Digiovanni, Timothy W. Dodson

Risk -Informing Safety Reviews for Non-Reactor Nuclear Facilities ........................................................................... 1466
V. Mubayi, A. Azarm, M. Yue, W. Mukaddam, G. Good, F. Gonzalez, R. A. Bari

Nuclear PRA and Defense-in-Depth Insights into the Deepwater Horizon Accident ..................................................... 1473
Thomas A. Morgan, Wayne Crawford, Frank Rahn

Development of a Generation Risk Assessment Model for a Fossil-Fueled Power Station ......................................... 1482
Dennis Henneke, Matt Warner, Paul Nichols

Study of Risk Assessment Programs at Federal Agencies and Commercial Industry Related to the Conduct or Regulation of High Hazard Operations ................................................................. 1489
Robert A. Bari, Samuel Rosenbloom, James O’Brien

NEXT GENERATION REACTOR PSA

Modifying the Risk-Informed Regulatory Guidance for New Reactors ....................................................................... 1501
Cj Fong, Donald A. Dube

IRSN Review of EPR Level 1 PSA ................................................................................................................................. 1513
G. Georgescu, F. Corenwinder

PSA Insights of the New Nuclear Power Plants ............................................................................................................... 1524
Andrija Volkanovski

Investigation of Risk-Informed Methodologies to Improve Sodium-Cooled Fast Reactor Economies With Safety, and Non-Proliferation Constraints .............................................................. 1534
George Apostolakis, Michael Driscoll, Michael Golay, Andrew Kadak, Neil Todreas, Tunc Ailem, Richard Denning, Michael Lineberry

The Evolution from a Design Certification Pra to an As-Built As-Operated PRA ................................................................ 1549
Yunlong Li, Dennis Henneke, Glen Seeman, Gary Miller

PRA Analysis for a New Reactor Design: The B&W MPOWER™ Small Modular Reactor .............................................. 1563
Thomas A. Morgan, Kenneth W. Baity

Risk-Informed Design and Safety Review of HTR-PM ..................................................................................................... 1571
Jiejuan Tong, Tao Liu, Jun Zhao

Containment Source Terms in SFR Accidents .................................................................................................................... 1580
M. Umhel, A. Brunetti, R. Denning

Containment Processes in Sodium-Cooled Fast Reactor Accidents ........................................................................... 1592
A. Brunetti, W. Wutzler, R. Denning

Risk-Informed Approach for Design of Korean Demonstration Fusion Reactors ................................................................. 1603
Gyuanyoung Heo, Myoung-Suk Kang, Young-Seok Lee, Hyuck Jong Kim

Partitioning of LOCA Initiating Event Frequencies to Support PRA Modeling of Debris-Induced Failure of Long Term Core Cooling Via Recirculation Sumps........................................................................... 1615
David S. Teolis, Heather L. Detar, Robert J. Lutz, Rachel A. Solano

PASSIVE RELIABILITY

M. Marquiés, C. Bassi, F. Bentivoglio

Options for Defining Large Release Frequency for Applications to the Level-2 PRA and Licensing of SMRS ......................... 1639
Mohammad Modarres, Mark Leonardi, Kent Welser, Jason Pottorf

Achievement of the Level 1 PSA in Support to the CEA 2400 Mwth Gas-Cooled Fast Reactor .............................................. 1643
M. Balmain, C. Bassi, P. Azria

U.S. Regulatory Lessons Learned from New Nuclear Power Plant Applications on Evaluating Degraded Voltage Protection .................................................................................................................... 1659
Robert G. Fitzpatrick, Ronaldo V. Jenkins, Malcolm D. Patterson, Nicholas T. Saults
VOLUME 3

Reliability Prediction of Passive Systems Based on Multiple Failure Measures Modeling ......................................................... 1664
Luciano Burgazzi

Critical Issues Pertaining to the Evaluation of Passive System Reliability .................................................................................. 1676
A. K. Nayak, Vikas Jain, D. Saha

Using Importance Sampled RELAP5-3D Simulations to Evaluate Radioactive Material Release Frequencies for the Technology Neutral Framework .................................................................................. 1684
M. Denman, N. Todreas, M. Driscoll

Insights from PSA Applications of the OECD Nuclear Energy Agency (OECD/NEA) OPDE Database .............................................. 1696
Bengt Lydell, Alejandro Huerta, Karen Gott

A Probabilistic Physics of Failure Approach to Prediction of Steam Generator Tube Rupture Frequency .................................................. 1707
Kaushik Chatterjee, Mohammad Mohammad

Passive System Accident Scenario Analysis by Simulation ........................................................................................................... 1718
Francesco Di Maio, Enrico Zio, Tao Liu, Jieqian Tong

PROLIFERATION RISK

The Need for Proliferation Risk Assessment ............................................................................................................................... 1729
William E. Burchill

An Assessment of the Terrorists Attack Risk for a BWR Nuclear Power Plant Using Monte Carlo Simulation ................................. 1737
Min Lee, Yi-Chung Tian

Limiting Future Proliferation and Security Risk ......................................................................................................................... 1750
Robert A. Barl

Security System Designs Via Games of Imperfect Information and Multi-Objective Genetic Algorithms .................................................. 1761
I. Kuzmina, M. El-Shanawany, M. Modro, A. Lyubarskiy

RISK-INFORMED DECISION MAKING

WGRISK Activities: What’s New? .................................................................................................................................................... 1775
Jeanne-Marie Lanore, Martina Röwekamp, Nathan G. Sia, Abdallah Amri

Experiences from the project on Validity of Safety goals ............................................................................................................. 1785
Göran Hullqvist

Using PRA to Improve Safety Through Design and Operational Changes .................................................................................... 1800
Robert Lutz

An Approach for Holistic Consideration of Defence in Depth for Nuclear Installation Using Probabilistic Techniques ......................... 1812
I. Kazmina, M. El-Shanawany, M. Modro, A. Lysbarksky

A Study on Methodology for Identifying Correlations Between LERF and EF ................................................................................ 1825
Kyungmin Kang, Meosung Jun

Risk Informed Safety Margin Characterization: Trial Application to a Loss of Feedwater Event .......................................................... 1834
Richard Sherry, Jeff Gabor

Analysis of BWR CRDH System to Provide Supportable PRA Basis in Support of EPU Evaluation ..................................................... 1846
Benjamin Jessup, Julie Weber

Evolution of Canadian Reliability Requirements in a Risk-Informed Environment ............................................................................. 1855
C. Morin

“How Safe Is Safe Enough?”: A PRA Perspective on GSI-191 ........................................................................................................... 1867
Robert Lutz, Heather Detar, Rachel Solano, David Teolis

MSPI False Indication Probability Simulations ............................................................................................................................ 1877
Dana Kelly, Kurt Vedros, Robert Youngblood

CCI or CCF incident at Forsmark NPP 25 of July 2006 .................................................................................................................... 1889
Göran Hullqvist

RISK-INFORMED TECHNICAL SPECIFICATIONS

Risk-Managed Technical Specifications Application At STP: More Than Three Years Of Experience .............................................. 1900
Fatma Yilmaz, Ernie Kee, Rick Granttom

A Proposed Framework for Integrated Risk-Informed Performance-Based Regulation for Nuclear Power Plants ............................... 1907
James K. Liming, David H. Johnson, C. Richard Grantom

Interpretation and Evaluation of the TS Criteria – Development of a Guidance Document .............................................................. 1918
Ola Bäckström, Anna Häggeström, Anders Olsson

Fleet Wide Pursuit of Risk-Informed Initiative 5B - Surveillance Frequency Control Program (SFCP) at Exelon Nuclear Stations .......................................................................................................................... 1927
Philip Tarpinian, Glenn Stewart, Victoria Warren
RISK MONITORS

PSA and Risk Monitor for the Electrical Grid................................................................................. 1935
Zdenko Kovacevic, Pavol Hlawac

Development of the Risk Monitoring System “COSMOS” and Application for the Risk Evaluation During Online Maintenance .......................................................... 1947
Hiroshi Tanaka, Junji Nyuui, Akira Hashimoto, Takahiro Karamoto

Development of OLM Configuration Risk Management Actions for Potential Use by Japanese Utilities ............................................................................................................. 1957
Hidetaka Imai, Ken-Ichi Bando, Koichi Miyata

Implementation of Risk Monitoring Technology at Russian Federation VVER-1000 Reactors With Risk Watcher .......................................................... 1969
Francisco Osorio, Carlos Lopez, Alfonso Sanchez

SEISMIC PSA

Development of Seismic Risk Evaluation Model for New Nuclear Power Plant ........................................ 1980
Kohei Hisamochi, Daizuke Taniguchi, Shingo Oda

Addressing Accident Sequence Over-Counting in the Kernkraftwerk Mühleberg Seismic PSA .............. 1989
R. F. Kirchner, E. T. Burns, V. M. Andersen, O. Zachuat, Y. Bayraktarli

Use of Seismic PSA for Risk-Informed Decision Making by Utilities and Regulatory Agencies ............. 1997
Robert J. Budnitz, Nilesh C. Chokshi, M. K. Ravindra

Seismic PRA Modeling and Quantification Approaches ................................................................ 2010
Andreas Maisel, Martin W. McCann, David J. Fincicum

A Comprehensive Database Application to Support Seismic PSA Modeling ....................................... 2022
Sillovo T. Sperbeck, Michael Turschmann, Matias Krucci

Methods for Seismic Analysis Using Riskspectrum ........................................................................... 2031
Ola Backstrom, Johan Sorman

Advanced Quantification Methods Applied to Seismic Risk Assessment ............................................. 2042
Ken Canavan, Jeff Riley

Advancing Performance-Based and Risk-Informed Design Methods for the Seismic Design and Regulation of SSCs in NPPs ................................................................. 2050
Robert J. Budnitz

Calculation of Seismic Fragility Parameters for Flatbottom Vertical Liquid Storage Tanks by Numerical Simulation........................................................................................................... 2063
John J. O'Sullivan, Tsiming Tseng

EPRI Pilot Application of the ASME/ANS Seismic PRA Standard ...................................................... 2074
Greg Hardy, Robert Kassawara, Dravaka Bhargava, David Moore

Seismic PSA of Kernkraftwerk Neckarwestheim Unit 2 ...................................................................... 2085
F. Amato, A. Rubertke, J. Ermisse, A. H. Rahbar, M. Ravindra, W. Tong, A. Stromh, J. Rutke, W. Schwarz, D. Rittig

Study on Seismic PSA for A BWR in Shutdown State ........................................................................ 2097
Masahide Nishio, Haruo Fujimoto

Human Reliability Modeling in the Kernkraftwerk Mühleberg Seismic PSA .......................................... 2108
R. F. Kirchner, E. T. Burns, V. M. Andersen, O. Zachuat, Y. Bayraktarli

A Procedure for The Computation of Seismic Fragility Of NPP Buildings with Base Isolation ............ 2119
G. Bianchi, M. Domaneschi, D. C. Mantegazza, F. Perotti, L. Corradi dell'Acqua

Seismic PSA in Germany .................................................................................................................. 2131
Ralf Obenland, Holger Ulbrich, Theodor Bloem, Wolfgang Tietsch

SAFETY CULTURE

Development of Safety Culture Assessment Model Using Safety Culture Maturity Model and 4P-4C MATRIX .................................................................................. 2143
Cheol Sheen, Dae-Wook Chung

Nuclear Power: Too Risky for Risk Management? Facing the Limits of Doublet Risk Modeling ................. 2153
William P. Mullins

Impact of Viable System Model (VSM) Type of Organizational Concept on Safety Regulation of the Nuclear Industry .................................................................................. 2163
Anthony J. Spargin, David Stapple

SHUTDOWN PSA

Application of Low Power and Shutdown PSA Insights to Development and Implementation of Full Scope Severe Accident Management Guidelines Covering All Plant Operating States for VVER And PWR in Europe ........................................................................................................... 2187
Oleg Solonenyav, Robert Lutz, Antoine Rubbers

Quantification of A 3 Loops Westinghouse PWR Outage Key Safety Functions Using Probabilistic Safety Assessment ........................................................................................ 2204
M. M. Cid, J. Dies, C. Tapia, O. Vihals

Outage PRA METHODOLOGY for Multi-Unit Candu Generating Stations ........................................... 2214
Krist Papadopoulos, Ben Hryciw, Steve Kausalainen, Ian Beith, Rob McLean
Dominion Experience in Shutdown Risk Analysis ....................................................................................................................... 2224
Ross C. Anderson, Robert W. Fosdick
Transition Risk Model for PWR ........................................................................................................................................................................ 2231
A. Zoulis

SIGNIFICANCE DETERMINATION PROCESS

Examples Of Risk Assessments In Support Of Significance Determination Process (SDP) Evaluations At San Onofre Nuclear Generating Station (SONGS) ........................................................................................................................................................................ 2252
Parviz Moieni, Michelle P. Carr, Craig F. Nierode

RISK-INFORMED SAFETY MARGINS

Recent Trends In Risk-Informed Safety Margin Characterization .......................................................................................................................... 2263
Stephen M. Hess, Robert Tsang disturb, Dominique Faveur
Experiences in Describing PRA Technical Adequacy in Risk Informed Submittals ........................................................................................................... 2275
Victor A. Warren, Donald E. Vanover, Lawrence K. Lee
Insights from the SM2A Pilot Study Towards Quantification of a Change of Plant Safety Margin After a Hypothetical Power Up-Rate ........................................................................................................................................................................ 2281
Martin A. Zimmermann, Tinh N. Dang, Jeanne-Marie Lanore, Pierre Probst, Javier Hortul, Abdallah Amri

SOFTWARE RELIABILITY

Effect of Testing Coverage on Software Reliability - An Experimental Investigation ....................................................................................................... 2297
Sergiy Vilkomir
Review of Quantitative Software Reliability Methods ................................................................................................................................. 2306
Tsong-Lun Chu, Meng Yue, Gerard Martinez-Guridi, John Lehner

PSA STANDARDS

Development of a Standard for Risk-Informed Decision Making .......................................................................................................................... 2314
Yoshiyuki Naramiya, Manehiro Yasuda, Akira Yamaguchi, Masashi Hirano
Technical Overview of Japan’s Standards for Riskinformed Decision Making ........................................................................................................... 2325
Akira Yamaguchi, Yoshiyuki Naramiya, Mitsuasa Hirano
NPSAG- Nordic PSA-Group – Performed and Ongoing Research Program ................................................................................................. 2337
Göran Hultqvist
Recent Advances in Developing Guides and Standards for Internal Flooding PRA ........................................................................................................... 2348
Kari N. Fleming, Jean Francois Roy
U.S. NRC Confirmatory Level 1 PRA Success Criteria Activities .......................................................................................................................... 2360
Donald Helton, Hossein Esmaili, Robert Buell
Peer Review of NRC Standardized Plant Analysis Risk Models .......................................................................................................................... 2372
James Knudson, Robert Buell, John Schroeder, Anthony Koonce, Pete Appignani
Potential Enhancements to the PRA Peer Review Process .............................................................................................................................. 2381
Edward T. Burns, Gregory A. Krueger, Barry D. Sloane, Donald E. Vanover

UNCERTAINTY ANALYSIS & METHODS

Model Uncertainty of Empirical Metallic Fuel/Clad Eutectic Predictive Relationships .......................................................................................... 2391
M. R. Denman, M. Zacchetti
Uncertainty Analysis and Sensitivity Calculations for Reliability Assessment of a Digital Feedwater Control System ........................................................................................................................................................................ 2403
Meng Yue, Tsong-Lun Chu, Gerardo Martinez-Guridi, John Lehner, Alan Kuritzky
Identification of Single Point Vulnerability Using a Blended Method .................................................................................................................. 2415
Kwang Nam Lee, Jin Kye Han, Moon Goo Chi, Eun Chan Lee
An Integrated Methodology for Assessing Model Uncertainty in Fire Simulation Codes .......................................................................................... 2421
Víctor Ontiveros, Mohammad Medarres
Probability of Events with Failing Control Rods .................................................................................................................................................. 2429
Göran Hultqvist
A Simplified Methodology to Generate MGL-Parameter Uncertainty Distributions Using Alpha-Parameter Data from NUREG/CR-5497 ........................................................................................................................................................................ 2449
Joshua M. Reinert
Parameter and Model Uncertainty Analysis using Dempster-Shafer Theory in Nuclear Probabilistic Risk Assessment

Tu Duong Le Duy, Dominique Vasseur, Mathieu Couplet, Laurence Dieulle, Christophe Bérenguer

Approaches for Addressing Parametric and Modeling Uncertainties in a Reference PWR PRA

Young G. Jo, Beomhee Jeong

Uncertainty Assessment Methodology for Probabilistic Risk Assessment (PRA); Data, Methods, Models, and Inputs

Mohammad Pourgol-Mohammad, Seyed Mohsen Hosseini

SPACE/AIRCRAFT PSA

Methodology for Developing a Probabilistic Risk Assessment Model of Spacecraft Rendezvous and Dockings

Steven J. Farnham, Joel Garza, Theresa M. Castillo, Michael Lutomski
