10th IFAC International Workshop on Adaptation and Learning in Control and Signal Processing 2010

Istanbul, Turkey
26 – 28 August 2010

Editors:
Erdal Kayacan

CONTENTS

Regular Papers

Adaptive Output Feedback Control of Bouc-Wen Hysteretic systems ................................................................. 1
J.B. Gning, F. Giri, F.Z. Chaoui

Induction Machine Control in Presence of Magnetic hysteresis Modelling and Speed reference tracking .......... 7
H. Ouadi, F. Giri, A. Elfadili, Ph. Dorleans, J.F. Massieu

Adaptive Control for Systems Preceded by Hysteresis Represented by Preisach Model ........................................ 13
Xinkai Chen

Modeling and identification of a small scale magneto-mechanical damper .......................................................... 19
N. Aguirre, F. Ikhouane, J. Rodellar, J. Wagg, S. Neild

On the Analysis of the Quasi-Static Regime ...................................................................................................... 25
F. Ikhouane

Noise covariances estimation for Kalman filter tuning ...................................................................................... 31
P. Matisko, V. Havlena

Model-Based Kalman Filtering Approaches for Frequency Tracking ............................................................ 37
A. Dardanelli, S. Corbetta, I. Boniolo, S.M. Savaresi, S. Bittanti

Hybrid Observer for multi-frequency signals .................................................................................................... 43
Daniele Carnevale, Sergio Galeani, Alessandro Astolfi

A New Respiratory Model considering Hysteresis for Artificial Respiration ..................................................... 49
S. Kanae, M. Nakamichi, Z.J. Yang, K. Wada,

A two-level optimization based learning control strategy for wet clutches ....................................................... 54
Bruno Depaertere, Gregory Pinte, Lieboud Van den Broeck, Jan Swevers

Sensorless Induction Machine Observer in Presence of Nonlinear Magnetic Characteristic .................................. 60
A. Elfadili, F. Giri, A. El Magri, H. Ouadi

Passification-based robust flight control system design ..................................................................................... 66
A.L. Fradkov, B. Andrievsky

Adaptive coding for position estimation in formation flight control .................................................................... 72
B. Andrievsky, A.L. Fradkov

Adaptive Control Augmentation of a Missile ....................................................................................................... 77
Kadiye Tiryaki Kutluay, Ilkay Yavrucek

Target Tracking Using Adaptive Gain Backstepping Control ............................................................................... 83
Baris Fidan, Veyesel Gazi

Immersion and Invariance Based Adaptive Control of Three Dimensional Autonomous Vehicle Maneuvers .......... 89
Baris Fidan, Ismail Bayezit

Neuro-adaptive Approach for Controlling a Quad-rotor Helicopter Using Sliding Mode Learning Algorithm ........ 94
Andon Venelinov Topalov, Nikola Shakev, Okyay Kaynak, Erdal Kayacan

SMDO-Based NGPC Control for Uncertain Nonlinear Systems ........................................................................... 100
Lu Cheng, Chang-sheng Shakev, Mou Chen

Wiener-Hammerstein system identification with non-Gaussian input .................................................................. 106
Grzegorz Mzyk

Bias Compensated State Space Identification Method in Closed Loop Environment ............................................. 112
Kenji Ikeda Yoshio Mogami, Takao Shimomura

Grey-box model identification – control relevant approach .............................................................................. 117
Jiri Rehor, Vladimir Havlena

Observer-based parameter estimation in Lienard systems ................................................................................... 123
G. Besancon, A. Voda

Comparing Recursive Estimators in the Presence of Unmodeled Dynamics ....................................................... 128
Magnus Nilsson, Bo Egardt
Fictitious Reference Iterative Tuning for Internal Model Controller
Osamu Kaneko, Yusuke Wadagaki, Shigeru Yamamoto

134

Model Free Design of Parallel Feedforward Compensator for Adaptive Output Feedback Control via FRIT with T-S Fuzzy Like Model
Ikaro Mizumoto, Hiroki Tanaka

140

An FRIT method for disturbance attenuation using input-output data for disturbance responses
Shiro Masuda, Guo-Dong Li

146

A Design of a FRIT Based Nonlinear PID Controller
Yoshihiro Ohnishi, Toru Yamamoto

152

FRIT with Dead-Zone Compensation and Its Application to Ultrasonic Motors
Yuji Wakasa, Shinji Kanagawa, Kanya Tanaka, Yuki Nishimura

156

Robustness of discrete-time and sampled-data adaptive control
Dariusz Harla

162

Adaptive Nonlinear Control of a Continuous Stirred Tank Reactor
P. Dostal, V. Bobal, J. Vojtisek

168

An Improved Adaptive Control Algorithm based on Unfalsified Control
Ehsan Gholamzadeh Nabati, Sebastian Engell

174

Adaptive Control of Continuous-Stirred Tank Reactor in Two Stable Steady-States
Jiri Vojtesek, Petr Dostal

180

A robust MRAC design and performance improvement in the presence of uncertainties
Michal Poliaek, Jan Murgas, L'udovit Farkas, Michal Blaho

186

Auto-tuning cascade loops subject to saturation
A.S. Butt, J.M. Maciejowski, H.M. McNaughton

191

Adaptive Hybrid Approach to Active Noise and Vibration Control by Piezoelectric Ceramic Transducers
Hiroshi Okumura, Hiromitsu Ohmori, Akira Sano

196

Performance/Robustness Limit Evaluation for Lyapunov-Stable Nonlinear Plants
Cs. Banyasz, L. Keviczky

202

A necessary and sufficient condition for n-D BIBO Stability and Functional Schur Coefficients
Ioana Serban, Flavius Turcu, Mohamed Najim

208

Global Tracking Result for Strict Feedback Systems in Presence of Actuator Saturation
F. Giri, F.Z. Chaoui, E. Chater, J.B. Gning

214

A Multi-step Q(\epsilon) learning Approach to Power System Stabilizer
Tao Yu, Wei-Guo Zhen

220

Stability in the Pseudo-state Formalism of Discrete Systems Controlled in the Presence of Intermittent Sensor Faults
R.V. Dionisio, J.M. Lemos

225

Determination of the Minimax Risk for the Normal Two-Armed Bandit
Alexander V. Kolmogorov

231

Determination of the Minimax Risk for Bernoulli Multi-Armed Bandit
Alexander V. Kolnogorov

237

Non-myopic Innovations Dual Controller
Miroslav Flidr, Miroslav Simandl

243

Structure-preserving Computation of Stable Deating Subspaces
Vasile Sima

249

On Optimal Control under Program Disturbances
Dmitry A. Serkov

255

Adaptive Fuzzy Weighted Template Matching Using Invariant Features for a Tracking Application
Nevrez Imamoğlu, Aydin Eresen, Mehmet Önder Efe

259

Identification of Local Model Networks Parameters Using Fuzzy Clustering
J. Novak, P. Chalupa, V. Bobal

265
