National Conference of Higher Vocational and Technical Education on Computer Information 2010

Shandong, China
4 September 2010

Editors:

Yixian Yang

ISBN: 978-1-61782-867-6
Contents

Part 1  Computer Technology and Applications

Study on the Virtual Reality Based on ComGIS and OpenGL  
Hai-feng Li....................................................................................................................................................... (1)

The Design of J2EE Training for the Comprehensive Vocational Ability  
Jing-ming Xie, Run-lu Zhong............................................................................................................................. (6)

Simulating Double-Arched Bridge by ANSYS and Calculating Internal Forces and Displacement  
Jia-bang Shao..................................................................................................................................................... (10)

Monitoring Vibration and Tool Wear by Pattern Recognition of Variance of Dynamic Force  
Ping Liu, Zhen-chie Zhang, Su-chang Ma, Hong-jun Wang............................................................................. (14)

A Probe into the Project-Oriented Teaching Based on CSCL  
Da-jie Fu, Mei-ling Huang, Lin Tang............................................................................................................. (18)

Research on Numerical Simulation of Automotive Panel Stamping and Spring-Back  
Lei Duan, Zhen Li, De-hua Miao, Yang Zhang, Qiang Yu, Yan-long Xue....................................................... (22)

Knowledge Management System Frame of Ethnic Culture  
Yan-ling Liao, Bo Zhao, Yu-dan Lu, Li-jin Gao, Xiao-dan Feng.................................................................... (27)

Analysis on Springback Simulation Distortion of Autobody Panel and Optimization of die Structure  
Qiang Yu, Yu-jun Cai, Zhou-de Qu, De-hua Miao, Lei Duan, Yan-long Xue..................................................... (31)

Research on The Decrease of MDA Content in Tissues by Herbal Medicine Great Burdock Achene  
Yan Huang...................................................................................................................................................... (35)

Design of Virtual Class Based on Modern Communication Theory  
Yuan Shen, Guang-peng Hu, Hua-feng Sun....................................................................................................... (38)

Teaching Reform of Undergraduate Specialty of Diagnosis and Maintenance of NC Machine Tool under Mode CDIO  
Bin Li, Yi Dai, San-peng Deng, Xiu-min Shi, Li Jiang, Xue-cui Yang, Hong-chang Sun, Chao-hua Liu.............. (43)

The Research of Distributed Embedded Intelligent Building Control System Based on ARM  
Jian-guang Zhao, Jian-chen Liu, You-chun Wang, Jing-jing Fan..................................................................... (49)

Investigate on VB Experiment Teaching Mode  
Li Liu, Jun-dong Zhu...................................................................................................................................... (53)

The Research and Practice of Classification Teaching Model of Basic Computer Education in Local College  
Yan-jun Zhao, Chun-yi Zhang......................................................................................................................... (57)

Office Automation Course Educational Reform thought and Exploration  
chun-yang Zhao.............................................................................................................................................. (62)

Research of Vocational Specialty Evaluation System Based on Group Decision-making Technique  
Liang Chen, Li-fang Chen, Shu-li Qi................................................................................................................ (65)

Steel Ball Surface Fault Inspection Based on Machine Vision  
Han Xiao, Jing-hai Cheng, Wei Ying................................................................................................................ (70)
Design of a Network Video Monitoring System Based on Arm
   Shuang Chen ................................................................. (74)

Primary Research on Basic Computer Class for Fresh Undergraduates
   Feng-qin Wang ............................................................... (77)

Research of Virtual Laboratory Based on Proteus
   Xiao-juan Peng, Shi-an Liu, Chun-ru Xiong .......................... (81)

Application of Item-driving Teaching Method in Higher Vocational Practical Courses
   Bao-jun Yao, Ying-huai Mao ............................................... (85)

Thesis on the Importance and Feasibility of Network to the Student Management
   Li Gao ................. (89)

The Study of Synthetic Instance in Teaching of Data Structure
   Cheng-xia Liu, Ying Cai, Xin-yuan Niu ................................. (92)

Research on the University Teachers Management Based on CRM
   Jia-qi Wu .............................................................. (97)

The Research about Extracurricular Sci-tech Training Management System of Electronic Information Major
   Peng Guo .................... (102)

Reforms of in Teaching and Practice in the Speciality of Food Quality and Safety
   Zhen-min Yan, Yan-bing Wu, Tian-fu Deng, Da-fu Wu, Xiu-juan Ren, Xin-jun Wei .......................... (106)

A Course Design Project Research and Implementation Based on the RealTime Operating System µC/OS-II
   Xin-yuan Niu ................... (109)

Consideration and Exploration of the Robot Design and Manufacture Course in the Higher Vocational Colleges
   Shi-hua Tong .................. (113)

The Exploration and Practice on the Teaching Mode of JAVA Programming Based on Working Process
   Xue-hong Zhang, Bin Qiu, Yu Liu .................................. (117)

Sandboxie-style Offense and Defense Laboratory Environment for Computer Network Security
   Xing-zhi Lin .................. (120)

Construction of English Information System for Learner Autonomy in HVC
   Jing-yong Bai .................. (125)

Research on the Problems of Multimedia Courseware of Ecology Science
   Da-fu Wu, Su-mei Yao, Yan-bing Wu, Xiu-juan Ren, Dong-fang Li, Zhen-min Yan .................. (130)

Research of Web Service- Based Distance Education System for Public Security Army
   Yun-tao Jiang, Guo-guang Jing ...................................... (133)

The Research and Realization of Digital Campus Public Information Service Frame
   Dan Li, Shen-ling Liu, Chun-yuan Zhang ..................... (137)

Application Based XML Data Exchange Technology on E-Business
   Xin-yu Ma, Ai-hong Dong ........................................... (141)

Research the Fabrics Color of the Heat Transfer Printing Based on the Color Space of Lab
   Ling-hua Guo, Mei-yun Zhang, Xin-hua Guo, Xing Wang ................... (144)

Algorithms of Internet Music Search Engine by Humming and Performance Evaluation
   Yun-feng Dong, Bei Qi ................................................ (148)
Practice in Experimental Teaching of Programming Design in Vocational Education

Ying Huo

Modular Ontology Model in domain of Aerodrome Tower Control

Xin-sheng Yang, Bin Liu, Jie-ning Wang

Exploration of Teaching Reform and Practice to Computer Network Course

Dong-bin He, Yan-hong Zhu, Li-zhong Lin, Li-ying Duan, Qian Dong

The Course Teaching Reform in Higher Vocational Environmental Protection Inspection Major

Bao-jun Yao, Ying-huai Mao

Teaching ESP in Vocational Colleges in Net-Based Environment

Mei-yan Liu, Chang Liu

Working Process-orientated Exploration and Practice of the Curriculum System of Database Application

Li Li

Thinking of Universities’ Experimental Teaching Work of New Speciality in the New Era

Xiu-juan Ren, Da-fu Wu, Zhen-min Yan, Xue-feng Yang, Yan-bing Wu

Innovation and Practice of Teaching Model in Mathematical Courses Based on Humanity

Xiao-jian Ma

Application of Multimedia Technology in Modern Agriculture

Dong-xiang Xiao, Tian-fu Deng, Wen-li Yuan, Xu-wen Guo

Application of the Union of Proteus and Keil Simulation Technology in MCU Course Teaching

Chun-ru Xiong

Exploration and Practice on Comic and Animation Personnel Training Model

Fan Zhang, Ping-ping Mo

The Basic Electronics Course of Teaching Methods Base on Project

Qi-wen He, Jian-sheng Peng

A Teaching System about Computer Applications Foundation Based on Scheduling Algorithm

Man-ying Huang

Function Analysis of Education Equipment Management

Li Xu, Cheng-kai He, Li-yan Kong

The Research and Practice of Building Adult Education NetWare Course “College Computer Fundament”

Li Liu, Chun-ying Zhang, Feng-chun Liu

Reflections of Common Mistakes in the Multimedia Teaching and Rectification

Tian-fu Deng, Xing-qi Ou, Yan-bing Wu, Guang-ling Li, Fan-bin Kong, Jian-hua Wang

The Study of Image Segmentation Based on PCNN and PSO

Bo Wang, Wei Ge, Zhi-qiang Liu

The Application of Pro/E to course teaching in Machine Designing Foundation Curriculum

Dai-gen Zhu, Can-yu Yang, Ai-ping Zhao

The Measurement of a Wheel-Flange Wear Based on Digital Image Processing Technology

Na Wang
The Manipulator of Six Degrees of Freedom Design Based on VB
Ya-ning Sun, Yao Xiong

Practice and Reflection on Job-Oriented “Double Certificates” Education
Ming-lian Jiao

Design and Implementation of Distributed Computer Room Monitoring and Control System
Xiao-ling Huang

The Study on Features Shape Extraction in High-Resolution Remote Sensing Image
Run-fang Wang

Design for Emergency Power Supply Based on PIC16F874A and EE87C196MC
Jian-qin Guo, Chun-yan Meng

Part 2  Theory and Technology of Network

Research and Practice on Teaching Method of Information Security Major Student Contest
Yi-xian Liu, Jiu-lun Fan

The Research of the constructing Based on the Computer Forensics
Qing-shan Zhao, Shao-bing Wu, Xue-ming Jia

A Survey of Agent-Based Active Defense Network Model
Jun Lu, Jia-lin Jiao, Zhi-min Li

The Discussion on Teaching Method of Improving Undergraduates’ Information Security and Keeping Secrets Quality
Ai-zhen Liu, Li-yun Chen, Hong-li Jia

AES Encryption and Decryption Algorithm for High-Speed Design FPGA-Based
Yong-hong Zhou, Jin-xiang Shao, Shun-wen Xiao, Zheng-ming Tang

The Study and Design of a Skewed-Associative Object Cache on the Number Theory Function
Bin Chen

Part 3  Teaching Reform and Education

Research on the Technology of GPS Precise Point Positioning Based on IGS Tracking Station
Hai-feng Li

Electro-hydraulic Servo System Sampling Period Selection Based on PLC
Yu Shu, Ming Li

The Research of Countryside Energy Conservation Microgrid System Based on CAN Bus
Shu-fen Liu, Ting-qin Yan

Research and Practice of Project Education Method in Sensor Principle and Application Course
Lin Fu

A Discussion on Application of Virtual Reality Technology in Vocational Colleges
Jin-Xia Li, Xue-Qing Liu

Fluent Software Combined with the Computational Fluid Dynamics Course Teaching and its Application Example
Shu Xu
Consideration and Suggestion of the Higher Vocational Education

Shi-hua Tong

Part 4  Comprehensive Chapter

Research and Development of Non-standard PoE-Hub Based on High-Power over Ethernet

Shi-hua Tong

Subsequence Matching Based on Edit Distance Over Data Stream

Guang-min Liang

An Improved Routing Algorithm Based on Kademlia

Guang-min Liang

Chinese Vocational Education Research Group of Sustainable Development

Hua-ping Shang

A Model of Intrusion Detection Based on Data Mining in Campus Network

Bei Qi, Yun-feng Dong

Survey on Wireless Sensor Networks Research and Application

Shi-an Liu, Xiao-juan Peng

A Micro-analysis of Inquiry Teaching Case in English Classroom

Hong-wei Cui
