17th World Conference on Non-Destructive Testing 2008

(WCNDT 2008)

Shanghai, China
25 - 28 October 2008

Volume 1 of 4

# TABLE OF CONTENTS

## VOLUME 1

### 1. SESSION: ACOUSTIC EMISSION (15):

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Magnetic Flux Leakage And Acoustic Emission Testing Technique For Atmospheric Storage Tanks</td>
<td>1</td>
</tr>
<tr>
<td>Fujun Liu, Xiaolian Guo, Yanting Xu</td>
<td></td>
</tr>
<tr>
<td>The Automated Device For Leak-Testing Of Nuclear Fuel On Their Manufacturing</td>
<td>11</td>
</tr>
<tr>
<td>Igor Loktev, Evgenij Frolkov</td>
<td></td>
</tr>
<tr>
<td>Loose Parts And Valve Flow Monitoring In Nuclear Power Plants Using Integrated Digital Systems</td>
<td>16</td>
</tr>
<tr>
<td>Sotirios Vahaviolos, Spilios Kattis, Mark Carlos</td>
<td></td>
</tr>
<tr>
<td>Application Of Acoustic Emission Detection Technology On Multilayer Binding High Pressure Vessel</td>
<td>27</td>
</tr>
<tr>
<td>Guang Dai, Wei Li, Zhijun Yang</td>
<td></td>
</tr>
<tr>
<td>Using Acoustic Emission Technique For Monitoring Real-Time Fracture Behavior Within Reinforced Concrete Structure Element Under Load Test</td>
<td>35</td>
</tr>
<tr>
<td>Yu-Cheng Kan, Kuang-Chih Pei, Dong-Wei Lin</td>
<td></td>
</tr>
<tr>
<td>Identification Of Source Time Function For Train-Induced Vibration Of Underground Tunnels</td>
<td>41</td>
</tr>
<tr>
<td>Jain-Fu Chai, Tsung-Jen Teng</td>
<td></td>
</tr>
<tr>
<td>Investigation On Acoustic Emission Of Hydrogen Induced Cracking For Carbon Steel Used In Pressure Vessel</td>
<td>49</td>
</tr>
<tr>
<td>Gongtian Shen, Lifei Li, Wanlong Zhang</td>
<td></td>
</tr>
<tr>
<td>The Acoustic Emission Monitoring During The Bending Test Of Q235 Steel Box Beam</td>
<td>56</td>
</tr>
<tr>
<td>Zhanwen Wu, Gongtian Shen, Shaohei Wang</td>
<td></td>
</tr>
<tr>
<td>Case Studies Of Electric Power Equipment Diagnostics Using Acoustic Emission</td>
<td>62</td>
</tr>
<tr>
<td>Oswaldo Santos Filho, Sergio Zaghetto, Giorgio Pereira</td>
<td></td>
</tr>
<tr>
<td>Application Of NDT Procedures For Identification Of Fatigue Life Stages Of AIMg Alloys</td>
<td>68</td>
</tr>
<tr>
<td>Petr Liskutin, Pavel Mazal, Jaroslav Fiala</td>
<td></td>
</tr>
<tr>
<td>AE Intelligent Sensor Networks System Used In Tele-Monitoring Of Civil Engineering</td>
<td>76</td>
</tr>
<tr>
<td>Guanjun Tong, Fanjin Kong, Ruli Wang</td>
<td></td>
</tr>
<tr>
<td>Acoustic Emission Transferability Using Transfer Function</td>
<td>83</td>
</tr>
<tr>
<td>Asa Prateepasen, Montana Srinang</td>
<td></td>
</tr>
<tr>
<td>Non-Destructive Testing: The Guarantee Of The Success Of Full Scale Aircraft Fatigue Test</td>
<td>91</td>
</tr>
<tr>
<td>Bongsheng Geng</td>
<td></td>
</tr>
<tr>
<td>Acoustic Emission In-Service Detection Of Cryogenic Storage Tank Floors</td>
<td>98</td>
</tr>
<tr>
<td>Yanting Xu, Shoubao Ding, Fujun Liu</td>
<td></td>
</tr>
<tr>
<td>Feature Extraction Of Acoustic Emission Signals From Low Carbon Steel Pitting Based On Independent Component Analysis And Wavelet Transforming</td>
<td>102</td>
</tr>
<tr>
<td>Wei Li, Guang Dai, Feifei Long</td>
<td></td>
</tr>
</tbody>
</table>

### 2. SESSION: COMPREHENSIVE NDT METHODS (6):

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Borescope And Eddy Current Dual Probe For In Situ Detecting Cracks In An Aeroengine Labyrinth Disc</td>
<td>108</td>
</tr>
<tr>
<td>Wugang Tian, Mengchun Pan, Feili Luo</td>
<td></td>
</tr>
<tr>
<td>NDT As A Tool, For Post-Irradiation Examination</td>
<td>114</td>
</tr>
<tr>
<td>Abdeljalil Alghem, Mourad Kadouma, Rabab Benaddad</td>

<tr>
<td>Michael Kröning, João Gabriel H Ribeiro, A Vidal</td>
<td></td>
</tr>
<tr>
<td>Eddy Current And Ultrasound Data Fusion Applied To Carbon Fiber Reinforced Plastic Evaluation</td>
<td>132</td>
</tr>
<tr>
<td>Adriana Savin, Rozina Steigmann, Nicoleta Iftimie</td>
<td></td>
</tr>
<tr>
<td>A Radio-Frequency Measurement System For Metallic Object Detection Using Pulse Modulation Excitation</td>
<td>140</td>
</tr>
<tr>
<td>Yong Li, Gui Yun Tian</td>
<td></td>
</tr>
</tbody>
</table>
3. SESSION: COMPREHENSIVE STUDIES AND APPLICATIONS IN NDT (49):

Inspection And Identification Of Inner-Outer Defects On Oil-Gas Pipeline ................................................................. 159
   Lijian Yang, Gang Liu, Guoguang Zhang

Status Of The Thai Society For Nondestructive Testing And NDT In Thailand ................................................................. 163
   Asa Prateesapen, Mantana Srinang, Mai Noytsak

Data Fusion For Combining Techniques To In Situ Detect Defects Of Turbine Blade ........................................................ 171
   Wanggan Tian, Mengchun Pan, Fei Lu

Adhesive Bond Testing By Laser Induced Shock Waves .................................................................................................. 177
   Michel Aaggari, Silvio Kruger, Jean-Pierre Monchalin

Thermal Performance Of Lead-Free Microelectronic BGA Package With Defects .............................................................. 185
   Haixia Shang, Jianxin Gao, Ian Nicholson

Characterization Of Impact Test Response Of PCCP With System Identification Approaches ........................................... 195
   Zheng Liu, Alex Wang, Dennis Krys

Monitoring Of Concrete Components Structure Condition Using Nonlinear Ultrasonic Spectroscopy ............................................ 202
   Marta Korenska, Michal Matysik, Monika Manychova

Opportunities And Challenges Of Effective Inspection Industry In Nigerian Petroleum Sector ........................................... 208
   Michael Adegokun Adegbite, Okiemute Grace Erhimona

Basic Principles Of The Construction Of Residual Resource Estimation Systems .............................................................. 213
   Vladimir V Klyuev, Mikhail V. Filinov, Andrey. S. Farsov

Research On Application Of Pipe Crawler Device ........................................................................................................... 219
   Bangxian Li, Junpeng Zhang, Bing Li

On The Nondestructive Evaluation Of Composite Structures By Liquid-Crystal Thermography ............................................ 226
   Hadi Rezghi Maleki, Akbar Afaghkia Khatibi, Farhang Honarvar

Firmware System For Diagnostics Of The Mill Rolls ............................................................................................................ 233
   Aleksandr Nichipuruk, Sergey Murikov, Aleksey Stashkov

Why Not Enlarge The Non-Destructive Testing (NDT) Experience In Construction Maintenance - Problems, Practice, Ideas Etc? ................................................................. 239
   Valentin D. Vladimirov

Problems Of Image Restoration In Metallography ................................................................................................................ 244
   Mikhail V. Filinov, Vladimir V. Bykov, Alexey A. Maslov

A Novel Approach For Nonlinear Distortion Correction Of Industrial Endoscope Images .................................................... 252
   Hui-Xian Sun, Yu-Hua Zhang, Fei-Lu Luo

Increased Inspection Productivity Through Advances In Remote Visual Inspection (Rvi) ....................................................... 259
   Edward Hubben, Bradford Morse, Christine Murner

Study On The Penetration Theory Of Flaw ........................................................................................................................ 264
   Xing-Wei Li, Ping Zhang, Yan Pu

Performance Based Qualification For NDT .......................................................................................................................... 270
   Michael Tumehow

The Advent Of Age With Integrated NDT Technology ........................................................................................................... 274
   Jumning Liu

Fault Indication Film Used In Magnetic Nondestructive Testing .......................................................................................... 283
   Bin Liu

Dynamic Strain Measurement Using Improved Bonding Fiber Bragg Grating ........................................................................ 286
   Gwo-Shyang Hwang, Chien-Ching Ma

Help Software Design Of NDT Instrument Based On FLASH Cartoon ................................................................................ 294
   Jun-Ming Lin, Han-Lin Li, Zhen-Xiong Cai

Recent Advances In NDE Technologies For Turbines And Generators ............................................................................. 300
   Waheed Abbasi, Michael Metala

POD Generator, Development Of Numerical Modeling Tools For Quantitative Assessment Of The Performance Of Non-Destructive Inspection Techniques ................................................................. 307
   Arjan Mast, Arno Volker, Joost Bloom

Nondestructive Elastic-Wave Tests Of Post-Tensioned Concrete Girders In Road Bridge ...................................................... 315
   Krzysztof Sabadowszic, Jerzy Hola

Mechanical Characterization Of Porous Structures By The Combined Use Of Micro-CT And In-Situ Loading ........................................ 321
   Greet Kerckhofs, Jan Schroten, Martine Wevers
Automated MPI Test Fluid Quality Checks And Dye Penetrant Tam Panel Tests
Thomas Vetterlein, Michael Wagener, Heinz Rongen

NDT Certification Procedure At Hazardous Production Facilities
Nikolay N. Kononov, Vasily P. Shevchenko, Oksana N. Kochetkova

Personnel Certification And Qualification By The Independent Certification Body Spektrcet Of JSC MSIA
Irina Yu. Pushkina, Dmitry A. Glotov, G. A. Tarasenko

ISO 17020 Accreditation Of CNTESTEN NDT Laboratory Part 1
Kamal Sahaimi, Abdessalam Benstiel, Samira Mimount

Energy In The Future - New Challenges For NDT
Mike Farley

EFNDT Guidelines On The Overall NDT Quality System In Europe
Mike Farley

Development And Implementation Of A Specification For Authorised Qualifying Bodies
John Thompson

Non-Destructive Testing Of Mechanical Parameters For Wood-Based Materials
Yingcheng Hu

Analysis Of The Relationship Between The Limit Load Of Structure And The Microscopic Character
Gongfeng Jiang, Yiliang Zhang, Liang Sun

Estimation Of Wall Thinning Defect Size And Location In Pipes By Laser Speckle Interferometry
Hyun-Chul Jung, Jong-Hyun Park, Koonsuk Kim

Soft Calibration Method To Uncertainty Of Measurement About Nondestructive Quantitative Testing
Li Yao

TD Handy-Scan, A New Alternative In Hand Held Advanced Ultrasonic Equipment
Mark Nel

ARM9-Based High Speed Multi-Channels Eddy Current And Ultrasonic Testing System
Zeyi Zhang, Lei Zhao

Method For Dynamic State Monitoring Of Pressure Vessel
Xuerong Ma

NDT Equipment Rental Practice
Helen Hu, Daibin He

NDT Personnel Certification In Accordance With European And International Standards
Georgy Batov, Nadezhda P. Biryukova

The Inspection System For Mechanical Non-Destructive Of Npps Type VVER Steam Generator Tube Sheet Inspection
Martin Kuna, Josef Plašek, Pavol Jablonický

NDT Of Lattice Sandwich Metal Plate By Using DC Potential Drop Method
Dongli Zhang, Zhenmao Chen, Shejuan Xie

Fiber Bragg Gratings And Two Wave Mixing Spectral Demodulator System For Impact Detection And Localization
Goutham Kirikera, Oluwaseyi Balogun, Sridhar Krishnaswamy

Comments Toward The Harmonization Of Qualification And Certification Of Non-Destructive Testing Personnel In Arab Countries
Wafik Harara

Low-Frequency Magnetic Current Features
Bin Liu

Instrumental Technique For The Detection And Identification Of Radioactive, Fissile And Extrahazardous Substances
Nikolay R. Kaulev, I. N. Ivanov, Viacheslav M. Yumashev

Imaging Of Internal Cracks In Concrete Structures Using The VOLUME Rendering Technique
Pei-Ling Liu, Po-Liang Yeh

4. SESSION: COMPUTED TOMOGRAPHY & DIGITAL RADIOLOGY (33):

Advanced NDT With High Resolution Computed Tomography
Thomas Paul, Zhenhui He

Quality Evaluation For The Digital Radiography Inspection Based On Imaging Parameters
Fanqin Kong

On The Detection Of Inhomogeneities In Steel By Computed Tomography
Bernhard Harrer, Johann Kastner, Hans-Peter Degischer
True 3D-CT-Reconstruction In Comparison To The FDK-Algorithm ................................................................. 491
Axel Lange, Manfred P. Hentschel, Andreas Kupsch

Algebraic Reconstruction Technique Class For Linear Scan CT Of Long Object ........................................... 496
Bao-Dong Liu, Li Zeng, Dong-Jiang Ji

A De-Convolution Technique Used For NDT In X-Ray & CT. ...................................................................... 501
Kai Chat, David Stanfield, Andrew Wride

Artist - Analytical RT Inspection Simulation Tool For Industrial Application.................................................. 511
Gerdi-Rüdiger Jaenisch, Carsten Bellon, Uwe Exert

Radiographic And Tomographic Inspection Of Wooden Specimens With Fission Neutrons ........................... 517
Kurt Osterloh, Thomas Bücker, Andreas Hasenstab

X-Ray Detection And Data Acquisition For NDT Applications .............................................................. 523
Michael Homer, Stephen Jaye

Real-Time Radiographic Non-Destructive Inspection For Aircraft Maintenance ........................................... 531
Xin Wang, Brian Stephen Wong, Chen Guan Tui

3D Image Reconstruction From Low Energy And Noisy X-Ray Projection Data ........................................... 539
Valery Vengrinovich, Sergei Zolotarev, Iliya Reshetouski

X-Ray Net Weight Control Of Pharmaceutical Products .................................................................................. 546
Florian Bessler, Walter Bauer

Realization And Application Of Simulation Technology In Direct Radiography ............................................ 554
Chao-Ming Sun, Guang-Ping Tang, Zeng-Yong Wang

Scan And Reconstruction Of Helical Cone-Beam Industrial CT For Big Workpiece ........................................ 561
Xiaobing Zou, Li Zeng

Segmentation Of Casting Defects In X-Ray Images Based On Fractal Dimension ........................................ 566
Jae Wang, Xiaorun Hou, Yufang Cai

Optimization Research On Weld Image Based On Computed Radiography System ..................................... 573
Meng Zheng, Keqin Ding, Guang Chen

Ridgelet Compression Method Of Luggage X-Ray Inspection Images ......................................................... 577
Zong-Jian Li, Li Zeng, Rifeieng Zhou

Real-Time X-Ray Image Processing Based On Information Fusion For Weld Defects Detection ................ 583
Dong Du, Runshi Hou, Jiaxin Shao

Industrial Ray DR/ICT Integrated Inspection Testing System (1) Hardware System ...................................... 589
Keqin Ding, Li Hong Liang, Jian Fu

A Method Of Weld Edge Extraction In The X-Ray Linear Diode Arrays Real-Time Imaging .............................. 595
Guang Chen, Keqin Ding, Li Hong Liang

Structural Index Of Metal Matrix Composites Evaluated With Computed Tomography .................................. 600
Juergen Goebbels

Segmentation Of Weld Defects In X-Ray Image Based On Partial Surface Reconstruction ........................... 606
Runshi Hou, Dong Du, Jiaxin Shao

Digital Comparisons In Oil & Gas ................................................................................................................. 612
Joseph Zekowski, James Costain

Referenceless Beam Hardening Correction In 3D Computed Tomography Images Of Multi-Material Objects .......................................................................................................................... 618
Michael Krumm, Stefan Kasperl, Matthias Franz

The Multi-Sensor Tomolibri® - Measurements With Computed Tomography (CT) ....................................... 625
Stefan Kasperl, Michael Maisl, Dirk Neumayer

Image Registration Combining Digital Radiography And Computer-Tomography Image Data .......................... 631
Frank Herold

Industrial Ray DR/ICT Integration Inspection Testing System (2) Software And Testing .............................. 637
Lihong Liang, Kejian Ding, Keqin Ding

Enhanced Spatial Resolution In 2D CT-Reconstruction Without Filtered Back-Projection: DIRECTT ...... 643
Andreas Kupsch, Axel Lange, Manfred P. Hentschel

Digital Radiography In Industry ..................................................................................................................... 649
Wafik Harara

Study On The Density Characterization Of The CT Image ............................................................................. 655
Huieng Chen, Shubin Yang

Method For Three-Dimensional Evaluation And Visualisation Of The Distribution Of Fibres In Glass-Fibre Reinforced Injection Molded Parts By μ-X-RayComputed Tomography ........................................... 662
Franz Pfeifer, Johann Kastner, Rotraud Freytag

Digital Radiography And Its Advantages In Field NDT Inspections Today .................................................. 669
Ron Pincu
5. SESSION: ELECTROMAGNETIC METHODS (65):

Effect Of Lift-Off On Pipeline Magnetic Flux Leakage Inspection ............................................................. 682
Lijian Yang, Guoquan Zhang, Gang Liu

Increased Use Of Remote Field Technology For In-Line Inspection Of Pipelines Proves The Value Of
The Technology For This Application ............................................................ 686
David Russell, Vincent Shen

New Techniques For The Quantification Of Defects Through Pulsed Magnetic Flux Leakage ........ 694
John Wilson, Muma Kaba, Gui Yun Tian

Resolution Of Magnetic Intelligent Tool In Case Of Stress-Corrosion Cracks Detection ................. 700
Alexander N. Kovalenko

Smart Two Wire Vibration Switch - New Class Of Monitoring Device .................................................. 707
George Zusman

AC Conductivity Of Non Magnetic Metallic Alloys ............................................................................. 715
Freddy Fraudita, Carlos Gonzalez, Audry Gallipoli

Eddy Current Non-Destructive Testing Application Research Of Marine Engines ..................... 722
Zhen-Xiong Cai, Han-Lin Li, Jun-Ming Lin

Study On ET Technique To Measure Oxide Thickness Of Rods For PWR ......................................... 728
Dong Li, Jing Xiong, Junming Lin

Geometry Parameters Estimation Of Defects In Multi-Layered Structures Based On Eddy Current
Nondestructive Testing Technique With Bayesian Networks .......................................................... 734
Bo Ye, Pingjie Huang, Mengbao Fan

3D Magnetic Field Responses To A Defect Using A Tangential Driver-Coil For Pulsed
Eddy Current Testing ................................................................................................. 743
Yu-Hua Zhang, Hui-Xian Sun, Fei-Lu Luo

Development And Application Of Pulsed Eddy Current Testing System For Ferromagnetic Pipes ..... 751
Chen Huang, Xinjun Wu, Shuqing Lin

Magnetic Field Mapping For Complex Geometry Defect - 3D Transient Problem ......................... 757
Ilham Mukriz Zainal Abidin, Gui Yun Tian, Yong Li

Detection Of Wire Disconnection Using New Rope Tester ................................................................. 766
Yutaka Hirama, Hiroyuki Wakiwaka, Kunihisa Tashiro

Characterization Of Carbon Fibre Reinforced Composite By Means Of Non-Destructive Eddy
Current Testing And FEM Modeling ................................................................. 772
Xin Li, Wuliang Yin, Anthony J Peyton

Eddy Probe System On The Basis Of New Technology ...................................................... 778
Alexandr Karpichev, Petr Shkatov, Andrey Klushev

Simulator For Education Of Eddy Current Testing Specialists ....................................................... 784
Petr Shkatov, Denis Bydanov, Sergey Klyuev

Electromagnetic Health Monitoring Of BSSC Prosthetic Heart Valves .............................................. 788
Raimond Grimberg, Shiux Chen, Adriana Savin

A Detection Method For The Fuel Balls Passing Through The Pipeline Of Pebble-Bed High
Temperature Gas Cooled Reactor ........................................................................ 796
Zizhong Han, Kewi Yuan, Liang Zhang

The Important Role Of Eddy Current Testing In Railway Track Maintenance ............................ 804
Anika Dey, Hans-Martin Thomas, Rainer Pohl

Research On Surface Defect Detection Using Pulsed Eddy Current Testing Technology ............ 808
De Qiang Zhou, Bingjiang Zhang, Gui Yun Tian

Recognition And Improvement In The Classification Of Imperfections Detected By
Eddy Current Inspection ......................................................................................... 816
Frédéric Lesage, Xiaoxing Guo, Bernard Bisiaux

High Resolution Eddy Current Testing Of Superconducting Wires Using GMR Sensors ............... 821
Marc Kreutzbruck, Kai Allweins, Hendrik Bernau

Modelling Of Eddy Current Inspections With CIVA ................................................................. 827
Catherine Gilles-Pascaud, Gregoire Pichenot, Christophe Reboud

3D Finite Element Analysis Of Marine Steel Plate Magnetic Leakage Testing ............................... 835
Han-Lin Li, Jun-Ming Lin, Zhen-Xiong Cai

</table>
A Permanent Magnet Device For Measuring The Coersive Force ................................................................. 1504
Eduard S. Gorkunov, Vera P. Tabachnik

9. SESSION: NDT TECHNIQUES FOR DIVERSE PIPELINES AND STRUCTURES (6):

The NDT Study Of Metal Composite Material Tube .................................................................................... 1509
Jun-Ming Lin, Ji-Lin Ren
No UV Radiation In Magnetic-Powder Inspection ..................................................................................... 1517
Richard Soehnchen, Hans Berg
Research On And Development Of Steam Pipeline Creep Real-Time Monitoring System Based On Virtual Instrument Technology ......................................................................................................................... 1519
Lichun Zhu, Hua He, Qi Ding
Advanced Matrix Phased Array Settings For Inspection .............................................................................. 1527
Frederic Reverdy, Steve Mahaut, Philippe Dubois
NDE Technology Of Pressure Equipments In Line With International Standards .......................................... 1537
Yan Li
Design Of Transmission Scheme For Radiation Detection & Management Information ................................... 1549
Jin-Ping Liu, Chao Liu

10. SESSION: NOVEL APPLICATIONS OF NDT TECHNIQUES (7):

The Value Of DICONDE .................................................................................................................................. 1558
Andrea Koetz, Sue Clendening
Industrial Computer Tomography - A Universal Inspection Tool .................................................................... 1561
Christof Reinhart
Eddy Current And Ultrasound Data Fusion Applied To Carbon Fiber Reinforced Plastic Evaluation .............. 1571
Raimond Grimberg, Adriana Savin, Rozina Steigmann
Testing Instrument For Internal Stress Of Long Seamless Rails .................................................................. 1579
Xin Qi, Jian Chen, Xingye Zheng
Procedure For NDT And Traditional Methods Of Ancient Buildings Diagnosis, By Using Thermograph, Digital Images And Other Instruments Data Analysis ................................................................. 1586
Liliana Palaia, Rafael Sánchez, Vicente López
Correlation Leak Detector For Control Of Underwater Pipeline Leakproofness ........................................... 1594
Boris Lapshin, Aleksey Ovchinnikov
The Basic Study Of Safety Evaluation For Cylinder Wall Of Small Output 2 Cycle Engine ......................... 1601
Sasaki Syuutei, Ezumi Tsutomu

11. SESSION: OPTICS (5):

Advanced Optical Coherence Tomography Techniques: Novel And Fast Imaging Tools For NDT .................. 1607
David Stifter, Karin Wiesauer, Martin Wurm
Evaluation Of Rubber - Composites Bonding Components By Using Laser Electronic Shearography .............. 1613
Songping Liu, Feifei Liu, Legand Li
Studies On Digital Shearography For Testing Of Aircraft Composite Structures And Honeycomb-Based Specimen ................................................................................................................................. 1620
Jian Zhang, Rongsheng Geng
Aerospace NDT With Advanced Laser Shearography .................................................................................. 1625
John Newman
Detection Capabilities Of State-Of-The-Art Shearography Systems ............................................................. 1631
Eberhard Moser, Joerg Collrep

12. SESSION: PENETRANT TESTING (4):

The Ways Of Penetrant Testing Applicability For Rough Surfaces .............................................................. 1638
Nikolai Migoun, Nikolai Delenkovsky
Automated Dye Penetrant Systems With Process Control And Documentation In The Aerospace Industry ................................................................................................................................. 1643
Thomas Vetterlein, Michael Wagener, Heinz Rongen
### Equipment And Mobile Laboratories For Ndt And Diagnostics Of Underground Communication

*Vasily N. Koltsov, Yury A. Kondratiev*

---

### Non Destructive Testing Of Materials Subject To Atmospheric Stress Corrosion Cracking

*Martin Van Dalen, Craig Wicker, Graham Wilson*

---

### 13. SESSION: RADIOGRAPHIC TESTING & COMPUTED RADIOLOGIC TESTING (32)

**Nondestructive Evaluation Of Uranium- Plutonium Mixed Oxide(MOX) Fuel Ts By Gamma Autoradiography**

*Jose Panakkal, Dipankar Mukherjee, Hs Kamath*

---

**Digital Radiography And Computed Radiography For Enhancing The Quality And Productivity Of Weldments In Boiler Components**

*R. J. Pardikar*

---

**Low Frequency Acoustic (Impedance) Flaw Detectors Of The New Generation And Their Application**

*Vladimir F. Muzhitsky, Andrey M. Sysoev, Alexey G. Efimov*

---

**Influence Of Lack-Of-Fusion Defects On Load Capacity Of MAG Welded Joints**

*Miloš Jovanovic, Janez Grum, Miro Uran*

---

**VOLUME 3**

**Improved Procedure For Computed Radiography - A Comparative Study On Welded Tube Sections**

*Jörg Beckmann, Siegfried Rachny, Uwe Ewert*

---

**A New Fully Digital System For RT Inspection Of Metal Tube To Tube Sheet Joints Of Heat Exchangers**

*Uwe Zscherpel, Peter Rost, Konstantinos Spartiotsi*

---

**Flaw Size Dependent Contrast Reduction And Additional Unsharpness By Scattered Radiation In Radiography - Film And Digital Detectors In Comparison**

*Uwe Ewert, Uwe Zscherpel, Carsten Bellon*

---

**Feature Extraction And Optimisation For X-Ray Weld Image Classification**

*Ying Yin, Guiyun Tian*

---

**Prediction Of Density In Porous Materials By X-Ray Techniques**

*Ali Bateni, Mehdi Ahmadi, Nader Parvin*

---

**Computed Radiography And Microtomography Of Riveted Lap Joints Of Glaretm Subjected To Constant Amplitude Loading (CAL) Fatigue**

*Guohui Wu, Yan Li, Jun Su*

---

**X-Ray Testing Sensitivity Of Carbon Fiber Reinforced Aluminium Matrix Composite**

*Wei-Ming Yan, Peng-Fei Zeng, Guo-Quang Zhang*

---

**The Exploration To The Case Of X-Ray Detection Of The Vertical Angle Weld**

*Wei Zhao, Keqin Ding, Guang Chen*

---

**Use Of Monte-Carlo Method For The Reconstruction Of Response Functions And Radiation Spectra In Radiography**

*Mikhail Zhukovskiy, Sergey Podoliako*

---

**Digital Radiographic Imaging Inspection System On The Tube To Tube Sheet Welding Joints Of Heat Exchanger**

*Keqin Ding, Guang Chen, Binan Shou*

---

**NDT Data Management - Archive And Data Sharing**

*Andrea Koetz*

---

**Factors Affecting Probability Of Detection With Computed Radiography**

*Gregory Mohr, Peter Willems*

---

**Computed Radiography With Isotopes- Suitability For Weld Inspection**

*Manoharan Venugopal, Prasad Thapa, Rajashekar Venkatchalam*

---

**The Optimizing Technology Research Of Imaging Quality On X-Ray Digital Imaging**

*Wenming Guo, Lihong Liang*
Digital Camera Application In X-Ray Real Time Control Of European Launcher’s Ariane 5 Booster Segments
Elena Tosti

An Quantitative Evaluation Of The Canadian Forces New Radiology Inspection Systems For The Detection Of Water Ingress In CF188 Flight Control Surfaces
Brian Tang, Paul Hugley, Christine Sweetapple

Gamma Ray System Operated By Divers For Underwater Inspection
Carla Mariño, Claudio Camerini, Ricardo Lopez

Gauging Information Systems, Means Of Technological Diagnostics And Intelligent Gauges In Nuclear Power Engineering And Industry
Nikolay R. Kuzeev

X-Ray Thickness Gauges Of The RIT10 Family For Thickness Measurement At Line Production Of Rolled Metal
Boris V. Artemiev, Alexander I. Maslov

X-Ray Pulse Apparatus Based On Explosive Electron Emission
Evgeny Peliks

Ray Detection Digital Image Quality And Influential Factors
Xiangzhao Zeng

A Review Of Current Status In Applying Special Radiographic Techniques To Pressure Equipment In China
Yan Li

Evaluations On The Composite Bonding Quality By Ultrasonic Amplitude Measurements
Jong-O Lee, Hyun-Sup Jee, No-Hoe Ju

Constitution And Prospect Of Chinese Radiography Digital Imaging Nondestructive Testing Standard
Xiangzhao Zeng

Computed Radiography Deployed Subsea By A Romotely Operated Vehicle
James Mcnab, Bernie Steel

Strategies For Film Replacement In Radiography - Films And Digital Detectors In Comparison -
Uwe Ewert, Uwe Zscherpel, Klaus Bavendiek

Simulation Studies Of Radiographic Inspections With CIVA
Roman Fernandez, Joachim Tabary, Andrea Schumm

14. SESSION: REVIEW OF NDT (9):

Progress Of Nondestructive Testing And Evaluation In China
Gongtian Shen

An Overview Of The Rapidly Developing Non-Destructive Testing Technology In China
Rongsheng Geng

Recent Developments Of Aircraft Nondestructive Evaluation Based On Advanced Sensor Techniques
Gongjin Qi, Hong Lei, Rongsheng Geng

The Role Of IAEA/AFRA On The Promotion Of NDT In Africa
Kwaku Aboagye Danso, Jim Guild, Ferid Herelli

From Fifteen To Two Hundred NDT-Methods In Fifty Years
Thomas Aastroem

Non-Destructive Testing In Belarus
Nikolai Migoun, Siyatoslav Novikov

NDT Integrated Technology Based On Computer Network
Jun-Ming Lin, Ji-Lin Ren

Advanced Publishing In NDT
Rolf Diederichs, Edward Ginzel

50th Anniversary Of Non-Destructive Testing In Russia
Vladimir V. Klyuev, Yury K. Fedoseenko

15. SESSION: ULTRASONIC TESTING (109):

The Development Of Laser Ultrasonic Visualization Equipment And Its Application In Nondestructive Inspection
Bo Wang, Junji Takatsubo
Study On The Character Of Metal Magnetic Memory Signal In The Course Of High-Cycle Fatigue Experiment For 16MnR Steel .......................................................... 2012
Jinjin Li, Yiliang Zhang, Gongtian Shen

Research On Pipeline Corrosion And Cracking Inspection By Broad-Band Ultrasonic Pig Technology ......................... 2020
Fengqi He, Shu He, Jingwei Yang

The Numerical Investigation Into The Influence Of The Scattering Effect From The Aggregates Of Concrete On The Transient-Elastic-Wave-Based NDT Technologies .................................................. 2025
Jian-Hua Tong, Chih-Hung Chiang, Wei-Liang Chiang

Influence Of Inclusion On Crack Tip In Rotating Disc By Photoelasticity And Caustic Method ................................................. 2031
Sasaki Syuhei, Hagiwara Keiich, Ezumi Tsuotu

Ultrasonic Examination Of Difficult Welds ................................................. 2037
Rafal Mis, Wladyslaw Michnowski, Jaroslaw Mierzwa

Determination Of Elastic Modulus Of Thin Materials By Speckle Interferometry ......................................................... 2043
Naseem Akhter, Koungh-Suk Kim, Ho-Sup Chang

Detectability Of Kissing Bonds Using The Non-Linear High Frequency Transmission Technique ........................................... 2049
Dawei Yan, Bruce Drinkwater, Simon Neild

Interaction Of Rayleigh Waves Induced By Interdigital Transducer With Fatigue Crack ................................................... 2056
Jeong Na, Samuel Kuhr, James Blackshire

Application Of Wide Band AE Sensor In Model Test Of Reinforced Concrete Structures ......................................................... 2062
Wei Zhang, Chun-Hong Xia, Fan-Jin Kong

Industrial Ultrasonic Examination Of Plates With EMAT .......................................................... 2068
Andrey Kirilov, Vladimir Brevin, Aleksey Kashin

Holistic Approach For Structural Integrity Evaluation Of Composite Main Rotor Blades ................................................... 2078
Krzysztof Dragas, Slawomir Klimaszewski

Integrated Time Of Flight Diffraction Set Up Software .......................................................... 2084
Jan Verkooijen, Alex Mclay

Water Content Diagnostics Of Concrete Using Nonlinear Acoustics Means .......................................................... 2092
Dao Zhou, Xiaozhou Liu, Xiwen Gong

Data Computing Disk Of Line Convergent Detector .................................................................................. 2098
Shusen Lin

Immersion Multi-Zone Ultrasonic Inspection System Of Large-Diameter Special Billets .......................................................... 2105
Jianhua Jin, Xueming Liu, Diamond Han

Evaluation Of Impact Damages In RTM Stitched Composites By Using Ultrasonic Multiple Imaging Techniques .......................................................... 2114
Songqing Liu, Feifei Liu, Enming Guo

Experimental System Dependent Factors In The Measurement Of Ultrasonic Nonlinear Parameter By Using Contact PZT Transducer .......................................................... 2120
Ik-Hwang Choi, Jaeik Lee, Kyung-Young Jhang

Ultrasonic Evaluation Of Friction Stir Welding .................................................................................. 2121
Feifei Liu, Songping Liu, Legand Li

Study On Characteristic Of Thin Layer Rubber Based On Ultrasonic Echo Testing .......................................................... 2128
Jianjie Chang

Evaluation Of The Fiberglass-Reinforced Plastics Interfacial Behavior By Using Ultrasonic Wave Propagation Method .................................................................................. 2135
Jianjie Chang

Optimization Of Ultrasonic Testing System Applicable To High Manganese Steel Rails .......................................................... 2141
Ryuta Hirokawa, Yoshihiro Mizutani, Yu Kurokawa

3i In NDT .................................................................................. 2149
Norman Ng, William Ha

Application Of Full Data Acquisition Technology In Automatic Ultrasonic Inspection .......................................................... 2153
Yongqing Teng, Di Wu, Zhongling Zhao

An Investigation Into The Performance Of Complex Plane Spilt Spectrum Processing Ultrasonics On Composite Materials .......................................................... 2161
Manfred Johannes, Philippe Rubbers

Ultrasonic Testing Of Austenitic Welds At The Russian NPP .................................................................................. 2168
Vladimir Baidalov, Alexey Vopilkin, Pavel Samarin

Acoustical Holography Implementation For Defected Rails Inspection .................................................................................. 2174
Alexey Vopilkin, Dmitry Kononov, Dmitry Tikhonov

Ultrasonic Transducers Calibration System With 3D Processing AUGUR 5.4 .................................................................................. 2178
Andrej Bazulin, Evgeny Bazulin, Dmitry Tikhonov

Automated Ultrasonic Pipe Weld Inspection .................................................................................. 2184
Wolfram A. Karl Deutsch
Application Of Ultrasonic Guided Wave To Heat Exchanger Tubes Inspection ................................................................. 2194
Ik-Keun Park, Yong-Kwon Kim, Sue-Jun Park

Comparison Between In - Line Ultrasonic Monitoring Of The Spot Weld Quality And Conventional
NDT Methods Applied In A Real Production Environment ......................................................................................... 2200
 Danilo Stocco, Andriy Chertov, Roman Maev

Line Maintenance Solutions For Composite Damage Evaluation ...................................................................................... 2208
Christine Munner, Werner Yezelman, Andrea Koetz

The Preferred Magnetization Direction Of Long Line Magnetostrictive Position Sensor ......................................................... 2212
Zheng Wang, Xiaoming Chang

Determination Of Relation Between Elastic Constant And Sintered Temperature In WC-Ni Composites ........................................ 2218
Ismail Hakki Serpín, Sabri Tunçel, Yıldızan Özkın

High Temperature Integrated And Flexible Ultrasonic Transducers For NDT ................................................................. 2226
Makiko Kobayashi, Cheng-Kuei Jen, J. F. Bussiere

Ultrasonic Inspection Of Steam Generators At CANDU Power Plants ............................................................................... 2234
Andy Chen, Ken Chan, John Huggins

Sizing In Phased Array Technique Using Diffraction And Amplitude Displacement .......................................................... 2242
Giuseppe Nardoni, Maria Doct. Certo, Pietro Nardoni

Experimental Investigation On Porosity Of Carbon Fiber-Reinforced Composite Using Ultrasonic Attenuation Coefficient ................................................................. 2249
Li Lin, Ming Luo, Hongtao Tian

Monitor The Circumferential Welds Of Multi-Layer Thick-Wall Pressure Vessels Serving At Elevated Temperature By Ultrasonic Testing ........................................................................ 2258
Xu-Feng Li, Ben-Guang Tang

The Reliability Of The Ultrasonic Characterization Of Welds By The Artificial Neural Network ............................................. 2268
Fairouz Bettayeb, Hamid Benbartaoui, Brahim Raouraou

The Ultrasonic Feature Imaging Testing Of Special Structure ................................................................................................ 2273
Ming Hui Lu, Yi Zhu, Xun-Feng Liu

Thin Multi-Layer Plate Testing With Ultrasonic Feature Scan Imaging System ........................................................................ 2278
Ming Hui Lu, De-Yong Fu, Qing Li

Ultrasonic Feature Imaging System For Testing Bimetal Rotor Clad Layer .................................................................................. 2285
Xin Liu, Ming Hui Lu, Yi-Fang Chen

Quantitative Evaluation Of Brazed Joints In Flat Structure With Ultrasonic Inspection Method ............................................ 2291
Jing Liang, Yiwei Shi, Danggang Yang

Application Of Bare Piezoelectric Ceramics In Monitoring Resin Transfer Moulding (RTM) Process ........................................ 2298
Cheng Bin Lu, Adam Postula

A New Testing Method Combining EMAT With Eddy Current ............................................................................................... 2304
Fengying Huang, Zhengguan Zhou, Juming Liu

Observation Of Trapped Thin Oil Film Behavior Between Ball And Disc With Using Ultrasonic Technique ........................................ 2312
Akitsugu Takuchi, Seiichi Terada, So Toda

Simulation Of Scattering Acoustic Field In Rod And Identify Of Ultrasonic Flaw Detecting Signal ............................................... 2318
Keyi Yuan, Wenhui Song, Yifang Chen

Research On Ultrasonic Velocity Imaging Of Metal Matrix Composites With TIRP Method ................................................ 2327
Yifei Gao, Zhengguan Zhou, Fangchong He

Influence Of Precipitates And Dislocations On The Acoustic Nonlinearity ........................................................................ 2334
Chung Seok Kim, Tae Sung Park, Ik Keun Park

Ultrasonic NDE Of Thin Composite Plate Based On An Enhanced Wigner-Ville Distribution .................................................. 2340
Gaohui Wu, Jun Su, Dezhi Zhu

Corrosion Assessment Of Offshore Oil Pipeline Based On Ultrasonic Technique ..................................................................... 2346
Qi Zhang, Pei-Wen Que, Hua-Ming Lei

In-Motion Ultrasonic Testing Of The Tread Of High-Speed Railway Wheels Using The Inspection System AUROPA III ................................. 2352
Hans-Juergen Salzburger, Li Wang, Xiaorong Gao

Application Of Logarithmic Amplifier To Ultrasonic Imaging ............................................................................................... 2360
Toshikiko Sasahara, Hirotsugu Inoue

Inspection Of CANDU Reactor Pressure Tubes Using Ultrasonics ................................................................................... 2368
Michal Trellinski

US Spectroscopy Applied To Evaluation Of Some Prosthesis Made From Syntherized Zirconium Oxides ......................................... 2376
Raimond Grimberg, Adriana Savin, Rozina Steigmann
Microdefect Detection In High-Temperature Resistant Steel By Using Ultrasound Laser Interferometer ................................................................. 2384
Yakov Smorodinsky, Yulia Zhiltikhina, Dmitry Perov

The Ultrasonic Detection Of The Large Welded Gear ...................................................... 2391
Yong-Xiang Chen, Cai-Yuan Qu, Xiu-Juan Yue

TOFD-Scan Imaging Based On Synthetic Aperture Focusing Technique .......................... 2396
Zicheng Wang, Youpeng Zhou, Jiuxin Tian

Controlled Excitation Of Ultrasonic Transducers ......................................................... 2403
Arno Volker, Maurits Van Der Heiden

High Resolution Transforms .......................................................................................... 2411
Arno Volker

Using Ultrasonic Pulse Velocity To Evaluate Residual Compressive Strength Of Post-Fire-Curing Concrete ......................................................... 2419
Hsuan-Chih Yang, Yiching Lin, Chi-Ann Hsiao

Non-Destructive Examination For Ageing Management Of Indian Nuclear Power Plants ......................................................... 2427
Paritosh Nanekar, Bijoy Shah

Development, Validation And Execution Of The Automated Ultrasonic Testing Of A Subsea Pipeline Hot Tap Weld ................................................................. 2435
Malcolm Miller

Detection Of A Surface-Breaking Crack Depth By Using The Surface Waves Of Multiple Laser Beams .................................................................................................................. 2443
Seung-Kyu Park, Yong-Moo Cheong, Sung-Hoon Baik

Development Of Reinforced Concrete Corrosion Amount Presumption Method By Ultrasonic Method ................................................................. 2449
Yousuke Sakurada, Hiroshi Irie, Yasukatsu Yoshida

Ultrasonic Pulse Signal Diffraction From Different Flaws In Elastic Media ........................ 2455
Dmitry Perov, Anatoly Rinkevich, Yakov Smorodinsky

Zhan-Feng Yang, Wei-Bin Zhang, Yong Tian

Development Of Ultrasonic Line-Focus SH-Wave Probe .................................................. 2468
Yuata Moriya, Hirotsugu Inone

Ultrasonic TOFD Testing Model For Crack Measurement In Thick Wall Weldment .......... 2473
Tie Gang, Dazhao Chi

Fretting Cracking Ultrasonic Detection In Generator Teeth .............................................. 2479
Xiaoming Jian, Shaun Smalley, Jim Knowles

Electromagnetic Acoustic Transducers For In And Out Of Plane Ultrasonic Wave Detection ................................................................. 2487
Xiaoming Jian, Steve Dixon, Karl Quirk

Cellular Polypropylene Ferroelectret Film: Piezoelectric Material For Non-Contact Ultrasonic Transducers ............................................................. 2494
Joachim Düring, Victor Zhou, Marc Kreutzbruck

Application Of Portable Non-Destructive Testing Instruments To Enhance Performance Of Hot Strip Mill Rolls ................................................................. 2500
Rama Shankar Verma, Krishna K Singh, G. M. D. Marty

Automated Inspection Of Complex Composite Components In The Production Cycle .......... 2511
Albrecht Maurer, Rudolf Henrich, Walter De Odorico

Advancements In Pipeline Girth Weld Inspection ............................................................... 2517
Jeffrey Stetson

Inclusion Evaluation Of The Slab By The Focused Ultrasonic Method ............................. 2524
Guoxing Zhang, Yinguan Wang, Yunsong Hua

Inline-Process And Quality Control Of Spotwelds Of Car Bodies - Ultrasonic Sensors Integrated In Resistance Welding Electrodes ................................................................. 2530
Goeran Vogt

Development Of Ultrasonic Transducer Testing Austenitic Stainless Steel Weld ................................. 2536
Yubao Chen

Process Monitoring Of Cast Explosive Solidification Molding By On-Line Multichannel Ultrasonic Measurement ......................................................... 2541
Wei bin Zhang, Yong Tian, Hongping Zhou

Advanced NDE Inspection Methods For Detection Of SCC In Blade Attachments And Blade Roots ................................................................. 2546
Hans Raaschenbach, Michael Clossen, Michael Opheys

Related Problems In Ultrasonic Detection Of Porcelain Insulator ..................................... 2554

16. SESSION: ULTRASONIC TESTING – GUIDED WAVE (30):

Case Studies On Uncertainties Of Ultrasonic Weld Testing Interpretation ................................................................. 2742
KuppaswamyNachimuthu, SajeeshKumar Babu

Development Of EMA Guided Wave Technique For Testing Of Wires ................................................................. 2750
Huirong Jia, Hong Fan

Modelling Of Ultrasonic Wave In Aircraft Wiring ............................................................................................................ 2755
Yousef Gharibbeh, Slim Soua, Septimontet Chan

Application Of Laser-Generated Ultrasound For Evaluation Of Wall-Thinning In Carbon Steel Elbow ................................................................. 2762
Do-Young Kim, Seung-Joon Lee, Joon-Hyun Lee

Detection Of Protective Coating Disbonds In Pipe Using Circumferential Guided Waves ................................................. 2768
Jason Van Velsor, Joseph Rose, J. Bruce Nestleroth

Ultrasonic Guided Wave Nondestructive Testing For Helicopter Rotor Blade ................................................................. 2774
Xue Qi, Joseph Rose, Chenguang Xu

Inspection Of Adhesively Bonded Joints Using Ultrasonic Guided Waves ................................................................. 2781
Padma Kumar Puthillath, Joseph Rose, Chenguang Xu

Guided Wave Thickness Measurement Tomography For Structural Health Monitoring In Critical Zones Of Pipelines ................................................................. 2787
Lingji Jin, Younho Cho, Joseph Rose

Recent Advances On Guided Waves In Pipe Inspection ................................................................................................. 2793
Joseph Rose, Jing Mu, Younho Cho

Study On Automatic Testing Of Treads Of Running Railroad Wheels ................................................................................. 2799
Hong Fan, Huirong Jia

Ultrasonic Tomography Of Guided Wave ......................................................................................................................... 2805
Lianji Jin, Younho Cho, Joseph Rose

Wireless Ultrasonic Transducer Network For Structural Health Monitoring Of An Aircraft Wing ........................................ 2811
Xiaoliang Zhao, Tao Qian, Gang Mei

Study On Simulation Of Guided Wave Propagation In Pipes ................................................................................................. 2819
Yuemin Wang, Chuanjun Shen, Feng-Rui Sun

Study On Relationship Between Amplitudes Of Reflection Signals And Positions Of Magnetostrictive Transducer ................................................................. 2826
Yuemin Wang, Lihua Shen, Feng-Rui Sun

The Affection Of Pipes Characteristics To Exciting Frequency For Guided Waves NDT ................................................. 2832
Yuemin Wang, Lihua Shen, Chuanjun Shen

Research On An Inspection Method For De-Bond Defects In Aluminum Skin-Honeycomb Core Sandwich Structure With Guided Waves ................................................................................................. 2837
Fangcheng He, Zhenggan Zhou, Zhanying Feng

Research On Line-Scan Inspection Method With Guided Waves ................................................................................................. 2845
Zhenggan Zhou, Zhanying Feng

Nondestructive Determination Of Elastic Constants Of Thin Plates Based On PVDF Focusing Ultrasonic Transducers And Lamb Wave Measurements ................................................................. 2853
Leo-Shin Wei, Cheng-Hsien Chang, Yang-Chun Lee

Research For Field Application Of Heat Exchanger Facilities Using Guided Wave ................................................................. 2859
Doo-Song Gil, Yeon-Shik Ahn, Sang-Ki Park

Ultrasonic Thickness Inspection Of Oil Pipeline Based On Marginal Spectrum Of Hilbert-Huang Transform ................................................................. 2869
Yimei Mao, Peiwen Que, Qi Zhang

Permanent Corrosion Monitoring Using Guided Waves ................................................................................................. 2877
Arno Volker, Arjan Mast, Joost Bloom

Contact Defect Detection In Plates Using Guided Wave And Vibro-Acoustic Modulation ................................................................. 2885
Jingxin Jiao, Bruce Drinkwater, Simon Neild

Visualization Of Weld Defects In Water By Laser-Ultrasonics ................................................................................................. 2892
Takahiro Miura, Satoshi Yamamoto, Makoto Ochiai

Research Of Double Mode Ultrasonic Testing In Multi-Layered Adhesive Structure Of The Solid Rocket Motor ................................................................. 2897
Ji-Tang Zhang

New Ultrasonic Guided Wave Testing Using Remote Excitation Of Trapped Energy Mode ................................................................. 2903
Morio Onoe, Kenji Oka, Takanoobu Suzuki
Feasibility Study of Blockage Detection Inside Pipes Using Guided Ultrasonic Waves
Jian Ma, Michael Lowe, Francesco Simonetti
............................................................................................................................... 2913

TOFD Inspection With Phased Arrays
Charles Brillon, Tim Armit, Olivier Dupuis
............................................................................................................................... 2955

Long Range Guided Wave Pipe Inspection - The Advantages of Focusing
Jacob Davies, Peter Cawley, Michael Lowe
............................................................................................................................... 2921

Inspection of Thick Part With Phased Array Volume Focusing
Dominique Braconnier, Takeko Murakami
............................................................................................................................... 2962

Ultrasonic Guided Waves - Evaluation of Trials for Pipeline Inspection
Francisco Marques, Alessandro Demma
............................................................................................................................... 2927

Defect Reconstruction Procedures Based on Sampling Phased Array Techniques with Probabilistic Focusing Beams
Gerd Dobmann
............................................................................................................................... 3035

Weldments
Jing Ye, Hak-Joon Kim, Song-Jiu Song
............................................................................................................................... 3028

2D Arrays and Volume Focusing Combined Inspection Technique
Dominique Braconnier, Masaki Takahashi
............................................................................................................................... 2969

An Automatic Guided Wave Pulse Position Modulation System Using Steel Pipes As a Communication Channel for Flood Detection in Steel Offshore Oilrigs
Yongsheng Zhang, Songling Huang, Wei Zhao
............................................................................................................................... 2944

Practical Experiences in Manual Ultrasonic Phased Array Inspection
Michael Berke, Johannes Buechler
............................................................................................................................... 3076

Application of Ultrasonic Phased Array In Acoustic Logging
Bixing Zhang, Xianmei Wu, Junjie Gong
............................................................................................................................... 3022

Prediction of Side-Drilled Hole Signals Captured by a Linear Phased Arrays With Steering and Focusing Beams
Tie Gang, Xinyu Zhao
............................................................................................................................... 3035

Propagating of Torsional Waves in a Waveguide of Arbitrary Cross Section Immersed in a Fluid
Zheng Fan, Michael Lowe, Michel Castagna
............................................................................................................................... 2936

Study on the Lift-Off Effect of EMAT
Yongsheng Zhang, Songling Huang, Wei Zhao
............................................................................................................................... 2944

Qualification of Manual Phased Array Ultrasonic Techniques for Pipe Weld Inspection in Nuclear Power Plants
Jürgen Laube, Frederic Lasserre, Gunter Guse
............................................................................................................................... 3005

Feasibility Study of Blockage Detection Inside Pipes Using Guided Ultrasonic Waves
Jian Ma, Michael Lowe, Francesco Simonetti
................................................................. 2913

Potential New Approaches to Ultrasonic Quantitative NDE (QNDE) by Combining High Speed Defect Reconstruction Procedures Based on Sampling Phased Array Techniques With Probabilistic Failure Assessment
Gerd Dobmann
