2011 16th IEEE International Conference on Engineering of Complex Computer Systems

(ICECCS 2011)

Las Vegas, Nevada, USA
27 - 29 April 2011
# Table of Contents

Preface ......................................................................................................................................................... ix
Committees .................................................................................................................................................. x
Reviewers ................................................................................................................................................... xiii

---

## Session 1: Real-Time Systems I

Temporal Abstract Domains ........................................................................................................................3  
*Julien Bertrane*

WCET Analysis of Component-Based Systems Using Timing Traces ......................................................... 13  
*Adam Betts and Amine Marref*

Memory Positioning of Real-Time Code for Smaller Worst-Case Execution Times .................................. 23  
*Amine Marref and Adam Betts*

---

## Session 2: Real-Time Systems II

Tighter Schedulability Analysis of Synchronization Protocols Based on Overrun without Payback for Hierarchical Scheduling Frameworks ................................................................. 35  
*Moris Behnam, Thomas Nolte, and Reinder J. Bril*

*W. El Hajj Chehade, A. Radermacher, F. Terrier, B. Selic, and S. Gérard*

Timed Circus: Timed CSP with the Miracle ................................................................................................. 55  
*Kun Wei, Jim Woodcock, and Alan Burns*

Verification of MARTE/CCSL Time Requirements in Promela/SPIN .................................................... 65  
*Ling Yin, Frédéric Mallet, and Jing Liu*
Session 3: Real-Time Systems III
Modeling Variability from Requirements to Runtime .......................................................... 77
  Mathieu Acher, Philippe Collet, Philippe Lahire, Sabine Moisan, and Jean-Paul Rigault
Formal Model of Interrupt Program from a Probabilistic Perspective ......................... 87
  Yongxin Zhao, Yanhong Huang, Jifeng He, and Si Liu
Model-Based Simulation of SOAP Web Services from Temporal Logic Specifications .......................................................... 95
  Sylvain Hallé

Session 4: Dynamic Modeling
A Fully Dynamic Approach to the Reverse Engineering of UML Sequence Diagrams .................................................................................................................. 107
  Tewfik Ziadi, Marcos Aurélio Almeida da Silva, Lom Messan Hillah, and Mikal Ziane
Using Model Transformation to Generate Graphical Counter-Examples for the Formal Analysis of xUML Models .......................................................................... 117
  Osmar M. dos Santos, Jim Woodcock, and Richard Paige
Required Behavior of Sequence Diagrams: Semantics and Refinement .......................... 127
  Lunjin Lu and Dae-Kyoo Kim

Session 5: MDE I
A Goal-Based Approach to Guide the Design of an Abstract Event-B Specification .......................................................... 139
  Abderrahman Matoussi, Frédéric Gervais, and Régine Laleau
Modelling and Analysing Standard Use within System of Systems .................................... 149
  Russell Lock
Towards a MDE Transformation Workflow for Dependability Analysis ................................ 157
  Leonardo Montecchi, Paolo Lollini, and Andrea Bondavalli
Tailoring Process Synthesis to Domain Characteristics ..................................................... 167
  Stefan Naujokat, Anna-Lena Lamprecht, and Bernhard Steffen

Session 6: MDE II
A Component-Oriented Metamodel for the Modernization of Software Applications .......................................................... 179
  Luciano Baresi and Matteo Miraz
A Formal Approach to Model Composition Applied to VUML ........................................ 188
  Adil Anwar, Taoufiq Dkaki, Sophie Ebersold, Bernard Coulette, and Mahmoud Nassar
Leveraging Service-Orientation for Combining Code Generation Frameworks ........................................ 198
Sven Jörges and Bernhard Steffen

Session 7: Intelligent Systems
A Software Requirements Specification Framework for Objective Pattern Recognition: A Set-Theoretic Classification Approach ......................................................... 211
Arbi Ghazarian, Mehdi Sagheb Tehrani, and Arin Ghazarian
A Novel Approach Based on Gestalt Psychology for Abstracting the Content of Large Execution Traces for Program Comprehension ........................................ 221
Heidar Pirzadeh and Abdelwahab Hamou-Lhadj
Towards Succinctness in Mining Scenario-Based Specifications ........................................... 231
David Lo and Shahar Maoz

Session 8: Communication Systems
Modeling and Coordinating Social Interactions in Pervasive Environments .................................................. 243
Muhammad Ashad Kabir, Jun Han, and Alan Colman
Group Selection by Nodes in Wireless Sensor Networks Using Coalitional Game Theory ........................................ 253
Fatemeh Kazemeyni, Einar Broch Johnsen, Olaf Owe, and Ilangko Balasingham
LIPS: A Protocol Suite for Homeostatic Sensornet Management .................................................. 263
Jonathan Tate and Iain Bate
Computational Social Network Management in Crowdsourcing Environments ........................................ 273
Florian Skopik, Daniel Schall, and Schahram Dustdar

Session 9: Parallelism-Intensive and Evolving Software Systems
Naeem Muhammad, Nelis Boucke, and Yolande Berbers
Analyzing and Forecasting Near-Miss Clones in Evolving Software: An Empirical Study ........................................ 295
Minhaz F. Zibran, Ripon K. Saha, Muhammad Asaduzzaman, and Chanchal K. Roy
On the Impact of Kanban on Software Project Work: An Empirical Case Study Investigation ........................................ 305
Marko Ikonen, Elena Pirinen, Fabian Fagerholm, Petri Kettunen, and Pekka Abrahamsson
Sixth IEEE International Workshop on UML and AADL

An Efficient Modeling and Execution Framework for Complex Systems
Development .................................................................................................................. 317
Isabelle Perseil, Laurent Pautet, Jean-François Rolland, Mamoun Filali,
Didier Delanote, Stefan Van Baelen, Wouter Joosen, Yolande Berbers,
Frédéric Mallet, Dominique Bertrand, Sébastien Faucou, Abdelhafid Zitouni,
Mahmoud Boufaida, Lionel Seinturier, Joel Champeau, Thomas Abdoul,
Peter H. Feiler, Chokri Mraidha, and Sébastien Gérard

An Implementation of the Behavior Annex in the AADL-Toolset Osate2 ......................... 332
Gilles Lasnier, Laurent Pautet, Jérôme Hugues, and Lutz Wrage

Modeling and Verification of Memory Architectures with AADL and REAL .................. 338
Stéphane Rubini, Frank Singhoff, and Jérôme Hugues

Two Formal Semantics of a Subset of the AADL .......................................................... 344
Zhibin Yang, Kai Hu, Jean-Paul Bodeveix, Lei Pi, Dianfu Ma,
and Jean-Pierre Talpin

Requirements Exchange: From Specification Documents to Models ................................ 350
Morayo Adedjouma, Hubert Dubois, and François Terrier

ABV - A Verifier for the Architecture Analysis and Design Language (AADL) .................. 355
Stefan Björnander, Cristina Seceleanu, Kristina Lundqvist, and Paul Pettersson

A Tool Set for Integrated Software and Hardware Dependability Analysis
Using the Architecture Analysis and Design Language (AADL) and Error
Model Annex ............................................................................................................... 361
Myron Hecht, Alexander Lam, and Chris Vogl

Integrating AADL-Based Tool Chain into Existing Industrial Processes ..................... 367
Alexey Khoroshilov, Igor Kourenkinsky, Alexander Petrenko,
and Alexander Ugnenko

Author Index ................................................................................................................. 372
