2011 16th Conference on Electrical Power Distribution Networks

(EPDC 2011)

Bandar Abbas, Iran
19 – 20 April 2011
TABLE OF CONTENTS

Effect of Distribution System Specifications on Voltage Stability in Presence of Wind Distributed Generation ................................................................. 1
Siamak Barghi, Masoud Aliakbar Golkar, Amin Hajizadeh

Economic Evaluation of Distributed Generation in Semnan Power Grid ................................................................. 2
Mehdi Hajian, Zahra Moravej

Impact of Distributed Generation and Interruptible Load on Energy Supply Strategies of Distribution Companies in Day-Ahead Market ................................................................. 3
Sadjaw Sarkhani, Soodabeh Soleymani, Babak Mozfari, Hadi Afaqhazadeh

Optimal Distributed Generation Placement and Sizing for Loss and THD Reduction and Voltage Profile Improvement in Distribution Systems using Particle Swarm Optimization and Sensitivity Analysis ................................................................. 4
O. Amanifar

Optimal Distributed Generation Placement in a Restructured Environment via a Multi-Objective Optimization Approach ................................................................. 5
Moein Moeni-Aghtaie, Payman Dehghani, Seyed Hamid Hosseini

Optimal Capacitor Placement with Consideration of Voltage Source Harmonic Distortion effect on Radial Distribution Networks Using Binary Particle Swarm Optimization (BPSO) ................................................................. 6
Hadi Afaqhazadeh, Khallil Vahidpour, Mehdi Esfeh, Hossein Ghadimi

Using a Hybrid Evolutionary Method for Optimal Planning, and Reducing Loss of Distribution Networks ................................................................. 7
L. Mohammadid, A. Mohammadid, S. Khani, M. Tarafdar Haegh, E. Babaei

Loss Reduction Planning in Electric Distribution Networks of IRAN Until 2025 ................................................................. 8
Ali Arefi, Mahmood-reza Haghiham, Akbar Yavartala, Javad Olamaei, Hossam Keshkar

A Multiobjective Evolutionary Algorithm for Distribution System Reconfiguration ................................................................. 9
Fatemeh Nournejad, Rasool Kazemzadeh, Ahmad Sadeghi Yazdankhah

Loss Reduction Allocation to Distributed Generation Units in Distribution Systems ................................................................. 10
N. Madineh, H. Askariyan Abyaneh, M. Mousavi Agah, H. Nafisi, K. Shaludeg

Parastoo Nezamabadi, G. B. Gharehpetian

Optimal Placement of Reactive Power Compensators in a Test Radial Distribution Network ................................................................. 12
M. Rouholamini, S. Esmaeili, A. V. Mahdavinia

Comparison of Several Clustering Methods in the Case of Electrical Load Curves Classification ................................................................. 13
S. M. Bidoki, N. Mahmoudi-Kohan

Simultaneous Implementation of Optimal Demand Response and Security Constrained Unit Commitment ................................................................. 14
Mohsen Kia, Mir Mohammad Reza Sahebi, Esmaeil Abedini Duki, Seyed Hamid Hosseini

Asset Management: Condition Based Monitoring Effect on Utility Coasts and Lose Power Consumption ................................................................. 15
Gholamreza Nemati, Kamran Salehi Nasr

Significance of the Role and Implementation of Strategic Management in Electric Distribution Companies as Expected by TAVANIR Co. ................................................................. 16
Habibollah Mazaheri, Mohammad Mahmoudi Maymand, Ahmad Jamalpoor

Planning Strategic in the Form of Scientific and Practicable Model and Format of Integration Workshop (Hormozgan Electric Distribution Company Selected as a Case Study) ................................................................. 17
Farshid Malekhosseiny

Technical and Economic Evaluation of Implementing Outage Management System in Urban Distribution Systems in Iran ................................................................. 18
E. Alishahi, M. R. Haghifam, A. R. Sheikhifini, M. Ajalli

Review of UWB Technology Specifications and Benefits as a Powerful Technology to Develop Power Distribution Grid Automation Techniques ................................................................. 19
Danial Nezhad Malayeri

Control System Design for Energy Optimized Dynamic Voltage Restorer ................................................................. 20
M. Jaferi, M. A. Taghikhani

Thermal Coefficient Measurements of Typical Distribution Transformers Operating Under Imbalance Conditions ................................................................. 21
M. A. Taghikhani, M. Rafiei
Introduction of a Novel Operational Framework for Distribution Network Considering Distributed Generations and Load Elasticity Effect ................................................................. 22
Moein Choorbinnah, Mohsen Kalantar

Clustering Load Distribution Substation Based on Similarity of Load Curves Using Statistic-Fuzzy Methods ................................................................. 23
Farshid Daneshvar, Mahmod Reza Haghigham, Mohammad Sadegh Vojdani

Determining of Annual Distribution Feeder Configuration Using Load Curves Clustering ................................................................. 24
Mohammad Hosein Shariatkab, Mohammad Reza Haghigham

Effect of Two-Circuit Lines on Unbalanced Distribution Systems ................................................................. 25
Ramin Rahmat Smiti, Habibollah Razzafi, Nik Moslemi

Unbalance Fault Location in Electrical Distribution System ................................................................. 26
Misagh Aliaie Faradonbeh, Hazlita Bin Mokhila

Robust Control Design for UPFC to Improve Damping of Oscillation in Distribution System By H2 Method ................................................................. 27
F. Shalchi, H. Shaveghi, H. A. Shayanfar

Fault Location and Classification in Distribution Systems using Clark Transformation and Neural Network ................................................................. 28
S. M. Torabi

Protection of Parallel Passive Filters Against Lightning Surges ................................................................. 29
M. Asadi, A. Jalilian

A New Multi-Objective Double Inverter Based Series Compensator to Protect Sensitive Loads of Distribution System Against Utility-Side Disturbances ................................................................. 30
Hamed Abdollahzadeh, Babak Mozaffari, Soudabe Soleymani

Optimal Placement of SVC to Improve Voltage Profile Using Hybrid Genetics Algorithm and Sequential Quadratic Programming ................................................................. 31
Farzad Khandani, Soodehbe Soleymani, Babak Mozaffari

Optimum Coordination of Overcurrent Relays Using SAD Algorithm ................................................................. 32
Mojtaba Mohseni, Amir Afrooqand, F. Mohsenipour

Effect of Distribution System Specifications on Voltage Stability in Presence of Wind Distributed Generation ................................................................. 33
Siamak Barighi, Masoud Aliakbar Goikar, Amin Hajizadeh

Economic Evaluation of Distributed Generation in Semnan Power Grid ................................................................. 39
Mehdi Hajjani, Zahra Moravej

Impact of Distributed Generation and Interruptible Load on Energy Supply Strategies of Distribution Companies in Day-Ahead Market ................................................................. 47
Sadjad Sorkhani, Soodabeh Soleymani, Babak Mozaffari, Hadi Afaghzadeh

Optimal Distributed Generation Placement and Sizing for Loss and THD Reduction and Voltage Profile Improvement in Distribution Systems using Particle Swarm Optimization and sensitivity analysis ................................................................. 53
O. Aminifar

Optimal Distributed Generation Placement in a Restructured Environment via a Multi-Objective Optimization Approach ................................................................. 60
Moein Moeni-Aghaie, Payman Dehghanian, Seyed Hamid Hosseini

Optimal Capacitor Placement with Consideration of Voltage Source Harmonic Distortion effect on Radial Distribution Networks Using Binary Particle Swarm Optimization (BPSO) ................................................................. 66
Hadi Afaghzadeh, Khalil Valipoor, Mehdi Ebtehaj, Hossein Ghadimi

Using a Hybrid Evolutionary Method for Optimal Planning, and Reducing Loss of Distribution Networks ................................................................. 72
L. Mohammadian, A. Mohammadian, S. Khani, M. Tarafdarre Hagh, E. Babaei

Loss Reduction Planning in Electric Distribution Networks of IRAN Until 2025 ................................................................. 81
Ali Arefi, Mahmoud-reza Haghigham, Akbar Yavartalab, Javad Olamae, Hessam Keshkar

A Multiobjective Evolutionary Algorithm for Distribution System Reconfiguration ................................................................. 87
Fateme Nournejad, Rasool Kazemzade, Ahmad Sadeghi Yazdankhah

Loss Reduction Allocation to Distributed Generation units in Distribution Systems ................................................................. 94
N. Madedehi, H. Askarian Abyaneh, M. Mousavi Agah, H. Najafi, K. Shaludegi

Parastoo Nezamabadi, G. B. Gharehpetian

Optimal Placement of Reactive Power Compensators in a Test Radial Distribution Network ................................................................. 104
M. Rouholamin, S. Esmaili, A. V. Mahdavinia

Comparison of Several Clustering Methods in the Case of Electrical Load Curves Classification ................................................................. 110
S. M. Bidoki, N. Mahmoudi-Kohan, S. Gerami
# TABLE OF CONTENTS

Effect of Distribution System Specifications on Voltage Stability in Presence of Wind Distributed Generation .......................................................... 1
Siamak Barghi, Masoud Aliakbar Golkar, Amin Hajizadeh

Economic Evaluation of Distributed Generation in Semnan Power Grid .......................................................... 2
Mehdi Hajian, Zahra Moravej

Impact of Distributed Generation and Interruptible Load on Energy Supply Strategies of Distribution Companies in Day-Ahead Market .............................. 3
Sadjad Sarkhani, Soodehbe Soleymani, Babak Moazafar, Hadi Afaghzaadeh

Optimal Distributed Generation Placement and Sizing for Loss and THD Reduction and Voltage Profile Improvement in Distribution Systems using Particle Swarm Optimization and Sensitivity Analysis .................................................................................. 4
O. Amanifar

Optimal Distributed Generation Placement in a Restructured Environment via a Multi-Objective Optimization Approach .......................................................... 5
Moein Moeni-Aghtaie, Payman Dehghaniyan, Seyed Hamid Hosseini

Optimal Capacitor Placement with Consideration of Voltage Source Harmonic Distortion effect on Radial Distribution Networks Using Binary Particle Swarm Optimization (BPSO) .......................................................... 6
Hadi Afaghzaadeh, Khalil Valipoor, Mehdi Etehaj, Hossein Ghadimi

Using a Hybrid Evolutionary Method for Optimal Planning, and Reducing Loss of Distribution Networks ........................................................................... 7
L. Mohammadian, A. Mohammadian, S. Khani, M. Tarafdrare Haghi, E. Babaei

Loss Reduction Planning in Electric Distribution Networks of IRAN Until 2025 .......................................................... 8
Ali Arefi, Mahmod-reza Haghiyan, Akbar Yavartalah, Javad Olimaei, Hessam Keshkhar

A Multiojective Evolutionary Algorithm for Distribution System Reconfiguration .......................................................... 9
Fateme Nournejad, Rasool Kazemzade, Ahmad Sadeghi Yazdankhah

Loss Reduction Allocation to Distributed Generation Units in Distribution Systems .......................................................... 10
N. Madineh, H. Askarian Abyaneh, M. Mousavi Agah, H. Nafsi, K. Shaludegi

Parastoo Nezamabadi, G. B. Gharehpetian

Optimal Placement of Reactive Power Compensators in a Test Radial Distribution Network .......................................................... 12
M. Rouholamini, S. Esmaeili, A. V. Mahdavinia

Comparison of Several Clustering Methods in the Case of Electrical Load Curves Classification .......................................................... 13
S. M. Bidoki, N. Mahmoudi-Kohan

Simultaneous Implementation of Optimal Demand Response and Security Constrained Unit Commitment .......................................................... 14
Mohsen Kia, Mr Mohammad Reza Sahebi, Esmaeil Abedini Duki, Seyed Hamid Hosseini

Asset Management: Condition Based Monitoring Effect on Utility Coasts and Lose Power Consumption .......................................................... 15
Gholamreza Nemati, Kamran Salimi Nasr

Significance of the Role and Implementation of Strategic Management in Electric Distribution Companies as Expected by TAVANIR Co. .......................................................... 16
Habibollah Mazaheri, Mohammad Mahmoudi Maymand, Ahmad Jamalpour

Planning Strategic in the Form of Scientific and Practicable Model and Format of Integration Workshop (Hormozgan Electric Distribution Company Selected as a Case Study) .......................................................... 17
Farshid Malekhosseiny

Technical and Economic Evaluation of Implementing Outage Management System in Urban Distribution Systems in Iran .......................................................... 18
E. Alishahi, M. R. Haghiyan, A. R. Sheikhli Fini, M. Ajalli

Review of UWB Technology Specifications and Benefits as a Powerful Technology to Develop Power Distribution Grid Automation Techniques .......................................................... 19
Danial Nezhad Malayeri

Control System Design for Energy Optimized Dynamic Voltage Restorer .......................................................... 20
M. Jaferi, M. A. Taghikhani

Thermal Coefficient Measurements of Typical Distribution Transformers Operating Under Imbalance Conditions .......................................................... 21
M. A. Taghikhani, M. Rafiei
Introduction of a Novel Operational Framework for Distribution Network Considering Distributed Generations and Load Elasticity Effect ................................................................. 22
Moein Choobineh, Mohsen Kalantar

Clustering Load Distribution Substation Based on Similarity of Load Curves Using Statistic-Fuzzy Methods .......................................................... 23
Farshid Daneshvar, Mahmood Reza Haghjifam, Mohammad Sadegh Vojdani

Determining of Annual Distribution Feeder Configuration Using Load Curves Clustering .......................................................... 24
Mohammad Hosein Shariatkhah, Mahmood Reza Haghjifam

Effect of Two-Circuit Lines on Unbalanced Distribution Systems .......................................................... 25
Ramin Rahmat Samii, Hadiollah Raoufi, Niki Moslehi

Unbalance Fault Location in Electrical Distribution System .......................................................... 26
Misagh Alie Faradonbeh, Hazliz Bin Mokhill

Robust Control Design for UPFC to Improve Damping of Oscillation in Distribution System By H2 Method .......................................................... 27
F. Shalchhi, H. Shaveghi, H. A. Shayanfar

Fault Location and Classification in Distribution Systems using Clark Transformation and Neural Network .......................................................... 28
S. M. Torabi

Protection of Parallel Passive Filters Against Lightning Surges .......................................................... 29
M. Asadi, A. Jalilian

A New Multi-Objective Double Inverter Based Series Compensator to Protect Sensitive Loads of Distribution System Against Utility-Side Disturbances .......................................................... 30
Hamed Abdollahzadeh, Babak Mozaffari, Soudabe Soleymani

Optimal Placement of SVC to Improve Voltage Profile Using Hybrid Genetics Algorithm and Sequential Quadratic Programming .......................................................... 31
Farzad Khandani, Soudabe Soleymani, Babak Mozaffari

Optimum Coordination of Overcurrent Relays Using SADE Algorithm .......................................................... 32
Mojtaba Mohseni, Amir Afrozmand, F. Mohsenipour

Effect of Distribution System Specifications on Voltage Stability in Presence of Wind Distributed Generation .......................................................... 33
Siavak Barzghi, Masoud Aliabak Goikar, Amin Hajizadeh

Economic Evaluation of Distributed Generation in Semnan Power Grid .......................................................... 39
Mehdi Hajian, Zahra Moravej

Impact of Distributed Generation and Interruptible Load on Energy Supply Strategies of Distribution Companies in Day-Ahead Market .......................................................... 47
Sadjad Sarkhani, Soudabe Soleymani, Babak Mozaffari, Hadi Afaghzadeh

Optimal Distributed Generation Placement and Sizing for Loss and THD Reduction and Voltage Profile Improvement in Distribution Systems using Particle Swarm Optimization and sensitivity analysis .......................................................... 53
O. Amanifar

Optimal Distributed Generation Placement in a Restructured Environment via a Multi-Objective Optimization Approach .......................................................... 60
Mohsen Moemi-Aghaie, Payman Dehghanian, Seyed Hamid Hosseini

Optimal Capacitor Placement with Consideration of Voltage Source Harmonic Distortion effect on Radial Distribution Networks Using Binary Particle Swarm Optimization (BPSO) .......................................................... 66
Hadi Afaghzadeh, Khalil Valipoor, Mehdi Ehtehaj, Hossein Ghadimi

Using a Hybrid Evolutionary Method for Optimal Planning, and Reducing Loss of Distribution Networks .......................................................... 72
L. Mohammadian, A. Mohammadian, S. Khani, M. Tarafdarre Hagh, E. Babaei

Loss Reduction Planning in Electric Distribution Networks of IRAN Until 2025 .......................................................... 81
Ali Arefi, Mahmood-reza Haghjifam, Akbar Yavartalab, Javad Olamaei, Hessam Keshtkar

A Multiobjective Evolutionary Algorithm for Distribution System Reconfiguration .......................................................... 87
Fateme Nournejad, Rasool Kazemzade, Ahmad Sadeghi Yazdankhah

Loss Reduction Allocation to Distributed Generation units in Distribution Systems .......................................................... 94
N. Madinehi, H. Askarian Abyaneh, M. Mousavi Agah, H. Nafisi, K. Shaludegi

Parastoo Nezamabadi, G. B. Gharehpeshtan

Optimal Placement of Reactive Power Compensators in a Test Radial Distribution Network .......................................................... 104
M. Rouholamin, E. Esmaeili, A. V. Mahdavinia

Comparison of Several Clustering Methods in the Case of Electrical Load Curves Classification .......................................................... 110
S. M. Bidoki, N. Mahmoudi-Kohan, S. Gerami
Simultaneous Implementation of Optimal Demand Response and Security Constrained Unit Commitment ............................................................................................................................... 117
Mohsen Kia, Mir Mohammad Reza Sahebi, Esmaeil Abedini Duki, Seyed Hamid Hosseini

Asset Management: Condition Based Monitoring Effect on Utility Costs and Lose Power Consumption ............................................................................................................................... 122
Gholamreza Nemati, Kamran Salimi Nasr

Significance of the Role and Implementation of Strategic Management in Electric Distribution Companies as Expected by TAVANIR Co.......................................................... 127
Habibollah Mazaheri, Mohammad Mahmoudi Maymand, Ahmad Jamalpour

Planning Strategic in the Form of Scientific and Practicable Model and Format of Integration Workshop (Hormozgan Electric Distribution Company Selected as a Case Study) ............................................................................................................................... 138
Farshid Malekhosseiny

Technical and Economic Evaluation of Implementing Outage Management System in Urban Distribution Systems in Iran ............................................................................................................................... 147
E. Alishahi, M. R. Hghifam, A. R. Sheikhi Fini, M. Ajalli

Review of UWB Technology Specifications and Benefits As a Powerful Technology to Develop Power Distribution Grid Automation Techniques .......................................................... 156
Danial Nezhad Malayeri

Control System Design for Energy Optimized Dynamic Voltage Restorer ............................................................................................................................... 163
M. Jafari, M. A. Taghikhani

Thermal Coefficient Measurements of Typical Distribution Transformers Operating under Imbalance Conditions ............................................................................................................................... 169
M. A. Taghikhani, M. Rafiei

Introduction of a Novel Operational Framework for Distribution Network Considering Distributed Generations and Load Elasticity Effect ............................................................................................................................... 175
Moein Choobineh, Mohsen Kalantar

Clustering Load Distribution Substation Based on Similarity of Load Curves Using Statistic-Fuzzy Methods ............................................................................................................................... 181
Farshid Daneshvar, Mahmood Reza Haghi, Mohammad Saleh Vojdani

Determining of Annual Distribution Feeder Configuration using Load Curves Clustering ............................................................................................................................... 187
Mohammad Hosein Shariatzeh, Mohammad Reza Haghi

Effect of Two-Circuit Lines on Unbalanced Distribution Systems ............................................................................................................................... 194
Ramin Rahmat Sami, Habibollah Raoufi, Niki Moslemi

Unbalance Fault Location in Electrical Distribution System ............................................................................................................................... 199
Misagh Alire Faradonbeh, Hazline Bin Mokhlis

Robust Control Design for UPFC to Improve Damping of Oscillation in Distribution System by H2 Method ............................................................................................................................... 207
F. Shalchi, H. Shayeghi, H. A. Shayanfar

Fault Location and Classification in Distribution Systems using Clark Transformation and Neural Network ............................................................................................................................... 217
S. M. Torabi

Protection of Parallel Passive Filters Against Lightning Surges ............................................................................................................................... 225
M. Asadi, A. Jalilian

A New Multi-Objective Double Inverter Based Series Compensator to Protect Sensitive Loads of Distribution System Against Utility-Side Disturbances ............................................................................................................................... 232
Hamed Abdollahzadeh, Babak Mozaifar, Soudabe Soleymani

Optimal Placement of SVC to Improve Voltage Profile Using Hybrid Genetics Algorithm and Sequential Quadratic Programming ............................................................................................................................... 240
Farzad Khandani, Soodabeh Soleymani, Babak Mozaifar

Optimum Coordination of Overcurrent Relays Using SADE Algorithm ............................................................................................................................... 246
Mojtaba Mohseni, Amir Afroomand, F. Mohsenipour
