AERODYNAMICS III

Design and Evaluation of Multi-Element Airfoils for Rotorcraft ................................................................. 346
   Narramore, James; McCroskey, W. J.; Noonan, Kevin W.
First-Principles Based High Order Methodologies for Rotorcraft Flowfield Studies .......................................... 357
   Sankar, L. N.
Free-Wake Hover Flow Prediction with a Hybrid Potential/Navier-Stokes Solver ........................................... 370
   Moulton, Marvin; Wenren, Yonghu; Caradonna, Francis
High-Order Simulations of Wake and Tip Vortex Flowfields ................................................................. 383
   Hull, Christopher; Long, Lyle
Hovering Rotor and Wake Calculations with an Overset-Grid Navier-Stokes Solver ........................................ 397
   Strawn, Roger; Ahmad, Jassim
Improved Euler Simulation of Hovering Rotor Tip Vortices with Validation .................................................... 408
   Tang, Lei; Baeder, James D.

AIRCRAFT DESIGN I

Unmanned Transport Helicopters ................................................................. 423
   Chopra, Inderjit
Development of a Light Weight Emergency Flotation System for the SH-2G Super Seasprite .......................... 440
   Vrionides, Polis; McCoubrey, George
The Effect of Design Requirements on Conceptual Tiltrotor Wing Weight ..................................................... 449
   Peyran, Richard; Rand, Omri
Flywheel Rotor/Wing Makes Stopped Rotor Aircraft Practical ........................................................................ 464
   Pande, J. Bradley
Implementation of a Technology Impact Forecast Technique on a Civil Tiltrotor .............................................. 475
   Mavris, Dimitri; Mavris, Dimitri; Schrage, Daniel P.; Baker, Andrew
Rapid Prototype Development of the Mitsubishi Helicopter ................................................................. 488
   Toda, Nobuo; Harada, Toshio; Sato, Akira

AIRCRAFT DESIGN II

A Variable Diameter Short Haul Civil Tiltrotor ....................................................................................... 500
   Wang, James
A Computer Program for the Preliminary Design and Assessment of Future VTOL Configurations ............... 508
   Pleasants, William; Trant, James P.; Boehler, Gabriel D.
Concurrent Optimization of Aeroelastic Couplings and Rotor Stiffness for the Alleviation of Helicopter Aeromechanical Instability ....................................................................................... 529
   Hathaway, Eric; Gandhi, Farhan
Design and Development of a Four-Bladed Bearingless Main Rotor System for the USMC H-1 Upgrade Program .................................................................................................................. 545
   Sehgal, Ajay
Effect of Active Constrained Layer Damping Treatment on Helicopter Aeromechanical Stability Analysis .............................................................................................................................. 558
   Liu, Qiang; Chattopadhyay, Aditi; Gu, Haozhong; Zhou, Xu
KA-50 Attack Helicopter Acrobatic Flight ....................................................................................................... 570
   Mikheev, Sergey V.; Bourtsev, Boris N.; Selemenev, Sergey V.
Recent Applications of Design Optimization to Rotorcraft - A Survey ...................................................... 582
   Celi, Roberto

AVIONICS & SYSTEMS

Adaption of a Ground Proximity Warning System for Rotorcraft ............................................................. 604
   Funchion, Rick; Schueler, Doug; Durkin, John
USMC Combat Visions - Advanced Avionics for Next Generation Helicopters ........................................ 611
   Dowell, John
The V-22 Osprey Avionics Software Architecture: Preparing for Multi-mission Software ................................. 619
   Borkiewicz, Feliks; Borkiewicz, Feliks
Application of the Joint Technical Architecture (JTA) to the Navy MultiMission Helicopter (MMH) Program .......................................................... 624
Gaska, Thomas D.

Enhanced and Synthetic Vision System for Helicopter Search and Rescue Mission Support .................. 634
Kruk, R. V.; Link, N. K.; Mackay, W. J.; Jennings, S.

Key Aspects and Attributes of the RAH-66 Comanche Flight Control System ......................................... 641
Boczar, Bruce; Borgstrom, Dennis; Everett, Peter

Predicting Airspeed and Sideslip Angle using an Artificial Neural Network ................................................. 660
Goff, Dean; Thomas, Stephen; Jones, Massey, Colin

Rotorcraft Pilot's Associate Hierarchical Planning ...................................................................................... 669
McBryan, Bernie; Joy, Mark

CRASH SAFETY

Airframe Water Impact Analysis Using a Local/Global Methodology .......................................................... 680
Pentecote, Nathalie; Kindervater, Christof M.

Application of Skid Landing Gear Dynamic Drop Analysis ........................................................................... 691
Stephens, Brian; Evans, William L.

Crash Analysis of an Energy-Absorbing Subfloor During Ground and Water Impacts .................................. 700
Sareen, Ashish; Smith, Michael R.; Hashish, Emam

Crashworthy Evaluation of a 1/5-Scale Model Composite Fuselage Concept ............................................. 710
Jackson, Karen; Fasanella, Edwin

Crashworthy Fuel Tanks: How We Got Where We Are and Where Should We Go From Here .................. 723
Bracken, Jeffrey

Development of a Water Impact Dynamic Test Facility and Crash Testing a UH-1H Aircraft onto a Water Surface ........................................................................................................... 730
Richards, Marvin K.; Kelley, E. Allen

CREW STATION & HUMAN FACTORS

Vertical Reference Flight (VFR) The Kaman K-200 "K-MAX" Helicopter Design ............................................ 742
Haliscak, George

Apache Longbow Color AMLCD Multipurpose Display Incorporation ......................................................... 748
Little, J. Kristin

A Crew Workload Evaluation Methodology .................................................................................................. 769
Villedieu, Pierre

VOLUME 2

Digitizing the Force: Designing a Pilot Vehicle Interface to Meet Future Army Tactical Information Needs .......................................................................................................................... 780
De Cou, Michel-David V.; Kraay, Anthony G.

Helicopter Side Stick Controller .................................................................................................................... 793
Kanbayashi, Hiroyuki

Nacelle Control Augmentation For Tiltrotor Flight Directors ......................................................................... 800
Walz, Curtis; Brick, Scott; Bauer, Carl; Fischer, Douglas

DYNAMICS I

Advanced Aeroelastic Optimization Applied to an Improved Performance, Low Vibration Rotor .................. 810
Tarzanin, Frank; Young, Darrell; Panda, Brahmananda

The Development of the Total Vibration Reduction (TVR) System .............................................................. 822
Aso, Mitsuhiro; Bandoh, Syun-Ichi; Bandoh, Syun-Ichi

Helicopter Vibration Reduction through Cyclic Variations in Rotor Blade Root Stiffness .......................... 829
Anasonti-Inthra, Phurtwat; Gandhi, Fairhan

The Model 427 Pylon Isolation System ........................................................................................................ 846
Smith, Michael R.; Redinger, W. Scott
Multi-Body Analysis of the 1/5 Scale Wind Tunnel Model of the V-22 Tiltrotor .......................................................... 853
Masarati, Pierangelo; Ghiringhelli, Gian Luca; Mantegazza, Paolo; Nixon, Mark

Results of Initial Aircraft Manoeuvre Simulation on the Coupled Rotor Fuselage Model (CRFM) .........................863
Chan, Wayland Y. F.; Holton, Stephen A.; Hamm, Jonathan C.

Rotor Vibratory Hub and Blade Loads Prediction and Correlation ................................................................. 883
Wasikowski, Mark; Corrigan, John J.; Bothwell, C. Michael

DYNAMICS II

Active Control of BVI Induced Vibrations Using a Refined Aerodynamic Model and Experimental Correlation ................................................................................................................................. 897
Friedmann, Peretz; De Terlizzi, Marino

Aeroelastic Analysis of the NASA/Army/MIT Active Twist Rotor ................................................................. 914
Wilkie, William K.; Wilbur, Matthew L.; Mirick, Paul H.; Cesnik, Carlos; Shin, Sangjoon

Comprehensive Modeling of Rotors with Trailing Edge Flaps ........................................................................ 927
Straub, Friedrich K.; Charles, Bruce D.

Design, Fabrication and Testing of a Mach Scaled Rotor Model with Trailing-Edge Flaps ............................. 937
Koratkar, Nikhil A.; Chopra, Inderjit

Mach-Scale Design of a Rotor-Model with Active Blade Tips ........................................................................ 958
Bernhard, Andreas P. F.; Chopra, Inderjit

Cesnik, Carlos

DYNAMICS III

Aeroelastic Stability for Straight and Swept-Tip Rotor Blades in Hover and Forward Flight ................. 990
Maier, Thomas H.; Sharpe, David L.; Abrego, Anita I.

Aeroelastic Tailoring for Stability Augmentation and Performance Enhancements of Tiltrotor Aircraft .............................................................................................................................................. 1007
Nixon, Mark; Piatok, David; Corso, Lawrence; Popelka, David

Analysis and Control of the Transient Shipboard Engagement Behavior of Rotor Systems ......................... 1025
Keller, Jonathan; Smith, Edward C.

Implementation of Rotary-Wing Aeromechanical Problems using Differential-Algebraic Equation Solvers ............................................................................................................................................. 1040
Celi, Roberto

Overview of the EC155 Dynamics Validation Program From Design Stage up to Certification .................. 1056
Krysinski, Tomasz; Ferullo, David

Rotor Design for Whirl Flutter: An Examination of Options for Improving Tiltrotor Aeroelastic Stability Margins ............................................................................................................................................. 1064
Aceee, Cecil; Peyran, Richard; Johnson, Wayne

FLIGHT SIMULATION I

The Use of Simulation and Modeling for Acquisition, Requirements, and Training (SMART) in the Virtual Cockpit Optimization Program (VCOP) in Support of Vertical Take-Off and Landing (VTOL) Technologies ........................................................................................................................................... 1080
Thome, Michael; Dennis, Scott; Scalf, Doug; Moore, Jimmy

Verification and Validation of the Operational Capabilities of a Tactical Engagement Simulation System for the Apache Longbow Attack Helicopter ................................................................................................................................. 1087
Chalk, Carvil; William, Lewis; Papalákitis, Robert

Development of a Powerful but Inexpensive Helicopter Flight Simulator ......................................................... 1101
Rogers, Steven P.; Ashby, Charles N.; Haworth, Loran A.

Flight Simulation As A Tool To Develop V-22 Slung Load Capabilities ....................................................... 1127
Miller, David

Simulation of the human pilot applied at the helicopter / ship dynamic interface ....................................... 1145
Turner, Graham; Bradley, Roy

Terrain-Correlated Turbulence Models for Rotorcraft Nap-Of-the-Earth Flight Simulations ......................... 1157
Sahasrabudhe, Vineet
# FLIGHT SIMULATION II

RAH-66 Comanche Helicopter Flight Test ................................................................. 1176  
Packard, Charles

Rotorcraft Pilot’s Associate Full-Mission Simulation Architecture .......................... 1186  
Huff, Kip; Edwards, Eric

Rotorcraft Simulation Model Enhancement to Support Design, Testing and Operational Analysis .............................................................. 1201  
He, Chengjian; Lee, C. S.

Simulation Prediction and Flight Validation of UH-60A Black Hawk Slung-Load Characteristics .............................. 1219  
Tyson, Peter H.; Cicoliandi, Luigi S.; Tischler, Mark B.; Rosen, Aviv; Levine, Daniel; Deering, Munro

State-of-the-Art On-Deck Dynamic Interface Analysis ....................................... 1245  
Langlois, Robert; Tadros, Atif R.

# HANDLING QUALITIES I

Active Control Technology to Improve Mission Effectiveness .............................. 1256  
Rollet, Philippe

An Approach to Reducing Rotor-Body Coupled Roll Oscillations on the RAH-66 Comanche Using Modified Roll Rate Feedback ........................................................................... 1265  
Dryfoos, James; Kothmann, Bruce; Mayo, John

Control Law Design and Optimization for Rotorcraft Handling Qualities Criteria Using CONDUIT ................................................................. 1279  
Colbourne, Jason; Frost, Chad

Development and Flight Testing of a Command Validation Algorithm for a Simplex Fly-By-Wire Helicopter ............................................. 1300  
Ellis, D. Kris; Gubbels, Arthur W

Evaluating H∞ Controllers on the NRC Bell 205 Fly-By-Wire Helicopter .............. 1309  
Postlethwaite, I.; Smerlas, A. J.; Walker, D. J.; Strange, M. E.; Howitt, Jeremy; Gubbels, Arthur W

Tomashofski, Chris; Tischler, Mark B.

Optimization of Partial Authority Automatic Flight Control Systems for Hover/Low-Speed Maneuvering in Degraded Visual Environments .................................................. 1346  
Whalley, Matthew; Howitt, Jeremy; Clift, Steve

# HANDLING QUALITIES II

Aerodynamic Models and the Off-Axis Response .................................................. 1365  
Curtiss, Howard

Contrasting Effects of Control System Delay and Visual System Delay on Helicopter Pilot Performance: Preliminary Findings ....................................................... 1369  
Swail, Carl; Jennings, Sion; Craig, Greg

Development of Envelope Protection Systems for Rotorcraft ............................... 1377  
Horn, Joe; Calise, Anthony; Prasad, J. V. R.

Evaluation of Helicopter Handling Qualities Improvements During a Step Approach Using New Piloting Modes ............................................................... 1389  
Taghizad, A.; Bouwer, G.

Flight Dynamics of an Articulated Rotor Helicopter with an External Slung Load .............................................................................................. 1398  
Celi, Roberto; Fusato, Dario; Guglieri, Giorgio

A Preliminary Analysis of Indicated Torque Response Requirements for Aggressive Helicopter Heave Axis Handling ....................................................... 1411  
Erdos, Robert; Ellis, D. Kris

The RAH-66 Comanche Flight Envelope Cueing System ..................................... 1422  
Mayo, John; Iannacci, Vincenzo

# INTEGRATED MFG. PROCESS & CONTROL TECH I

Applying High-Speed Machining Techniques on Rotor Grip Configurations .............. 1437  
Leigh, Edmund; Tlusty, Jiri; Schueller, John
Ergonomic Simulation for Rotorcraft Manufacturing ................................. 1453
Dong, Hugh

Fabrication of the BA609 Wing Skin ...................................................... 1461
Carlson, David; Benda, B. J.

Inspection of Working Fasteners on the AH-64D Apache LongBow Helicopter Re-Manufacture Program .................................................. 1467
Warner, Shawn D.; Fraser, Clinton S.

Laser Trimming of Graphite-Epoxy Laminates ..................................... 1483
Ludin, Douglas

Low Cost Bonded IML-Tooled Tiltrotor Wing Program .................... 1491
Cronkhite, James D.; Dompka, Robert V.; Anderson, Timothy C.; Nunn, Kenneth E.

INTEGRATED MFG. PROCESS & CONTROL TECH II

Detection and Quantification of Fiber Waviness in Thick Composite Components ................................................................. 1501
Marshall, T.; Hurmuzlu, Yildirim

Fiber Placement of Staged Thermoset Material ..................................... 1508
Hutchins, Joanne G.

Resin Transfer Molding (RTM) of Transmission Top Case .................. 1520
Crist, Steven R.; Henry, Zachary S.

Simulation the Press Forming of Thermoplastic Composite Parts .......... 1528
Jouin, Pierre; Laananen, David; Hitt, Joseph; Halle, Frederic

Tackification of Textile Fiber Preforms in Resin Transfer Molding ......... 1535
Shih, Chih-Hsin; Lee, L. James; Coyle, Lawrence W.

Tool Engineering and Manufacturing System (TEAMS) .................... 1550
Moore, Robert A

MILITARY OPERATIONS

A Unifying Approach for Rotor-craft Information Systems .................. 1562
Garga, Amulya; Hall, David

VOLUME 3

Airborne Manned Unmanned System Technology (AMUST) Program .... 1569
Kuck, Kristopher; Peterson, Allen

Air-To-Air Starstreak - Integrating and Testing an Air Defense Missile in the Air-To-Air Role ......................................................... 1579
Barlow, Ryland; Harrison, Ronnie

Apache Longbow in Theater Missile Defense Attack Operations ........ 1593
Kraay, Anthony G.

The Magic Lantern (Adaptation)® Program ........................................... 1600
Gallagher, Frank

Rotorcraft Pilot™s Associate (RPA) Attack Mission Planner ................ 1613
Baker, Bill

PRODUCT SUPPORT

Continuous Logistics Engineering for the WAH-64: Fulfilling the Promise of 1388-2B ............................................................... 1623
Case, Michael

FAA Airframe & Powerplant Certification at a U.S. Army Depot ........ 1631
Tindall, Gary

Fultz, Christopher

A Scientific Approach to Spares Prediction ....................................... 1638
Nicholas, Paul
Storage, Analysis, Failure Evaluation, and Reclamation Of Aircraft Parts Scheduled For Disposal

Cass, Wesley

1651

PROPULSION

Variable Rotor Speed Transmission With High Speed Traction Drive

Goi, Tatsuhiko

1667

Automated Eddy Current Inspections for Turbine Engine Component Life Extensions

Caraway, John; Benson, Craig

1679

Development of a Particle Separator for the Agusta A109 Helicopter & Its Influence on Turboshaft Performance

Hendrick, Patrick; Rademeyer, Ivan

1684

Evaluation of Carburized and Ground Face Gears

Lewicki, David; Handschuh, Robert; Heath, Gregory; Sheth, Vijay

1690

Model 427 Drive System

Cope, Gary

1699

T700 Growth through Technology Insertion

Cornier, Kenneth

1710

SPECIAL SESSION 1: TECHNICAL DIRECTOR’S CHALLENGE

How Technology has Served and will Serve the Cost Reduction Target

Philippe, Galland

1715

SPECIAL SESSION IV: Rotorcraft Pilot’s Associate

Dynamic Optimal Sensor Employment

Stiles, Peter; Vandenberg, John

1726

Rotorcraft Pilot™s Associate From Concept to Flight Demonstration

Kapferer, Rich

1739

Rotorcraft Pilot™s Associate Shared Memory Task Network Architecture

McBryan, Bernie; Joy, Mark

1748

Rotorcraft Pilot™s Associate Test Approach and Results for Boeing Simulation

Benes, Reid; Robertson, Greta

1763

The Rotorcraft Pilot’s Associate Cockpit Information Manager: Acceptable Behavior from a New Crew Member

Miller, Christopher A.; Guerlain, Stephanie; Hannen, Matthew D.

1775

Rotorcraft Pilot’s Associate: Technology for the Battlefield of Tomorrow

Rippy, Lisa; George, Dimitrov

1787

Transitioning Decision Aiding Technology to the Digitized Battlefield

Bodenhorn, Chris; Hess, Janice

1793

SPECIAL SESSION V: SYSTEM HEALTH AND USAGE MONITORING

US Navy/USMC/ BFGoodrich IMD-COSSI Program: Status

Hayden, Richard E.; Muldoon, Richard

1801

In Search of a Common HUMS - Meeting Military and Commercial Requirements

Augustin, Michael J.; Cronkhite, James D.; Yeary, Robert D.

1812

SPECIAL SESSION VI: V/STOL DESIGN CONCEPTS

JSF STOVL Performance Toolset Innovations

McDevitt, M.; Bailey, E.

1821

STOVL at Sea: How the Harrier Works for the UK

George, S.

1861

An Update Status for the SH-60 Helicopter Integrated Diagnostic System (HIDS) Program
Diagnostic and Prognostic Experience ................................................................. 2124
Hardman, Bill; Hess, Andrew; McGonigle, Mike; Sheaffer, John

V-22 Drive Train Vibration Monitoring System Ground Station Development ................................................................. 2132
Dousis, Dimitri; Giles, L. Brent; Hale, R. Keith; Priest, Thomas B.

Development of New Health and Usage Monitoring System Tools Using a NASA/Army Rotorcraft ................................................................. 2150
Halmos, Zsolt; Ellerbrock, Philip

The Effects of Aerodynamic Damping on Damage Detection in Helicopter Main Rotor Blades ................................................................. 2162
Kiddy, Jason; Pines, Darryll

Structural Life Monitoring of the V-22 .......................................................................................................................... 2171
Martin, Weyman; Collingswood, Geoff; Barndt, Gene

TECHNICAL DIRECTOR’S CHALLENGE

Utility and Attack Helicopter Configurations for the USMC with Commonality in All Major Systems .......... 2185
Harse, James; Koch, Beth S.

Design and Manufacturing Efficiencies Through Modeling and Simulation in IPPD ................................................................. 2197
Sen, Joyanto K.; Daniel, John M.

Reducing Cost of T&E for Mil Hel Through ITOP ................................................................................................................................. 2207
Jones, Raymond; Schnell, John

Rotary Wing Structures Technology Demonstration Cost Savings ................................................................................................. 2212
Kay, Bruce; Schuck, Jon

Streamlined Software Development Process: A Proven Solution to the Cost/Schedule/Quality Challenge ................................................................................................................................. 2224
Maselko, William; Kahn, Ronald; Winstead, Laura

TEST & EVALUATION I

Correlation between Analyses and Wind Tunnel Test Results -What ATIC has done so far-................................. 2248
Kobiki, Noboru; Kobiki, Noboru

Experimental Study of Alternative Flow Diverting Devices for the Modified MH-6J Helicopter ................................................................. 2275
Valer, Juan; Valer, Juan; William, Lewis; Eric, Hicks

Overview of the Testing of a Small-Scale Proprotor ................................................................................................................................. 2283
Young, Larry; Young, Larry; Booth, Earl; Yamauchi, Gloria; Botha, Gavin; Davsson, Seth

Servo-Flap Rotor Power Improvement Through Wind Tunnel Testing ................................................................................................. 2295
Adrezin, Ronald; Adrezin, Ronald; Gates, Alfred; Wei, Fu-Shang

System Identification of Small-Size Unmanned Helicopter Dynamics ................................................................................................. 2305
Metzler, Bernard; Fischler, Mark B.; Kanade, Takeo

TEST & EVALUATION II

Development and Design of an Individual Blade Control System for the Sikorsky CH-53G Helicopter .......... 2317
Kunze, Oliver; Arnold, Uwe T. P.; Waaske, Stefan

Firehawk: Dual Use Fire Fighting Technology for the National Guard ................................................................................................. 2327
Peterson, Allen

IBC Effects on BVI Noise and Vibrations - A Combined Numerical and Experimental Investigation ................................................................................................. 2333
Kube, Roland; Van Der Wall, B. G.; Schultz, Klaus-Juergen; Splettstoesser, Wolf

Limited Flight Loads Survey of the AH-64 with Experimentally Repaired Main Rotor Blades ................................................................................................. 2343
Walters, Stephen; Bivens, Courtland

S-92 Helibus Test Program ................................................................................................................................................................. 2351
Oliver, Randall; Oliver, Randall

Tail shake vibration in flight: Objective comparison of aerodynamic configurations in a subjective environment ................................................................................................. 2360
De Waard, Pieter; Trouve, Michel
