49th American Helicopter Society
International Annual Forum 1993

St. Louis, Missouri, USA
19 – 21 May 1993

Volume 1 of 2

ISBN: 978-1-61782-944-4
# TABLE OF CONTENTS

## Volume 1

### ACOUSTICS

- **Noise Certification of Bell Model 412, 230, and 206L–4 Helicopters**  
  C. Cox, S. Shank, J. Brieger, T. Settle  
  p. 1

- **Flight Measurements of Blade-vortex Interaction Noise Including Comparisons with Full-scale Wind Tunnel Data**  
  G. Yamauchi, D. Signor, M. Watts, F. Hernandez, P. Lemasurier  
  p. 26

- **A Computational Study of the Aeroacoustics of Rotors in Hover**  
  J. Baeder, J. Gallman, Y. Yu  
  p. 55

- **The Importance of Tail Rotor Interaction as an Acoustic Source**  
  J. Leverton, T. Pike  
  p. 72

- **Helicopter Main Rotor/Tail Rotor Noise Radiation Characteristics from Scaled Model Rotor Experiments in the DNW**  
  K. Schultz, W. Splettstoesser  
  p. 88

### STRUCTURES & MATERIALS I

- **Structural Integrity of Composite Flexbeams**  
  A. Vizzini, S. Lee  
  p. 99

- **Strength and Damage Tolerance Evaluation of Sandwich Structure Manufactured Utilizing the Automated Tow-Placement Process**  
  S. Llorente, R. Fay, L. Kitson  
  p. 110

- **Performance of Composite Joints Utilizing Thermoplastic Fasteners**  
  A. Sawicki  
  p. 120

- **Advanced Composite Main Rotor Flexbeam from Optimization to Full Scale Multicomponent and Whirl Tower Testing**  
  B. Hamilton, N. Bell, R. Murrill, S. Flores, L. Lucchetto  
  p. 131

- **Injection Molded Notar® Fan Blade for Helicopter Dynamic Application**  
  S. Chen, R. Patel  
  p. 151

- **Bearing Fatigue and Hole Elongation in Composite Bolted Joints**  
  P. Grant, N. Nguyen, A. Sawicki  
  p. 156

- **Low Temperature Curing Adhesives for Repair**  
  D. Ruffner, R. Patel  
  p. 164

### HANDLING QUALITIES

- **Identification of UH-60 Stability Derivative Models in Hover from Flight Test Data**  
  J. Fletcher  
  p. 173

- **V-22 Load Limiting Control Law Development**  
  D. King, C. Dabundo, R. Kisor, A. Agnihotri  
  p. 201

- **The European ACT Programme: A Collaborative Approach to Handling Qualities Evaluation and Control Law Design**  
  M. Charlton, C. Guyomard, R. Lane, H. Modden, D. Schimke, A. Taghizad  
  p. 215

- **Flight Evaluation of the New Handling Qualities Criteria Using the BO 105**  
  C. Ockier  
  p. 237

- **Flight Simulation Model Application for AH-64A Apache Engine Integration**  
  P. Shanthakumar, J. Harding, T. Thompson, M. Kuehn, D. Monroe  
  p. 250

- **Helicopter Robust Nonlinear Controller Synthesis Using Approximate Linearization**  
  J. Leitner, J. Prasad  
  p. 272
CREW STATIONS & HUMAN FACTORS

Active Man-machine Interface for Advanced Rotorcraft ................................................................. 286
A. Zaklad, M. Weiland, W. Zachary, C. Fry

Inadvertent Helicopter Air Bag Deployment - Evaluation of the Effects in a Flight Simulator .................. 295
L. Bark, R. Zimmermann, K. Smith

Human Engineering Maintenance Analyses for the RAH-66 Comanche ........................................ 305
E. Wunsh, J. Grenell

AVIONICS & SYSTEMS

Fluidic Backup Flight Control and Integrated Pump-actuator for Advanced FBW Rotorcraft .................. 323
D. Muggeridge, J. Day, J. Berger

Integrated Fire, Flight and Propulsion Controls (IFFC) for a Rotorcraft Weapon System ...................... 337
J. Edwards

Development of a Large AEW/Ground Target Radar for a Shipboard Compatible Tiltrotor Aircraft .............. 347
R. Pruyn, C. Lonroth

FLIGHT SIMULATION

An Aeroelastic Model Structure Investigation for a Manned Real-time Rotorcraft Simulation ..................... 357
W. Lewis

Evaluation of Simulation Motion Fidelity Criteria in the Vertical and Directional Axis ............................ 385
J. Schroeder

Application of Real-time Flight Simulation for Design of a Helicopter Obstacle Avoidance System .............. 404
C. Sullivan, E. Wood, J. Demaio

Real Time Implementation Aspects of a Rotorcraft Turbulence Simulation Method ................................. 423
J. Prasad, G. Gaonkar, J. Riaz, D. Yingyi

Civil Tiltrotor: Flight Simulation Development of Instrument Procedures ............................................. 429
P. Klein, P. Wilkinson, L. Zmroczek

System Identification Validation of an AH-64 Aeroelastic Simulation Model .......................................... 444
S. Sturisky, D. Schrage

MANUFACTURING & PRODUCT ASSURANCE I

Fabrication of the Notar® Tailboom for the MD Explorer ...................................................................... 468
P. Jouin, R. Kulesha, G. Schindler

Cost-effective Production of Helicopter Energy-absorbing Subfloor Structures with Advanced Thermoplastic Composites ....................................................... 479
L. Bark, G. Yaniv, D. Orlino

Experiments and Modeling of Residual Deformations in the Manufacturing of Sandwich and Laminated Composite Structures ......................................................... 490
P. Handel, P. Minguet

Laser Based Alignment, Advanced Manufacturing Techniques .......................................................... 500
G. Confalone

Experimental Design Application: Udimet 720 Broaching Optimization .................................................. 515
D. Nowatney

AERODYNAMICS I

The Application of Computational Vorticity Confinement to Helicopter Rotor and Body Flows .................. 518
C. Wang, J. Bridgeman, J. Steinhoff, Y. Wenren

The Application of Vorticity Embedding to the Computation of Advancing Rotor Flows ......................... 532
K. Ramachandran, S. Schlechtriem, F. Caradonna, J. Steinhoff

Vorticity Concentration at the Edge of the Inboard Vortex Sheet ........................................................... 545
J. Kim, K. Komarath, S. Liong
A Consistent Approach for Modeling the Aerodynamics of Self-generated Rotor Blade-vortex Interactions ................................................................. 556
A. Hassan, B. Charles, H. Tadghighi, C. Burley

A Fast Adaptive Resolution Method for Efficient Free Wake Calculations ................................................................. 575
W. Miller

Unsteady Compressible Rotor Airfoil Aerodynamics Using an Automated Adaptive Finite Element Method ................................................................. 589
B. Webster, M. Shephard, Z. Rusak

Dynamic Stall Correlation of a Rotor/Wing Navier-Stokes Solver on a Massively-Parallel Computer .................... 607
B. Wake, P. Lorber

MILITARY OPERATIONS

Scenario Analysis for VTOL Vehicles using an Interactive Environment ................................................................. 622
T. Turpin, F. McQuillan

Apache Modernization - The User's Perspective ................................................................. 637
D. Sale, G. Lund

Shipboard Suitability and the UAV ................................................................. 644
B. Scholes

Development of a Realistic Combat Environment for Operational Testing ................................................................. 656
L. Weidell

The OH-58D Kiowa Warrior: "The Spirit of the Cavalry" and "The Enemy's Worst Nightmare" .................... 662
T. Cordrey, R. Cumbie

V-22 Osprey Survivability Tradeoff Studies ................................................................. 675
B. Hegdahl

Volume 2

STRUCTURES & MATERIALS II

Rival Rotorcraft Water Impact Crash Simulation Using Program Krash ................................................................. 686
G. Wittlin, M. Rapaport

Procedures Used to Ensure Strength, Endurance and Damage Tolerance of MIL Helicopter Fuselages (MI-26, MI-28, etc.) ................................................................. 697
Z. Shnurov

Advanced Aluminum Alloys for Improved Rotorcraft Reliability ................................................................. 713
G. Nanni

Flight Service Evaluation of Composite Components on the Bell Model 206L Helicopter ................................................................. 719
S. Smith, H. Wilson

Systematic Application of Holometric Synthesis for Cost-effective Flight Load Monitoring ................................................................. 740
B. Gustavsson, W. Pellum, E. Robeson

Development of a Crashworthy Crewseat for the Kaman K-1200 Helicopter ................................................................. 760
M. Richards

MANUFACTURING & PRODUCT ASSURANCE II

Flow Reduction Efforts Benefit from Computer Simulation ................................................................. 774
S. Cooper

Rapid Prototyping for the Development of Gas Turbine Engines ................................................................. 781
M. Hyduke, R. Chu

Automated Harness Design and Process Planning ................................................................. 792
G. Geanuracos, J. Hollis

Small Diameter Wire Marking for Light Weight Electrical Interconnections Systems ................................................................. 798
M. Rowland

Integration of Avionics Troubleshooting System with Interactive Electronic Technical Manuals ................................................................. 805
J. Gutlick, E. Kell
AIRCRAFT DESIGN I

The Design Evolution of the Canard Rotor/Wing ............................................................... 814
J. Rutherford, S. Bass

Advanced Civil Tiltrotor Design Optimization and Issues .............................................. 824
D. Schleicher

Some European Considerations On Civil Tilt-Rotor Efficiency And Viability ............. 841
J. Renaud, J. Weisse, B. Allard, W. Muggli, D. Ingram

Analysis of Helicopter Air-to-Air Combat Tests, Design Implications ......................... 856
K. Amer

Variable Design Criteria for Rotary Wing Aircraft Crash Resistance ......................... 880
L. Burrows

The EH101 Helicopter - A Review of its Capabilities and Technology ......................... 891
C. Battisson

The Tilt Wing Design for a Family of High Speed VSTOL Aircraft ................................ 899
W. Chana, T. Sullivan

DYNAMICS I

Stability of the Sikorsky S-76 Bearingless Main Rotor .................................................. 917
J. Wang, J. Duh, J. Fuh, S. Kottapalli

Correlation of Experimental Flap-lag-torsion Damping - A Case Study ................. 944
D. Andrade, D. Peters

Experimental Investigation of Main Rotor Wake Induced Empennage Vibratory Airloads for the RAH-66 Comanche Helicopter ......................................................... 961
K. Frederickson, J. Lamb

Ground Vibrations Tests for the High Speed Dolphin Helicopter .............................. 972
L. Girard, P. Lubrina

Full-scale Higher Harmonic Control Research to Reduce Hub Loads and Noise ........ 985
S. Kottapalli, S. Swanson, P. Lemasurier, J. Wang

Dynamics of a Rotor with Nonharmonic Control ......................................................... 997
F. Straub, L. Robinson

The Practical Implementation of an Actively Controlled Flap to Reduce Vibrations in Helicopter Rotors ................................................................. 1009
T. Millott, P. Friedmann

AERODYNAMICS II

Laser Velocimetry and Blade Pressure Measurements or a Blade-Vortex Interaction ........ 1023
S. Gorton, D. Poling, L. Dadone

Investigation of Empennage Airloads Induced by a Helicopter Main Rotor Wake ........ 1050
M. Torok, D. Roum

High Lift Concepts for Rotorcraft Applications ......................................................... 1067
Y. Yu, S. Lee, K. McAllister, C. Tung, C. Wang

V-22 Flight Test Aerodynamic Refinements .................................................................. 1093
M. Savage, M. Farrel, W. Grauer, M. McVeigh

Reduction of Tiltrotor Download .............................................................................. 1102
T. Wood, M. Peryea

Detailed Aerodynamic Design of the RAH-66 FANTAIL™ Using CFD ..................... 1117
R. Rajagopalan, C. Keys

PRODUCT SUPPORT

Integration of Publications, Training, and LSa to Support a Mature Fleet .................. 1131
M. Anderson III

Changing Role of the Contractor Field Technical Representative ............................ 1137
V. Parziale

Supporting Mature Aircraft in a Decreasing Budget Environment ............................ 1140
A. Conti, R. Cramm, D. Gearhart
Smoothing the CH-47D With the Observe, an on Board Vibration Analyzer, Tracker, and Balancer
S. Crews, V. Berger

DYNAMICS II

Correlation of the LYNX-XZ170 Flight-test Results up to and Beyond the Stall Boundary
B. Lau, A. Louie, C. Sotiriou, N. Griffiths

High Speed Tiltrotors: Dynamics Methodology
M. Moore, M. Yablonski, B. Mathew, J. Liu

Bearless Main Rotor Whirl Test: Design, Analysis And Test Results
R. Merril, B. Hamilton, V. Anand, D. Lauzon, B. Tuttle

Aeroelastic Stability Of The Mcdonnell Douglas Advanced Bearless Rotor
K. Nguyen, M. McNulty, V. Anand, D. Lauzon

Measurements Of Unsteady Pressure On A Pitching Rotor Blade
M. Lal, S. Liou, G. Pierce, N. Komerath

Wind Tunnel Modeling of High Order Rotor Vibration
J. Staley, M. Mathew, F. Tarzanin Jr.

AIRCRAFT DESIGN II

A Feasibility Study Of Using Smart Materials For Rotor Control
F. Straub

Aeroelastic Optimization Of A Helicopter Rotor With Composite Tailoring
R. Ganguli, I. Chopra

The Combat Suitability Filter for the VEcrR Project: (The Culmination of the Concept Analysis Process)
J. Davis

Material Applications To A Light Helicopter
R. Taylor, K. Nunn, C. Rogers

Downwash Design Criteria for VTOL Aircraft
K. Stanzione, L. Oliver

Optimum Design Of High Speed Prop Rotors Including The Coupling Of Performance, Aeroelastic Stability And Structures
A. Chattopadhyay, T. McCarthy, J. Madden III

Applying Technology for Cost Effective Upgrades
T. Bartley

PROPELLATION

Composite Inlet Housing for the T55 Engine
B. Pickett, A. Ben-Porat

Integrated Flight /Propulsion Control For Helicopters
S. Rock, W. Neighbors

Practical Application of Health and Usage Monitoring (HUMS) to Helicopter Rotor, Engine, and Drive Systems
J. Cronkhite

AH 64 Apache External Air Partic Le Separator (EAPS) Design And Performance
K. Boyd, R. Burgess

Seasprite Oil Out Transmission Testing
M. Abdelmasih, C. Orkin, E. Sikorski

The Compound Helicopter - The Rotorcraft of the 21st Century?
T. Jordan, D. Humperson, B. Benger

TEST & EVALUATION

Flight Research Of MI-26 Heucopter Transportation Of External Parallelepiped Cargo With Stabilizing And Aerodynamic Drag Reduction Means
V. Koslovsky, N. Sunovsky, S. Babahesh, S. Isaev
Recent NOTAR® Anti-Torque System Research and Testing at MDHC

S. Dawson, T. Thompson

Certification Of Model 230 Helicopter For Category 'A' Elevated Helipad Operations

J. Goldenberge, L. Meslin, M. Blondino, D. Williams

Full-scale Wind Tunnel Evaluation of the Sikorsky Five-bladed Bearingless Main Rotor

T. Norman, C. Cooper, C. Fredrickson, J. Herter

Variable Diameter Tiltrotor Wind Tunnel Test Results

K. Studebaker, D. Matuska

A Full-scale Test of the McDonnell Douglas Advanced Bearingless Rotor in the NASA Ames 40- by 80-Ft Wind Tunnel

M. McNulty, S. Jacklin, B. Lau
