2011 24th IEEE-CS Conference on Software Engineering Education and Training

(CSEE&T 2011)

Honolulu, Hawaii, USA
22 – 24 May 2011
## Preface

Foreword

## Academic Research Papers

**PROGTEST: An Environment for the Submission and Evaluation of Programming Assignments based on Testing Activities**
Draylson Micael de Souza, José Carlos Maldonado, and Ellen Francine Barbosa — University of São Paulo, Brazil  
1

**Predicting Individual Performance in Student Project Teams**
Matthew L. Hale, Noah M. Jorgenson, and Rose F. Gamble — University of Tulsa, USA  
11

**Communication Genres: Integrating Communication into the Software Engineering Curriculum**
Michael Carter, Mladen Vouk, Gerald C. Gannod, Janet E. Burge, Paul V. Anderson, and Mark E. Hoffmann — North Carolina State University, USA; Miami University, USA; Quinipiac University, USA  
21

**Teaching Software Engineering with SimulES-W**
Elizabeth Suescún Monsalve, Vera Maria B. Werneck, and Julio Cesar Sampaio do Prado Leite — PUC-Rio, Brazil; Universidade do Estado do Rio de Janeiro, Brazil  
31

**Investigating Student-Instructor Interactions When Using Pair Programming: An Empirical Study**
Alex Radermacher and Gursimran Walia — North Dakota State University, USA  
41

**Supporting Introductory Test-Driven Labs with WebIDE**
Thomas Dvornik, David S. Janzen, John Clements, and Olga Dekhtyar — Salesforce.com, USA; California Polytechnic State University, USA  
51

**Competence Analysis of IT Professionals Involved in Business Services - Using a Qualitative Method**
Hsin-Ke Lu, Chia-Hui Lo, and Peng-Chun Lin — Chinese Culture University, Taiwan; National Taiwan Normal University, Taiwan  
61

**An Exploration of Knowledge and Skills Transfer from a Formal Software Engineering Curriculum to a Capstone Practicum Project**
Ray Bareiss and Edward Katz — Carnegie Mellon Silicon Valley, USA  
71

**Teaching Software Project Management using Simulations**
Andreas Bollin, Elke Hochmüller, and Roland T. Mittermeir — Universität Klagenfurt, Austria; Carinthia University of Applied Sciences, Austria  
81

**Educating Software Engineers of the Future: Software Quality Research through Problem-Based Learning**
Ita Richardson, Louise Reid, Stephen B. Seidman, Bob Pattinson, and Yvonne Delaney — University of Limerick, Ireland; Texas State University, USA  
91

**An Overview of the Main Design Characteristics of Simulation Games in Software Engineering Education**
Daniela C. C. Peixoto, Rodrigo M. Possa, Rodolfo F. Resende, and Clarindo Isaías P. S. Pádua — Federal University of Minas Gerais, Brazil  
101

**Industry Academia Collaboration Model: The Design Challenges**
Manisha and Manoj Manuja — Infosys Technologies Ltd., India  
111

**Analysis of the Motivation of Learners in the In-House Training of Programming in Japanese ICT Industries**
Hidekuni Tsukamoto, Hideo Nagumo, Yasuhiro Takemura, and Kenichi Matsumoto — Osaka University of Arts, Japan; Niigata Seiryo University, Japan; Nara Institute of Science and Technology, Japan  
121
Contributions to Mini-Track on Systems and Software Engineering

Experience Teaching Software Project Management in both Industrial and Academic Settings
Philippe Kruchten — University of British Columbia, Canada ................................. 199

Educating Software Engineers to Become Systems Engineers
Supannika Koolmanojwong and Barry W. Boehm — University of Southern California, USA .................................................. 209

Teaching Systems Engineering to Software Engineering Students
Richard E. Fairley and Mary Jane Willshire — Software and Systems Engineering Associates, USA .......................... 219

In-Depth Teaching / Training Experience Reports

Using Abstraction and Web Applications to Teach Criteria-Based Test Design
Jeff Offutt, Nan Li, Paul Ammann, and Wuzhi Xu — George Mason University, USA ................................................................. 227

Design and Delivery of a Modern Mobile Application Programming Course - An Experience Report
Meyer Cu Tanuan — Conestoga College Institute of Technology and Advanced Learning, Canada .......................... 237

Some Observations from Releasing Student Projects to the Public
Damith C. Rajapakse — National University of Singapore, Singapore .................................................. 247

The Design and Implementation of an Innovative Online Program for a Master of Science Degree in Computer Science - Software Engineering Specialization
Laura J. White and John Coffey — University of West Florida, USA .................................................. 257

Development of North Carolina’s First Software Engineering Program: An Experience Report
Nasseh Tabrizi, Sergiy Vilkomir, and Junhua Ding — East Carolina University, USA .................................. 266

Guiding Global Software Development Projects using Scrum and Agile with Quality Assurance
Christelle Scharff — Pace University, USA .................................................. 274

Delivering PSP Course in Tertiary Education Environment: Challenges and Solution
Guoping Rong, He Zhang, Zhenyu Chen, and Dong Shao — State Key Laboratory for Novel Software Technology, China; Nanjing University, China; NICTA, Australia; University of New South Wales, Australia .................................................. 284

Integrating Instructional and Study Materials to Tailor a Student-Specific Resource
J. Yates Monteith and John D. McGregor — Clemson University, USA .................................................. 294
Making Winners for Both Education and Research: Verification and Validation Process Improvement Practice in a Software Engineering Course
Qi Li and Barry W. Boehm — University of Southern California, USA .......................... 304

A New CS0 Course for At-Risk Majors
Mona Rizvi, Thorna Humphries, Debra Major, Heather Lauzun, and Meghan Jones — Norfolk State University, USA; Old Dominion University, USA ................................................................. 314

The Virtual Agile Enterprise: Making the Most of a Software Engineering Course
Fatma Meawad — German University in Cairo, Egypt ...................................................... 324

An Introductory Course on Software Engineering on Self-Organization in Swarm Robotics
Michael Uelschen and Heinz-Josef Eikerling — University of Applied Sciences Osnabrück, Germany ............................................................... 333

Engineering a Successful Partnership Between Academia and the Financial Industry: A Software Engineering Program for IT Professionals
Sotiris Skevoulis — Pace University, USA ................................................................. 343

Teach Project Management, Pack an Agile Punch
Shankar Venkatagiri — IIM Bangalore, India ............................................................. 351

Group Project Work from the Outset: An In-depth Teaching Experience Report
Martin Shepperd — Brunel University, UK ................................................................. 361

Read Before You Write
Thomas B. Hilburn, Masood Towhidnejad, and Salamah Salamah — Embry-Riddle Aeronautical University, USA ................................. 371

Work in Progress Reports

Mystery Bug Theater
Renée Bryce and Vicki Allan — Utah State University, USA ........................................ 381

How Can We Make Software Engineering Text Books Well-founded, Up-to-date, and Accessible to Students?
David Broman and Kristian Sandahl — Linköping University, Sweden ......................... 386

Teaching Software Testing Methods Based on Diversity Principles
Zhenyu Chen, Jinyu Zhang, and Bin Luo — Nanjing University, China ........................ 391

Incorporating Real-World Industrial Testing Projects in Software Testing Courses: Opportunities, Challenges, and Lessons Learned
Vahid Garousi — University of Calgary, Canada ............................................................ 396

A Learning Methodology based on Semantic Tableaux for Software Engineering Education
Rafael del Vado Vírseda — Complutense University of Madrid, Spain .......................... 401

Toward Instant Gradeification
Daniel M. Zimmerman, Joseph R. Kiniry, and Fintan Fairmichael — University of Washington at Tacoma, USA; IT University of Copenhagen, Denmark; University College Dublin, Ireland ............................................. 406

An Introductory Software Engineering Course for Software Engineering Program
Dong Shao, Bin Luo, Eryu Ding, and Qin Liu — Nanjing University, China .................... 411

Making the Comprehension of Software Architecture Attractive
Claudia Susie C. Rodrigues and Cláudia M. L. Werner — COPPE/UFRJ, Brazil ............. 416

Teaching UML Using Umlpe: Applying Model-Oriented Programming in the Classroom
Timothy C. Lethbridge, Gunter Mussbacher, Andrew Forward, and Omar Badreddin — University of Ottawa, Canada ........................................... 421

Effective Real-World Project Collaboration: Strategies from a Cyber Security Degree Program
Wajee Chookittikul and Peter E. Maher — Phetchaburi Rajabhat University, Thailand; Webster University, USA .............................................. 429

Short Papers

Software Development as Service to the Student Community: An Experiential and High Student Involvement Approach to Software Engineering Education
John C. Georgas — Northern Arizona University, USA ................................................ 434
Continued Assessment of Students’ Learning Experience in an Oral Communication Course at MIT for EECS Majors
Tony L. Eng and Rudolph Mitchell — MIT, USA ............................................................... 439

Updating CS Capstone Projects to Incorporate New Agile Methodologies used in Industry
Dean Knudson and Alex Radermacher — North Dakota State University, USA ................. 444

How Middle School Teachers Solved Our SE Project Problems
Elizabeth Sweedyk — Harvey Mudd College, USA ......................................................... 449

Teach Sustainability in Software Engineering?
Birgit Penzenstadler and Andreas Fleischmann — Technische Universität München, Germany .......................................................................................... 454

Software Engineering or Soft Engineering?
Ken Robinson and Peter Ho — The University of New South Wales, Australia ................. 459

Retrospectives in a Software Engineering Project Course: Getting Students to Get the Most from a Project Experience
Steve Roach — University of Texas at El Paso, USA ......................................................... 467

Using Community-based Projects in Software Engineering Education
Roshanak Roshandel, Jeff Gilles, and Richard LeBlanc — Seattle University, USA ............. 472

Empirical Assessment of Languages for Teaching Concurrency: Methodology and Application
Sebastian Nanz, Faraz Torshizi, Michela Pedroni, and Bertrand Meyer — ETH Zurich, Switzerland; University of Toronto, Canada ................................................................. 477

Comparing Extreme Programming and Waterfall Project Results
Feng Ji and Todd Sedano — Carnegie Mellon Silicon Valley, USA .................................... 482

Contextual Android Education
James Reed and David S. Janzen — Intuit Inc., USA; California Polytechnic State University, USA .......................................................................................... 487

Research and Practice on Software Engineering Undergraduate Curriculum NJU-SEC2006
Ding Eryu, Bin Luo, Daliang Zhang, Jidong Ge, Dong Shao, and Haoran Wang — Nanjing University, China ................................................................. 492

The Challenge and Practice of Creating Software Engineering Curriculum
Yanchun Sun — Peking University and Ministry of Education, China .............................. 497

MSE Studio Project: The Viewpoint of a UC Student
António Damasceno — CMU, USA and University of Coimbra, Portugal ......................... 502

Incremental Sequential Problem Based Training Model [Pleaseinsertintopreamble] Institute Corporate Readiness
Sundaresan Iyer, S. Meenakshi, and Anooja Mary Jacob — Infosys Technologies Limited, India .......................................................................................... 507

The Practical Method of Motivating Students to Iterative Software Development
Ondřej Macek and Martin Komárek — Czech Technical University in Prague, Czech Republic .......................................................................................... 512

Highly Collaborative Workshops

International Workshop on Distance Learning Support for Postgraduate Programs in Software Engineering (e-gradSE)
Itana M. S. Gimenes, Leonor Barroca, and Ellen Francine Barbosa — Universidade Estadual de Maringá, Brazil; The Open University, UK; Universidade de São Paulo, Brazil ................................................................. 517

SMArtphones in the Curriculum worKshop (SMACK 2011)
Jules White, Jeff Gray, and Adam Porter — Virginia Tech, USA; University of Alabama, USA; University of Maryland, USA ................................................................. 520

Incorporating Software Architecture in the Computer Science Curriculum
Martin L. Barrett, Ayşe Başar Bener, and Steve Chenoweth — East Tennessee State University, USA; Ryerson University, Canada; Rose-Hulman Institute of Technology, USA ................................................................. 523
Panel Sessions

Is Integration of Communication and Technical Instruction Across the SE Curriculum a Viable Strategy for Improving the Real-World Communication Abilities of Software Engineering Graduates?
Gerald C. Gannod, Janet E. Burge, Paul V. Anderson, and Andrew Begel — Miami University, USA; Microsoft Research, USA ................................. 525

Teaching Software Testing: Experiences, Lessons Learned, and the Path Forward
W. Eric Wong, Antonia Bertolino, Vidroha Debroy, Aditya Mathur, Jeff Offutt, and Mladen Vouk — University of Texas at Dallas, USA; Italian National Research Council, Italy; Purdue University, USA; George Mason University, USA; North Carolina State University, USA ........................................... 530

The Role of Graduate Software and Systems Engineering Bodies of Knowledge in Formulating Graduate Software Engineering Curricula
Barry W. Boehm, Pierre Bourque, Don Gelosh, Thomas B. Hilburn, Art Pyster, Mary Shaw, and J. Barrie Thompson — University of Southern California, USA; Ecole de Technologie Superieure, Canada; Department of Defense, USA; Embry-Riddle Aeronautical University, USA; Stevens Institute of Technology, USA; CMU, USA; University of Sunderland, UK ..................................................... 535

Practice and Methods Presentations, and Tutorials

A Quantitative Usability Assessment Method for Inclusion in Software Engineering Courses
Bonnie E. John — IBM Research Watson, USA ................................................................. 537

Teaching Second-Level Java and Software Engineering with Android
Sarah Heckman, Thomas B. Horton, and Mark Sherriff — North Carolina State University, USA; University of Virginia, USA .......................... 540

Structuring a Software Engineering-based Curriculum: Tutorial Presentation Summary
Mehdi Jazayeri — University of Lugano, Switzerland .............................................................. 543

Pex4Fun: Teaching and Learning Computer Science via Social Gaming
Nikolai Tillmann, Jonathan de Halleux, and Tao Xie — Microsoft Research, USA; North Carolina State University, USA ........................................ 546

SLPC++: Teaching Software Engineering Project Courses in Industrial Application Landscapes - A Tutorial
Bernd Bruegge, Helmut Naughton, and Michaela Gluchow — Technische Universitat Munchen, Germany .......................................................... 549

Posters

Mission to Mars: An Agile Release Planning Game
Philippe Kruchten and James King — University of British Columbia, Canada; Software Education, Australia .................................................. 552

Hard Choice: A Game for Balancing Strategy for Agility
Nanette Brown, Robert L. Nord, Ipek Ozkaya, Philippe Kruchten, and Erin Lim — SEI/CMU, USA; University of British Columbia, Canada ................................................................. 553

Using Games in Software Engineering Education to Increase Student Success and Retention
C. Shaun Longstreet and Kendra M. L. Cooper — University of Texas at Dallas, USA .......................... 554

Teammates: A Cloud-Based Peer Evaluation Tool for Student Team Projects
Gerald Goh, Xiaoni Lai, and Damith C. Rajapakse — National University of Singapore, Singapore ................................................................. 555

A Proposal for an Educational System Service to Support Teaching/Learning Process for Logic Programming
Eric R. G. Dantas, Ryan R. de Azevedo, Cleiton M. O. Rodrigues, Silas C. Almeida, Fred Freitas, and Vinicius C. Garcia — Federal University of Pernambuco, Brazil ................................................ 556

Agile Methods in Thai Higher Education and Beyond
Wajee Chookittikul, Peter E. Maher, and Janet L. Kourik — Phetchaburi Rajabhat University, Thailand; Webster University, USA .......................... 557

Erase and Rewind [Please insertintopreamble] Learning by Replaying Examples
Lile Hattori, Alberto Bacchelli, Michele Lanza, and Mircea Lungu — University of Lugano, Switzerland; University of Berne, Switzerland ............................................. 558

Grading Code Quality of Programming Assignments Based on Bad Smells
Woei-Kae Chen and Pin-Ying Tu — National Taipei University of Technology, Taiwan ................................................................. 559
