Second International Conference on Environmental Science and Technology 2006

Houston, Texas, USA
19-22 August 2006

Volume 1 of 2

Editors:

William G. Lyon  Jihua Hong
Steven K. Starrett

INTRODUCTION
William G. Lyon, Steven K. Starrett, Jihua Hong ............................................. 1

WATER POLLUTION AND WATER QUALITY CONTROL

Rivers, Lakes and Estuary Systems
Study on the Effects of Microbubbles to Improve Oxygen-Deficient Water.
Mohammad Shahidul Islam, Masahiko Isobe, Yukio Koibuchi, Jun Sasaki .................. 4

The Concentration, Sources and Control of Nitrate-Nitrogen Pollution Along the Cameroon Coastline.
Eric Awa Teyim, Pius Mbu Oben, Benedicta Mbu Oben and Aaron Suh Teneng, George Elambo Nkeng ................................................................. 11

Metal Distribution and Bioaccumulation in Water and Fish of an African Lake.
George E. Nkeng, Benedicta O. Oben, Pius M. Oben, Alex O. Ugwumba, Tonye G. Okorie, Joseph I. Uponi, Horst Grimme ......................................................... 17

Bacterial Source Tracking in an Urban River using Specific Gene Markers. A. Mark Ibekwe, Stephen R. Lyon, Menu Leddy ................................................................. 30

Wind-Induced Entrainment in Smal Scale Closed Density-Stratified Water Body with Floating Vegetation. Akinori Ozaki, Ken Mori ........................................................................ 36

Selenium Removal in San Joaquin Marsh: San Diego Creek Watershed, Southern California.
Barry Hibbs, Mercedes Merino, Henry Jones ............................................................. 42

Influence of Hurricane Katrina on Water Quality. Aixin Hou ........................................ 48

Nutrient Flux and Budget in Ebro Estuary. Orenigo, M.A.; Martí, C.M.; Falco, S.; Rodilla, M.; González del Rí o, J.; Romero, I.; Niencheski, LF. ........................................... 48

Water Resources and Watershed Management
Sustainable Development Manner of Groundwater Resources in Loess Area of Zhidan, Jingbian, China. WANG Wei, QIN Yupeng, CHEN Jianmin ......................................................... 49

Longitudinal Surveys Identifying Key Contaminant Sources In a Dairying Watershed. R. J. Wilcock ........... 55

Multiple Use Water Schemes –Implication on sustainable Livelihood. Dhruba Pant, Kamal Gautam, Sabita Dhakhwa ............................................................................. 61

Environmental Problems Caused by Unreasonable Use of Water Resources in Yinchuan Plain.
Hui Qian, Yaqiao Sun, Yan Dou .................................................................................. 67

Deoxygenation and Contamination of Reservoir Metalimnion. Kohji Michioku, Hideyuki Kotani ........ 73

Nitrogen Isotopes Support Model of Selenium Mobilization by Nitrate. Rachel Andrus, Barry Hibbs ........................................................................................................... 80

Open Services-Oriented Architecture for Accessing Hydrologic Time Series Repositories.
I. Zaslavsky, D. Maidment, D. Tarboton, M. Piasecki .................................................. 86

Non-point Sources
Soil Nutrient Changes as Influenced by Different Agroecosystem Management Practices.
Xinyu Zhang, Liding Chen, Bojie Fu, Qi Li, Xin Qi, Yan Ma ........................................ 92

Groundwater
Li-Yunfeng, Fu-Xiaogang, Song-Guohui, Wu-Yaoguo, Wang Jiangxia, Hou-Guangcai .......... 104

Effect of Subgrade Layer Property on Heavy Metal Transport from Fly Ash Stabilized
Subbase in Highway. Sazzad Bin-Shafique, Craig H. Benson, Tuncer B. Edil ..................... 110

Study of the Additional Loading Effect from Groundwater Pumping on Land Subsidence in Xi’an.
Hui Zhao, Hui Qian, Peng Jianbing ................................................................................. 117

Leaching of Heavy Metal into Ground Water- Long Term Amounts and Effects.
Owusu Akyaw Kwarteng .................................................................................................. 123

Model Investigations of Groundwater Pollution by Nitrogen Compounds. Vida Rutkovic, 
Laima Cesoniene, Gintautas Mogeris ............................................................................ 128

Wastewater Discharge Management
Residential Water Use Impact on Total Dissolved Solids Concentration.
M. Brett Borup, Shawn Wendt .......................................................................................... 137

Case Study of Regulatory Agency Cooperation in Meeting a Shared Site Objective.
Robert A. Ellgas, Robert M. Gray ...................................................................................... 142

A New Membrane Technology for Waste Water Management.
Gerry Lachut, Howard Reed ............................................................................................. 147

Drinking Water Purification
Biopolymer Alginate: A Potential Coagulant for Water Treatment. F. Dilek Sanin, 
H. Aylin Coruh, A. Mete Yuksel ..................................................................................... 148

Preparation and Characterization of Photocatalysts with Visible Light Activity by
Tetrabutyl Titanate. Xianhuai Huang, Qilin Li, Yuchao Tang ............................................ 155

Nanotechnology for Drinking Water Purification. Allen W. Apblett, Satish Kuriyavar, 
Abdulaziz Bagabas, Alan Piquette .................................................................................. 161

Drinking Water Pretreatment and Protection
Rangesh Srinivasan, He Huang, George A. Sorial ................................................................. 162

DBPs in Two Drinking Water Supply and Distribution Systems in Southern Taiwan.
Han Chia-Yun, Lou Jie-Chung ........................................................................................... 168

Optimizing the Treatment Efficiency and Formation of DBP in Water Treatment Processes.
Lin Yung-Chang, Lou Jie-Chung ........................................................................................ 174

The Sequential Chlorination Process for Integrative Control of DBPs and Microorganism.
Xiaoqian ZHANG, Chao CHEN, Jing LIU, Wenjie HE, Hongda HAN ................................. 179

Water Environmental Capacity Calculation Based on Unascertained Information.
SUN Xiu-ling, CAO Sheng-le, CHU Jun-da ........................................................................ 186

Regeneration of Ion-Exchange Resins Using Biodegradation for Perchlorate Removal
from Waters. Jacimaria R. Batista, Peter Jensen ................................................................. 192

Chemical, Surface-Chemical and Physical Properties of Bioflocs in Response to Growth Conditions.
F. Dilek Sanin, Mohamed Lamin Sesay, Burcu Durmaz ...................................................... 198

Photocatalytic Water Decontamination
Treatment of Industrial Waste Water using Photooxidation and Bioaumentation Technology.
M.T.Pandya ........................................................................................................................ 199

Transformation Mechanism of the Degradation of EDC by Photo-Induced Fenton’s Process.

Xenon Beam Radiation Assisted Degradation of an Organic Dye in Aqueous Medium.
Yong Zhao, Nageswara R. Yesu, Rafael Ordonez, Maryam C. Zarei, Geoffrey B. Saupe 218

Synthesis and Optimization of New Catalysts for Photolytic Water Decontamination.  
Rafael Ordonez, Nageswara R. Yesu, Geoffrey B. Saupe 218

Phosphorus Wastewater Biotreatment  
Effect of pH on the Competition Between PAOs and GAOs. Yang You, Yongzhen Peng, Zhibo Liu 219

Nitrogen Wastewater Biotreatment  
Simultaneous Nitrification and Denitrification in Pilot-Scale Pre-Anoxic Anaerobic Oxidation Ditch  

Nitrite-Type Nitrification from Domestic Wastewater Using Real-Time DO and pH Control.  
Yongzhen PENG, Shouyou GAO, Shuying WANG 233

Microbiology/Biochemistry of the Nitrogen Cycle - Innovative Process Applications for  
Nitrogen Removal. Alphonse Warakomski 240

Enhancing Nitrogen Reduction in Advanced Individual Onsite Wastewater Treatment Systems.  
Joe C. Yelderman, Jr., Ronald J. Suchecki Jr., Brian L. Scheffe, Robert K. Pertuit 241

Sludge Treatment  
David Montag, Katrin Gethke, Johannes Pinnekamp 242

Sewage Sludge – Difficult Waste or Valuable Material. Stephan Köster, Silvio Beier,  
Johannes Pinnekamp 249

Effect of Acclimation Period on Kinetics of Polymer Removal by Activated Sludge.  
Yuu UBUKATA 255

Industrial Wastewater Biotreatment  
Biodegradation of Complex Phenolic Mixtures using Hybrid Reactor.  
Anushyaa Ramakrishnan, S. K. Gupta 256

Color Removal from dye wastewater under Anaerobic Conditions.  
Harpreet S. Rai, Prasanna K. Mohan, Uttam C. Banerjee 262

Wei Li, Ma Fang, Yao Jie, Aolei Nari, Liu Guang-ming, Zhang Zhao-han 269

Changes in Dewaterability of Mixed Culture in Relation to Carbon Source.  
Selim Sanin, Gonca Yilmaz 275

Biomethanation of Cheese Whey in High-Rate Bioreactors. Harpreet S. Rai, Prasanna K. Mohan 280

Application of a Novel Concept of Wastewater Pre-Treatment in Textile Finishing Industry.  
Ralf Minke, Ulrich Rott 285

Bee Ting Low, Yun-Peng Ting, Shubo Deng 286

Municipal Wastewater Biotreatment  
Polymer-Treated Woody Biomass: A Filtration Medium for Removing Phosphate from Water.  
Thomas L. Eberhardt, Soo-Hong Min 287

Endogenous Denitrification to Enhance Nitrogen Removal from Domestic Wastewater in Pilot  
Oxidation Ditch. Shouyou GAO, Yongzhen PENG, Shuying WANG, Hongxun HOU 293

Amount of Metabolite from Pure Substrate by Activated Sludge. Yuu UBUKATA 300

Enhanced Wastewater Purification by Floating Aquatic Plants. Y. Zimmels, F. Kirzhner,  
A. Malkovskaja, A. Kadmon 307

Novel Method for Municipal Wastewater Treatment. Taleb H. Ibrahim, Ahmed Aidan,
Adsorption for Wastewater Treatment
Adsorbent Selections for the Removal of Anionic Surfactants from Laundry Rinsing Water.

Natasja Schouten, Louis van der Ham, André de Haan, Gert-Jan Eeuverink, Sybrands Metz

Removal of Uranium From Solution by Schwertmannite Adsorbent Using High Gadien Magnetic Separation.

Satoshi Kato, Osuke Miura, Daisuke Ito, Yoshiaki Takahashi, Yukio Wada

Khajornsak Sopajaree, Warunyoo Songkran

Removal of Dyes from Textile Industry Wastewater Using Adsorption Technique.

Muhammad Ahsan Iqbal, Muhammad Arif Butt, Tahir Jamil

Kinetic Aspects of Arsenate and Phosphate Adsorption onto Granular Ferric Hydroxide (GFH).

Alexander Sperlich, Benno Baumgarten, Arne Genz, Mathias Ernst, Martin Jekel

Polyacrylic Acid Grafted Chitosan Beads for Highly Effective Adsorption of Lead Ions.

Renbi Bai, Nan Li

Amino Acid Uptake and Phosphate Release by Anaerobic/Aerobic Activated Sludge.

Yuu UBUKATA, A. Ibe

Physico-chemical Wastewater Treatment
Characteristics and Coagulation Mechanism of Macromolecular Coagulant which Traps Heavy Metals.

Qing Chang, Mingquan Yu

Extractants for Phenol Recovery by Solvent Impregnated Resins.

Bernhard Burghoff, Louis van der Ham, André de Haan

Treatment of Synthesis Wastewater by Fenton Method and Ferrite Process.

Huang Yu-Jen, Lou Jie-Chung

Catalytic Oxidation of Dye Wastewater with Chlorine Dioxide.

Wang Cheng-tao, He Qi-huan, He Peng

Study on the New Type of Mixing Coagulants to Treat Oilfield Wastewater.

Tang Zhengzheng, Zhao Lin, Lu Yiren, Tan Xin

A H$_2$O$_2$-Assisted Photoelectrocatalytic Oxidation Process for Water and Wastewater Treatment.

X. Z. Li, Y. B. Xie

Treating Heavy Metal Laboratory Waste Liquid by Ferrite Process and Auxiliary Methods.

Chien-Kuei Chang, Lou Jie-Chung

Reactions and Degradation of Wastewater Contaminants
Respirometer Study and Simulation of the Biodegradation Process of Endocrine Disrupting Compounds in Wastewater Treatment Plants.

Zlata Simunic-Grenoble, Chunlong Zhang

The Importance of Mixing in a Homogenous Advanced Oxidation Process.

M. Brett Borup

Im-Gyu Byun, Ju-Hyun Go, Jeung-Jin Park, Tae-Joo Park, Tae-Ho Lee

Effect of Ultrasonic Irradiation on the Catalytic Activity and Stability of α-FeOOH in the Presence of H$_2$O$_2$ on Dye Degradation.

M. Muruganandham, Jerry J. Wu

Mineralization of N-Methylpyrrolidone by Ozone Based Advanced Oxidation Processes.

M. Muruganandham, Jerry J. Wu

AIR POLLUTION AND AIR QUALITY CONTROL

Aerosol
Aerosol Deposition Fluxes and Deposition Velocities Calculated from $^{210}$Pb Measurements.

Alfred S. Likuku

Electrostatic Field-sampler for Collection of Fine Particles for Analysis and Bioassays.
Prediction the Effects of Bevel Edges on Bevel Edge Dust Catcher Performance. Li Shanhong, Li Caiting, Zeng Guangming, Li Simin, Zhai Yunbo .......................................................... 411

Collection Patterns of A Single Drop, and A Series of Drops, Falling Through Self-Expanding Arrays of Charged Particulates. S. Kojevnikova, Y. Zimmels, Y. Agnon ........................................... 417

Climatology of Aerosol Radiative Properties in Northern China. Xingna Yu, Tiantao Cheng, Jianmin Chen, Yan Liu .......................................................... 423

Source Apportionment Modeling of PM$_{2.5}$ in Corpus Christi, Texas. Priya Subramoney, Saritha Karnae, Kuruvilla John ............................................................................. 423

Air Quality Assessment
Sulfur Dioxide Emission from Coal in China and its Temporal Variations.

Kouhei Yamamoto, Yongliang Ma, Jiming Hao, Naohiro Kitano ........................................... 424

Linkage from PSI to AQI in Taiwan. Chung-Ming Liu, C. Y. Young, Yen-Chih Lee ................. 429

Ambient Air Quality Trends and Driving Factor Analysis Since 1980’s in Beijing, China.

ZHANG Ju, MIAO Hong, OUYANG Zhiyun, WANG Xiaoke ........................................... 434

Atmospheric Volatile Organic Compounds in an Electronic-Industrial City in Korea.

Sung-Ok Baek, Young-Kyo Seo .......................................................... 442

Impact of Ozone Precursor Emissions in the Corpus Christi Urban Airshed.

Zuber Farooqui, Kuruvilla John ............................................................................. 449

Transport of Air Pollutants
Selection of an Appropriate Model to Predict Plume Dispersion in Coastal Area.

Park, O. H., Seok, M. G. ..................................................................................... 450

Major PM$_{2.5}$ Episodes Affecting a Semi-Arid Coastal Urban South Texas Region.

Saritha Karnae, Kuruvilla John ............................................................................. 455

Waste/Hazardous Gas Control Techniques
Integrated Cyclic Two Bed Adsorption and TBAB for VOC Emission Control.

Zhangli Cai, George A. Sorial .................................................................................. 456

Trickle Bed Air Biofilter Performance for Removal of Multicomponent VOCs.

Zhangli Cai, Daekeun Kim, George A. Sorial ........................................................ 461

Basic Studies on Complex Type Acid Mist Adsorbent. Yan-Lei Wang, Jian Li, Yu-Quan Jin,

Yi-Li Li, Bing Tang, Hong Ji ..................................................................................... 467

Assessing the Efficiency of Ozone/UV/H$_2$O$_2$ Wet-Scrubbing of Waste Water that Contains VOCs.

Hsieh Fu-Chen, Lou Jie-Chung .................................................................................. 472

Collection Characteristics of Semi Wet Type Multi-Stage Porous Plate System (Pilot Scale).

Seok-Jun Yoa, Yong-Soo Cho ........................................................................... 477

Phytocapping: Can It Mitigate Methane Emission in Municipal Landfills?

Kartik Venkatraman, Nanjappa Ashwath ............................................................... 483

Biofiltration Technology for Effective Control of Air Emissions.

George A. Sorial .................................................................................. 484

Air Pollutant Monitoring
Portable Instruments for On-Site Measurement of Odorous Sulfur Gases.

Kei Toda, Shin-Ichi Ohira, Md. Abul Kalam Azad .......................................................... 485

Compositions of Volatile Organic Compounds (VOCs) Emitted from Solid Lumbers. Hyun - Ju Park, Jo - Chun Kim, Yun - Seok Shon, Kang - Nam Park, Ki - Jun Kim, Byung - Dae Park ........ 490

PAHS in Dust from Computers: One Possible Indoor Source of Human Exposure.

Yu Ren, Jinjun Lian, Tiantao Cheng, Jianmin Chen ................................................. 494
Characterization of Photochemistry during the High Ozone Events in Seoul Metropolitan Area.

Gangwoong Lee, Meehye Lee, Kyung-Ryul Kim, Jinseok Han ........................................ 494

Catalysts for Reducing Waste
High Efficient Technology to Reduce NOx. Raafat Alnaizy, Mohammed Alahmari .................. 495
Treatment of Gaseous Toluene Using a Catalytic Incineration System.

Huang Shih-Wei, Lou Jie-Chung ................................................................. 502
Mixture of Sea-Salt and Hematite as an Efficient Scavenger of Sulfur Dioxide.

Yong Yin, Xiao Wang, Jianmin Chen .......................................................... 508
A Comparison Study on Ebeam-catalyst Coupling Effects for Various Catalysts.

Ki-Joon Kim; Jo-Chun Kim; Kang-Nam Park; Wan, Namkoong; Young,
Sunwoo; Hee-Nam, Song; Sang-gwi, Chung .................................................... 515

BIO-ASSESSMENT AND TOXICOLOGY

Bio-response
Specific Gene Targets from Escherichia coli for DGGE-Based Bacterial Source Tracking.

A. Mark Ibekwe, Stephen. R. Lyon, Menu Leddy .................................................. 521
Ambient Particulate Matter Decreased Human Alveolar Macrophage Cytokine Release.

Keegan Sawyer, Michael Madden ................................................................. 526

Ecotoxicology
Biomonitoring of Selected Freshwater Macrophytes to Assess Lake Trace Element Contamination:

A Case Study of Nal Sarovar Bird Sanctuary, Gujarat, India.

Nirmal Kumar J.I., Hiren Soni ........................................................................ 527

Microbiology and Microbial Degradation
Microbial Community and Kinetic Coefficients of Waste Caustic Applied Autotrophic

Denitrification. Im-Gyu Byun, Ju-Hyun Go, Jeung-Jin Park, Tae-Joo Park, Tae-Ho Lee ..... 528
Arsenic Resistant Bacteria in Mining Wasters from Shangrao Coal Mine of China.

Haoxin Fan, Jingbo Xiong, Wenming Wang, Xiuyun Zhao, Gejiao Wang .......................... 535
Biodegradation Kinetics of Estradiol during Sewer Transit. Michelle E Jarvie, David W Hand ........ 541
Nutrients Uptake by Mesophilic Anaerobic Digestion of Blue Mussels. Lim Yong Giak,
Shuichi Yamamoto, Tatsuki Toda, Chiaki Niva, Norio Nagao ...................................... 547
The Bacterial Diversity in a Southern Arizona Pristine Forest Ecosystem. Gejiao Wang,
Derek J. Fairley, Susheela Y. Carroll, Christopher Rensing, Ian L. Pepper ..................... 554
The Molecular Identification of a Hydrolyzed Polyacrylamide (HPAM) Degrading

Bacteria Strain and Biodegradation Product Analysis. Wei Li, Ma Fang .......................... 559
Isolation and Preliminary Characterization of a 3-Chlorobenzoate Degrading Bacteria.

Qi Yun, ZHAO Lin, Tang Zheng-zheng, Dong Tao .............................................. 565
Biodegradation of Cyanobacterial Toxin, Cylindrospermopsin in Drinking Water.

Shiromi Wijesundara, Glen Shaw, Gayle Newcombe ........................................... 571
Combining Electrochemical and Surface Analytical Techniques in Investigating Biocorrosion

of Stainless Steel. Thi My Phuc Nguyen, Yen-Peng Ting, Simo Olavi Pehkonen ............. 571
Polyelectrolyte Multilayers Coating for Inhibition of Bicorrosion of Stainless Steel.

Xiaoxia SHENG, Yen Peng TING, Koon Gee NEOH ........................................ 572
# TABLE OF CONTENTS

## INTRODUCTION

*Steven K. Starrett, Jihua Hong, William G. Lyon* ................................................................. 1

## LAND (SOIL, SOLID WASTE) POLLUTION AND REMEDIATION

### Permeable Reactive Barriers

*In Situ Passive Alkaline Barrier: A Low Maintenance In Situ Treatment for Hexahydro-1,3,5-Trinitro-1,3,5-Triazine Contamination in Groundwater.*

*Altaf H. Wani, David B. Gent,*

*Jeffery L. Davis* ......................................................... 4

*Bimetallic Iron-Aluminum Particles for Effective Dechlorination of Carbon Tetrachloride.*

*Wen-Shan Lee, Yu-Sheng Juo, Hsing-Lung Lien* .............................................................. 10

*Laboratory Testing of Alkaline Waste Materials for Remediating Acidic Groundwater from Acid Sulphate Soils.*

*Alexandra N. Golab, Buddhima Indraratna, Mark A. Peterson* .................. 15

*Carbon-based Reactive Barrier for Nitrate Remediation at a Former Swine CAFO.*

*Richard T. Wilkin, Stephen R. Hutchins, Tony Lee, Brad Scroggins* ............................................. 21

*Effect of Oxidant (Nitrate) on the Performance of Iron Permeable Reactive Barriers.*

*Qiong Lu, Lai Gui, Marek S. Odziemkowski, Robert W. Gillham* ............................. 22

### Natural Attenuation of Contaminants

*Organic Solvent Vapour Phase Effects on Biological Activity in Contaminated Soils.*

*M. O. Akinola, D. L. Jones* ........................................... 23

*Density Driven Flow of Gas Phase Chemicals in Soils.*

*Shoichiro Hamamoto,*

*Tsuyoshi Miyazaki, Masaru Mizoguchi* ................................................................. 27

*Source Strength Of Explosives on Munitions Contaminated Sites and Risk Assessment.*

*Jennifer Hörner, Dieter Hennecke, Neera Singh, Kerstin Hund-Rinke, Werner Kördel* .............. 34

*Temperature and Carbon Source Effect on Xenobiotic Degradation by Rhodotorula Glutinis.*

*Aysun Vatansever, Selim Sanin* .............................................. 41

*Efficiency and limitations of Different Technologies to Enhance the Natural Attenuation of MTBE at Contaminated Megasites.*

*Marion Martienssen, Mario Schirmer* .......................................................... 46

### In-Situ Remediation and Solid Waste Management

*A Radiative Transfer Model for Soil Incorporating Volume and Surface Scattering Phenomena.*

*David Kuria, Hui Lu, Toshio Koike, Hiroyuki Tsutsui and Tobias Graf* ............................. 47

*Food Waste Mineralization and Accumulation in Biological Solubilization and Composting Processes.*

*Hazel B. Gonzales, Hideki Sakashita, Yoichi Nakano, Wataru Nishijima, Mitsumasa Okada* ......... 53

*Effect of a Natural Emulsifier on the Biodegradation of Oily Sludge.*

*George E. Nkeng, Gerard Nkwelang, Henri F. L. Kamga, S. P. Antai* .............................. 60

*An Optimal Model of Collecting Center Allocation for the Management of Municipal Solid Waste.*

*Nataša Iršič Bedenik, Zdervko Kravanja* ............................................................... 66

*Surfactant Enhanced Bioremediation of Oil Contaminated Soil.*

*Yukako Kumada, Takuro Kisa,*

*Takeru Ohkuma, Yusuke Kuwano, Yoshihisa Shimizu* ................................................... 73

*Analysis of Current Industrial Wastewater Sludge Treatment and Disposal in Shanghai.*

*Zhang Dao-fang, Cheng Hai-jing, Shi Xue-fei, Huang Xiao-jing* ....... 78

*Range Management Using Lime for Dual Role of Metals and Explosives Transformation.*

*Jeffrey Davis, Steven Larson, Andy Martin* .................................................. 84
Waste Recycling
Development of Value Added Products from Plastic and Rubber Wastes. 
Jobin Jose, A Nag and G B Nando ................................................................. 85

Recycling Agricultural Wastes to Produce Oil Dispersant: An Ecotoxicological and Bioremediation Perspective. Gerard Nkwelang, Henri F L Kamga, George E Nkeng, S P Antai ......................... 92

Yoshitada Kakuta, Toshihiko Matsuto, Yasumasa Tojo, Susumu Ohnuma .................. 98

Catalytic Conversion of Waste Plastics into Hydrocarbon Based Fuels. Sebastian Bojanowski, 
Ernst A. Stadlbauer, Astrid Fiedler, Sajjad Hossain, Andreas Frank, Bernhard Jehle ....... 103

Influence of Desulfurization Slag on Burnability of Cement Raw Mixes. Juu-En Chang, 
Ying-Liang Chen, Pai-Haung Shih, Li-Choung Chiang ........................................ 109

Reclamation of Water-Quenched Slag as Raw Material of Permeable Brick and Glass-Ceramic. 
Sheng-Fu Yang, Wen-Tung Chiu, Ching-Liang Chen, Chin-Cing Tzeng ......................... 114

Low-Pressure Sludge Homogenization for Increased Energy Production with Improved Economic Benefits at Wastewater Treatment Plants. Theodore I. Onyeche ......................... 118

On-site and Off-site Remediation
Zero Valent Iron and Pyrite System to De-Chlorinated Toxaphene Contaminated Soils. 
Roger E. Carlton, N. Lee Wolfe ........................................................................ 119

Upgrading the Soil Washing and Treatment Processes on EDC by Using Surfactant. 

Experimental Study on the Effects of Protozoa in ICAST System. 
ZHANG Dao-fang, WEI Yu, SHI Xue-fei, LI Kun ................................................... 132

Peri-Urban Mangrove Forests as Filters and Potential Phytoremediators of Domestic Sewage in East Africa. Catarina Fonseca, José Guerreiro, Stephen Bouillon, Marco Vannini, Jamidu Katima, Jeremiah Daffa, Yunus Mgaya, Erik Kristensen, José Paula, Patrick Rönnbäck ........................................................................................................ 136

Bioremediation of Soils Contaminated with Electrical Insulating Oil by In-Vessel Composting. L.A. Warner, A.J. Beck, N.J. Russell, M. Ezzi, J. Rother ......................... 137

Landfill
Characterization of Airborne VOC Emissions from a Municipal Waste Landfill in Korea. 
Sung-Ok Baek, Young-Kyo Seo ........................................................................ 138

Isotopicanalysis of Ammonium (δ 15N), Nitrate (δ 18O & δ 15N) and Dissolved Carbon (δ 13C) in Landfill Leachate Plum. Hossein Mohammadzadeh, Ian Clark, Annie Bourbonnais, Paul Middlestead ................................................................. 145

Phytocapping: An Alternative Technique for Municipal Landfill Remediation. 
Nanjappa Ashwath, Kartik Venkatraman ................................................................ 157

Canopy Interception Significantly Reduces Effective Rainfall on a Phytocapped Landfill. 
Kartik Venkatraman, Nanjappa Ashwath .............................................................. 157

Wateruse by Australian Native Species Grown on a Phytocapped Landfill Site. 
Kartik Venkatraman, Nanjappa Ashwath, Ajay Sharma ........................................ 158

ECOSYSTEM ASSESSMENT AND RESTORATION

Restoration of Ecosystems
Restoration of Mesopotamian Marshlands. Hossein Ghadiri ................................ 160

Environmental Recovery of the Mallorquín Marsh (Atlántico, Colombia). José Manga.
Nelson Molinares, Jorge Arrieta, Yubizza Pimienta, Johana Guzmán and Luis Sepúlveda ..... 166
Restoration of Urban Lakes: Mir-Alam Tank, Hyderabad City, India.
B.A. Prakash, V.V.S. Gurunadha Rao, K. Mahesh Kumar .................. 172
Incorporating Chinese Environmental Policy into Sustainable Development. Ping Ji .................. 172

Ecosystem Assessment
Physiological Characteristics of Three Mangrove Species under Salt Stress.
Liao Yan, Peng Yougui, Chen Guizhu .................................................. 173
Seasonal Fluctuations of Bio-Chemical Parameters in Kucukcekmece Lagoon, Istanbul.
Beyza Üstün, Sevgi Demirel, Elif Okumus ................................................. 179
The Effects of Harvesting and Sustainable Management of Phragmites australis.
Takeshi Fujino, Takashi Asaeda ................................................................. 185
A Study on the Balance of Nitrogen and Phosphorous in Cage Culture.
Yanmao Wen, Xiange Wei, Tingfei Shu ..................................................... 189

WETLANDS

Conservation and Geochemical Process of Wetlands/06-02 Wetlands for Wastewater Treatment
Successful Use of Wetland for the Treatment of Soil Containing Explosives.
Claas Meier, Conrad Boley, Johann Freudenfeld, André Gerth ......................... 191
Investigation of Spirulina Biomass Yield Using Natural Soil Based Growth Media in Fed-Batch
Reactors. Gözde Yılmaz, Selim Sani, Cemal Saydam ..................................... 197
The Study on Using Flood Storage and Detention Ponds as Wetlands for Water
Environment Improvement. Jia Haifeng, Ma Hongtao .................................. 201

SEDIMENTS

Assessment and Remediation of Sediments
Ecological Risk Assessment and Heavy Metal Mobility in Urban Stream Sediments from
Prague, Czech Republic. P. Hnat'uková, L. Benesová ...................................... 203
Effective Diffusion Coefficients Determination of Nitrate in Sediments.
Zhang Ming, Zhang T, Fang HHP .............................................................. 210
Environmental Impact Assessment of Human Activities on Sediments in Hussain Sagar Lake,
Hyderabad, India. B.A. Prakash, V.V.S. Gurunadha Rao, K. Mahesh Kumar,
Mitsuo Yoshida ............................................................... 215

GLOBAL CHANGE

Global Change
Impact of Elevated CO₂ on Nutrient Bioavailability in Paddy Fields.
Abbas Shahdi Koumeleh, P. Sharmila, P. Pardha Saradhi, D.C. Uperty .................. 217
Global Climatic Changes: Challenges to Kyoto Protocol. Ojekunle Z. O, Zhao Lin .................. 223
Global Cooling. Ernst Knolle ................................................................. 223

METALS

Metal Distribution and Bioavailability
Influence of Different Geochemical Levels of Ni and Cr on Their Distribution in Grapevine
Organs. Vlado Licina, Svetlana Antic Mladenovic, Mirjana Kresojevic,
Leonardo Lombardini ............................................................. 225
Metal Removal and Remediation
Characteristics and Coagulation Mechanism of Macromolecular Coagulant which Traps Heavy Metals. Qing Chang, Mingquan Yu ................................................................. 226
Investigation of Heave and Remediation of Chromite Ore Processing Residue (COPR) Materials Using Ferrous Sulfate. Dekh Hyun Moon, Dimitris Dermatas, Adriana M Sanchez, Maria Chrysochoou, Mahmoud Wazne, Dennis G. Grubb, Min Gyu Kim ......................... 239
Phytoremediation
Reduction of Cadmium and Lead Uptake by Plants Cultivated on Polluted Soils, Using Foliar Application of Manganese. Constantin-Horia Barbu, Camelia Sand, Mihai Pop and Letitia Oprean .................................................. 245
Assessment of Heavy Metal Accumulation Capability of Four Aquatic Plants in Lake Mariut, Egypt. Manal. F. Ahmed, Nadia. B.E. Badr ................................................................. 249
Selection of Plant Species and Chemical Amendments for Stormwater Phytotreatment. Anthea Johnson, Naresh Singhal .................................................. 258
Interspecific Variation in Cadmium Tolerance: Growth, Leaf Traits and Nutrient Uptake in C3 Grasses. S. Sabreen, S. Sugiyama .................................................. 264
Efficiency of Cation Accumulator Italian Ryegrass Genotypes for Cadmium Uptake and Phytoremediation. S. Sabreen, S. Sugiyama, S. Saiga .................................................. 264
Communities of Ectomycorrhizal Fungi in a Pb Contaminated Pine Forest Site. Nan Hui, Rauni Strömmer, Teija Koivula, Martin Romantschuk .................................................. 265
Wool: A Novel Chelating Agent for Heavy Metal Chelate-Assisted Phytoextraction from Soil. Evangelou M.W.H., Ebel M., Schaeffer A. .................................................. 266
Screening Plant Species for Uptake of Arsenic in Northwest Ohio. Jordan R. Rofkar, Joe Hickey, Daryl F. Dwyer .................................................. 266

CHLORINATED AND OTHER ORGANIC POLLUTANTS
Degradation of Organic Pollutants
Using Nafion as a Solid Acid Catalyst for Sorption and Transformation of Methyl-tert-butyl Ether (MTBE). Hsing-Lung Lien, Wei-xian Zhang .................................................. 268
Biodegradation of Short-Chain n-Alkanes in Oil Sands Tailings under Methanogenic Conditions. Tariq Siddique, Julia M. Foght, Phillip M. Fedorak, Michael D. MacKinnon .................................................. 273
Transport and Remediation of Organic Pollutants
Removal of VOCs and Svocs in Desert Mining Soils: Preliminary Studies. Alex Godoy-Faúndez, Lorenzo Reyes-Bozo, César Sáez-Navarrete .................................................. 280
Evaluation of Accelerated Dechlorination of p,p'-DDT in Acidic Paddy Soil. Fenxia Yao, Xin Jiang, Guifen Yu .................................................. 281
Phenanthrene Metabolism and Transport Across the Cell Membranes of Pseudomonas fluorescens LP6a Strains. Angela Smith, Julia M. Foght, Murray R. Gray .................................................. 281

MODELING
Environmental Simulation
Impact of Industrial Tailings Pond on Infiltration of Sulfates into Groundwater.
Wieslaw Fialkiewicz and Stanislaw Czaban ......................................................... 283
Wei Wei, Haijeng Jia, Kunlun Xin ................................................................. 290
Application of Weap Simulation Model for Water Resources Planning and City Development.
Ojekunle Z. O., Zhao Lin ........................................................................... 297
Two-Phase Numerical Model for Simulation of Air Sparging. Nenad Jacimovic,
Takashi Hosoda, Kiyoshi Kishida, Marko Ivetic .................................... 305
The Improved Matter Element Extension Evaluating Model and Application.
SUN Xiu-ling, CHU Jun-da, MA Hui-qun .............................................. 312

Water Quality Modeling
Runoff and Phosphorous Loading Estimation for the Simiyu Catchment (Tributary of Lake Victoria), Tanzania. J. Rwetabula, F. De Smedt ......................................................... 318
Water Quality Modeling Case Studies from the Bay Area. Mikkel Bugge Andersen ................................................................. 324
Biochemical Modeling of a Facultative Stabilisation Pond in La Guajira (Colombia).
José Manga, Nelson Molinares, Jorge Arrieta ............................................ 330
Numerical Simulation of Non-Isothermal Reactive Transport in Expansive Unsaturated Porous Media. Mingliang Xie, Sebastian Bauer, Olaf Kolditz ......................................................... 337
Trajectory Modelling and Impact of Marine Oil Spills in Complex Coral Reefs. Trevor Gilbert .... 343

Process Modeling
Decay Model of Chlorinated Endocrine Disruptor Chemical in a Continuous Ozonation Process.
Wei Chu .............................................................................................. 344
Modelling of the 2-Phase System “Water and Activated Sludge”. Stephan Köster,
Daniela Tacke, Johannes Pinnekamp ......................................................... 350
Improvement of Membrane Bioreactor Aeration. Daniela Tacke, Johannes Pinnekamp,
Helmut Prieske, Matthias Kraume .......................................................... 356
Cross Flow Two Compartment Model of Air Sparging. Osama Al-Gahtani, James Warner .............................................................. 362
Modeling the Performance of Uasb Reactor for Treatment of Municipal Wastewater under Psychrophilic, Mesophilic and Thermophilic Conditions. Prasanna Mohan,
Harpreet.S.Rai .................................................................................. 368

GIS, DATA MANAGEMENT AND REMOTE SENSING

GIS for Environmental Assessment
Radiological Hazard Characterization with a Mobile GPS Based Technology.
Mahesh Vidyasagar, H. Robert Meyer .......................................................... 376
Quantifying the Spatial and Temporal Variations in the Urban Soundscape by Noise Mapping.
Kin-Che Lam, Wai-Hong AU .................................................................... 380
Integrating GIS and Portal Technologies for Assessing Environmental Health Impacts of Hurricane Katrina. I. Zaslavsky, K. Pezzoli, D. Valentine, A. Lin, H. Sarabia, M. Ellisman,
R. Tukey, A. Hull, M.L Miranda, M. Avakian ................................................ 385
GIS Analysis of Phosphorus in X-Ray Dispersive Spectral Maps.
Kathleen M. Baker, Carol Bronick ........................................................... 391
GIS Applications for Ground Level Ozone in Kansas City, MO. Chris Green, Jimmy Adegoke .... 396

Data Management and Environmental Remote Sensing
Identifying Driving Factors for Urban Expansion by Land Cover Change. Lin Li, Haihong Zhu .......... 397

viii

ENVIRONMENTAL ANALYSIS AND MEASUREMENTS

Environmental Analytical Technologies

Hermann Stadler …………………………………………………………………………………………… 415

Structure and Function of Dynamic Membrane Determined by Microelectrodes.

X.H. Zhou, Han-chang Shi, Q. Cai, Y.X. Wu ………………………………………………………… 420

An Improved Organic Carbon Detector for Use in Size Exclusion Chromatography of NOM.

Bradley P. Allpike, Anna Heitz, Cynthia A. Joll, Robert I. Kagi …………………………………… 426

Application of Isotopic Geochemical Division to Resource and Environment Evaluation.

Chang Xiangyang, Zhu Bingquan, Tu Xianglin, Chen Yuwei, Peng Jianhua ………………. 427

Environmental Monitoring
Event Sampling and Monitoring for Hydrogeological Investigations by Networking
via Leo-Satellites. Hermann Stadler, Paul Skritek, Werner Heiner, Gerald Derflinger … 429

Integrating Observation with Numerical Modeling for the Exploration of Hypoxia.

Mohammad Shahidul Islam, James S. Bonner, Temitope Ojo, and Cheryl Page ……………… 436

Special Observational System to Resolve the Atmospheric Processes.

D. Rajan, T. Koike ………………………………………………………………………………………… 441

Dynamic Leaching of Toxic Elements from Computer Components.

Yadong Li …………………………………………………………………………………………………… 442

Environmental Stability of PAH and Biomarker Source Ratios in Extreme Environments.

SOCIETY AND THE ENVIRONMENT

Society and the Environment
Holistic Environmental Education through Sustainable Habitats. V. R. Desai ………………….. 444

Multifaceted Evaluation of Sustainable Landscaping on a College Campus.

Beth C. Pallo, Julian Ewel, Fahri Unsal, Akiko Fillinger, René Borgella ……………………. 450

Environmental Literacy for Tertiary Institutions: A Student’s Perspectives.

Isoken T Aighewi, Agbonsalo U. Osaigbovo ………………………………………………………… 450

Environmental Ethics and Laws
International Legal Issues for Implementing the Use of Mangroves for Sewage Filtration.

Catarina Fonseca, Catarina Grilo, Cristina Rebelo, José Guerreiro ……………………………… 451

Environmental Ethics and the Third World.

Archana Barua …………………………………………………………………………………………… 457

The Role of the Humanities in Resolving Environmental Crises. Robert Frodeman …………… 460

ENVIRONMENTAL PLANNING AND MANAGEMENT

Environmental Quality and Planning
Degradation of the Coastal Wetlands Along the South China Sea in China and Countermeasures.

Liao Yan, Lan Zhuhong, Chen Guizhu …………………………………………………………………… 462
