# TABLE OF CONTENTS

Analysis of Oscillating Modality and Stability of U-Shaped Aqueduct-Fluid Coupling System ......................................................... 1

Zhang Hua, Yang Qing, Zhao Wen-tao

Three-Dimensional Dynamic Characteristics Analysis of Large Span Cable-Stayed Aqueduct .......................................................... 9

Zhang Hua, Liu Liang, Yang Qing

Analysis of Dynamic Properties of Aqueduct-Water Coupling Systems with Rubber Bearings ..................................................... 17

Dong Ming, Zhang Hua, Yang Qing

Experimental Behavior of Lightweight Aggregate Concrete Filled Steel Tubular Stub under Axial Compression .................................... 24

Zhongqin Fu, Bohai Ji, Yu Zhou, Xiaoliang Wang

The Mechanical Properties of Lightweight Aggregate Concrete Confined by Steel Tube .............................................................. 33

Zhongqin Fu, Bohai Ji, Lei Lv, Ming Yang

Approximate Importance Sampling Approach Based on DSmT in Structural Reliability Analysis .................................................. 40

Donghuan Chen, Bohai Ji

Experimental Study and Numerical Simulation on Bonding Behavior of the FRP-Bolt Strengthening Technology ................................ 49

Yan Hua Guan, Bin Song Jiang, Xiu Guang Song

Experimental Study on RC Beams Strengthened in Shear with the FRP-Bolt Strengthening Technology ................................................. 57

Yan Hua Guan, Bin Song Jiang, Yi Dong Jiang

Study on Damage Identification for a Simply Supported Reinforced Concrete Beam Based on the LMBP Neural Network .................. 65

Yuan Aimin, Lu Jintao, Ji Bohai, Mo Haifeng

Road Damage Due to Expansive Soils: Survey of the Phenomenon and Measures for Improvement .................................................. 73

M. A. Dafalla, M. A. Shamrani

Launching Construction of the Deck of the Hangzhou Jiangdong Bridge ......................................................................................... 81

Chuangwen Dong, Chuanshi Li

Finite Element Analysis of Soil Nailing in Expansive Soils Considering Rainfall Effects ................................................................. 90

Jian-hua Li, Fang-cui Zhu, Ming-han Zhuo, Yue Yang

Study on Mechanics Behavior and Model Tests of Bridge Piles Foundation in Slope ................................................................. 97

Jian Hua Liu, Ming Hua Zhao, Ming Hui Yang

Influence of Construction Methods and Working Mechanisms on Stress Distribution in Deep Foundation Design .................... 105

Jian Wang, Zhifang Zhou

Study of a Skewed HPS Bridge and a Culvert Bridge Using LiDAR Scan ............................................................................. 113

Kaoshan Dai, Chris Watson, Haitao Bian, Yonghong Tong, Shen-En Chen

Modern Protection Systems to Prevent Corrosion of Structural Steel Elements Due to Deicing and Roadway Salts .................. 121

John J. Myers, Wei Zheng

Accelerated Construction for Pedestrian Bridges: A Comparison between High Strength Concrete (HSC) and High-Strength Self Consolidating Concrete (HS-SCC) ......................................................... 129

John J. Myers, Kurt Bloch

Study on Strength Developing Regularity of Concrete with Proto-Machine-Made Sand ................................................................. 137

Fenglan Li, Qian Zhu, Zhanfang Ge

Analysis of Integral Loading Properties of Assembled Prestressed Concrete Hollow Slab Bridge Affected by Hinge Concrete ................. 144

Wei He, Rong He, Shunbo Zhao

A Review of Contemporary Research on Ancient Rammed Earth Technique ........................................................................ 151

Bingxiang Yuan, Xaiwen Xia, Jinyuan Liu, Wenwu Chen, Keping Chen

Simplified Method of Flow Deformation Induced by Liquifed Sands ......................................................................................... 160

Yumin Chen, Hanlong Liu

Experimental Study on Drying Shrinkage of Concrete with Proto-Machine-Made Sand ................................................................. 168

Fenglan Li, Qian Zhu, Zhanfang Ge

Research on the Flexing Resistance of RC Defective Beams of Hybrid-Bonding of FRP ................................................................. 175

Pingxia Niu, Shuchen Li, Shucui Li

Stochastic Parameters Analysis for Steel Highway Bridge Members ......................................................................................... 184

Kun Li, Kai-chung Sun

Effects of Cables on Dynamic Properties of Short-Span Cable-Stayed Bridges ........................................................................ 190

Yanqiang Li, Yanliang Du
