Tunnel Management, Emerging Technologies, and Innovation

Selected Papers from the GeoHunan 2011 International Conference
Geotechnical Special Publication No. 221

Hunan, China
9 - 11 June 2011

Editors:
James C. Ni
Jun Sheng Yang
Guiyao Wang
Shong-loong Chen

ISBN: 978-1-61782-998-7
GSP 221 Table of Contents

1 A Tunneling-Induced Stratum Settlement Assessment and Prediction System: STEAD-RISK
   Bo Liu, Yan Li, and Tao Li

10 A Case History of the Excavation of Deep Foundation Pit Adjacent to Railway
   Hualin Zhang, Guoliang Zhang, and Junsheng Yang

17 Comparison of Different Analytical Models on Evaluation of Post-Earthquake Serviceability of Water Conveyance Tunnel
   Fei Leng, Ji-wei Wang, Dong-wang Fu, and Ai-li Liu

25 Quality Testing and Evaluation of the Damaged Lining of Zhoulichong Railway Tunnel
   Jianhe Zhu and Li Yan

33 Steering Efficiency of Microtunnelling in Various Deposits
   James C. Ni and Wen-Chieh Cheng

40 Research on the Operating Performance Assessment for the Automatic Incident Detection System of the Highway Tunnel—An Example of Ba-Guah Mountain Tunnel in Taiwan
   Tung-Tsan Chen and Yao T. Hsu

48 Properties of Chemical Foamed-Sand Modification Tests for Metro Shield Tunneling Engineering
   G. G. Qiao, D. J. Yuan, and B. Liu

56 Stability Monitoring and Analysis of Core Rock in a Tunnel with Extra-Large Cross Section and Low Flat-Ratio during Construction
   Dingheng Zhou, Liqiao Cao, Yongfeng Ma, and Shitao Fang

64 Performance of a Shallow Footing Foundation Bridge Due to Interaction of Tunneling and Ground Fissures in Loess Soil Stratum
   Junsheng Yang, Haibo Hu, and Feng Yang

72 Back-Analysis of External Loads on Wall Rock of Deep Burying Laneway Influenced by Exploitation Pressure
   Haiqing Guo, Peng Zhang, and Jun Li
Three-Dimensional Numerical Analysis of Ground Surface Settlement Induced by the Excavation of Shield Tunnels
Shong-Loong Chen, Cheng-tao Ho, and Yung-Cheng Kuo

Optimization Analysis of Rockbolts Supporting for Double-Arch Shallow Tunnels Subjected to Asymmetrical Loads
Xiao-Li Yang and Ben Wu

Parameter Estimation and Structural Reliability Analysis for Tunnel Lining Structure Based on Maximal Entropy Principle
Dao-Bing Zhang and Xiao-Li Yang

Experiment Research on Smoke Temperature Properties Lower Ceiling along Tunnel at Different Longitudinal Ventilation Velocities and Tunnel Slopes
Xue-Peng Jiang, Rui-Yu Chen, Zhi-Sheng Xu, and Xiao-Li Yang

Numerical Simulation of Smoke Flow Controlling in Railway Shield Tunnel
Xue-Peng Jiang, Hua-yun Ji, Zhi-Sheng Xu, and Xiao-Li Yang

Analysis of Bearing Capacity of Foundation above Tunnel Based on the Seepage Flow
Kun Miao, Bo Huang, and Xiao-Li Yang

Advanced Finite Element Fire Calculation in Tunnel Design
Xiaolin Cai, K. A. M. Ahmed, G. Swboda, Junsheng Yang, and Congshi Wu

Optimal Analysis for Tunnel Axis’s Trend by Block Theory and Genetic Algorithm
Wenjun Yang, Baoning Hong, and Shaorui Sun

Displacement Controlled Analysis on Tunnel-Soil-Pipe Interaction Based on Layered Half Space Soil Model
ZhiGuo Zhang, MaoSong Huang, WeiDong Wang, and MengXi Zhang

The Tunnel Arch Effect Analysis of Anchor-Sprayed Lining Structural System
Caihua Shen, Zhong Wu, and Xingwei Niu

Study on Behavior and RCFEM Designing of Restricting Crack Width of Circular Pressure Tunnel Lining
Jiwei Wang, Fei Leng, and Yong Jiang

Anti-Analysis of the Release Rate of Displacements during the Tunnel Excavation
Guangxiang Mao, Yuanyou Xia, and Lingwei Liu
Flow Catastrophe Evolution Laws of Nonlinear Seepage for Water Inrush Induced by Conductive Fault
Liping Li, Shucai Li, Zhenhao Xu, and Shaoshuai Shi

Study on the Defect Characteristics of Water Leaking of Old Tunnels in Cold Regions
Chao Yuan, ShuChen Li, and ShuCai Li

Evaluation of Blasting Influence on the Middle Wall of a Multi-Arch Tunnel
Qingbin Zhang, Junsheng Yang, and Congshi Wu

Forecast of Groundwater Flowrate in Tunnel by Integrated Approach
Yong Feng, Qiang Sun, and Lei Fan
