### ACS Award for Team Innovation: Symposium in Honor of Patricia Burns, Chieh-Min Cheng, Grażyna KmieciK Lawrynowicz, and Tie Hwee Ng

#### Self-Assembly in Biomedicine and Delivery

- Fast Dissolving Open-celled Porous Solid Technology
  
  Glenn, Robert W.; Lynch, Matthew L.  
  ................................................................. 1

- Engineering Surface Architectures for Biomimetic Activity: Selective Cell Capture and Manipulation
  
  Santore, Maria  
  ......................................................... 2

- Polymer-Surfactant Self-Assembly for the Design of Mild Skin Cleansers
  
  Walters, Russel M.; Fenvola, Michael J.; Gundolfi, Lisa; Librizzi, Joseph J.; Thanasesedvy, Krishnan; Tierney, Neena K.  
  .......................................................................................................................... 3

- Reversible Blood Gelation and Hemostatic Action Using a Biopolymer with Hydrophobic Stickers
  
  Raghavan, Srinivasa R.; Dowling, Matthew B.  
  ................................................................. 5

- Transport of Nanoparticles and Proteins in Self-Assembled Block Copolymer Hydrogels
  
  Walker, Lynn M.; Cheng, Vicki A.  
  ................................................................. 6

#### Self-Assembly in Energy and Device Applications

- Current-Induced Disorder-Order Transition in a Dry Block Copolymer Electrolyte
  
  Balsara, Nitash P.; Mullin, Scott A.; Stone, Gregory M.; Teran, Alex A.; Hallinan, Daniel T.; Wanakule, Nisita S.  
  .......................................................................................................................... 7

- High Volume Production of Well-Ordered Hybrid Materials for Device Applications
  
  Lin, Ying; Daga, Vikram K.; Anderson, Eric A.; Gido, Samuel P.; Watkins, James J.  
  .......................................................................................................................... 9

- Nanostructured Polymer Solar Cells
  
  Black, Charles T.  
  ..................................................................................................................... 10

- Polyaniline-Containing Polymer Solar Cells
  
  Shao, Lin; Lutkenhaus, Jodie L.  
  .......................................................................................................................... 11

#### Self-Assembly in Digital Printing and Film Formation

- Self-Assembly of Colloidal Particles in Electrophoretic Printing Applications: Challenges and Opportunities
  
  Lai, Zhen (Jerry); Cheng, Chieh-Min; Ng, Hwee; Bhatia, Surita  
  .......................................................................................................................... 12

- Controlling Clustering and Rheology in Attractive Nanoparticle Dispersions
  
  Griffin, David M.; Amuri, Anand; Lai, Zhen (Jerry); Cheng, Chieh-Min; Bhatia, Surita  
  .......................................................................................................................... 13

- Film Formation from Bimodal Reactive Latexes
  
  Liu, Lili; Daniels, Eric S.; Klein, Andrew  
  .......................................................................................................................... 14

- Mixing Study of Self-Assembled Polymeric Particles
  
  Tahvildarian, Parisa; Ng, Hwee; D'Amato, Michael; Drappel, Stephan; Ein-Mozaffari, Farhad; Upreti, Simant R.  
  .......................................................................................................................... 16

#### Akzonobel Student Award Symposium

- Designer Block Ionomer Networks for Responsive Technologies
  
  Vargantwar, Pruthesh H.; Tauer, Klaus; Ghosh, Tushar K.; Spontak, Richard J.  
  .......................................................................................................................... 17

- High-Performance Poly-3-Alkylthiophene-Carbon Nanotube Composite Transparent Electrodes
  
  Hellstrom, Sondra L.; Jin, Run Zhi; Stoltenberg, Randall M.; Bao, Zhenan  
  .......................................................................................................................... 19

- Injectable Solid Hydrogels as Cell Carriers: Mechanism of β-Hairpin Hydrogel Shear Thinning/immediate Recovery and Effects on Cell Payload
  
  Yan, Congqi; Schneider, Joel P.; Pochan, Darrin  
  .......................................................................................................................... 21

- Multiphoton Writing of 3D PI and Temperature-Responsive Hydrogels Integrated with High-Aspect-Ratio Polymer Microbristles
  
  Zarzaur, Lauren D.; Kim, Philseok; Kolle, Mathias; Brinker, C. Jeffrey; Aizenberg, Joanna; Kaehr, Bryan  
  .......................................................................................................................... 25
Bio-Inspired Fillers for Mechanical Enhancement ........................................................................... 63
Korley, Lashanda T. J.; Stone, David A.; Wanasekara, Nandula; Wheeler, Nicholas R.; Johnson, J. Casey; Wnek, Gary E.

Combinatorial Synthesis of Core-Shell Nanoparticles for SiRNA Delivery ........................................ 64
Siegrist, Daniel J.; Nuhn, Lutz; Leelenderker, Matthias; Whitehead, Kathryn A.; Sahay, Gaurav; Lytton-Jean, Abigail; Cheng, Hao; Jiang, Shen; Ma, Minglin; Vegas, Arturo; Langer, Robert; Anderson, Daniel G.

Compositional Polydispersity Effects on the Solution Self-Assembly of Triblock Copolymer Surfactants ................................................................................................................................. 67
Schmitt, Andrew L.; Mahanthappa, Mahesh K.

Conjugated Polymer Assemblies on Carbon Nanotubes ..................................................................... 68
Liu, Jianhua; Zhai, Lei

Cylindrical Micelles from the Living Crystalization-Driven Self-Assembly of Poly(Lactide)-
Containing Block Copolymers ............................................................................................................. 71
Petzetakis, Nikos; Dove, Andrew P.; O'Reilly, Rachel K.

Functional Block Copolymers Via Thiol-Ene Click Chemistry .................................................................. 73
Killlops, Kato L.; Gupta, Nalini; Dimitriou, Michael D.; Lynd, Nathaniel A.; Jung, Hyunjung; Bang, Joona; Campos, Luis

Functional Materials from the Self-Assembly of Bottlebrush Copolymers ............................................. 75
Razeyev, Javid; Bolton, Justin; Kloecker, Julia

Functional, Degradable Block Copolymer Nanoparticles ..................................................................... 76
Robb, Maxwell J.; Connal, Luke A.; Lee, Bongjue F.; Lynd, Nathaniel A.; Hawker, Craig J.

High-Aspect-Ratio Macromolecular Assembly of Biodegradable Polymers Towards Smart
Biomaterials .............................................................................................................................................. 78
Fukashima, Kazuki; Korevaar, Peter A.; Tan, Jeremy P. K.; Coady, Daniel J.; Frommer, Jane E.; Nelson, Aloshkin; Meijer, E. W.; Yang, Yi Yan; Hedrick, James L.

Investigation of Thermally Responsive Block Copolymer Thin Film Morphology Using Gradient
Libraries ................................................................................................................................................... 79
Kelly, Jennifer Y.; Albert, Jake N. L.; Howarter, John A.; Kang, Shuhui; Stafford, Christopher M.; Epps III, Thomas H.; Fasolka, Michael J.

Microscale Patterning of Functional Polymeric Structures .................................................................. 81
Lewis, Jennifer A.

Molecular Scale Design for Highly Thermo-Sensitive Supramolecular Polymers .................................. 82
Greenland, Barnaby W.; Hermida-Merino, Daniel; Hamley, Ian W.; Stark, Andrew T.; Prisecaru, Cristina; Hayes, Wayne

Molecular Structure and Morphology Influence Ionic Conductivity in Polymerized Ionic Liquid
Homopolymers and Block Copolymers .................................................................................................... 84
Weber, Ryan L.; Ye, Yueheng; Elabd, Yossif A.; Mahanthappa, Mahesh K.

Monodisperse ?-Conjugated Oligo(Phenylene Ethynylene)s as Side Chains in Macromolecular
Assemblies: Tuning the Optical Properties ............................................................................................... 85
Breul, Alexander M.; Pavlov, George M.; Teichler, Anke; Höppner, Stephanie; Weber, Christine; Nowotny, Jürgen; Blankenburg, Lars; Hager, Martin D.; Schubert, Ulrich S.

Multicompartment and Multigeometry Nanostructures Through Kinetic Control of Block Copolymer
Solution Assembly ..................................................................................................................................... 88
Pochan, Darrin

Nanostructured Polymer Electrolytes for Li Batteries Via the Cross-Linking of Self-Assembled
Lyotropic Liquid Crystals ......................................................................................................................... 89
Gin, Douglas L.; Kerk, Robert L.; Edwards, Julian P.; Shoemaker, Richard K.; Miller, Seth A.; Elliott, Brian J.

New Applications and Challenges in Layer-By-Layer (LbL) Assembly .................................................. 90
Luktenhaus, Jodie L.

Patterning of Polymer Brushes ................................................................................................................ 91
Welch, Mary E.; Xu, Youyong; Ober, Christopher K.

Photocurable Polydiene-Based Block Copolymer Nanostructured Hydrogels ........................................ 93
Scalfani, Vincent F.; Bailey, Travis S.

Polyelectrolyte Multilayers: Tuning Transport of Ions, Electrons and Molecules .................................... 94
Hammond, Paula T.

Polyethylene-Based Micelles and Vesicles in Water .............................................................................. 95
Yin, Ligeng; Hillmyer, Marc

Selective and Controlled Shape Transformations of Amphiphilic Block-Copolymer Assemblies .................. 96
Wilson, Daniela A.; Kim, Kyoung T.; Meeussen, Silvie A.; Nolte, Roeland J. M.; Van Hest, Jan C. M.

Self-Assembled Block Copolymer-Nanoparticle Hybrids: Role of Nanoparticle Surface Interactions ............ 98
Sarkar, Biswajit; Alexandridis, Paschalis
Self-Assembled Nanoparticles Derived from Diblock and Multiblock Copolymers as Modular Drug Delivery Vehicles................................................................. 100  
Xiao, Longyi; Jia, Xinqiao

Self-Assembly of Dendrimer/Lipid for Drug Delivery ................................................................. 101  
Sun, Qihang; Ma, Xingpeng; Zhang, Bo; Zhou, Zhanxian; Jin, Erlei; Van Kirk, Edward A.; Murdoch, William J.; Shen, Youqing

Solution Self-Assembly and Responsiveness in Polypeptide-Based Triblock and Star Copolymers ................................................................................ 103  
Ray, Jacob G.; Johnson, Ashley J.; Ly, Jack T.; Naik, Sandeep S.; Savin, Daniel A.

Stabilizing Co-Continuous Structures in Polymer Blends Through Intra-Phase Gelation of Nanoparticles ........................................................................ 104  
Li, Le; Miesch, Caroline; Sudeep, P. K.; Balazs, Anna C.; Emrick, Todd; Russell, Thomas P.; Hayward, Ryan C.

Synthesis and Self-Assembly of Polystyrene-B-Poly(Fluorene-Co-Benzothiadiazole) Block Copolymers ........................................................................ 105  
Verduzco, Rafael; Botí, Joan; Pickel, Deanna L.; Kilbey, S. Michael; Hong, Kanlun; Dimasi, Elaine; Darling, Seth B.

Synthesis of Anisotropic Photo-Responsive Microgels Via Guided Self-Assembly and Inter-Particle Crosslinking ............................................................... 106  
Fan, Zhirong; Böker, Alexander

Synthesis of Triblock Copolymers and Development of a Stabilized Polymer Micelle for Drug Delivery in Oncology ............................................................... 108  
Sill, Kevin; Carie, Adam; Doria, Jonathan Rios; Burke, Brian; Skaff, Habib

Theory and Molecular Simulations of Functionalized Nanoparticles in Polymer Nanocomposites .................................................................................. 110  
Jayaraman, Arthi; Nair, Nitish; Seljoul, Aereou

Toward Harnessing Membrane Protein Functions in Engineered Systems: Self-Directed Reconstitution of a Light-Driven Proton Pump with Amphiphilic Block Copolymers .............................................................................................................. 113  
Zheng, Wan; Hua, Daoben; Kuang, Liangju; Liang, Hongjun

Unprecedented Lubricant Base Oil Friction Reduction by Block Copolymer Micelles and Crosslinked Micelles ........................................................................ 117  
Liu, Guojun; Zheng, Ronghua; Devlin, Mark; Hu, Karen; Jao, Tze-Chi

GENERAL PAPERS/NEW CONCEPTS IN POLYMERIC MATERIALS

BIOLOGICAL

Amylose's Perfect Recognition of Chirality in Polylactides on Assembled Formation of Inclusion Complexes in Vine-Twining Polymerization ................................................................................ 119  
Kadokawa, Jun-ichi; Ueno, Koji

Biodegradable Elastomeric Substrates with Concentric Microgrooves for Regulating MC3T3 Cell Behavior ........................................................................ 121  
Wang, Kan; Cai, Lei; Zhang, Li; Dong, Jingyan; Wang, Shanfeng

Biodegradable Elastomeric Substrates with Controllable Stiffness for Regulating Smooth Muscle Cell Behavior ........................................................................ 124  
Liu, Xifeng; Cai, Lei; Hao, Feng; Cui, Meizhen; Wang, Shanfeng

Biodegradable Elastomeric Substrates with Micro-Fabricated Grooves for Promoting Neurite Extension ........................................................................ 126  
Cai, Lei; Zhang, Li; Dong, Jingyan; Wang, Shanfeng

Biodegradable Layered-Nanocomposites Based on Pectin and Montmorillonite................................................................. 128  
Rajme-Mendez, Jirka; Salgado-Escobar, Irma; Reyes-Mayer, Adriana; Valero-Cárdenas, Cintya; Uribe, Angel Romo

Electrospun Mats of Genistein-Modified Blends of Poly(D,L-Lactic Acid) and Poly (Ethylene Oxide) with Improved Anti-Oxidant and Anti-Inflammatory Properties ................................................................................ 130  
Buddhiranon, Sasiwimon; Define, Linda; Alexander, Thomas; Kyu, Thein

Enhanced Biological Performances of Polyurethane Containing Silver Nanoparticles Dispersed in Poly(Ethylene Glycol) ................................................................................ 132  
Mtimet, Issam; Lecamp, Laurence; Burel, Fabrice; Jouve, Thierry

Green Epoxy Resin: A Fully Vegetable Oil Based Material ........................................................................ 135  
Stemmelen, Mylène; Pessel, Freddy; Lapinte, Vincent; Caillol, Sylvain; Habas, Jean-Pierre; Robin, Jean-Jacques

Honeycomb-Patterned Polymer Substates Prepared Via the Breath Figure Method and Photo-Crosslinking for Promoting MC3T3 Cell Functions ................................................................. 136  
Wu, Xiaohui; Wang, Shanfeng

Thermo-Induced Reversible Transfer of Hairy Particles Between Water and an Ionic Liquid

Horton, Jonathan M.; Bai, Zhifeng; Jiang, Xiaoming; Li, Dejin; Lodge, Timothy P.; Zhao, Bin

SYNTHESIS

Design, Synthesis, and Characterization of Clickable Polyoxetanes as Drug Carriers

Zolotarskaya, Olga Yu; Wynne, Kenneth J.; Yang, Ha

Development of a Paradigm for the Facile Incorporation of Diels-Alder Moieties

Koehler, Kenneth C.; Kloxin, Christopher J.; Bowman, Christopher N.

Effect of Acrylate Choice on Binary Frontal Polymerization

Viner, Veronica G.; Viner, Gloria

Improvement of Fire Retardancy of Epoxy-Amine Network by Adding Metal and Phosphorous-Containing Additives: A Comparative Study

Manzi-Nshuti, Charles; Wu, Yingji; Nazarenko, Sergei

Investigation of the Mechanism of Seeded Dispersion Polymerization Using Refractive Index Matching

Song, Zhipeng; Daniels, Eric S.; Sudo, E. David; El-Aasser, Mohamed S.; Klein, Andrew

Ketenes in Polymer Chemistry: Improving Ketene Generation and Finding Applications in Materials Science

Leibfarth, Frank A.; Wolffs, Martin; Schneider, Yanika; Kawauchi, Mariko; Campos, Luis; Treat, Nicolas; Moon, Bongjin; Hawker, Craig J.

Novel Synthetic Methods for Acceptor Polymers Containing Fullerene C60

Heuken, Maria; Komber, Hartmut; Voi, Brigitte

Organocatalytic ROP of Functional Cyclic Carbonates and Their Post-Polymerization Functionalization

Tempelaar, Sarah; Mesponde, Laetitia; Dubois, Philippe; Dove, Andrew P.

Phosphonic Acid Functionalized Diblock Copolymers as Emulsifiers and for Fuel Cell Application

Wanderlich, Katrin; Markova, Dilyana; Klapfer, Markus; Müller, Klaus

POSS-Sorbitol Interactions: Towards Development of New Class of Polyolefin Composite Materials

Roy, Sayantan; Jana, Sadhan C.

Synthesis and Characterization of Film-Forming Poly(Methyl Methacrylate-Co-N-Butyl Acrylate)/silica Nanocomposite Particles Via Surfactant-Free Aqueous Emulsion Copolymerization

Fielding, Lee A.; Tonnar, Jeff; Armes, Steven P.

Synthesis and Characterization of Polysiloxane-Based Single-Ion Conductors Containing Novel Borates

Liang, Siwei; Choi, U. Hyoek; Runt, James P.; Colby, Ralph H.

Synthesis and Post-Polymerization Functionalization of Poly(S-Iodo-1,2,3-Triazole)s

Schwartz, Erik; Breitenkamp, Kurt; Fokin, Valery V.

Versatile Surface Biofunctionalization of Poly(Ethylene Terephthalate) by Interpenetrating Polymerization of a Butynyl Monomer Followed by "Click" Chemistry

Liu, Song; Li, Lingdong; Zhao, Nan

JOINT PMSE/POLY POSTER SESSION

DYNAMICS OF NANOSTRUCTURED POLYMERS AND GENERAL POSTERS/NEW CONCEPTS IN POLYMERIC MATERIALS

Conjugated Metallo-Supramolecular Polymers and Materials

Wild, Andreas; Schlüter, Florian; Winter, Andreas; Hager, Martin D.; Schubert, Ulrich S.

Crystallinity Effect on Electric Energy Storage in Miscible Poly(Vinylidene Fluoride-Co-Hexafluoropropylene)/poly(Methyl Methacrylate) Blend Films

Tseng, Jung-Kai; Lewis, Craig; Zhu, Lei

Facile Synthesis of Colloidal Silver Nanoparticles and Its Incorporation Into Acrylic Coatings

Teran-Salgado, Elvira; Valerio-Cárdenas, Cintya; Romo-Urbi, Angel; Cruz-Silva, Rodolfo

Mechanical Properties of Robust Polyethylene Glycol: Hydroxyapatite Hydrogels

Gaharwar, Akhilesh K.; Dammu, Sandhya A.; Canter, Jamie M.; Wu, Chia-Jung; Schmidt, Gudrun

Novel Approach to Study the Dielectric Constants of Polymeric Chains

Yadla, Karun; Derosa, Pedro A.

Novel Elastic Conductive Composite Films PEDOT:PSS/P(BA-St)

Yin, Hui-En; Wu, Chieh-Han; Chiu, Wen-Yen
FUNCTION THROUGH MACROMOLECULAR ASSEMBLY AND GENERAL POSTERS/NEW CONCEPTS IN POLYMER MATERIALS

Assembly of Functional Hollow Nanoparticles and Their Transition to Breath Figures from Photopolymerized Acryloyl Chloride ................................................................. 236

Honglavan, Apiradee; Yang, Shu

Facile Synthesis of Well-Defined Oligoamide-11-B-Poly(N-Butyl Acrylate) by Combination of Melt Polycrystallization and RAFT Polymerization .... 238

Chen, Senbin; Doitrind, Pierre-Marie; Grondin, Pauline; Rousseau, Alain; Gérard, Jean-François; Lorite, Frédéric; Bernard, Julien

High Permeability and Diffusion Parameters of Hydrogen-Bonded Multilayer Capsules 240

Drachuk, Irina; Shchepelina, Olga; Tsukruk, Vladimir V.

Improved Simulated Structure Generation of Linear Polymers of Intrinsic Microporosity (PIMs) 241

Hart, Kyle E.; Abbott, Lauren J.; Larsen, Gregory S.; Lin, Ping; Colina, Coray M.

Mechanical and Electrical Properties of Multi-Walled Carbon Nanotube/FKM Composites 242

Lee, Young Seok; Ryu, Hyun Soo; Lee, Jong Cheol; Choi, Hyun Jin; Ha, Kiryong

Micellar Drug Delivery System from Poly(Ethylene Glycol-B-Caprolactone) Diblock Copolymers 244

Glover, Amanda L.; Bennett, James B.; Nikles, Sarah M.; Nikles, Jacqueline A.; Brazel, Christopher S.; Nikles, David E.

Near Zero VOC Low Viscosity Colloidal Unimolecular Polymer (CUP) Epoxy Hardener 246

Behave, Mandar R.; Hancock, Catherine E.; Van De Mark, Michael R.

Peptide Directed Self Assembly of Polymeric Nanotubes 248

Chapman, Robert; Jolliffe, Katrina A.; Perrier, Sebastien

Soft Fullerenic Materials Via Retro-Functional Analysis: From Molecules to Materials 250

Zhang, Wen-Bin; Quirk, Roderic P.; Cheng, Stephen Z. D.

Strategies Towards Independent Mesh-Size and Swelling Ratio Control in Tethered-Micelle Hydrogel Networks ......................... 252

Guo, Chen; Lewis, Jackson T.; Schwartz, Miriah M.; Bailey, Travis S.

Synthetic Methods to Prepare Amphiphilic and Biocompatible Cyclodextrin Derivatives 254

Gyanwali, Gaumani; White, Jeffery L.

Well-Defined Graft Copolymers Assembled by Host-Guest Inclusion Between Adamantane-Functionalized Poly(Acrylic Acid) and β-Cyclodextrin-Grafted Polymer 256

Bertrand, Arthur; Stenzel, Martina; Fleury, Etienne; Bernard, Julien

GENERAL POSTERS/NEW CONCEPTS IN POLYMER MATERIALS

American Dental Association - Paffenbarger Research Center: Polymers and Composites Research Overview ................................................................. 258

Davis, Cher H.; Skritic, Drago; Schumacher, Gary E.; Carey, Clifton M.

Anti-Fouling Effect and Biomedical Application of Modified Star-Shaped Poly(Ethylene Oxide) 259

Kim, Ju Eun; Kang, Jungkyu; Jeong, Jee-Heon; Byun, Youngro; Kim, Jungahn; Ahn, Cheol-Hee

Biosensory Function of Fluorescent Dendron-Cyclodextrin Nanotubes 261

Lee, Jeonghun; Park, Chiyoung; Park, Sanghyu; Kim, Hyunsoo; Kim, Chulhee

Characterization by Optical Microscopy of the Dispersion in Carbon Nanotube/polymer Composites 263

Combessis, Anthony; Bayon, Lorrène; Flandin, Lionel

Construction of Benzene-Cored Molecules and Hyperbranched Polymer with Aggregation-Induced Emission Characteristics 264

Hu, Rongrong; Lam, Jacky W. Y.; Sung, Herman H. Y.; Williams, Ian D.; Yue, Zhouruan; Wong, Kam Sing; Yuen, Matthew M. F.; Tang, Ben Zhong
Deformation of a Uniformly Driven Single Polymer Studied by Brownian Dynamics Simulations
Nie, Yijing; Li, Ju; Hu, Wenbing

Dendron Nanotubes with Surface Maltosyl Units and Their Reversible Complexation with Concanavalin A
Lee, Jeonghun; Yun, Mikiyoung; Park, Chiyong; Park, Sangkyu; Kim, Hyunsoo; Kim, Chulhee

Detection of MEA’s Flaws in PEMFC: An Innovative In-Situ and Ex-Situ Combination
Moor, Gilles De; Bus, Corinne; Nieper, Frederic; Alberola, Nicole D.; Flandin, Lionel

Dynamics of Aging in Clay-Polymer Suspensions
Atmuri, Anand; Bhatia, Surita

Effect of UV-Treatment for Preparation of SUS Electroforming Master
Jo, Nam-Seek; Park, Deok-Min; Lee, Jae-Yun; Ka, Dong-Myung; Lee, Kyung-Yul; Nah, Jung-Sok; Chin, In-Joo

Fabrication of Titania Nanoparticles Based on Block Copolymer Self-Assembly and Sol-Gel Chemistry
Kim, Young Chan; Kim, Wonho; Choi, Su Yeon; Kim, Seung Hyun

Formation of Planar Arrangements in Cholesteric Liquid Crystals
Jung, Gapha; Lee, Mongsung; Song, Kigook

Geinstein Modified Polymer Blends for Hemodialysis Membranes
Chang, Teng; Chandrasekar, Neelakandan; Kyu, Thein; Define, Linda; Alexander, Thomas

Glutathione-Responsive Silica Nanocounters with Cyclodextrin Gatekeepers for Drug Delivery Application
Kim, Hyunjun; Kim, Hyebyeon; Kim, Saehee; Lee, Hyemi; Park, Heon Joo; Kim, Chulhee

Improvement of Electric Conductivity of Polyaniiline Thin Film with Self Orientation Induced Additive for the Polymer Electrode
Kim, Seong Hun; Lim, Tae Hwan; Oh, Kyung Wha

Injectable Hyaluronan-Based Hydrogels with Tunable Adhesive and Mechanical Properties
Rojas, Ramiro; Kootala, Sujit; Hilborn, Jöns

Investigation of Various Interactions Between Biomimetic Polymer Membranes and Ionic Liquids
Jeong, Seungwhan; Baek, Youhyo; Jung, Sung-Ho; Park, Jongjin; Jeon, Tae-Joon

Kinetic Models for Predicting PEG Covalent Grafting Using XPS Fractional C-O Intensities
Damodaran, Vinod B.; Fee, Conan J.; Popat, Ketul C.

Ladder-Like Structured Polyisoprene with High Photoluminescence Efficiency
Choi, Seung-Sock; Lee, Albert S.; Lee, He Seung; Hwang, Seung Sang; Choi, Dong Hoon; Baek, Kyung-Youl

Magnetothermally-Triggered Drug Delivery Using Temperature-Responsive Polymeric Micelles
Bennett, James B.; Glover, Amanda L.; Nikles, David E.; Nikles, Jacqueline A.; Brazel, Christopher S.

MALDI MS for the Products of Group IVB Metalloenes and Thiamine
Carracher Jr., Charles E.; Lambert, Raven E.

Measurement Strategies for Thin Polymer Membranes Used in Water Purification
Stafford, Christopher M.; Johnson, Peter M.; Yoon, Joonsang; Lee, Jung-Hyun; Howarter, John A.; Chung, Jun Young

Mechanical Properties and Crystallization Behavior of PLA/PETG Blends
Park, Jun Yong; Hwang, Sung Yeon; Im, Seung Soon

Modeling of Moderate Mass Range F MALDI MS Results of Organotin Poly(Ester Amines) Derived from Ciprofloxacin and Dibutyltin Dichloride
Carracher Jr., Charles E.; Zhao, Anna

On Binary Phase Diagrams of Polymer Blends: Spinodals That Make a Circular Envelope
Sharma, Kal Renganathan

On Occurrence of Multiplicity During Transient Polymerization in CSTR
Sharma, Kal Renganathan

Optimizing the Heat Sealing of Polymer Through Multilayers
Planes, Emile; Flandin, Lionel

Physical Properties and Crystallization Behaviors of Polylactide with Carbon Nanotube
Kim, Seong Hun; Park, Sang Ho; Lee, Seung Goo

Preparation and Characterization of HTPB/AIN Thermal Paste for Application of Thermal Interface Material in High Power LED
Chen, Jang-Kang; Lin, Yi-Hao; Lin, Yen-Shou; Rau, Mann-Fu

Preparation of Pressure Sensitive Adhesive for Electroformed Copper EMI Mesh
Park, Deok-Min; Jo, Nam-Seek; Lee, Jae-Yun; Ka, Dong-Myung; Lee, Kyung-Yul; Nah, Jung-Sok; Chin, In-Joo

Preparation of Supported Liquid Membranes with Proton Carriers for Water Free Polymer Electrolyte Fuel Cells
Park, Jin-Soo; Shin, Mau-Sik; Kang, Moon-Sung; Choi, Young-Woo; Yang, Tae-Hyun

Protein-Polymer Conjugates for Use as Hybrid Functional Materials
Briand, Victoria A.; Thilakaratne, Vindya; Kumar, Challa V.; Kasi, Rajeewari M.
Role of Microfillers on Molecular Orientation and Mechanical Properties of Thermotropic Copolyester ........................................ 312
Mohite, Dhairyashil P.; Larimore, Zachary; Sotiriou-Leventis, Chariklia; Leventis, Nicholas

Salicylic Acid-Based Poly(Anhydride-Esters) to Reduce Soft Tissue Growth Into Ceramic Bone Tissue Scaffolds ................................................................. 314
Ray, Jacob G.; Naik, Sandeep S.; Johnson, Ashley J.; Ly, Jack T.; Savin, Daniel A.

SEM Characterization of Wheat Gluten Blends with Functionalized Silane-Coated Alumina ...................................................... 316
Hemsri, Sadisiri; Parnas, Richard S.; Asadi, Alexandre D.

Solid-State Dye-Sensitized Solar Cells Based on Conducting Polymers by Photo-Electropolymerization ................................................. 318
Song, Inyoung; Park, Sung-Hae; Park, Taeho

Soluble Crosslinked Tetraphenylenethene-Containing Polyacrylates with Aggregation-Induced Emission Characteristics ........................................ 320
Hu, Rongrong; Lam, Jacky W. Y.; Sung, Herman H. Y.; Williams, Ian D.; Yu, Yong; Yuen, Matthew M. F.; Tang, Ben Zhong

Structural Effects on Assembly and Responsive Behavior in Polypeptide-Based Block Copolymers .................................................. 322
Ray, Jacob G.; Naik, Sandeep S.; Johnson, Ashley J.; Ly, Jack T.; Savin, Daniel A.

Synthesis of Organotin Polyamine Dihalides Employing Interfacial Polycondensation ........................................................ 324
Carragher Jr., Charles E.; Gupta, Amit

Synthesis of Organotin Polyamine Dihalides with Glycyrrhetinic Acid ....................................................................................... 329
Carragher Jr., Charles E.; Truong, Ngoc Trang Caroline; Roner, Michael R.

Synthesis of Organotin Polyether Esters from the Reaction of Organotin Dihalides with Glycyrrhetic Acid .................................................. 331
Carragher Jr., Charles E.; Arnold, Tiasha; Roner, Michael R.

Synthesis of Sterically Hindered Polyamine for Slow Curing Polyurea Coatings ................................................................. 337
Shooshatri, Kiawash A.; Gade, Sagar V.; Van De Mark, Michael R.

Thermal Annealing, Microstructure and Mechanical Properties in Thermotropic Copolymers ...................................................... 339
Reyer-Mayer, Adriana; Constant, Amaury; Romo-Uribe, Angel

Thermoplastic Elastomers Based on Maleated Polyolefin Elastomer-Nylon 12 Blends .............................................................. 342
Choi, Myung-Chan; Jung, Je-Yoon; Chang, Young-Wook

Transparent Nanocomposites for Protective Coating Applications ................................................................................................. 344
Ojha, Satyajeet S.; Hui, Ching Ming; Matyjaszewski, Krzysztof; Bockstaller, Michael R.

Transparent, Thermoresponsive Hydrogels for Ophthalmic Drug Delivery ................................................................................. 346
Mazumder, Mohammad A. Jafar; Fitzpatrick, Scott; Muirhead, Ben; Sheardown, Heather

PET RECYCLING: BRIDGING THE GAPS THROUGH INNOVATION AND GENERAL POSTERS/NEW CONCEPTS IN POLYMERIC MATERIALS

Biologically and Mechanically Tunable Resilin-Based Elastomeric Biomaterials ........................................................................... 348
Li, Linqing; Kiick, Kristi L.

Defining the Drivers for Reuse: A Planning and Decision Tool for Plastic Recycling ................................................................. 350
Babcock, Laura M.; Smith, Timothy M.

Dynamics and Memory Effect in Wrinkling ..................................................................................................................... 351
Li, Zhong; Zhang, Shen; Zhang, Pengfei; Yang, Dayong; Ma, Hongwei

Enhanced Phase Morphology of Polyester/polyolefin Blends by In-Situ Reactive Compatibilization .............................................. 352
Lee, Eunji; Song, Kwonbin; Lee, Jin-Kyun; Lee, Kwanghee

Establishment of Nanofiber by Electrospinning Technique with Resin Muluti-Nozzle ................................................................. 354
Miyake, Hajime; Yamashita, Yoshihiro; Wakiwaka, Hiroaki

Fabrication of Polyrhodanine Nanotubes Modified Anodic Aluminum Oxide Membrane and Its Application for Heavy Metal Ions Removal ........................................................................... 355
Oh, Hyuntaek; Song, Jooyoung; Jang, Yongsook

Politics of Recycling RPET Bottles ................................................................................................................................. 357
Adams, Geoffrey L.

Polydicyclopentadiene Aerogels Grafted with Polymethylmethacrylate ........................................................................ 358
Mohite, Dhiyayashil P.; Larimore, Zachary; Sotiriou-Leventis, Chariklia; Leventis, Nicholas
Preparation of Dense Hybrid Membranes from Ultraviolet Treatment of Poly(Chloroethylsilsesquioxane) Particles ............................................................... 361
   Li, Zhe; Loy, Douglas A.

Thermally Initiated Crosslinking of Highly Functional Biobased Epoxy Resins .............................................................................................................. 363
   Nelson, Thomas J.; Pan, Xiao; Galhenage, Teihuka; Webster, Dean C.

Triblock Copolymer Thin Film Complexed with Lithium Salt ............................................................... 365
   Lee, S.; Lee, Bomi; Lee, Jin Wook; Kim, Seung Hyun

POROUS POLYMERS AND GENERAL POSTERS/NEW CONCEPTS IN POLYMERIC MATERIALS

Block Copolymer Micellar Cubic Structures in Ionic Liquids ........................................................................... 366
   Alexandridis, Paschalidis; Tsoutsoura, Alkaterini

Dynamic Mechanical Thermal Properties of Polycarbonate/ABS Blends: Influence of ABS Type and Compatibilizer ................................................................. 368
   Bai, Yu; Wang, Rongwei; Du, Qiangguo; Wang, Juan

   Barbetta, Andrea; Cametti, Cesare; Rizzitelli, Giuseppe; Dentini, Mariella

Hexaphenylbenzene-Based Polymers of Intrinsic Microporosity ................................................................ 371
   Croad, Matthew J.; Short, Rhys; Carta, Mario; Bezzu, Grazia; Kariuki, Benson; Muyib, Kadhum J.; Fritsch, Detlev; McKeown, Neil B.

In Situ Generated Polymeric Devices for the Treatment of Abdominal Aortic Aneurysm ............................................................... 372
   Abbas, Randa; Cohn, Daniel

Nonaqueous PolyHIPEs with an Ionic Liquid as Internal Phase ........................................................................ 374
   Shirshova, Natasha; Bismarck, Alexander; Steinke, Joachim H. G.

Novel 3D Porous Polyester-Based Scaffolds for Tissue Engineering ........................................................................ 376
   Ramier, Julien; Renard, Estelle; Langlois, Valerie; Grande, Daniel

Novel Functionalized Nanoporous Polymers Derived from Macromolecular Architectures with Controlled Hydrolytic Degradability ................................................. 378
   Majdoub, Rim; Benzina, Mourad; Grande, Daniel

Polypropylene Glycol: An Effective Hydrophilic Additive to Polyethersulfone Membranes Modification ........................................................................................................ 380
   Zhao, Li-Hua; Yi, Zhuan; Zhu, Li-Ping; Xu, You-Yi; Li, Xiao-Ling

Porous Gelatin-Hydroxyapatite Composite Scaffolds Via Gas-In-Liquid Foam Templating ................................. 382
   Barbetta, Andrea; Cuppone, Ilaria; Pecci, Raffaella; Bedini, Rossella; Dentini, Mariella

Silica and Dysprosia Aerogels as Drug Carriers for Indomethacin and Paracetamol ........................................... 383
   Bang, Abhishek; Sadekar, Anand; Curtin, Brice; Baback, Clayton; Acar, Selma; Leventis, Nicholas; Sotiropou-Leventis, Chariklia

Synthesis and Characterization of Highly Porous Polyvinyl Alcohol Hydrogels Crosslinked in Different Ways ........................................................................................................ 385
   Barbetta, Andrea; Papi, Alessio; Dentini, Mariella

Use of Triple-Detector Gel Permeation Chromatography to Explore the Heterogeneous Polymerisation of PIM-1 ........................................................................................................ 386
   Maynard-Atem, Louise; Budd, Peter M.; Al-Harabi, Nasser

PET RECYCLING: BRIDGING THE GAPS THROUGH INNOVATION

Chemical Recycling of Polyethylene Terephthalate (PET) Bottle Waste Using DMAP as a Catalyst ................. 388
   Nigar, Mehr; Feroze, A.; Rashid, N.; Coughlin, E. Bryan

Conversion of Waste PET to Value-Added Products ............................................................................................. 390
   Nikles, David E.; Farahat, Medhat S.

Driving Increased Recycling Rates and RPET Use Through "extended Producer Responsibility" (EPR) ............................................................................................................. 391
   Flaherty, Brian J.

Improving the Properties and Recycling of PET ................................................................................................. 392
   Joijode, Abhay; Tonelli, Alan E.

Life Cycle Inventory of Postconsumer PET Recycling ............................................................................................. 393
   Sauer, Beverly
Organocatalytic Amidation of Poly(Ethylene Terephthalate) ................................................................. 394
Fukushima, Kazuki; Lecuyer, Julien M.; Almegren, Hamid A.; Alabdulrahman, Abdullah M.; Alsewailem, Fares D.; McNeil, Melanie A.; Horn, Hans W.; Rice, Julia E.; Hedrick, James L.

PET Plastic Recycling: Technology and Quality ...................................................................................... 396
Cornell, David D.

Polyethylene Terephthalate Recycling for Food Contact Applications: A Global Perspective - Technologies, Testing, and Safety ................................................................. 399
Bayer, Forrest L.

Post Consumer PET Recycling Today and in the Future ........................................................................ 400
Sabourin, Denis

Recycled Plastics for Food Contact Applications in the US .................................................................... 401
Bailey, Allan B.; Komolprasert, Vaneet

Recycling PCR-PET Regulatory Situation in South America ................................................................... 402
Ariosti, Alejandro

Risk Assessment of Recycled Plastics for Food Contact: a European View .......................................... 403
Castle, Laurence

Study of PET-B-PLAc-B-P(DMAEMAq) Triblock Copolymers by Rheology and SANS ..................... 404
Liênafa, Livie; Oberdisse, Julian; Mora, Serge; Monge, Sophie; Robin, Jean-Jacques

POROUS POLYMERS

Biomaterials/Foams/Aerogels

Biobased, Biodegradable Polymer/clay Aerogels ..................................................................................... 406
Schiraldi, David A.; Gawryla, Matthew D.; Wang, Yuxin; Pojanaavaraphan, Tassawuth; Sanchez-Soto, Miguel; Chioa, Bor-Sen

Cellulose Aerogel from Ionic Liquid Solution Dried by Silylation ........................................................ 407
Rein, Dmitry M.; Cohen, Yachin

Control of Porosity, Modulus, and Structure in Micellar Hydrogel Networks ......................................... 408
Bailey, Travis S.; Scaljani, Vincent F.; Guo, Chen

High Porosity CO₂-Blown Nanofoams .................................................................................................... 409
Costeux, Stephane; Zhu, Liangbo

PMMA/carbon Nanotube Nanocomposite Foams for EMI Shielding Application .............................. 411
Thomassin, Jean-Michel; Valduga, Daniela; Alexandre, Michael; Jerôme, Christine; Molenberg, Isabel; Huynen, Isabelle; Detrembleur, Christophe

Polymer Scaffolds for Neural Tissue Engineering .................................................................................. 413
Daud, Muhammad; Pawar, Kiran; Gill, Andrew; Ortega, Ilica; Murray-Dunning, Celia; Claeysens, Frederick; Haycock, John W.

Porous Gels of Poly (ε-Caprolactone) Using the Tubular Organogel Fibers of a Polyurethane Model Compound as Porogen .............................................................................................................. 414
Sundararaju, P. R.; Khan, Mostofa Kamal

Scaffold for Tissue Regeneration Where Invading Cells Create Their Own Porosity .............................. 416
Hilborn, Jöns; Piskounova, Sonya; Ossipov, Dmitri; Varghese, Oommen; Bowden, Tim; Bergman, Kristoffer; Engström, Thomas

Block Copolymers/Membranes

Formation of Microporous Polymer Membranes from "hard Elastic" Precursors ....................................... 417
Demeuse, Mark; Druin, Melvin; Jaffe, Michael

Functionalized Porous Polymeric Membranes ....................................................................................... 418
Ulbrecht, Matthias; Adrus, Nadia; Frost, Sven; Klingethiller, Karin; Stabera, Nico; Tomicki, Falk; Yang, Qian

Nanoporous High Density Polyethylene .................................................................................................. 419
Pötet, Louis, Hillmayer, Marc

Nanoporous Polymer Templates from the Marriage of Polymerization Mechanisms .............................. 421
Hillmayer, Marc

PE/PEO Cocontinuous Polymer Blends with Application in Gas Separation Membranes .................. 422
Hedegaard, Aaron; Trifkovic, Milana; Macosko, Christopher W.

Polyethersulfone-Based Amphiphilic Block Copolymers for Hydrophilic Modification of Polysulfone Membranes ........................................................................................................ 424
Yi, Zhuan; Zhu, Li-Ping; Zhu, Bao-Ku; Xu, You-Yi
Polymers in the Porous Media ................................................................. 426
Chen, Dian; Zhao, Wei; Russell, Thomas P.

Porous Inorganic-Organic Shape Memory Polymers ........................ 428
Zhang, Dawei; Burkes, William L.; Schoener, Cody A.; Grunlan, Melissa A.

MESOPOROSITY/POROUS SYSTEMS

Biocompatible Nanocapsules with Nanometer-Thin Walls .................. 429
Dergunov, Sergey A.; Pinkhasik, Eugene

Fabrication of Nanostructured Porous Oxide Layers ......................... 430
Erenturk, Burcin; Hendricks, Nicholas R.; Watkins, James J.; Carter, Kenneth R.

Nanoporous Materials from the Self-Assembly of Asymmetric Bottlebrush Block Copolymers ..................................................... 432
Bolton, Justin; Rzayev, Javid

Novel Functional Porous Polymer Monoliths for Capillary Electrochromatography ................................................................. 434
Grande, Daniel; Guerrouache, Mohamed; Carbonnier, Benjamin

Triptycene Polymides: Porous Polymers with High Thermal Stability and Low Refractive Indices ................................. 436
Sydlik, Stefanie A.; Chen, Zhihua; Swagger, Timothy M.

Uniform Polymer Brush Layers on High-Surface-Area Ordered Mesoporous Silica Supports ......................................................... 439
Cao, Liang; Huang, Liang; Kruk, Michal

Viscoelastic Behavior of Hydrophobically Modified Hydrogels .......... 441
Hao, Jinkun; Weiss, Robert A.

MICROPOROUS

Development of a Scattering Model for Polymers of Intrinsic Microporosity with Insight from Molecular Dynamics Simulations .......... 443
McDermott, Amanda G.; Larsen, Gregory S.; Budd, Peter M.; McKeown, Neil B.; Colina, Coray M.; Runt, James

Exploring the Concept of Intrinsic Microporosity Though Synthetic Chemistry ................................................................. 445
McKeown, Neil B.

Functional Nanoporous Hypercrosslinked Polymers for High Surface Area ................................................................. 446
Zhou, Xia; Turner, S. Richard

Metal-Organic Conjugated Microporous Polymers (MO-CMPs) ................ 449
Jiang, Jia-Xing; Wang, Chao; Adams, Dave J.; Higgins, Simon J.; Xiao, Jianliang; Cooper, Andrew I.

Nanocomposite Gas Separation Membranes with Polymer of Intrinsic Microporosity (PIM) Matrix .................................................. 450
Budd, Peter M.; Bushell, Alexandra F.; Mason, Christopher R.; Maynard-Atem, Louise; Artfield, Martin P.; Jansen, Johannes C.; Clarizia, Gabriele; Bazzarelli, Fabio; Bernardo, Paola; Yam Polskii, Yuri; Starannikova, Ludmila

Novel Nanoporous Polymers: In Silico Design ................................... 452
Abbott, Lauren J.; Hart, Kyle E.; Larsen, Gregory S.; Lin, Ping; Colina, Coray M.

Polymers of Intrinsic Microporosity (PIMs) Derived from Bowl-Shaped Monomers ................................................................. 453
Vile, James; Carta, Mariantona; Bezzu, Grazia; McKeown, Neil B.

Porous Polymers Constructed from 3D Organic Molecular Cages ........ 454
Jin, Yinghui; Voss, Bret A.; Jin, Athena; McCaffrey, Ryan P.; Noble, Richard D.; Zhang, Wei

Synthesis of Organic Molecules and Dendrimers of Intrinsic Microporosity (OMIMs and DIMs) ......................................................... 455
Taylor, Rupert G. D.; Bezzu, Grazia; Walker, Jonathan; Msayib, Kadhum J.; McDermott, Amanda G.; Runt, James; Abbott, Lauren J.; Colina, Coray M.; Maynard-Atem, Louise; Budd, Peter M.; McKeown, Neil B.

POLYHIPE/TEMPLATING

Biodegradable and Functionalisable Emulsion Templated Porous Polymers from Thiol-Ene Chemistry ......................................................... 457
Caldwell, Sally; Cameron, Neil R.

Colloidal ly Templated Conducting Polymer Porous Arrays: Binary Chemistry and Applications ......................................................... 459
Advinful, Rigoberto C.

Injectable PolyHIPEs as High Porosity bone Grafts ................................. 461
Cosgriff-Hernandez, Elizabeth; Moglia, Robert; Holm, Jennifer; Sears, Nicholas

Macroporous Polymer Membranes Via Emulsion Templating ................ 462
Menner, Angelika; Jiang, Qixiang; Bismarck, Alexander

Macroporous Polymers with Hierarchical Pore Structures ...................... 463
Wong, Ling Ching; Ikem, Vivian O.; Menner, Angelika; Bismarck, Alexander
Mesoporous Polymer Networks by Hard Templating: High Surface Area Resins, Hydrogels of Reversible Porosity and CO₂ Capture Materials
Wilke, Antje; Yazdanbakhsh, Farzad; Weber, Jens

Porous Emulsion-Templated Polymers from Nanoparticle Pickering Emulsions
Silverstein, Michael S.; Gurevitch, Iona

Role of Foams in the Preparation of Highly Porous Materials
Barbeta, Andrea

ROY W. TESS AWARD: SYMPOSIUM IN HONOR OF DEAN C. WEBSTER

Applications of Controlled Radical Polymerization in Coatings and Block Copolymer Lithography
Vora, Ankit

Controlling the Structure of Nanoparticle Films and Coatings: Insights from Polymer Science
Hobbie, Erik

Crosslinked Siloxane-Polyurethane Coatings for Marine Coating Application
Ekin, Abdullah

Effect of Atomization and Rheology Control Additives on Particle Size and Appearance of Automotive Coatings
Basu, Soumendra; Zhou, Joe; Harding, Arved; Moncieer, John; Williams, Chip; Baker, Leslie; McCreight, Kevin

Effect of Location on Embedded Electrochemical Sensor Response in Coating Films
Bierwagen, Gordon P.; Upadhyay, Vinod; Allahar, Kerry N.

In Situ Oxidative Polymerization in Sol-Gel Coatings for Active Corrosion Inhibition
Croes, Kenneth; Gelling, Victoria; Singleton, Thomas; Vreugdenhil, Andrew

Linking Degree of Filler Dispersion to Photodegradation Rate in a NanoTiO₂-Latex Coating: An Accelerated Weathering Study
Sung, Lipiin; Pang, Yongyan; Watson, Stephanie S.

Magnetic Block Complexes: Perfect Union Between Well-Defined Ionic-Nonionic Block Copolymers and Iron Oxide Nanoparticles for Applications in Nanomedicine
Pothee, Nikorn; Jain, Neeta; Pothee, Nipon; Johnson, Lindsay M.; Balasubramaniam, Sharavan; Davis, Richey M.; Sriranganathan, Nathan; Riffle, Judy S.; Kabanov, Alexander V.

Non-Ionic and Ion-Containing Multiblock Copolymers
McGrath, James E.

Pigments and the Long Term Structure of Artists' Oil Paint
Croll, Stuart G.; Mecklenburg, Marion F.; Zee, Malia

Polymers to Coatings: Principles for Designing Complex Functional Materials
Webster, Dean C.

Synthesis and Characterization of Perfectly Alternating Polycarbonate-Polydimethylsiloxane Multiblock Copolymers
Majumdar, Partha; Yao, Hanzhen; Sharma, Ranjana; Crowley, Elizabeth; Bahr, James; Chisholm, Bret J.

SYMPOSIUM IN MEMORY OF PROFESSOR ANNE HILTNER

LAYERED POLYMER SYSTEMS

Confinement-Induced High Field Antiferroelectric-Like Behavior in a Poly(Vinylidene Fluoride-Co-Trifluoroethylene-Co-Chlorotrifluoroethylene)-Graft-Polystyrene Graft Copolymer
Guan, Fangxiao; Wang, Jing; Zhu, Lei

Layered Polymeric Systems
Baer, Eric

Multilayer Polymer Photonics
Singer, Kenneth; Andrews, James; Baer, Eric; Hiltner, Anne; Johnson, Jack; Lott, Joseph; Ryan, Christopher; Saini, Anuj; Schiraldi, David; Shan, Jie; Song, Hyunmin; Valle, Brent; Weder, Christophe; Wu, Yeheng; Zhou, Juefei

Multilayer Reactive Barrier Materials
Carranza, Susana; Paul, Donald R.; Bonnecaze, Roger

Polymer Multilayer Structures Containing Particulates
Nazarenko, Sergei
POLYMER ASSEMBLY

Combining Forced-Assembly and Self-Assembly to Generate Mechanically-Enhanced, Multi-Functional Materials .......................................................... 494
Korley, Lashanda T. J.; Burt, Tiffany M.; Lai, Chuanyar; Baer, Eric; Hiltner, Anne

New Interfacial Surface Generator for the Co-Extrusion of Micro- And Nano-Layered Polymers ................................................................. 495
Harris, Patrick; Paz, Jessica; Silva, Jorge; Chabert, Erwan; Bonnecaze, Roger; Maia, João

Solventless Spinning of Polymer Nanofibers ................................................................................................................. 496
Ellison, Christopher J.; Shanmuganathan, Kadhiravan; Sankhagowit, Robert; Iyer, Prashanth; Sparks, Sarah

Structure/property Relationships in Gas Barrier Materials .................................................................................. 497
Schiraldi, David A.

Structure-Property Relations in Polymers for Gas Separations ................................................................. 498
Freeman, Benny D.

POLYMER MOLECULAR DESIGN

Giant Surfactants and Lipids: A New Art in Designing Advanced Materials .......................................................... 499
Cheng, Stephen Z. D.; Zhang, Wenbin; Yu, Xinfei; Hsieh, I-Fan; Dong, Xuexiu; Van Horn, Ryan M.

Isosorbide Derived Mesogenic Monomers ........................................................................................................ 500
Sini, Pabhjot; Romo-Uribe, Angel; Hammond, Willis; East, Anthony J.; Jaffe, Michael

Polymer Research and Education: A View from the NSF Polymers Program .................................................. 502
Lovinger, Andrew J.; Khoury, Freddy A.

Step Towards Extrudable Photovoltaic: the Synthesis of Donor and Acceptor Polymers ........................................ 504
Nourdine, Ali; Perrin, Lara; Alberola, Nicole D.; Flandin, Lionel

Synthesis and Characterization of Melt Processible Acrylonitrile Copolymers and Blends ................................ 505
McGrath, James E.; Mecham, Sue J.; Lee, Myoungbae; Chen, Yu; Pisipati, Priya; Huang, Jianhua; Baird, Donald G.

POLYMER MOLECULAR ORGANIZATION

Controlling Cavitation of Crystalline Polymers During Tensile Drawing .......................................................... 507
Galeski, Andrzej; Rozanski, Artur

Effect of (3,1) Chain-Walking Defects on the Crystallization and Melting of Isotactic Poly(propylene) ............ 510
Alamo, Rafina G.; Ruiz-Orta, Carolina; Anderson, Amelia M.; Coates, Geoffrey W.

Highly Porous Polymer Systems Through Emulsion Templating .................................................................... 512
Silverstein, Michael S.

Strain and Shear Induced Crystallization of Polylactides .................................................................................... 513
Piorkowska, Ewa; Bojda, Joanna; Cichorek, Michal

Structure-Property Relationships of Polyurethane Vascular Grafts ............................................................ 514
Cosgriff-Hernández, Elizabeth; Dempsey, David; Nezarati, Roya; Browning, Mary Beth
