2011 IEEE Fourth International Conference on Software Testing, Verification and Validation Workshops

(ICSTW 2011)

Berlin, Germany
21 – 25 March 2011
# Table of Contents

Welcome Message from the Workshops Chair ................................................................. xiv
Workshop Organizers .................................................................................................... xv

---

**AMOST 2011—Seventh Workshop on Advances in Model-Based Testing**

**Model-Based Testing for Embedded and Real-Time Systems I**
Test Selection for Data-Flow Reactive Systems Based on Observations .......................... 1
  *Omer Nguena-Timo and Antoine Rollet*

**Model-Based Testing for Embedded and Real-Time Systems II**
Abstracting Time and Data for Conformance Testing of Real-Time Systems .................. 9
  *Wilkerson L. Andrade, Patricia D.L. Machado, Thierry Jéron, and Hervé Marchand*
Model-Based Statistical Testing of Embedded Systems .................................................. 18
  *Frank Böhr*
Risk-Based Testing of Safety-Critical Embedded Systems Driven by Fault Tree
Analysis ....................................................................................................................... 26
  *Johannes Kloos, Tanvir Hussain, and Robert Eschbach*
Simulated Restriction of Coverage Criteria on UML State Machines .............................. 34
  *Stephan Weißleder and Thomas Rogenhofer*

**Domain-Specific Approaches and Tools I**
An Experience Report on an Industrial Case-Study about Timed Model-Based Testing
with UPPAAL-TRON ..................................................................................................... 39
  *Carsten Rütz and Julien Schmalitz*
Reconfigurable Model-Based Test Program Generator for Microprocessors ..................... 47
  *Alexander Kamkin, Eugene Kornykhin, and Dmitry Vorobyev*
Model-Based Testing for the Second Generation of Integrated Modular Avionics ............... 55
  *Christof Efkemann and Jan Peleska*
Using a DSL and Fine-Grained Model Transformations to Explore the Boundaries of Model Verification—Extended Abstract .................................................................63

M.F. van Amstel, M.G.J. van den Brand, and L.J.P. Engelen

Domain-Specific Approaches and Tools II and the SCENARIOS Workshop

TripleT: Improving Test Responsiveness for High Performance Embedded Systems ................................................67

Ralf Mitsching, Carsten Weise, Frank Fiedler, Stefan Kowalewski, and Henrik Bohnenkamp

Inverse Model Based Testing—Generating Behavior Models from Abstract Test Cases ..................................75

Christoph Torens, Lars Ebrecht, and Karsten Lemmer

Scenario Based Test Generation Using Test Designer ...........................................................................79

Kalou Cabrera Castillos and Julien Botella

Scenario-Based Testing Applied in Two Real Contexts: Healthcare and Employability ....................................89

Eda Marchetti, Louis Schilders, and Sandra Winfield

Regression 2011—The First International Workshop on Regression Testing

Position Paper Session and Discussion

Empirically Evaluating Regression Testing Techniques: Challenges, Solutions, and a Potential Way Forward .................................................................99

Gregory M. Kapfhammer

Challenges in Audit Testing of Web Services ..........................................................................................103

Cu D. Nguyen, Alessandro Marchetto, and Paolo Tonella

Customer-Oriented Regression Testing: An Initial Discussion ............................................................107

Brian Robinson and Xiao Qu

Making the Case for MORTO: Multi Objective Regression Test Optimization ........................................111

Mark Harman

Session 1: Testing Evolving Systems

Regression Test Selection Techniques for Test-Driven Development .........................................................115

Hagai Cibulski and Amiram Yehudai

Selective Test Generation Method for Evolving Critical Systems ..........................................................125

Elizabeta Fourneret, Fabrice Bouquet, Frédéric Dadeau, and Stéphane Debricon

Dynamic Prioritization in Regression Testing ..........................................................................................135

Nilam Kaushik, Mazeiar Salehie, Ladan Tahvildari, Sen Li, and Mark Moore
Session 2: Emerging Issues

Employing Privacy-Preserving Techniques to Protect Control-Flow Graphs in a Decentralized, End-to-End Regression Test Selection Framework for Web Services .................................................. 139
  Michael E. Ruth

Agent-Based Test Case Prioritization ......................................................................................................................... 149
  Christoph Malz and Peter Göhner

SBST 2011—Fourth International Workshop on Search-Based Software Testing

SBST 2011 Keynote Address

Search-Based Software Testing: Past, Present and Future ................................................................................................................................. 153
  Phil McMinn

SBST 2011 Regular Papers

MOST: A Multi-objective Search-Based Testing from EFSM .......................................................................................... 164
  Thaise Yano, Eliane Martins, and Fabiano L. de Sousa

Porantim-Opt: Optimizing the Combined Selection of Model-Based Testing Techniques ................................................................................................. 174
  Arilo Claudio Dias Neto, Rosiane de Freitas Rodrigues, and Guilherme Horta Travassos

A Principled Evaluation of the Effect of Directed Mutation on Search-Based Statistical Testing ................................................................. 184
  Simon Poulding, John A. Clark, and Hélène Waeselynck

SBST 2011 Short Papers

Towards Search-Based Testing for Event-B Models ................................................................................................................................. 194
  Alin Stefanescu, Florentin Ipate, Raluca Lefïcaru, and Cristina Tudose

Search-Based Application Security Testing: Towards a Structured Search Space ................................................................. 198
  Sven Türpe

TESTBEDS 2011—Third International Workshop on TESTing Techniques and Experimentation Benchmarks for Event-Driven Software

TESTBEDS 2011—Session 1

Identifying Infeasible GUI Test Cases Using Support Vector Machines and Induced Grammars ................................................................. 202
  Robert Gove and Jorge Faytong

Event-Based GUI Testing and Reliability Assessment Techniques—An Experimental Insight and Preliminary Results ................................................................. 212
  Fevzi Belli, Mutlu Beyazit, and Nevin Güler
Behind the Scenes: An Approach to Incorporate Context in GUI Test Case Generation ..................................................222
   Stephan Arlt, Cristiano Bertolini, and Martin Schäf

TESTBEDS 2011—Session 2
Improved Bug Reporting and Reproduction through Non-intrusive GUI Usage
Monitoring and Automated Replaying ..........................................................................................................................232
   Steffen Herbold, Jens Grabowski, Stephan Waack, and Uwe Bünting
Model-Based Testing with a General Purpose Keyword-Driven Test Automation
Framework ..................................................................................................................................................................242
   Tuomas Pajunen, Tommi Takala, and Mika Katara
A GUI Crawling-Based Technique for Android Mobile Application Testing ...........................................................252
   Domenico Amalfitano, Anna Rita Fasolino, and Porfirio Tramontana

VAST 2011—First International Workshop on Variability-intensive Systems Testing, Validation, and Verification

Session 2: Product Line Testing
Decision Support for Test Management and Scope Selection in a Software Product Line Context .................................................................262
   Emelie Engström and Per Runeson
A Survey of Empirics of Strategies for Software Product Line Testing ........................................................................266
   Martin Fagereng Johansen, Øystein Haugen, and Franck Fleurey

Session 3: Formal Approaches
Proof Composition for Deductive Verification of Software Product Lines ........................................................................270
   Thomas Thüm, Ina Schaefer, Martin Kuhlemann, and Sven Apel
Calculating Prioritized Interaction Test Sets with Constraints Using Binary Decision Diagrams .........................................................278
   Elke Salecker, Robert Reicherdt, and Sabine Glesner

Session 4: Model and SOA Validation
Automated Detection of Discontinuities in Models Inferred from Execution Traces ........................................................................286
   Alessandro Marchetto, Cu Duy Nguyen, and Paolo Tonella
Validating Service Value Propositions Regarding Stakeholder Preferences ........................................................................294
   Erik Wittern and Christian Zirpins
CSTVA 2011—Third Workshop on Constraints in Software Testing, Verification, and Analysis

CSTVA 2011—Session 1
Grey-Box Testing and Verification of Java/JML
Frédéric Dadeau and Fabien Peureux

Utilizing Model Checking for Automatic Test Case Generation from Conjunctions of Predicates
Cong Tian, Shaoying Liu, and Shin Nakajima

Optimizing Constraint Solving to Better Support Symbolic Execution
Ikpeme Erete and Alessandro Orso

CSTVA 2011—Demo Session
Online Test Generation with PathCrawler: Tool Demo
Nikolai Kosmatov, Bernard Botella, Muriel Roger, and Nicky Williams

IPEG: Utilizing Infeasibility
Mickaël Delahaye

CPTEST: A Framework for the Automatic Fault Detection, Localization and Correction of Constraint Programs
Nadjib Lazaar

CSTVA 2011—Session 2
Dealing with Constraints in Boolean Expression Testing
Angelo Gargantini

When Does My Program Fail?
Jeremias Rößler, Alessandro Orso, and Andreas Zeller

Mutation 2011—Mutation Analysis 2011

Session 1: Mutation for Object Oriented Programs
An Analysis of OO Mutation Operators
Jingyu Hu, Nan Li, and Jeff Offutt

Object-Oriented Mutation Applied in Common Intermediate Language Programs Originated from C#
Anna Derezińska and Karol Kowalski

Paraμ—A Partial and Higher-Order Mutation Tool with Concurrency Operators
Pratyusha Madiraju and Akbar Siami Namin
Session 2: Efficiency of Mutation

Change Sensitivity Based Prioritization for Audit Testing of Webservice Compositions .................................................. 357
  Cu D. Nguyen, Alessandro Marchetto, and Paolo Tonella

An Evaluation of Mutation and Data-Flow Testing: A Meta-analysis ................................................................. 366
  Sahitya Kakarla, Selina Momotaz, and Akbar Siami Namin

Calibrated Mutation Testing ........................................................................................................................................ 376
  Jaechang Nam, David Schuler, and Andreas Zeller

Breeding High-Impact Mutations ............................................................................................................................... 382
  Birgit Schwarz, David Schuler, and Andreas Zeller

Session 3: Other Applications of Mutation

Test Case Generation from Mutants Using Model Checking Techniques ................................................................. 388
  Heinz Riener, Roderick Bloem, and Görschwin Fey

Analogies and Differences between Mutation Operators for WS-BPEL 2.0 and Other Languages ........................................................................................................................................ 398
  Juan Boubeta-Puig, Inmaculada Medina-Bulo, and Antonio Garcia-Dominguez

Model Driven Mutation Applied to Adaptative Systems Testing ............................................................................. 408
  Alexandre Bartel, Benoit Baudry, Freddy Munoz, Jacques Klein, Tejeddine Mouelhi, and Yves Le Traon

RefTest 2011—(REFactoring and TESTing) Berlin Workshop 2011

RefTest 2011 Keynote Address

Refactoring as Testability Transformation ............................................................................................................. 414
  Mark Harman

Session 1: Refactoring

Munch: An Efficient Modularisation Strategy to Assess the Degree of Refactoring on Sequential Source Code Checkings ............................................................................................................... 422
  Mahir Arzoky, Stephen Swift, Allan Tucker, and James Cain

Parameter-Based Refactoring and the Relationship with Fan-in/Fan-out Coupling ........................................................ 430
  A. Murgia, M. Marchesi, G. Concas, R. Tonelli, and S. Counsell

Automated Refactoring for Testability ..................................................................................................................... 437
  Mel Ó. Cinnéide, Dermot Boyle, and Iman Hemati Moghadam
Session 2: Testing and Code Smells

Test-Oriented Languages: Is it Time for a New Era? .................................................................444  
Benjamin Stopford

Francesca Arcelli Fontana, Elia Mariani, Andrea Mornioli, Raul Sormani,  
and Alberto Tonello

Prioritising Refactoring Using Code Bad Smells .................................................................458  
Min Zhang, Nathan Baddoo, Paul Wernick, and Tracy Hall

Session 3: Short Paper Session

Looking for Patterns in Code Bad Smells Relations ..............................................................465  
Bartosz Walter and Paweł Martenka

Enabling Testing, Design and Refactoring Practices in Remote Locations .........................467  
Amey Dhoke, Greg Gigon, Kuldeep Singh, Amit Chhajed, and Ben Stopford

Extracting Properties from Test Cases by Refactoring ........................................................472  
Huiqing Li, Simon Thompson, and Thomas Arts

On Investigating Code Smells Correlations .........................................................................474  
Francesca Arcelli Fontana and Marco Zanoni

ReVVeRT 2011—Workshop on Requirements and Validation, Verification, and Testing

Session 1: Tracing/Mapping of Requirements

Alignment of Requirements Specification and Testing: A Systematic Mapping Study ..............476  
Zeinab Alizadeh Barmi, Amir Hossein Ebrahimi, and Robert Feldt

Session 2: Requirements for Testing

Automatic Validation and Correction of Formalized, Textual Requirements ..........................486  
Jörg Holtmann, Jan Meyer, and Markus von Detten

Model Based Test Specifications: Developing of Test Specifications in a Semi Automatic Model Based Way .................................................................496  
Holger Funke

Session 3: Requirements-Based Testing

Requirements-Driven Testing with Behavior Trees ............................................................501  
Marc-Florian Wendland, Ina Schieferdecker, and Alain Youffo-Feudjio

Protocol Security Testing with SPIN and TTCN-3 ............................................................511  
Li Zhou, Xia Yin, and Zhiliang Wang
SECTEST 2011—The Second International Workshop on Security Testing

Defining and Matching Test-Based Certificates in Open SOA ................................................................. 520
  Marco Anisetti, Claudio A. Ardagna, and Ernesto Damiani

  Martin Johns and Moritz Jodeit

Offset-Aware Mutation Based Fuzzing for Buffer Overflow Vulnerabilities: Few Preliminary Results ..................................................................................................................................................... 531
  Sanjay Rawat and Laurent Mounier

Security Vulnerabilities Detection Using Model Inference for Applications and Security Protocols .......................................................... 534
  K. Hossen, R. Groz, and J.L. Richier

Practical Considerations in Control-Flow Integrity Monitoring .............................................................................. 537
  Iavor Diatchki, Lee Pike, and Levent Erkök

Applying Security Assurance Techniques to a Mobile Phone Application: An Initial Approach .................................................................................................................................................................... 545
  Padmanabhan Krishnan, Sergej Hafner, and Andreas Zeiser

TAIC PART 2011—Testing: Academic and Industrial Conference—Practice and Research Techniques

Change

How Test Organizations Adopt New Testing Practices and Methods? ................................................................. 553
  Jussi Kasurinen, Ossi Taipale, and Kari Smolander

Introducing Test Case Derivation Techniques into Traditional Software Development: Obstacles and Potentialities ........................................................................................................................................ 559
  Xiaojing Zhang, Haruto Tanno, and Takashi Hoshino

Metrics and Models

Assessing the Impact of Using Fault Prediction in Industry .......................................................... 561
  Robert M. Bell, Elaine J. Weyuker, and Thomas J. Ostrand

An Empirical Study on Object-Oriented Metrics and Software Evolution in Order to Reduce Testing Costs by Predicting Change-Prone Classes ........................................................................ 566
  Sinan Eski and Feza Buzluca

Combining Model-Based and Capture-Replay Testing Techniques of Graphical User Interfaces: An Industrial Approach .................................................................................................................................................................... 572
  Vladimir Entin, Mathias Winder, Bo Zhang, and Stephan Christmann
Techniques

Verifying Code and Its Optimizations: An Experience Report ..........................................................578
   Ravindra Metta

Monitoring and Testing with Case Observer Automata: An Industry Report .................................584
   Anders Hessel

Estimation of Clock Drift in HiL Testing by Property-Based Conformance Check ..................................590
   Jacob Palczynski, Carsten Weise, Stefan Kowalewski, and Daniel Ulmer

TeBug 2011—The First Workshop on Testing and Debugging

TeBug 2011 Keynote Address

Automated Debugging: Are We There Yet? .................................................................596
   Alex Orso

TeBug 2011—Session 1

An Abstract Operational Framework for Dependence Models in Software Debugging ......................597
   Bernhard Peischl and Franz Wotawa

Identifying Failure-Correlated Dependence Chains ........................................................................607
   Rawad Abou Assi and Wes Masri

Probabilistic Error Propagation Modeling in Logic Circuits ..................................................................617
   Shekhar Gupta, Arjan J.C. van Gemund, and Rui Abreu

TeBug 2011—Session 2

On the Use of Constraints in Dynamic Slicing for Program Debugging ................................................624
   Franz Wotawa

Modeling the Diagnostic Efficiency of Regression Test Suites ...........................................................634
   Alberto Gonzalez-Sanchez, Hans-Gerhard Gross, and Arjan J.C. van Gemund

Compression Strategies for Passive Testing .......................................................................................644
   César Andrés and Luis Llana

TeBug 2011—Session 3

A Diagnostic Point of View for the Optimization of Preparation Costs in Runtime Testing ..........................654
   Alberto Gonzalez Sanchez, Éric Piel, Hans-Gerhard Gross, and Arjan J.C. van Gemund

Author Index ........................................................................................................................................661
