

**33rd Annual Meeting of the
International Institute of Ammonia
Refrigeration**

**2011 IIAR Industrial Refrigeration
Conference & Heavy Equipment Show**

**Orlando, Florida, USA
27-30 March 2011**

ISBN: 978-1-61839-031-8

2011 IIAR Technical Paper

Table of Contents

Technical Paper #1 *3+

Minimize Cooling System Refrigerant Charge using Liquid Desiccant Dehumidification

Mike Harvey, Niagara Blower Company

Technical Paper #2 *42+

Integrated Ammonia Heating and Cooling Systems

David Blackhurst, Star Technical Solutions

Danny McDougall, Star Refrigeration

Technical Paper #3 *79+

Evaporative Condensers versus Open Cooling Tower and Heat Exchangers

John Kollasch, EVAPCO

Technical Paper #4 *9: +

Improve Product Quality and Reduce System Energy Use by Rightsizing Evaporators

Ian Runsey, Guntner U.S.

Technical Paper #5 *353+

Development and Validation of a Bench Test Procedure for Post Mortem Testing of Relief Valves

Claas M. Jekel, T. B., Industrial Refrigeration Consortium, University of Wisconsin-Madison;

D. T. Reindl, Industrial Refrigeration Consortium, University of Wisconsin-Madison

Technical Paper #6 *37: +

Vacuum Cooling – The Science and Practice

Don Tragethon, Western Precooling Systems

Technical Paper #7 *3: 3+

Application of Micro-channel Heat Exchangers to Compact Ammonia Systems

Mark Tomooka, Mayekawa USA

Technical Paper #8 *436+

Refrigeration Implications of High-Rise Automated Warehouses

Gerald von Dohlen, Newark Refrigerated Warehouses

Programa en español

Trabajo técnico #1 *459+

Sistemas de dos etapas de compresión con compresores de tornillo

Ricardo Mardones, Mayekawa/Mycom

Trabajo técnico #2 *47: +

La velocidad de congelación y su impacto en la calidad de alimentos expuestos a este proceso.

Un criterio clave en la definición del sistema de producción de frío.proceso

Manuel Alarcón López, A. Blasquez E.

Refrigeración Industrial S.A. de C.V;

Karla Elizabeth González Rosas, A. Blasquez E.

Refrigeración Industrial S.A. de C.V

Trabajo técnico #3 *528+

Condensadores evaporativos vs sistemas de intercambiadores de placas & torre de enfriamiento abierta en aplicaciones de refrigeración industrial

Max Duarte, EVAPCO

Trabajo técnico #4 *54: +

Análisis comparativo de un sistema de recirculación de líquido por presión de gas, a través de un estudio termodinámico teórico y su desempeño real.

Ing. Christian Ali Muñoz Duran, A. Blasquez E.

Refrigeración Industrial S.A. de C.V

Trabajo técnico #5 *596+

Economizadores y carga lateral en compresores de tornillo

Documento Original Por:

Jim Nesbitt, GEA FES

Traducción y presentación en español por:

Mauricio Quiroga, GEA FES
