2011 IEEE International Conference on Spatial Data Mining and Geographical Knowledge Services

(ICSDM 2011)

Fuzhou, China
29 June – 1 July 2011
Table of Contents

Message from the Conference Chair X
Message from the Program and organizing Chairs XII
Conference Sponsors and Organizers XIII
Organizing Committee XIV
Program Committee XV
Paper Reviewers XVII

Session I: Geo-spatial Data Mining and Knowledge Discovery

Positive Spatial Autocorrelation, Mixture Distributions, and Geospatial Data Histograms................................. 1
Daniel A. Griffith

Exploring Non-stationarity of Local Mechanism of Crime Events with Spatial-temporal Weighted Regression
............................................................................................................................................................................ 7
Po-Hui Yu, Jinn-Guey Lay

A Similarity Measure for Time Series of Spatial Lines Intersection Relations ................................................ 13
Sheng Liu, Genlin Ji, Wenjun Li

Study and Analysis of Temporal Data Using Hidden Markov Models .............................................................. 16
Kahina Ghidouche, Tahar Kechadi, A. Kamel Tari

Using Geographically Weighted Regression to Explore the Spatially Varying Relationship between Land
Subsidence and Groundwater Level Variations: A Case Study in the Choshuichi Alluvial Fan, Taiwan
............................................................................................................................................................................. 21
Rong-Kang Shang, Yi-Shiang Shiu, Kuo-Chen Ma

A Framework for Spatial Feature Selection and Scoping and Its Application to Geo-Targeting ...................... 26
Ruth Miller, ChunSheng Chen, Christoph F. Eick, Abraham Bagherjeiran

Comparisons with Spatial Autocorrelation and Spatial Association Rule Mining ............................................ 32
Jiangping Chen, Yanan Chen, Jie Yu, Zhaohui Yang

Session II: Geographical Modeling and Analysis

Moving Objects: Combining Gradual Rules and Spatio-Temporal Patterns ............................................................. 131
    Phan Nhat Hai, Pascal Poncelet, Maguelonne Teisseire

A Graph-Theory-Based Method for Parallelizing the Multiple-Flow-Direction Algorithm on CUDA Compatible Graphics Processing Units ............................................................... 137
    Lijun Zhan, Chengzhi Qin

An Improved Spatial Process Model for Mining Urban Traffic State Information from Macroscopic View ............................................................... 142
    Haixiang Zou, Yang Yue, Qingquan Li

Robustness Analyses for Repeated Mobility Surveys in Outdoor Advertising .................................................. 148
    Dirk Hecker, Christine Körner, Michael May

Analysis of Lung Cancer Gender Differences and Age Structure in the High Prevalence Areas of Xiamen . 154
    Cuiping Wang, Xinhu Li, Long Dai, Guoqin Zhang, Liling Gao, Qianjun Zhao

Implementing Conceptual Spatiotemporal Model into Object DBMS with Semantic Preserving .................. 160
    Chamseddine Zaki, Myriam Servières, Guillaume Moreau

The Integration of Multi-beam and Sub-bottom Profile Data Based on GIS and 3D Slicing Technology ...... 166
    Degang Wang, Fujiang Han, Yiju Yang

A Novel Approach for Proactive Delivery of Spatial Information ............................................................... 170
    Yu Xia, Xinyan Zhu, Jun Gong

Interfacing Business Processes and Spatial Processes ......................................................................................... 174
    Martin Treiblmayr, Karen Hoi Lam Tso-Sutter, Antonio Krüger

Diagnosis on Region Eco-environmental Quality Based on Geo-informatic Tupu: Taking Fujian Province as an Example .................................................................................................................. 181
    Guosheng Wu, Huihua Lin, Ke Liao

Research on Accessibility pattern of China at City Level Based on Land Traffic Network ............................. 187
    Haining Jiang, Guangbin Li, Rennu Gu

Predicting Migration System Dynamics with Conditional and Posterior Probabilities ................................ 192
    Clio Andris, Samuel Halverson, Frank Hardisty

Quantifying Spatial Heterogeneity of Coniferous Trees in ATM, CASI and Eagle Airborne Images .......... 198
Spatial Data Storage Model Based on Map Calculus for Online Map Generalization ........................................... 204
Bingwen Qiu, Canying Zeng, Rong Long, Chongcheng Chen, Xiaoyang Tu

Integrated Geo-Sensing: a Case Study on the Relationships between Weather and Mobile Phone Usage in Northern Italy ........................................................................................................................................... 208
Yang Jun

Mineral Prospectivity Mapping Integrating Multi-source Geology Spatial Data Sets and Logistic Regression Modeling .......................................................................................................................................................... 214
Guenther Sagl, Euro Beinat, Bernd Resch, Thomas Blaschke

Study on Land Use of Changping District with Spatial Data Mining Method .................................................. 218
Cuihua Chen, Hongzhang Dai, Yue Liu, Binbin He

Application of Density Analysis for Landmine Risk Mapping ............................................................................ 223
Aura Cecilia Alegría, Hichem Sahli, Esteban Zimányi

Session III: Geo-spatial Data Web Service and Geo-visualization

The locatable video: Acquisition, Segmentation, Retrieval .................................................................................. 229
Yong Wu, Xuejun Liu, Guangfa Lin

Construction of Geo-Ontology Knowledge Base about Spatial Relations ......................................................... 234
Xue Zhang, Jun Xu

Research the Spatial Reference System Sharing Framework Based on SOA ................................................... 238
Yanjun Wang, Xin Li, Gang Chen

A Language Design and Implementation for Geospatial Information Services Chaining .............................. 241
Sanphet Chunithipaisan, Soravis Supavetch

An intelligent Driver Guidance Tool Using Location Based Services ............................................................ 246
Kushani Perera, Dileeka Dias

RPRA: A Novel Approach to Mastering Geospatial Web Service Testing Complexity ........................................ 252
Jinsongdi Yu, Peter Baumann, Xia Wang

Ontology for Knowledge Management and Improvement of Data Mining Result ........................................ 257
Hayette Khaled, Tahar Kechachi, A. Kamel Tari

Design and Implementation of a Web-based Disease Control and Emergency Response System on CNGI for Mekong Subregion ........................................................... 263
An Zhang, Qingwen Qi, Lili Jiang

Ranking Factors in Devising Practical POI Search Model ................................................................................. 267
Shunkai Fu, Jiyang Zhang, Rong Mu

Thematic Data Extraction from Web for GIS and Applications ........................................................................ 273
Session IV: Remote Sensing and Earth Observation

Estimating the Effective Wavelength of the Thermal Band for Accurate Brightness Temperature Retrieval: Methods and Comparison ................................................................. 330
Huaying Hu, Feng Chen, Qicong Wang

Boosting the Semantics Sensitive Satellite Image Retrieval Using a Voting Algorithm ........................................ 335
Yikan Li, Xiaoyuan Dong

A United lq3-contourlet Method for Remote Sensing Image Fusion .......................................................... 340
Guofeng Wang, Pengfei Song, Jiancheng Li, Yunling Zhang

Segmentation of High Resolution Remote Sensing Image Based on Hierarchically Multiscale Object-oriented Markov Random Fields Model ....................................................... 343
Liang Hong, Zhaozhong Gao, Xianchun Pan, Kun Yang

Genetic Algorithm Optimized SVM in Object-based Classification of Quickbird Imagery ................................ 348
Mengmeng Li, Xiaocheng Zhou, Xiaoqin Wang, Bo Wu
DEM Generation of Typical Mountain Area Based on InSAR Technology .......................................................... 353
Xiaojun Rao, Fang Miao, Rui Liu, Xing Deng

Image-level Simulation of Spaceborne InSAR and Analysis of Influential Parameters ........................................... 359
Shanshan Zhao, Hu Li, Wanli Huang

3D Road Information Extraction from LIDAR Data Fused with Aerial-images .......................................................... 362
Guofeng Wang, Yunling Zhang, Jiancheng Li, Pengfei Song

The Surface Coseismic Deformation and Source Parameters Research of the Xizang Gaize Earthquake Based on the InSAR Technology .......................................................... 367
Guifang Zhang, Xinjian Shan, Chao Ma, Xiaogang Song

SAR Image Rapid Co-registration Based on RD Model and Coherence Interpolation ............................................. 370
Yu Gang

Accuracy of the LiDAR-derived DEM in Dense Shrub Areas in Mountainous NW US ........................................... 373
Hongyu Huang, T. Link, A. Smith, Chongcheng Chen

Investigating Ground Subsidence in Beijing by Using Interferogram Stacking InSAR ........................................... 378
Zhanqiang Chang, Xiaomeng Liu, Tengfei Xue, Ranran Yang

Forest/Non-forest Mapping Using ENVISAT ASAR Data in Northeast China ..................................................... 381
Yanping Huang, Feilong Ling, Bo Wu, Lina Bai, Xin Tian

Automatic Ship Detection from SAR Images ........................................................................................................... 386
Yingjian Liu, Hui Ma, Yanming Yang, Yanyan Liu

Dense Point Cloud Extraction from UAV Captured Images in Forest Area .......................................................... 389
Wang Tao, Yan Lei, Peter Mooney

A Scale Invariant Feature Transform based Matching Approach to Unmanned Aerial Vehicles Image Geo-reference with Large Rotation Angle ................................................................. 393
Qingwu Hu, Mingyao Ai

A Parallel Interior Orientation Method Based on Lookup Table for UAV Images ................................................... 397
Ming Wang, Qingquan Li, Qingwu Hu, Hui Yuan

Key Technologies of Aerial Photogrammetric Drift Angle Automatic Adjust-and-Control System ........................ 401
Liuzhao Wang, Fang Chen, Zhilong Wang

Spatial Knowledge Based Complicated Urban Area Classification from High-Resolution Remote Sensing Image .......................................................... 405
Cheng Qiao, Jiancheng Luo, Zhanfeng Shen, Zhiwen Zhu, Wei Wu

Spatial-temporal Characters of Evapotranspiration in the Yellow River Delta .......................................................... 409
Mingming Zhu, Xiyong Hou, Xiao Lu, Mingjie Li

Application Research of MODIS Data in Monitoring Land Use Change in Fujian ................................................... 413
Weihua Pan, Chongui Zhang, Hui Chen, Yiyong Cai, Jiajin Chen, Lichun Li

Quality Assessment for Human Settlement of Urban Community Based on Remote Sensing Technology .... 417
Session V: Applications of Integrated Geo-spatial Information

Spatial-Temporal Analysis of Land Use and Coverage Change in Nanjing Based on GIS/RS
Kai Cao, Heng Lv, Bo Wu, Yong Xu

A Preliminary Study on Impervious Surface Area Dynamics and Water Quality Response at Watershed Scale
Jinliang Huang, Yuan Feng, Ling Huang, Qinqin Sun

Models of Regional Agro-climatic Resources Survey and System Assessment Based on Geo-spatial Data Mining
Luming Yan

Spatial Externalities, Environmental Pollution and Total Factor Productivity Growth in China—Evidence From a Spatial Panel Data Set of Provincial-level
Xiaowei Zhao, Zhigang Gao

Study on the Vegetation Coverage Dynamic Change of Huoshan County Based on Remote Sensing and GIS
Liang Deng, Xianfu Cheng, Xiao Mingzi, Jinhong Xie

Study of Coseismic Displacement Field of the YUSHU MS 7.1 Earthquake Derived from Envisat/Asar Data
Chunyan Qu, Guohong Zhang, Guifang Zhang, Xinjian Shan, Xiaogang Song, Yunhua Liu

Shape Measurement of Parabolic Antenna Using Total Station TCRA1102
Li Zhao, Peixian Wang, Guihao Zhang

House Vacancy at Urban Areas in China with Nocturnal Light Data of DMSP-OLS
Yongling Yao, Yao Li

Allocation and Scheduling of Relief Materials based on GIS
Xiaohui Su, Xiaodong Zhang, Sanchao Liu, Siquan Yang, Jianyu Yang, Yanqing Chen, Jingyu Xu

Assessment of Wind-induced Environmental Lodging Stress for Maize based on GIS
Chunqiao Mi, Xiaodong Zhang, Shaoming Li, Jianyu Yang, Dehai Zhu, Yang Yang, Zhe Liu

Mine Environmental Monitoring and Evaluation Using RS&GIS in Chongqing
Ting Zhang, Rui Liu, Zhirong Zheng, Yuelong Chi

Coastal Wetland Automatic Extraction based on Remote Sensing Spatial – Spectral (Tupu) Coupled Information
Changming Zhu, Jiancheng Luo, Zhanfeng Shen, Junli Li, Xi Cheng
GIS-based Family Tree System Integration ......................................................................................................... 480
   Di Hu, Guonian Lv, Yongning Wen, Jing Jia, Yiru Feng, Qian Gong

Landslide Hazard Evaluation of Zigui Based on GIS Information Model in Three Gorges Reservoir ........ 486
   Ruixiang Liao, Shimei Wang, Haifeng Huang, Feifei Xu

Online Monitoring System for Soil Erosion and Non-Point Source Pollution in the Three-gorge Reservoir Area ........................................................................................................................................................................ 492
   Feng Guo, Xiubin He, Dongchun Yan, Yuhai Bao

Research into the Integration of Data Warehouse, Virtual Reality and Geographical Information System in Water Resources Management ........................................................................................................................................................................ 497
   Xian Luo, Youpeng Xu, Feng Zhou

Optimization the Relief Materials Allocation of the Central Reserve System based on Assessment of China Earthquake Disaster Risk........................................................................................................................................................................ 501
   Jianxi Huang, Jingyu Xu, Xiaohui Su, Xiaodong Zhang, Wei Su, Yanqing Chen

A Spatial Decision Support System for Analyzing the Spatial-Temporal Transit Service Gap .................. 506
   Jau-ming Su, Cheng-Chen Kou, Wen-Chi Ho, Mei-Hui Shen, Chih-Hung Chang

Using Tuned LS-SVR to Derive Normal Height from GPS Height ............................................................... 511
   Wenbin Huang

Session VI: Poster

Earthquake Disaster Estimation Based on Open Source Global Scale Geographic Data ............................. 515
   Yigang Li

Comparing Two Density-based Clustering Methods for Reducing Very Large Spatio-temporal Dataset .... 519
   Michael Whelan, Nhien An Le Khac, M-Tahar Kechadi

Precision Analysis and Visualize Calculation of Stripping and Mining Engineering Volume of Surface Mine Based on Surfer ........................................................................................................................................................................................................ 525
   Zhuan Chen, Yiyong Luo, Xudan Sun, Lingquan Zeng

SVM based Extraction of Spatial Relations in Text ......................................................................................... 529
   Xueying Zhang, Chunju Zhang, Chaoli Du, Shaonan Zhu

Study of the Extension to BPEL4Grid for Grid Service Composition .......................................................... 534
   Xiaozhu Wu, Haisheng Yang, Chongcheng Chen

Location Selection of Ecological Zone Based on Geoprocessing Server .................................................... 540
   Tengfei Xue, Zhanqiang Chang, Ranran Yang

Application of 3D Morphological Analysis in Geological Interfaces Based on TIN Model ....................... 544
   Jin Chen, Xiancheng Mao, Jianjun Zhu

Remote Sensing Analysis of Bohai Bay West Coast Shoreline Changes ..................................................... 549
Guixiang Zheng, Ling Peng, Gang Tao, Chunhong Wang

Reclamation Impact on Coastal Topography in Sheyang Estuary ................................................................. 553
Weixiu Qu, Ying Zhang, Yanchun Liu

Analysis of the Evolution on Tidal Flat and Their Reasons in Dongsha Based on Remote Sensing .......... 557
Lifan Chen, Ying Zhang

The Change and Analysis of Coastline Based on Remote Sensing Measurement ........................................ 562
Li Jing, Zhang Ying

Ship Recognition from High Resolution Remote Sensing Imagery Aided by Spatial Relationship ............ 567
Wei Wu, Jiancheng Luo, Cheng Qiao, Zhanfeng Shen

Impact of Excessive Drought on Regional Sensitivity of Eupatorium Adenophorum Invasion in Yunnan Province .............................................................. 570
Xingzheng Zhao, Zhe Zhang, Xiaolan Liu, Wei Wang, Wenjie Wang

The Application of Transient Electromagnetic Method in Detection of Coal Mine Goaf ............................ 574
Yanzhen Qiao, Zhouai Zhang

The Application of Entropy Weight Theory in Typhoon Disaster Vulnerability Assessment ..................... 577
Jinyu Ye, Mingfeng Zhang, Guangfa Lin, Fen Chen, Shan Yu

On Quantifying the Ecological Effects of Land Use/Cover Changes in Red Soil Erosion Area on Integrated Geo-spatial Information Techniques: A Case Study in Changting County, Fujian .................. 582
Huihua Lin, Guosheng Wu, Hejian Zhu

On Simulating the Spatial Distribution of Mean Annual Air Temperature at Regional Scale Based on Statistical Technology and GIS——A Case Study of Fujian Province in Subtropical Moist Region during 1961-1990 .................................................. 588
Jiabing Chen, Hui Li

Forest Fire Risk Zone Evaluation Based on High Spatial Resolution RS Images in Liangyungang Huaguo Mountain Scenic Spot ......................................................... 593
Xiangwei Gao, Xiayun Fei, Hongquan Xie
