# TABLE OF CONTENTS

## KEYNOTES

**Driving eGaN™ FETs in High Performance Power Conversion Systems** ................................................................. 1  
Alexander Lidow, Johan Strydom, Michael De Rooij, Andrew Ferencz, Robert V. White

**Research on High Temperature Superconducting Permanent Magnet Synchronous Motor** ............................... 11  
Liyi Li, Cao Jiwei, Zhengnan Han

**Single-Stage, AC-DC Converter Topologies of 98% Efficient Single Phase and Three-phase Rectifiers** .............. 15  
Slobodan Cukić

## ORAL PRESENTATIONS

### ENVIRONMENTAL FRIENDLY AND RENEWABLE ENERGY TECHNOLOGIES

**Control Strategies for Active Filters in Aircraft Power Networks** ................................................................. 24  
Jun Yi Liu, Pericle Zanchetta, Marco Degano

**Low Conduction Losses PWM Rectifier for High Efficiency Wind Power Micro-Generation** ......................... 32  
Daniel Augusto F. Collier, Victor Maryama, Marcelo Lobo Heldwein

**Concepts and Solutions to Parallel Windmill Converter Up to 6 MW** .......................................................... 40  
Norbert Pluschke

**Integration of Isolation for Grid-Tied Photovoltaic Inverters** ................................................................. 47  
Baoxing Chen

**Using New MPD for Wind Power Converters with High Reliability** .............................................................. 53  
Xiankui Ma, Xing Zhang

### LED LIGHTING

**Simulation and Design of a TRIAC LED Dimmer with Passive LCD Valley-Fill Rectifier** ............................. 59  
Ying-Yu Tzou, Wei-Shiang Wang

**Triac Dimmer Design for Low-consumption Lamps** ......................................................................................... 66  
Laurent Gonthier, Benoit Renard

**A Novel Single Stage PFC Topology Which Suit for Primary Side Regulate LED Power** .............................. 72  
Stephen Li

**A Study and Implementation of a High Efficiency and Precise Constant Control Driver for LED Applications** ................................................................................................. 79  
Albert Chen

**A LED Dimming Circuit with Efficiency Improved** ......................................................................................... 85  
W. C. Tu, K. I. Hwu, C. Hsu, Jenn-Jong Shieh

### ADVANCED POWER SEMICONDUCTORS I

**Reduction of Turn-off Loss in 600V-class Superjunction MOSFET by Surface Design** ................................. 91  
Takahiro Tamura, Mutsumi Sawada, Yushiko Onishi, Sota Watanabe, Takayuki Shimamoto, T. Kobayashi

**EMC Challenges in IGBT Driver Electronics** ................................................................ ......................... 97  
Johannes Krapp

**A Unified Direct Paralleling Approach Applied to IGBT Voltage Classes 1.2 to 6.5kV** ................................. 101  
Jan Thalheim, Olivier Garcia, Sascha Pawel

**3.3kV IGBT Modules with Trench Gate FS Structure** ................................................................................. 107  
Minghui Zhan, Takeharu Koga, Hideaki Kashiwa

**Enhanced 4th Generation CAL Diode for Highly Efficient Applications** ...................................................... 113  
Fryderyk Kozlowski, Bernhard Koenig, Martin Hansmann, Wolfgang Nichtl-Pecher
### AC/DC CONVERTER

**Effects of Imperfect Sinusoidal Input Currents on the Performance of a Boost PFC Pre-Regulator** .................................................. 119  
Martin Kin Ho Cheung

**A Novel Spread Spectrum Method for CCM Boost PFC Converters to Optimize both EMI and Efficiency Performance** .................................................. 126  
Jian Chen, Jun Yabuzaki, Hiroyuki Oota, Hideo Shimizu

**A Efficiency Improving Switching Device with Compensation Effect for Power Factor Correction** .................................................. 131  
Shiu-Hui Lee, Wen-Nan Huang, Jin-Ming You, K. I. Hwu

**Introduction to Bridgeless PFC and Realization of a 2 kW Unit with Semi-Active Control** .................................................. 137  
Eric Zhang, Han Wang

**Adaptive Active Capacitor Converter for Improving Stability of Cascaded DC Power Supply System** .................................................. 143  
Xin Zhang, Xunbo Ruan

### SMART GRID AND E-MOBILITY

**Gallium Nitride Power MOSFET Characterization and Application** ........................................................................................................ N/A  
Linhua Wang

### ADVANCED POWER SEMICONDUCTORS II

**The 6th Gen. Intelligent Power Module** .................................................. 150  
Satoru Motohashi, Manabu Watanabe, Keishirou Kumada, Akira Nakamori, Hideaki Takahashi, Naoki Shimizu, Osamu Ikawa

**Intelligent Power Module Family SKiiP4 with Improved Switching Behavior** .................................................. 156  
Ralf Ehler, Andreas Winterholler

**Newly Developed Hybrid Module by Si-IGBT and SiC-SBD** .................................................. 161  
Toshiyuki Miyagami, Masayoshi Nakazawa, Yoshinori Kiyasumi, Yasuyuki Kobayashi, Seiki Igarashi

**Innovative Two Closed Loop Control Techniques for Realization Pre-bias Feature in Isolated Brick Application** .................................................. 167  
Owen Jiang, Mark Ng, Sheng Lin

**Design and Considerations for Primary Side Regulation Control for Charger Applications Deploying mWSaver™ Technology** .................................................. 173  
Jayming Lee, Duncan Lee

### MOTOR DRIVE & MOTION CONTROL

**Enhanced Clamp Inductive Switching for Automotive DC Motor Control** .................................................. 179  
Thierry Sicard, Laurent Guillot, Evgueniy N. Stefanov, Nicolas Jarrige

**An Innovative Method for Induction Motor Driving Using Magnetic Energy Recovery Switch (MERS)** .................................................. 185  
Miao-Miao Cheng, Takanori Isobe, Shuhei Kato, Kazuhiko Fukutani, Hideo Sumitani, Ryuichi Shimada

**A Method of Accurately Detecting Transient Voltage Sag/Swell/Interruption Events Based on Virtual Area Algorithm** .................................................. 191  
Jianqiang Wu, Qinggang Wang, Yue Zhuo, Weigang Chen, Michael Anheuser

**Design and Digital Implementation of a Medium-Voltage Transformerless Hybrid APF** .................................................. 195  
Jinpiao Gao, Wei Chen, Zoe Zhang, Hongjian Gan, Jianping Ying

**A Virtual Temperature Sensor for Polyphase Squirrel-Cage Induction Motors** .................................................. 202  
Zhi Gao

### POSTER/DIALOGUE PRESENTATIONS

#### POWER ELECTRONICS APPLICATIONS

**Design and Implementation of Smart Azimuth Laser Pointer for Solar Panel Construction** .................................................. 208  
Shyi-Ching Chern, Chien-Lung Cheng, Sheng-Kai Fu, Fei-Hsiung Chuang

**Efficiency of LED Lamps and Lights by Applying Automatic LED Chip Temperature Measurement System** .................................................. 215  
Yeong-Long Shiu, Chien-Lung Cheng, Chih-Ping Huang, Shyi-Ching Chern
