2011 International Conference on Quality, Reliability, Risk, Maintenance, and Safety Engineering

(ICQR2MSE 2011)

Xi’an, China
17-19 June 2011

Pages 1-508
# Table of Contents

## I. Reliability Modeling and Risk Analysis

<table>

Risk Assessment on Scrapped Ammunition Disposing Systems via Analytic Hierarchy Process ................................................................................................................................................................................................... 267
Jiang Liu, Jun Yu, Dan Ling
Reliability Analysis Based on Combination of Universal Generating Function and Discrete Approach ................................................................................................................................................................................................... 272
Xiao-Ling Zhang, Li-Ping He, Ning-Cong Xiao, Zhonglai Wang, Hong-Zhong Huang
A Numerical Model with Age Reduction Factor for Warm Spare ................................................................................................................................................................................................... 275
Jian Sun, Yanfeng Li, Yu Liu, Hong-Zhong Huang, Tongdan Jin

II. Failure Physics, Data Analysis, and Reliability Testing
An Automatic Ground Test Method for the Analogue Unit of Ground Proximity Warning System ................................................................................................................................................................................................... 281
Wei Xiao, Xiao-Ping Zhu, Zhou Zhou
Life-Prediction of Accelerated Life Testing Based on Support Vector Machine ................................................................................................................................................................................................... 284
Pengcheng Yin, Chengdong Wang
Application of Bootstrap Method in Kolmogorov-Smirnov Test

Chengdong Wang, Bo Zeng, Jiye Shao
Accelerated Degradation Testing for Systems with Multiple Performance Parameters

Ye Shen, Chunhua Zhang, Yuanyuan Tan, Xun Chen
A Parallel-Plate Actuated Test Structure for Fatigue Analysis of MEMS

Qi Min, Junyong Tao, Yun’an Zhang, Xun Chen
A Study on the Lifetime Comparison for Electric Double Layer Capacitors Using Accelerated Degradation Test

Dong-Hoon Hwang, Jung-Won Park, Jae-Han Jung
Stress-Lifetime Joint Distribution Model for Performance Degradation Failure

Quan Sun, Yanzhen Tang, Jing Feng, Paul Kvam
Application of Fault Simulation Test in the VLSI Failure Analysis

Ye Shen, Chunhua Zhang, Yuanyuan Tan, Xun Chen
A Parallel-Plate Actuated Test Structure for Fatigue Analysis of MEMS

Qi Min, Junyong Tao, Yun’an Zhang, Xun Chen
A Study on the Lifetime Comparison for Electric Double Layer Capacitors Using Accelerated Degradation Test

Dong-Hoon Hwang, Jung-Won Park, Jae-Han Jung
Stress-Lifetime Joint Distribution Model for Performance Degradation Failure

Quan Sun, Yanzhen Tang, Jing Feng, Paul Kvam
Application of Fault Simulation Test in the VLSI Failure Analysis

Xiaoling Lin, Qingzhong Xiao, Ruohhe Yao
Accelerated Reliability Evaluation for High Density Packaging Integrated Circuits

Bin Yao, Ping Lai
Study of Vibration Reliability Test and Simulation for High Density PBGA Assembly

Bin Zhou, Xueli Qi
Single Event Effects Test for CMOS Devices Using 1064nm Pulsed Laser

Zhifeng Lei, Hongwei Luo, Hui Chen, Qian Shi, Yujun He
Reliability Estimation of Milling Head Based on Accelerated Bayesian Degradation Test

Rong Yuan, Weiwen Peng, Haiqing Li, Liping He, Hong-Zhong Huang
A Bootstrap-Based Method for Processing Accelerated Life Test Data

Xiaoyang Wang, Junjie Zhao, Haiqing Li, Yu Liu, Hong-Zhong Huang
Accelerated Storage Degradation Test and Life Extension Assessment Method for Hermetically Sealed Electromagnetic Relay

Bo Sun, Qiang Feng, Xuemei Zhao, Yi Ren, Shengkui Zeng
Aging Data Analysis for High Power Laser Diodes

Guoguang Lu, Yun Huang, Yunfei En
Method of Determining Acceleration Factors for Agricultural Tractors

Won Jung, Azianti Ismail
The Accelerated Life Experiment Study of Solid State Relay

Xiaowen Zhang, Hudong Zhang
Maximum Likelihood Parameter Determination Method for Complex System Modeling

Rui Jin, Zhong Han
Development of Possibility Distributions for Fatigue Lifetime Data Analysis

Liping He, Hong-Zhong Huang, Yu Pang, Yu Liu, Zhonglai Wang
Equipment Reliability Analysis Based on the Mean-Rank Method of Two-Parameter Weibull Distribution

Qiang Liao, Xiaoyang Wang, Dan Ling, Zhenlin Xiao, Hong-Zhong Huang
Bayesian Inference of Weibull Distribution Based on Probability Encoding Method

Haiqing Li, Rong Yuan, Weiwen Peng, Yu Liu, Hong-Zhong Huang
The Gate Metal Degradation Mechanism and Electromigration Evaluation of PHEMT Devices
Improved Electro-Migration Reliability in Nano Ag Modified Sn-58Bi Solder Joints under Current Stressing ............... 374
I. Shafiq, Y.C. Chan

A Power Analysis Based Approach to Detect Trojan Circuits ......................................................................................... 380
Li-Wei Wang, Hong-Wei Luo

III. Stochastic Reliability and Maintenance Modeling with Engineering Applications

Software Defect Prediction Based on Stability Test Data ................................................................................................. 385
Kazu Okumoto

Reliability Modeling of a Series System with Correlated or Dependent Component Degradation Processes .............. 388
Jingrui Li, David W. Coit, Elsayed A. Elsayed

Formal Verification of Communication Based Train Control System ............................................................................... 394
Guo Xie, XinHong Hei, Akira Asano, Hiroshi Mochizuki, Sei Takahashi, Hideo Nakamura

Optimal Replacement Policy for Continuous Damage Model and Its Application to Garbage Collection ................. 400
Xu-Feng Zhao, Cun-Hua Qian, Syouji Nakamura

Continuous Software Reliability Models .......................................................................................................................... 405
Lin-Zhu Jin, Tadashi Dohi, Shunji Osaki

Software Reliability Growth Model with Normal Distribution and Its Parameter Estimation ................................................. 411
Hiroyuki Okumura, Tadashi Dohi, Shunji Osaki

Asymptotic Replacement and Preventive Maintenance Policies ......................................................................................... 417
Toshio Nakagawa, Xufeng Zhao

A RAM Design of a Rolling Stock System .......................................................................................................................... 421
Yougn Jin Han, Won Young Yun, Goeun Park

Optimal Preventive Maintenance Intervals of a Rolling Stock System ..................................................................................... 427
Goeun Park, Won Young Yun, Young-Jin Han, Jong-Woon Kim

Optimal Maintenance Policy of Repairable System with Bathtub Shaped Intensity ................................................................. 431
Byeong Min Mun, Suk Joo Bae

A Note on Determining Confidence Level in Reliability Test for Assuring Bx-Life ............................................................. 436
Jae-Hak Lim, Young-II Kwon, Myung-Soo Kim

Managing Performance Based Logistics by Balancing Reliability and Spare Parts Stocking .............................................. 440
Tongdan Jin, ZhiGang Tian, Clara Novoa

Optimal Maintenance Policies During the Post-Warranty Period for Second-Hand Item ...................................................... 446
Dae-Kyung Kim, Jae-Hak Lim, Dong-Ho Park

IV. Fault Diagnosis, Prognosis, State Monitoring, and PHM

Innovative Multilevel Energy Processor in Machine Condition Monitoring ................................................................. 451
C. Cempel

Condition Monitoring for Helicopter Main Gearbox Based on Wavelet Packet Transform and Wavelet Neural Network ... 454
Li-Sheng Liu, Yu-Hang Yang, Zong-Yuan Li, Wei Yu

Failure Mechanism and Diagnosis Strategy of MMIC .......................................................................................................... 459
Ping Li, Yuan Chen
Solder Joint Degradation Analysis Using Time Domain Reflectometry ................................................................. 462
Ming Wan, Yudong Lu, Bin Yao, Jingdong Feng, Yunfei En, Xiaohan Wang, Xin Wang

Analog Circuit Fault Diagnosis Method Based on CPSO-SVM ........................................................................... 465
Jianchen Wang, Ganlin Shan, Qilong Zhang, Xiuisheng Duan

Effect of Channel Width on ESD Characteristics of SOI MOS Device............................................................... 469
Yujuan He, Yunfei En, Hongwei Luo, Qingzhong Xiao

Study on Fault Diagnosis of Gearbox Based on Morphological Filter and Multi-Fractal Theory .................... 472
Guang-Bin Feng, Yunbo Zhu, Hua-Gang Sun

A Comparison between Two Conventional Order Tracking Techniques in Rotating Machine Diagnostics........ 478
Kesheng Wang, Philippus Stephanus Heyns

The “Popcorn Effect” of Plastic Encapsulated Microelectronic Devices and the Typical Cases Study................. 482
Yuan Chen, Ping Li

Continuous Hidden Markov Model Based Gear Fault Diagnosis and Incipient Fault Detection .................... 486
Jian-She Kang, Xing-Hui Zhang, Yong-Jun Wang

A Simulation Software of Prognostics and Health Management for Aircraft Fuel System ............................... 492
Haifeng Wang, Bifeng Song, Fangyi Wan

Research on Information Description and Exchange Method in PHM System .................................................. 497
Jin-Ning Liu, Jie Yan

Reliability of Mutil-Layer Ceramic Capacitor and Its Conduction Mechanism under High Electric Field ........ 501
Yudong Lu, Yunfei En, Ming Wan, Xin Wang

Research on Diagnosis of Abnormal Causes in Quality of Weld Based on the Bayesian Net Model ............... 505
Hongquan Jiang, Jianmin Gao, Weilei Mu, Fumin Chen

Effects of Thick Al Wires Bonding Layout on Reliability of Power Devices ..................................................... 509
Hailong Liu, Shaohua Yang, Wulei Tang, Gangtao Zheng

Effect of Solder Joint Parameter on Vibration Fatigue Reliability of High Density PCB Assembly .................... 514
Xueli Qi, Bin Zhou, Yunfei En

Stick-Slip Mechanism Study of CNC Heavy-Duty Horizontal Lathe Feed Systems Based on Dynamics .......... 518
Peilin Yang, Wanli Zheng, Shuchuang Hao, Kun Chen

On-Line Safety Monitoring of Explosive Gas Concentration for Process in BF .............................................. 523
Xinguang Liu, Haitao Gu, Dahai Yu, Jian Wang

A RUL Model Based on KICA and Maximum Likelihood Estimation with Particle Filters ......................... 527
Ying-Bo Zhang, Yun-Xian Jia, Xu-Ming Song, Qingmin Gu

Research of Equipment Reliability Prognosis Model Based on SVR ............................................................... 532
Lei Sun, Yunxian Jia

Condition Prediction of Chemical Complex Systems Based on Multifractal and Mahalanobis-Taguchi System .... 536
Yanqing Lv, Jianmin Gao

V. Maintenance and Warranty Management

Optimising Burn-In Procedure and Warranty Policy in Lifecycle Costing ....................................................... 540
Mahmood Shafiee, Ming Jian Zuo

Discussion on Quality Control of First Batch Production of Land-Based Air Defense Missile Weapon System .... 545
Jian Zhang, Jiachen Wang, Shanbin Ma
Study on Storage Reliability of Portable Air Defense Missiles ................................................................. 548
Jian Zhang, Rong Xu, Qixun Liu, Yongjie Wang

Discussions about Reliability-Centered Quality Management ............................................................... 551
Xuecheng Zhang, Rong Xu, Chunning Jia

Automotive Warranty Data: On the Relationship between the Driving Patterns and Warranty .................. 556
Stefanka Chukova, Simon Anastasiadis, Boyd Anderson

Research and Application of Preliminary System Safety Assessment on Civil Airborne Systems ........... 562
Nve Xiao, Peng Wang, Yi Tian, Zan Ma

Analysis on the Requirements and Characteristics of Implementing Scientific Research Quality Management .................................................. 567
Xiaobo Lu, Xu Lu, Junyan Wu

Effectiveness Research of Quality Management System on Verification Risk ........................................... 571
Jianxin Huang, Yaqin Bian

Warranty Costs Monitoring ......................................................................................................................... 576
Zdenek Vintr, Michal Vintr

A Study on Military Equipment Lean Maintenance ...................................................................................... 581
Tao Qiang, Bin Zhu, Lin Li

Stochastic Program for Selective Maintenance Decision Considering Diagnostics Uncertainty of Built-In Test Equipment .................................................................................................................. 584
Xue-Zhi Lv, Yong-Li Yu, Liu Zhang, Yan-Fu Liu, Li-Yong Chen

A Condition-Based and Opportunistic Maintenance Model for a Two-unit Deteriorating System ........... 590
Zhuoqi Zhang, Su Wu, Binfeng Li

Condition Based Maintenance of Wind Turbine Systems Considering Different Turbine Types ............. 596
Abeer Amayri, Zhigang Tian, Tongdan Jin

A Grouping Model for Distributed Pipeline Assets Maintenance Decision ................................................. 601
Fengfeng Li, Yong Sun, Lin Ma, Joseph Mathew

Supervise on Aircraft Reliability for Improving Maintenance Program Continuously .............................. 607
Yi-Yong Cui, Qing-Gang Zhai

Optimal Joint Spare Stocking and Age Based Replacement Policy .......................................................... 610
Chang-An Xu, Jian-Min Zhao, Zi-Yan Wang, Ri-Hong Guo

Robustness of Age Replacement Strategy in Maintenance Management .................................................. 614
Liang Wen, Su Wu, Xisheng Jia, Binfeng Li

VI. Reliability, Maintainability, and Supportability

Research on Deploying Maintenance Support Force and Choosing Support Style .................................. 620
Zhi-Gang Sun, Xiao-Dong Zhu, Zhong-Xian Li

Research on Development Method of Virtual Maintenance Training System of Equipment ....................... 624
Pu Xie, Tian-Zhang Shao, Ying-Jun Guo

Research on SPA-Based Approaches and Application of the Evaluation for Maintenance Quality of Military Aircraft .......................................................... 629
Si-Dong Wei, Guo-Ping Xing, De-Xiang Sun, Kun Gao, Yu-Wei Liu

Risk Assessment Model of Error in Aviation Maintenance Based on Integrated Neural Networks .......... 633
Li-Zhi Xiao, De-Xiang Sun, Guo-Ping Xing, Yong Huang

Availability Model of Equipment Based on Three-Levels Maintenance System ........................................ 637

VII. Robust, Reliability-Based, and Lifecycle Design

Structural Topology Optimization Method Considering Reliability and Corrosion
Xiao-Jun Wang, Bin Zheng, Hong-Zhong Huang, Huanwei Xu, Zhonglai Wang

Robust Design of Dimension Chain with Less Composing Loops and Higher Precision Requirement
Yong-Hua Li, Wei Li

Reliability Design and Analysis of Electronic Components Based FEM Simulation Technology
Fangfang Song, Fulin Niu, Xiaoqi He

Reliability Sensitivity Analysis with Mixture of Random and Fuzzy Variables
Lijie Cui, Zhenzhou Lu, Pan Wang

Reliability Based Robust Design of Vehicle Rear-Axle Housing with Non-Normal Random Parameters
Zhou Yang, Yi-Min Zhang

Reliability Sensitivity Analysis Involving Correlated Random Variables by Directional Sampling
Shufang Song, Zhenzhou Lu, Zeshu Song

Landing Gear Torque Arm Position Analysis and the Optimization Design
Shichun Zhao, Weimin Cui, Tianxiang Yu, Bifeng Song

Chao Fang, Franck Marle, Enrico Zio

Decomposition Method for Hierarchical Multidisciplinary Robust Design Considering Uncertainty Functions and Coupling Variables
Jianbin Guo, Shengkui Zeng, Jiming Ma

Polynomial Chaos Expansion Based Robust Design Optimization
Fenfen Xiong, Bin Xue, Zhang Yan, Shuxing Yang

Uncertainty Propagation Techniques in Probabilistic Design of Multilevel Systems
Fenfen Xiong, Kun Guo, Wei Zhou

Topology Optimization Considering Stress and Reliability Constraints
Bin Zheng, Xiao-Jun Wang, Tao Ma, Hong-Zhong Huang, Huanwei Xu

Research on Multi-Objective Robust Design
Huanwei Xu, Hong-Zhong Huang, Zhonglai Wang, Bin Zheng, Debiao Meng

Reliability-Based Design of a Spindle Based on Random and Interval Variables
Yan-Yan Wang, Zonglai Wang, Hong-Zhong Huang, Weiwcn Peng, Ning-Cong Xiao

Part Reliability Design of Centrifugal Nozzle under Thermal Stress-Dependent Strength Using Polynomial Method
Chun Nam Wong, Hong-Zhong Huang, Yang Lu, Peng He

Application of Reliability-Based Multidisciplinary Design Optimization to Folding Mechanism
Research on Surety of the Complicated System ................................................................. 998
Lilun Guo, Jingrun Luo, Chaoyang Xie

Simulation of the Effect of Surface Roughness on the Mechanical Properties of a Microbeam .................................................. 1000
Wen-Xiao Fang, Qin-Wen Huang, Xin Liu, Chu-Xuan Qiu

Life Character Analysis Methods of Storage Electronic Components .................................................. 1004
Xin Liu, Wenxiao Fang

Design of Hardware Trojan Horse Based on Counter ........................................................................... 1007
Huafeng Liu, Hongwei Luo, Liiwei Wang

Dynamic Analysis on Rigid-Flexible Coupled Multi-Body System with a Few Flexible Components ............................... 1010
Guangyun Zhang, Nianli Lu, Renwei Che

The Option of Cracking Pressure of Two-Way Cartridge Valve .................................................................................. 1016
Hui Cao, Jun Song

Analysis of Horizontal Force of Low-Bridge's Container Trolley in Automatic Port ...................................................... 1018
Jian-Ge Yin, Zheng Gui, Peng Xie

A Preliminary Study of Work Problems on Train Drivers ................................................................................... 1022
Jing Qiu, R. Helbig, H. Rabenstein, M. Williams
