# Table of Contents

## I. Quality and Reliability Management

Reliability Practice in Aerospace Zero-defect Systems Engineering Management ........................................ (1)
* Dazhe Xu

Reliability Evaluation of An Implantable Deep Brain Stimulator ................................................................. (5)
* Weiming Wang, Bozhi Ma, Hongwei Hao, Luming Li

Construction of RMS Parameters System for Support System ................................................................. (9)
* Wenjin Zhang, Dezhen Yang, Ping Sun

Reliability Evaluation Models for High-reliability & Long-life and High-reliability & Short-life Products .... (15)
* Guocai Liu

Research on Reliability Assessment of Metalized Film Capacitors Based on T Performance Degradation Test ................................................................. (18)
* Yanzhen Tang, Quan Sun, Jing Feng

Dynamic and Gradual Coupling Reliability Analysis of Tension Rod ......................................................... (23)
* Changyou Li, Yimin Zhang, Yuewu Wang

Availability Verification of Military Aircraft Based on Reliability Simulation ............................................. (29)
* Zhongyi Cai, Yunxiang Chen, Huachun Xiang

Research of Qualitative Evaluation Method of the Reliability ..................................................................... (36)
* Shuyuan Jiao, Ling Shen, Xiuyin Chen

Research for Slope Structural Reliability and the Application of MATLAB Programme Software in Its Computation .................................................................................................................................................. (41)
* Yunlin Song, Min Lin

Review of Reliability Assessment Methods for Pyrotechnic Devices .......................................................... (46)
* Haiping Dong, Tianfei Zhang, Xia Zhao, Xiao Dong

Reliability Evaluation and Improvement of Deep Brain Stimulator Based On Accelerated Flexing Test ..... (50)
* Changqing Jiang, Xiongwei Wen, Weiming Wang, Hongwei Hao, Luming Li

Reliability Analysis of Asphalt Overlay Structure Based on Finite Element ............................................... (54)
* Kai Wang, Yangfeng Wu, Shining Li, Lianyu Wei, Shibin Ma

Reliability Simulation of Fretting Wear Based on Neural Network Response Surface in Space Structure Latches .................................................................................................................................................. (58)
* Qi Gong, Jianguo Zhang, Chunlin Tan, Chenguang Xing

Method and Model for Reliability Optimization Based on Variation of Quality ........................................ (64)
* Zhuojian Wang, Ruixiang Zhou

Reliability Model Test of Resistivity Sounding for Detecting Grouting Quality of the High-Speed Railway Karst
Xinhong Ren, Qiang Xie, Lining Zheng, Wen Zhao

Residual Strength Assessment to Panels with Multiple Site Damage by Method of System Reliability
Ningxiang Wu, Liyang Xie, Fei Zhao, Bo Chen

Analysis on Present Situation of Quality and Reliability Information Management of Research Institute
Tong Zhang, Lihong Guo, Qifeng Zheng

A Simulation Model for Multi-platform Phased Mission System Reliability Analysis
Houshun Zhou, Fang Li, Hui Weng

Real Time Reliability Analysis Based on the Performance Degradation Data and Bayesian Method
Jiming Ma, Xiaoyan Zhan, Shengkui Zeng

System Framework Research of Aeroengine Material and Craft Reliability
Xiao Liu, Weifang Zhang, Shengwang Liu

Electrical Method on Evaluation of Power Device Chip’s Welding Quality
Shuojie She, Guang-Bo Gao, Yueqiang Huang, Darshan Gandhi, Changzi Lv, Mahmood Choudhry

Integral Reliability Analysis and Evaluation of the Fire Equipment in Building
Yulong Du, Ailing Hao

A Mechanism Reliability Analysis Method Based on Polynomial Chaos Expansion
Wensheng Shi, Jianbin Guo, Shengkui Zeng, Jiming Ma

Researches on Integrated Evaluation Methods for Military Aircraft’s MTTR
Jiang Kun, Jinfeng Lv, Chuan Lv, Meihui Wang

Research on an Integrated Methodology of the Dynamic Performance and Reliability Evaluation
Jinling Wang, Shengkui Zeng, Jiming Ma, Weiwei Wu

An Efficient Method for Strain Fatigue Reliability Analysis
 Qin Liu, Yunpeng Qian, Dan Wang, Zhili Sun

Study on Reliability Estimation Approach Based on Simulation of Ad Hoc Network
Chao Yang, Zhengfu Zhu

Reliability Analysis Method of Mechanical System with Correlated Failures
Hongmao Tu, Yunpeng Qian, Juan Li

Structure Buckling Load Interval Analysis of Supercavitating Projectile
Ling Zhou, Weiguang An

Temperature-Humidity Oriented Reliability Prediction for Electronic Equipments
Xiaoxue Ding, Yufeng Sun, Weiwei Hu, Bangyan Qi

Mission Reliability Assessment for Plane Fleet Based on Flight Profile
Zhenyu Liu, Xiaohong Ma, Yu Zhao

Degradation Data-based Quantitative Qualification for High Reliable Microelectronic Device
Bo Sun, Jiuzheng Cui, Qiang Feng

Reliability Analysis of PMS with Disconnected Mission Phases
Xiaoyue Wu
Optimization Model for Mission Reliability of Multiple Working Mode Systems ....................... (168)
Wei Zhou, Bo Guo, Kai Yang
Research on Method about Reliability Prediction and Evaluation of Computer Measurement and Control System ........................................................................................................................................ (175)
Hongyan Zhuo, Yingsong Song, Jiaru Zhang
An Approach for Improvement of Avionics Reliability Assessment Based on Copula Theory ............. (179)
Mingsheng Huang, Qihua Wang, Yonghong Li, Liang Ao
Storage Durability Life and Reliability Analysis of Welded Metal Bellows ........................................ (184)
Jianguo Wu, Haibo Li, Deqiang Zheng, Wugang Liu, Jing Xu
Study on the Reliability Analysis Method of the Main Active Reflector System of FAST .................. (189)
Ming Zhu, Qiming Wang, Mingchang Wu
Reliability Analysis of Air-Gap Detonation Transmission Interface based on NESSUS ....................... (194)
Huina Mu, Limin Zhang
The Method of System Reliability Modeling Based on Hybrid Theory ............................................. (199)
Xin Wang, Jianbin Guo
An Integrated Reliability Evaluation Model of Aircraft Flight Test .................................................... (208)
Wenjin Zhang, Nan Lan, Ping Sun
Reliability Evaluation for High Reliability Products Based on Evidence Theory ............................... (212)
Yueqin Wu, Zhanyong Ren, Qihua Wang
System Reliability Measures Using Fuzzy Sets .................................................................................. (216)
Zhaojun Li, Kailash C. Kapur
Reliability Evaluation of a Multistate Network under Routing Policy ................................................ (222)
Yikuei Lin
A New International Standard: Combining Safety with Dependability .............................................. (231)
Yunhai Hou
Analysis of the Degradation of the Static Characteristics of Aged Discrete and Monolitic Components .... (235)
Jorge Marcos-Acevedo, Santiago Fernández-Gómez
A General Methodology used for Investigating the Technical Life of Products ................................. (242)
Ulf Borgström

II. Mathematical and Statistical Methods in Reliability

Reliability Estimations of Burr-XII Distribution under Entropy Loss Function .................................... (244)
Jinfen Wei, Baowei Song, Weian Yan, Zhaoyong Mao
Real-Time Reliability Evaluation of Equipment Based on Separated-Phase Gamma Process .............. (248)
Xiaolin Wang, Bo Guo, ZhiJun Cheng
The Application of Repairable Queuing System in Support Equipment ...................................................(255)
Xianli Yu, Zhiqiang Li

Research on Mission Modeling of Equipment Support Simulation ...........................................................(260)
Jianrong Zhang, Yongli Yu, Zhongxian Li

The Measurement of the Temperature and Pyrolysis Hot Gas Pressure at the Interface of the C/C Exit-cone ................................................................. (266)
Zhifei Sheng, Geng Li, Qin Liu, Xiao Hou, Hui Chen

Analysis of Simulation of Fleshy Food Company Logistics System Based on Flexsim.............................................(271)
Weiyu Chen, Zhiqiang He

Oil Filter Debris Analysis of Aero-Engine............................................................. (276)
Qing Wang, Zixin Zhu, Jingshun Duanmu, Xiaokai Ge

Research on Gearbox Wearing Prognosis Based on Gamma-State Space Mode ......................................................... (279)
Yingbo Zhang, Jianrong Zhang, Xinhui Zhao, Yunxian Jia, Wei Liu, Tianle Feng

A Neural Network Forecasting Model of Beijing’s Water Supplied and Consumed Based on Set Pare Analysis ................................................................ (284)
Xiaoxi Zhang, Dingtian Zhang

Investigation on Friction Coefficient between Solid Rocket Motor Nozzle Throat Components ........... (288)
Qin Liu, Zhifei Sheng, Hongbin Shi, Hui Chen, Jingwei Gu

Optimum Truncated Sequential Test of Binomial Distribution ................................................................. (293)
Sigui Hu

Runge-Kutta Algorithm of Reliability Model Based on Markov Chain for TT&C System ......................... (299)
Lirong Li, Xiaoyue Wu

A Forecasting Model to Equipment Health Status Based on PSR&Elman Technology ................................. (304)
Yuefeng Chen, Huting Song, Yuansheng Dong, Feng Liu

Fracture Mechanics Theoretical Modelling and FEM Analysis of 3-Point Bending Specimen Suffering Cyclic Loads .................................................................................. (308)
Yayu Huang, Xiangping Hu

An Approach of Mission Completion Success Probability Prediction for Circuits Based on Saber Simulation ........................................................................... (313)
Yi Ren, Zhi Fu, Linlin Liu

C-HFAMF: A New Way to Accident Analysis Considering Human Factor ................................................................. (319)
Jie Wu, Tingdi Zhao

Research on Fusion Method for Prior Distribution Based on the Second Maximum Likelihood Estimation Theory .................................................................................. (323)
Min Hou, Jilian Guo

Reliability Sensitivity Analysis via the Likelihood Ratio Method ............................................................................. (327)
Jinghui Li, Rui Kang, Ali Mosleh
Research on FFOP Prediction Approach of a Pulse Generator Based on Homogeneous Poisson Process….(334)
Weiwei Wu, Jiming Ma, Linlin Liu

Comparative Analysis of the Continuous-time Model and Discrete-time Instantaneous Approximate Instantaneous Availability and Its Error Analysis …………………………………………………………………………………… (339)
Yi Yang, Lichao Wang, Yongli Yu, Rui Kang

Forecast the Gas Gushing out Quantity of Mining Coal Working Surface Based on Markov Chain Model….(344)
Chunrong Wei, Minqiang Xu, Yanxia Li, Jianhua Sun, Shuren Xing

The PMS Modeling Method Based on Interactive Markov Chain…………………………………………………… (349)
Chunhui Yang, Jianjun Yang, Jinhui Bian

Research on Wear Random Process Modeling Methods…………………………………………………………… (353)
Jian Li, Hongmao Tu, Weijie Zhang

Fault Samples Simulation Based on Monte Carlo Method in Testability Virtual Test………………………… (358)
Chenxu Zhao, Guanjun Liu, Jing Qiu, Yong Zhang

Time-Dependent Reliability Model of Components with Strength Degradation Based-on Gamma Process….(363)
Ying Wu, Liyang Xie, Ningxiang Wu, Jindong Li

Accelerated Degradation Data Statistical Model Based on First Passage Time ………………………………… (369)
Hecai Liu, Ling Yang

Mission Effectiveness Simulation of the Special Plane Cluster on Continuous Mission………………………… (372)
Bin Wang, Rui Kang

The Reliability Model of Micro-electromechanical System Based on Fracture Mechanism …………………… (378)
Chunhua Yang, Qin Liu, Tao Li

The Application of Virtual Prototype in Equipment Supportability Design……………………………………… (383)
Qingjun Meng, Fusheng Liu, Ying Shen

A Perspective to Some Issues on Reliability Concept, Model and Method……………………………………… (387)
Liyang Xie, Ningxiang Wu, Wenxue Qian

Time Domain Reflectometry Technique for Detecting the Degradation of Solder Joints …………………… (395)
Yudong Lu, Bin Yao, Ming Wan, Jingdong Feng

Research of Anomaly Detection Method Based on Improved Artificial Immunity………………………… (398)
Xinpeng Zhang, Niaoqing Hu, Lei Hu

An Analysis of Mechanism Kinematics Accuracy Based on Linear Elastic……………………………………… (404)
Qiaoqiao Hou, Weimin Cui, Tianxiang Yu, Fangyi Wan, Bifeng Song

An Energy-Aware and Fuzzy Knowledge Routing Algorithm for Mobile Peer-to-Peer Networks……………… (409)
Xinzheng Niu, Dongmei Zhou, Zhouhui Deng

Research on Model of Fatigue Microcrack-Nucleating on Aluminum Alloy…………………………………… (416)
Guixue Bian, Yueliang Chen, Jianjun Hu, Maosheng Yang

Research on Bayesian Approach for Storage Reliability Assessment of Missile-Engine………………………… (420)
Lei Han, Jie Hong, Yanhong Ma, Miansheng Dou
Entropy Weight Health Index Method of Power Transformer Condition Assessment ........................................ (426)
Yan Zhou, Lin Ma, Jian Yang, Cong Xia

Integral Estimation Method of Constant Stress Accelerated Test Data under Periodic Inspection ................. (432)
Liang Ao, Yonghong Li, Qihua Wang

Autocorrelation-based Frequency Estimator for a Noisy Sinusoid ...................................................................... (436)
Yan Cao, Cui Yang

Reliability Analysis of Bayesian Monte Carlo Adaptive Importance Sampling Method for Structural Safety
........................................................................................................................................................................... (440)
Pidong Wang, Jianguo Zhang, Qi Gong, Chunlin Tan, Yuanzhen Zhu, Yichen Fan

Application of Reliability Non-parametric Estimation Methods Based on Computation of Capacity ............ (445)
Yao Hu, Guangbo Wei, Yu Ke

Industrial Structure to Economic Growth Influence .......................................................................................... (450)
Zhenfang Han, Pengcheng Ma, Xiuliang Zheng

III. Safety and Risk Assessment

Safety Analysis and Research on Risk Assessment Model of Spacecraft Assembly .............................................. (454)
Wenying Chen, Bile Wan, Gang Sun

Distortion Risk Measures of Uncertain Systems ............................................................................................... (460)
Jin Peng, Shengguo Li

Evaluation on Environmental Safety Effect of Natural Gas Storage ................................................................. (468)
Chang Yu, Guansan Tian, Yongming Song, Guolei Wang

Information Security Forecast Based on Artificial Neural Networks and Grey Set Pare Analysis ................ (473)
Dingtian Zhang, Xiaoxi Zhang

Study on Risk Development Trend Evaluation of the Emergency ....................................................................... (477)
Zhihong Wang

A Real Time Flight Deck Safety Monitoring System Based on Support Vector Machine ............................. (481)
Zhaoguo Zhang, Tingdi Zhao, Xiaoyun Wang

A Software Safety Analysis Method Based on S-Invariant of Petri Net ............................................................. (487)
Yang Sun, Hong Zhang

Software Safety Analysis of 2-out-of-3 Redundant Architecture System Based on Markov Model .......... (493)
Hongliang Pan, Xingyuan Zhang, Jiliang Tu, Decun Dong

Aviation Manufacturing Equipment Based WSN Security Monitoring System .............................................. (499)
Guoyi Zhang

A Survey of System Safety Technique of Commercial Aircraft ...................................................................... (504)
Siting Wang, Yi Liu

The Method of Area Selection for Lunar Landing Based on the Indicators of Area Risk Assessment .......... (513)
Jiangnan Xu, Jun Yang, Tao Li, Dayu Li
FTA and BN Methodologies in the Electrostatic Safety Analysis of Vessel’S Oil System ................. (516)
Zhuang Lin, Jun Li, Zhiqun Guo
Safety Influence of Lightning-induced Secondary Spark Discharge on Oil Tanks Area......................... (521)
Ping Huang, Xinning Qian, Wenlei Sun
The FTA Based Safety Analysis Method for Urban Transit Signal System........................................... (527)
Hongliang Pan, Jiliang Tu, Xingyuan Zhang, Decun Dong
A Quantitative Evaluation Approach to Astronaut Safety of Manned Spaceship ............................... (533)
Limin Shao, Haifeng Yang
Comparative Study on the Safety Assessment Technology between Civil Airborne System and Railway Signal System .................................................................................................................................................... (538)
Nve Xiao, Yadong Zhang
Fire Safety Assessment in Oil Depot Based on Comprehensive Grey Relational Analysis.................... (544)
Xiaogang Zhao, Yi Zhou, Jianyu Zhao
System Safety Model and Simulation Based on Entity-Oriented Event Sequence Diagram ..................... (549)
Jian Jiao, Tingdi Zhao
The Optimal Analysis of Safety Management System of Mine about “Series Circuit” ........................... (555)
Qiang Zheng, Fuchuan Jiang, Wenwen Shi
Safety and Availability Optimization of Safety Instrumented System ..................................................... (560)
Peng Wang, Yan Bai
The Effect of Experts on Failure Rate Estimate for Aircraft Risk Assessment ......................................... (565)
Wei Wang
Testability Simulation Validation Technology of Tank Fire Control System Based on TEAMS ............... (569)
Sijie Shao, Minghua Yang, Xi Wu, Hao Lu
An Event-Chain Risk Assessment Model Based on Definition Evolution in Safety Criterions ............... (573)
Nuo Zhao, Tingdi Zhao
Materiel Development Program Technical Risk Evaluation Method Based on Grey Relevancy Degree .... (579)
Xuemin Leng, Wei Wang, Huanhuan Gao, Yingying Gong
Method for Carrier Aircraft Task Flow Safety Analysis Based on TPN ................................................ (583)
Zhaoguang Peng, Tingdi Zhao, Jin Tian
Reliability and Safety Assessment with AltaRica for Complex Aircraft Systems ............................... (588)
Yuanzhen Zhu, Jianguo Zhang, Qi Gong, Yichen Fan, Pidong Wang, Cancan Wang
Safety Analysis for Complex System Based on the Finite State Machine Theory .................................... (594)
Yichen Fan, Jianguo Zhang, Qi Gong, Yuanzhen Zhu
Research on Progress of Risk Assessment on Consumer Product Safety at Home and Abroad ............ (599)
Xia Liu, Hongqi Luo, Wanjin Tang
A Fair Secret Sharing Protocol with Rational Participants ....................................................................... (606)
IV. Software Testing and Reliability

Research on the Definition and Model of Software Testing Quality .......................................................... (639)
Huiliang Jin, Fuping Zeng

The Process of Requirement Analysis about Military Software System Testing ........................................... (645)
Qing Zhou, Bin Liu, Zhengwei Yu, Xiaoqi Xing

Software Reliability Accelerated Testing Based on the Combined Testing Method ........................................ (651)
Erqieng Feng, Chang Liu, Jun Zheng

A Discussion on the Software Programming Technology ................................................................................ (657)
Gu Tingyang, Li Jiao

The Effectiveness of Real-time Embedded Software Testing ........................................................................... (661)
Bo Zhang, Xiangheng Shen

Software Reliability Modeling Based on Test Coverage ................................................................................. (665)
Shuanqi Wang, Yumei Wu, Minyan Lu, Haifeng Li

Fault Analysis of Software of the Feed Support System for the FAST Telescope ........................................... (672)
Hao Guan, Rui Yao, Wei Tang

A Dynamic Software Binary Fault Injection System for Real-Time Embedded Software .............................. (676)
Yunjia Zhang, Bin Liu, Qing Zhou

The Development of A Software Dependability Case Based on GSN ........................................................ (681)
Fen Sun, Yumei Wu

Study of Software Reliability Prediction Based on GR Neural Network ....................................................... (688)
Yumei Wu, Risheng Yang

A Safety-Critical Software Development Strategy Based on Theory of Diverse Design .............................. (694)
Shaojun Lee, Xiaohong Bao, Tingdi Zhao

Scenario-Based Software Operational Profile ................................................................................................. (700)
Qi Ao, Jun Ai, Minyan Lu, Fangling Zhong
Automatic Verification Environment for Embedded Software Reliability Testing............................... (705)
Fangling Zhong, Jun Ai, Qi Ao
A Study and Application on Airborne Software Safety Requirements Elicitation ..................................... (710)
Xiaojie Xu, Xiaohong Bao, Minyan Lu, Wei Chang
The Object-FMA Based Test Case Generation Approach for GUI Software Exception Testing ................ (717)
Jing Lai, Hong Zhang, Baiqiao Huang
A Prioritization Model for Software FMEA................................................................................................. (724)
Baiqiao Huang, Hong Zhang, Minyan Lu, Lingzhong Meng
Engineering Safety Information in Software Intensive Systems.................................................................... (730)
Baiqiang Xia, Deming Zhong
Designing Generic Safety Test Cases for Airborne Software ....................................................................... (737)
Changyong Yang, Xiaohong Bao, Deming Zhong, Zhen Li
One Test Case Generation Method for SW&HW Reliability Co-testing ..................................................... (742)
Chenguang Hou, Qihua Wang, Zhanpeng Ren
Reliability Engineering of the Command and Control Software ................................................................ (746)
Hua Wang, Xianya Li, Gang Xiang, Xiaokun Li, Xiaohua Wu
Theory and Implementation of Simulation Testing Framework for Embedded Software ............................... (751)
Yichen Wang, Yikun Wang, Chongwu Jiang
A Method of FTA Base on UML Use Case Diagram ...................................................................................... (757)
Wensheng Hu, Zhouhui Deng, Yi Hong
Web Software Reliability Analysis with Yamada Exponential Testing-Effort.............................................. (760)
Jianfeng Yang, Rui Wang, Zhouhui Deng, Wensheng Hu
A Decision Model for Agile Software Release............................................................................................... (766)
Xiaohua Wang, Liping Zou
Tendency Analysis of Software Reliability Engineering................................................................................ (771)
Linbo Fan, Zhigang Ma

V. Maintenance

Research of Framework of SMP2-based Maintenance Support Simulation Models ................................. (774)
Wei Zhang, Yongli Yu, Xinhui Zhao, Sheng Zhang
Research on Reliability and Maintainability of Deteriorated Steel Structures in Hydraulic Engineering........ (779)
Yushan Ren, Shuhe Wei, Jihai Wang, Zhigang Yin
The Condition Monitoring System of Mine Fan and Analysis of Condition Based Maintenance Policy .... (783)
Yinhua Pang, Sheng Fu, Yuechao Zhang, Quan Zhu
A Simulation Algorithm of Operational Availability and Maintenance Cost for Multi-mode System.......... (789)
Yanqiao Chen, Jiashan Jin, Zheng Huang
Ant Colony Algorithm for Optimal Resources Configuration of Equipment Maintenance Support .......... (793)
Yong Wu, Lin Ma, Jing Yang
Application of Virtual Maintenance in Maintenance Safety Design ..................................................... (796)
Jie Geng, Jianming Shi, Dong Zhou
Failure Risk Based Dynamic Decision Model of the Test Intervals for Condition Based Maintenance ........... (800)
Yaohui Zhang, Wu Cheng, Shixin Zhang, Yong Li
Application and Improvement Study on FMEA in the Process of Military Equipment Maintenance .......... (803)
Yanliang Li, Rui Kang, Lin Ma, Lei Li
Optimal Inspection and Maintenance Policy for the Multi-Unit Series System ....................................... (811)
Zhijun Cheng, Zheng Yang, Lin Tan, Bo Guo
The Modeling Method on Failure Prognostics Uncertainties in Maintenance Policy Decision Process .......... (815)
Rui Liu, Lin Ma, Rui Kang, Naichao Wang
Research on Evaluation Approaches of Maintainability Growth Based on Classification Data ................. (821)
Jilian Guo, Kangming Bai
Process Reengineering Method for Synthesis Design of Reliability Maintainability Supportability and Performance .......................................................... (826)
Qiang Feng, Chongyang Zhu, Bo Sun, Linlin Liu
Analysis of Multi-Functional Support Equipment Failure Impacting on Maintenance Waiting Time .......... (833)
Yan Wang, Lin Ma, Linhan Guo, Rui Kang
Small Sample Maintainability Test Data Fusion Method Based on ML-II .................................................. (838)
Baowei Song, Bochao Dong, Zhaoyong Mao, Jianfeng Yang
An Entropy-based Evaluation Method of Maintenance Support System .................................................. (842)
Zhisheng Cao, Lin Ma, Naichao Wang, Yalan Wang
Research on Integrated Environment of Maintainability Design and Analysis Based on PLM ................. (849)
Jinbo Huang, Anqing Liu
The Strategy Research of Maintenance and Replacement under Multi-Constraint ................................ (854)
Zhiyong Hu, Liyang Xie, Xiaojin Zhang, Zhaoguo Qiu
Process Oriented Maintainability and Maintenance Task Integrated Analysis Method .......................... (859)
Dong Zhou, Le Kang, Yan Ding, Chuan Lv
Research on the Maintainability Analysis and Verification Methods of Armored Equipment Based on Virtual Reality Technology ......................................................... (866)
Xi Wu, Chunlin Zhang, Yong Li, Ge Mu
Study on the Equipment Maintainability Database Management System Based on Active Server Pages Technique ................................................................. (870)
Dongxing Fang, Xi Wu, Zhenhui Gao, Ge Mu
New Method of Maintainability Comprehensive Analysis ................................................................. (874)
VI. Fault Diagnosis and Failure Analysis

How to Process Incomplete Failure Data in the Field................................................................. (915)
Xingbo Wang, Wei Zheng, Qunsheng Guan, Zhihui Guo
Fuzzy Multi-State Fault Tree Analysis Based on Fuzzy Expert System........................................... (920)
Yi Ren, Leixing Kong
Reliability Simulation for Phased Mission System with Multi-mode Failures Based on CPN............... (926)
Tao Hu, Hou-Shun Zhou, Feng Liu
Failure Analysis of Deployment Mechanism of a Satellite Solar Array......................................... (931)
Yi Yang, Liyang Xie, Shaoze Yan, Jianing Wu
Estimating the Turning Points of the Beta Generalized Exponential Failure Rate......................... (938)
Jiaqing Xu, Cheng Peng
Research on Application of PDM in Fault Diagnosis of IETM .................................................... (945)
Zongchang Xu, Shufeng Huang, Bo Li
Research on the Method of Dynamic Fault Tree Analysis......................................................... (950)
Wei Han, Weigang Guo, Zhiqiang Hou
A comparison of FMEA, AFMEA and FTA...................................................................................... (954)
Suiran Yu, Qingyan Yang, Jiwen Liu, Minxian Pan
Fault Analysis of the Feed Support System for the FAST Telescope............................................. (961)
Rui Yao, Hao Guan
The Method to Quickly Stimulate the Storage Failure Mode of the Repairable Products............... (966)
Shuaishuai Zhao, Jun Yao, Xufeng Zhou
An Effective Fault Detection Approach for Electrical Equipment of Propulsion System in a Type of Vessel Based on Subjective Bayesian Principle………………………………………………………………………………………………………………………… (970)

Bo Hu, Shiyin Qin

Design and Implement of RS-485 Bus Fault Injection………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………...

Methods on Reliability Estimation and Mechanism Consistency Test for Accelerated Degradation Data ................................................................. (1131)
Xiaobing Ma, Jinzhong Wang, Tingting Wang

A Multi-Stress Accelerated Life Tests Method for Smart Electricity Meter Based Upon the Life-Stress Model................................................................. (1136)
Bangyan Qi, Yufeng Sun, Weiwei Hu, Xiaoxue Ding

Design Criteria for Planning Multiple Stresses Accelerated Life Test................................................................. (1141)
Liang Gao, Wenhua Chen, Juan Liu, Jun Pan, Ping Qian

Mechanical Reliability Simulation ................................................................. (1147)
Xu Jianfeng, Xie Yalian, Xu Dan

Accelerated Test as A Tool for Reliability Comparison of Systems Manufactured by Different Ways ................................................................. (1151)
Zdenek Vintr, David Valis

ESS Profiles with Incremental Step Stress Levels................................................................. (1156)
M. Zhao, Y. Zhang, F.R. Xu

VIII. Miscellaneous

Sale Reliability of Products ........................................................................ (1162)
R. Jiang

Research for the Equipment Material Stock Model Two-class Supply Relationship................................................................. (1169)
Qingjun Zhao, Zhiqiang Li

Research on the Storage Scheme of Spare Parts for Long Voyage Vessel ................................................................. (1173)
Chen Jiang, Min Kong, Ming Liu

The Mission Availability of Equipment Defined Based on Mission Success and Its Application in Key Spare Parts Calculation of Warship................................................................. (1179)
Ruzheng Zhang, Shuhuan Wei, Zhigang Yao

Hydrodynamic Load Carrying Capacity Analysis of Planet Gear Thrust Washer Used in High-speed Planetary Transmission................................................................. (1183)
Hongwei Wang, Biao Ma, Man Chen, Chang Song Zheng

Molding Compounds Characteristics Testing of Plastic Device Used in High Reliability Fields................................................................. (1189)
Li Gao

The Effects of Calcite Particles on the Reliability of Electrical Contacts................................................................. (1193)
Yilin Zhou, Yang Lv, Hongda Liu

Research on Turnover Parts Optimization Based on Improved Spares Fill Rate................................................................. (1201)
Xianghui Meng, Zongchang Xu, Shaohua Wang
A Heuristic Algorithm for Mission Reliability Allocation of Spaceflight TT&C System.............................. (1208)
Xingui Zhang, Xiaoyue Wu

Optimization of Spare Parts Based on Inventory Level and Turnaround Time................................................. (1213)
Qingwei Yang, Naichao Wang, Ma Lin, Li Lei

Optimization Method for Spare Parts Deployment Efficiency in Development Phase..................................... (1218)
Yan Wang, Lin Ma, Zhen-Ying Zhang, Zhao-Dong Huang

The Study of the Effects on Stress Augmenting Factors by the Erosion Troubles to the Propeller of a Vessel
........................................................................................................................................................................ (1224)
Yuan Gu, Lixin Pan, Yiguo Qi, Fugang Zhang

A New Method of Determining the Partial Coefficient in the Limit State Design of Crane Structure.............. (1227)
Yuanyuan Teng, Dashan Dong, Huiqing Qiu

Estimation and Analysis of Time-varying Availability under the Drive of Mission Scenarios...................... (1237)
Naichao Wang, Lin Ma

Study on Measurement of Positional Precision for Industrial Robot............................................................. (1243)
Xiaojin Zhang, Jia Li, Zhiyong Hu, Sijun Zhu

Modeling Method of Military Aircraft Support Process Based SysML......................................................... (1247)
Lei Li, Lin Ma, Naichao Wang, Qingwei Yang

The Wear Characteristics on Bearing outer Ring of Planetary Gear in Conflux Planet Gear Train of Power-Shift
SteeringTransmission ........................................................................................................................................... (1252)
Hongwei Wang, Biao Ma, Hailing Zhang, Man Chen

Tensile Fracture Characteristics of Nitrile Rubber after Aging at Different Temperatures.............................. (1257)
Meili Ding, Weifang Zhang, Shengwang Liu, Weiguo Hou, Li Zhao

Research on the History and Perspective of System of Systems ................................................................. (1262)
Boping Xiao, Yalan Wang, Lin Ma, Zhisheng Cao

Enhanced Ultraviolet Resistance of Kevlar Fibers with TiO$_2$ Films............................................................. (1267)
Wei Chen, Xinning Qian, Xueqiu He, Jiping Liu

Fractured Profiles Analysis of Silicone Rubber of Different Stretch Rate.................................................... (1273)
Li Zhao, Weifang Zhang, Meili Ding, Weiguo Hou, Shengwang Liu

The Research of Sinusoidal Vibration Test Condition in Electric Control Thermal-Isolator ...................... (1277)
Fei Zhou, Shuhai Chen, Zhilei Wang, Qiang Li

Modeling and Simulation for SoS Based on The DoDAF Framework............................................................ (1283)
Xing Pan, Baoshi Yin, Jianmi Hu

Forecast Method Research of Activity-Centered Materiel Support Cost...................................................... (1288)
Yingying Gong, Linhan Guo, Lin Ma, Zhisheng Cao

The Analysis of End-to-End Delays Based on AFDX Configuration .............................................................. (1296)
Tangqi Lv, Ning Hu, Zhitao Wu, Ning Huang

Decision-making Method for the Varieties of Materiel'S Support Equipment in Development Phase.........(1301)
Jia Wen, Lin Ma, Hanguo Lin, Zhisheng Cao
Fatigue Life Analysis on Motion Mechanism for Multiple Loading Conditions........................................ (1308)
Xuemei Zhao, Bo Sun, Shengkui Zeng
Thermal Analysis Method for Avionic Device with Abnormal Geometry under Complex Air Flow Field...... (1314)
Wenjun Zhang, Yanchao Liu, Nan Li, Hantian Gu, Guicui Fu
The Buffer Size Assignment of AFDX Based on Network Calculus......................................................... (1319)
Zhiyao Wu, Tangqi Lv, Xuewang Wang, Ning Huang
Instantaneous Availability Models of URAS Basic Combat Unit During Mission.................................... (1324)
Zhiyu Jia, Zhaoyang Zeng, Zhehan Xu, And Xing Jin
Demonstration of Missile Equipments’ Supportability Based on the Mission Requirement.......................... (1330)
Tingxue Xu, Wei Zhen
Double-nozzle Flapper-style Hydraulic Servovalve Simulation Based on Sphere Wear......................... (1336)
Jinsheng Ren, Xiaoyang Li, Tongmin Jiang, Hong Wu
Bionics Analysis of Equipment Self-healing .................................................................................................. (1340)
Yan Ding, Le Kang, Meihui Wang, Chuan Lv
A Wavelet-analysis-based Change Point Model for Process Monitoring.................................................. (1347)
Jinlong Cao, Yiyong Xiao
A Model for Predicting the Obsolescence Trend of FPGA ......................................................................... (1354)
Cheng Gao, Xiaozhang Liu, Xiangfen Wang
Energy Adaptive Cooperative Data Dissemination for Mobile Peer-to-Peer Network.............................. (1359)
Xinzheng Niu, Dongmei Zhou, Zhouhui Deng
Ranking of Components in a System for Prioritisation of Preventive Replacement.................................. (1365)
Kecheng Shen
Using a Proportional Hazards Model to Determine the Effect of Covariates on Pooled Data–A Case Study (1370)
Mark Ho, Kecheng Shen
Interactive 3D Virtual Environments for Industrial Operation Training and Maintenance...................... (1376)
J. El-Chaar, C. R. Boer, P. Pedrazzoli, S. Mazzola, G. Dal Maso
System Reliability Optimization with k-out-of-n Subsystems and Changing k...................................... (1382)
Tipwimol Sooktip1, Naruemon Wattanapongsakorn1, David W. Coit2
Solid Rocket Motor Grain Life Prediction Based on Probability Model.................................................... (1388)
Jianwei Zhang, Guoqiang Liang, Bing Sun
