2011 Fourth International Conference on Ubi-Media Computing

(U-Media 2011)

Sao Paulo, Brazil
3 – 4 July 2011
Fourth International Conference on Ubi-Media Computing
U-Media 2011

Table of Contents

Message from the U-Media 2011 General Chairs.................................................................xi
Message from the U-Media 2011 Program Co-Chairs............................................................xii
Message from the ADET 2011 Workshop Chairs..................................................................xiii
Message from the MSEAT 2011 Workshop Chairs.................................................................xiv
U-Media 2011 Organizing Committee..................................................................................xv
U-Media 2011 Technical Program Committee......................................................................xvi
Keynotes .........................................................................................................................xvii

U-Media 2011

Session 1: Ubi-Media Infrastructure 1
Scalable Wireless Network Security for Bluetooth in Global Collaborative Environment .........................................................................................................................1
\textit{DaeHee Seo, Gaeil An, Jonghyun Kim, and JangMi Baek}
A Service Layer for Building GSM Positioning Systems in E-Health Domain ..............................7
\textit{Alexandre Bellini, Carlos E. Cirilo, Antonio F. Prado, Wanderley L. Souza, and Luciana A.M. Zaina}
Valid Location Measuring in Location Dependent Data for Mobile Environments .........................13
\textit{Ding-Jung Chiang, Chien-Liang Chen, and Wen-Chieh Lo}
Session 2: Ubi-Media Infrastructure 2

A Power Saving Sleep Scheduling Based on Transmission Power Control for Wireless Sensor Networks ............................................................19
  Ying-Hong Wang, Ya-Lan Wu, and Kuo-Feng Huang

uP: A Lightweight Protocol for Services in Smart Spaces ..........................................................25
  Fabricio Nogueira Buzeto, Carla Denise Castanho, and Ricardo Pezzuol Jacobi

Efficient Double Basis Semi-systolic Multipliers over GF(2m) Using Coupled Polynomials .................................................................31
  Chiou-Yng Lee

Session 3: Ubi-Media Infrastructure 3

Case Study on a Software Communications Architecture Component for Hardware Acceleration ........................................................36
  Rolando Duarte, Omar Granados, Chen Liu, and Jean Andrian

Using RFID Technology in Ubiquitous Resort Hotel Construction ..........................................41
  Chia-Chen Chen, Hsueh-Jung Wu, and Mu-Yen Chen

Cost-Efficient Data Cryptographic Engine Based on FPGA ......................................................48
  Chanjuan Li, Qingguo Zhou, Yuli Liu, and Qi Yao

Session 4: Ubi-Media Infrastructure 4

Context Aware Middleware for Supporting Idea Generation Meetings in Smart Decision Rooms .............................................................53
  Carlos Filipe Freitas, António Meireles, Lino Figueiredo, João Barroso, and Carlos Ramos

OntoHealth: A System to Process Ontologies Applied to Health Pervasive Environment ........................59
  Giovani R. Librelotto, Leandro O. Freitas, André Fiorin, Bruno A. Mozzaquatro, Leandro Pasetto, Ricardo G. Martini, Renato P. de Azevedo, and Rafael T. Pereira

An Extenics-Based Dynamic Resource Adjustment for the Virtual Machine in Cloud Computing Environment ..................................................65
  Liang-Teh Lee, Shin-Tsung Lee, and Jui-Chih Chang

Session 5: Ubi-Media Middleware 1

Technical and Organizational Potentials of Value Networks for Ubiquitous Information Products and Services: Exploring the Role of Cloud Computing ..................................................71
  Stefan Bensch
Factors Influencing Inter-organizational Information Integration in Networked Environment ............................................................................................................................................................................77
   Ying-Hueih Chen and Jyh-Jeng Wu

One-to-One Complementary Collaborative Learning Based on Blue-Red Trees and Performance Analysis for Social Network .........................................................................................................................83
   Yung-Hui Chen, Lawrence Y. Deng, Shwu-Huey Yen, Wu-Hsiao Hsu,
   Bruce C. Kao, and Yu-Che Haieh

Session 6: Ubi-Media Middleware 2

CA2P: An Approach for Privacy-Safe Context-Aware Services for Mobile Phones ........................................................................................................................................................................................................89
   Fabio Magagna, Mazenod Jaccomuthu, and Juliana Sutanto

General Pattern Discovery for Development of Social Game-Based Learning: A Case Study from Games in Facebook ........................................................................................................................................................................................................95
   Man-Ning Lee, Martin M. Weng, Chih-Hao Lin, Zhao-Heng Ma, Jen-Chih Lin,
   and Li-Chieh Lin

Using Gesture Annotation to Achieve Real-Time Communication under MSNP .................................................................................................................................101
   Fang-Yu Chen, Chia-Cheng Chao, Kanoksak Wattanachote, and Kuan-Ching Li

Session 7: Ubi-Media Middleware 3

Middleware Support for Context-Aware Mobile Applications with Adaptive Multimodal User Interfaces .......................................................................................................................................................................................................106
   Lincoln David, Markus Endler, Simone D.J. Barbosa, and José Viterbo Filho

Framework for Context-Aware Applications on the Brazilian Digital TV ..................................................................................................................................................................................................................112
   Thiago P. Salviano, Patrícia D. Costa, José Gonçalves P. Filho, and Igor M. Vale

Emergence Phenomenon Could Be Applied in Meaningful Image Segmentation .............................................................................................................................................................................................................118
   Sagarmay Deb

Session 8: Ubi-Media Middleware 4

Measuring Synchronous and Asynchronous Sharing of Collaborative Annotations Sessions on Ubi-Videos as Social Interactions ........................................................................................................................................................................................................122
   Alan Keller Gomes and Maria da Graça Campos Pimentel

Emotion-Oriented Computing: Possible Uses and Resources .................................................................................................................................................................................................................................130
   André Valdestilhas

A Discussion about Human-Computer Interaction Requirements for Ubiquitous Systems ..............................................................................................................................................................................................................134
   Thiago Grazaini Traue and Guiou Kobayashi
A Location Based Dial-A-Ride Service System for the Elderly and the Disabled in Taiwan ................................................................. 140
   Chi-Bin Cheng

Session 9: Ubi-Media Human-Computer Interaction 1

A Real-Time Hand Gesture Recognition System for Daily Information Retrieval from Internet .................................................................................................................. 146
   Sheng-Yu Peng, Kanoksak Wattanachote, Hwei-Jen Lin, and Kuan-Ching Li

Human Motion Extrapolation via Motion Analysis and 2D-3D Motion Estimation ................................................................. 152
   Pei-Yao Chen, Chun-Hong Huang, and Joseph C. Tsai

The Rotation Angle of the Video Background Based on Image-Based Rendering .................................................................................. 158
   Li-Yi Wu, Joseph Tsai, Timothy K. Shih, and Ying-Hong Wang

Modified Programming Language Framework for IVRS Accessibility of Graphical User Interfaces .................................................. 163
   Ajit Jain and Sarabjot Singh

Session 10: Ubi-Media Human-Computer Interaction 2

3D Skeleton Construction by Multi-view 2D Images and 3D Model Segmentation ................................................................................ 168
   Shih-Ming Chang, Yi-Sheng Tsai, Hui-Huang Hsu, and Kuan-Ching Li

Towards an Ubiquitous and Context Sensitive Public Transportation System ................................................. 174
   Vaninha Vieira, Luiz Rodrigo Caldas, and Ana Carolina Salgado

A Software Platform for Governmental Virtual Institutions ........................................................................................................ 180
   Cláudia J. Abrão de Araújo and Flávio S. Corrêa da Silva

Session 11: Ubi-Media Applications

Ubiquity of Virtual Disguisers and Potential Impact on Ethical Behavior ................................................................. 186
   G. Kobayashi, M.C. Broens, J. A. Quilici-Gonzalez, and M.E.Q. Gonzalez

Facilitating Academic Service-Learning with Android-Based Applications and Ubiquitous Computing Environment ................................................................. 191
   Hsuan-Che Yang and Wen-Ying Wang

End-User Ubiquitous Multimedia Production: Process and Case Studies ................................................................. 197
   Diogo Santana Martins and Maria da Graça Campos Pimentel
A New Handover Strategy between Femtocell and Macrocell for LTE-Based Network ....................................................203

Shih-Jung Wu

Discovery of Relationship between Learner Achievement and Motivation through Historical Learning Game ........................................................................................................209

Cheng-Jang Lin, Yung-Hui Chen, Zhao-Heng Ma, J.T. Yang, and Li-Chieh Lin

An Open-Source Enabled Scheme for Improved Interactive Whiteboard .................................................................213

Feng-Cheng Chang and Duen-Kai Chen

Adaptive Testing System for the Combination of Diagnosis Mechanism and Normal Distribution .........................................................217

Yung-Hui Chen, Wu-Hsiao Hsu, Lawrence Y. Deng, Chao-Yang Huang, and Chieh-Hsun Huang

Cross-Language Instant Messaging with Automatic Translation .................................................................222

Che-Yu Yang

PZB and Implementation of Web-Based Multi-Survey: A Case Study on Satisfaction Survey of Teaching ........................................................................................................227

Ling-Yi Lin, Hsiang-Chuan Liu, Chia-Cheng Liu, and Shih-Ming Chen

The Module Design for Critical Dimension Bias Correction of Slanted Line on High Level Large Area Mask .................................................................231

Wen-Hsing Kao, Yong-Chuan Chang, and Chi-Ching Lin

Web of Web: A User-centric Technology for Relation-Oriented Web Querying .................................................................236

Chun-Hsiung Tseng, Chun-Hong Huang, Sung-Min Liao, and Wen-Nung Wang

An Online Web Usage Mining System Using Stochastic Timed Petri Nets .................................................................241

Ching-Ming Chao, Shih-Yang Yang, Po-Zung Chen, and Chu-Hao Sun

After-Sales Service and HRM Strategies for Small Appliances Enterprises: Creating a Sustainable Competitive Advantage for SUNHOW in Taiwan .................................................................247

An-Shin Shia and Bau-Jung Chang

The Feasibility of Augmented Reality on Virtual Tourism Website ........................................................................................................253

Chouyin Hsu

Reversible Data Hiding for Color BMP Image Based on Block Difference Histogram ........................................................................................................257

Hsien-Wei Yang and Kuo Feng Hwang
MSEAT 2011 Workshop Session 2: Ubiquitous Environment and E-Learning

Student Performance in School: Examining the Importance of Hypermedia Assisted? ............................................................261
  Shu-Ching Yang and Chin-Hung Lin

Online Interactive Game-Based Learning in High School History Education:
Impact on Educational Effectiveness and Student Motivation .................................................................265
  Kuan-Cheng Lin and Yu Che Wei

The Design of a Video-Based OSGi-Compliant Remote Home Network Control System .............................................................269
  Chuan-Feng Chiu, Chun-Hong Huang, Steen J. Hsu, and Sen-Ren Jan

Relationships between Perceived Usefulness, Ease of Use and Environmental Factors of RFID Adoption in Taiwan Logistics Industry ........................................274
  Yu-Bing Wang and Kuo-Feng Hwang

An Ubiquitous and Intelligent Energy-Saving Information Processing and Supporting System .................................................................280
  Sheng-Yuan Yang and Lawrence Y. Deng

Intelligent Optimization Scheduling Algorithm for Professional Sports Games ........................................285
  Jason C. Hung, Miller K. Chien, and Neil Y. Yen

Author Index ............................................................................................................................................290
