# EDUCATION, TRAINING, AND PUBLIC INVOLVEMENT

**A Training Program for Asset Management of Infrastructure Water Pipelines**  
H. D. Tran

**Rigor Matrix to Enhance Public Involvement Effectiveness for Infrastructure Projects**  
Andrew S. Chang, Kuan-Pei Lee

**Case Study: Public Involvement Outcomes in Four Seattle Communities Targeted for New Combined Sewer Overflow Facilities**  
Monica Van Der Vieren, Robert Wheeler, Shahrzad Namini

---

# GEOTECHNICAL CONSIDERATIONS FOR PIPELINE PROJECTS

**Numerical Simulation of Buried Steel Pipelines under Strike-Slip Fault Displacements**  
Polynikis Vazouras, Spyros A. Karamanos, Panos Dakoulas

**Constrained Modulus of Crushed Rock for Pipeline Embedment**  
Amster Howard

**Finite Element Analyses of Soil-Pipe Behavior in Dry Sand under Lateral Loading**  
Jai K. Jung, Kunyong Zhang

**Mitigating Geohazards along Aging Infrastructure—The Tolt Pipeline**  
Claire L. R. Gibson, Taryn Sass, Dennis R. Stettler, Colin B. Turnbull, Robert O. Middour

**Development, Procedure, and Results for the Constrained Modulus of Gravel and Crushed Rock Test**  
I. Erica N. Gemperline, Mark C. Gemperline

**Over or Under: Geotechnical Considerations for Pipeline Levee Crossings**  
David P. Sauls, Andrew E. Sparks, Michelle L. Ramos

**Contribution of Lateral Earth Pressure Resistance to Restrain Horizontal Thrust in Buried Pipelines**  

---

# PIPELINE CONSTRUCTION AND REHABILITATION

**Hot Tapping and Plugging in New York City: A Method to Maintain Service and Protect the Marine Environment during Reconstruction of a Major Sewage Pumping Station and Treatment Plant**  
Charles Herckis

**The Need for National Data Standards for Condition Assessment**  
L. Grant Whittle, Kristi Steiner, Sunil Sinha

**Internal PCCP Force Main Deterioration—Analysis and Rehabilitation**  
Garry Mak

**Weighing the Risks of Installing a Lake Tap with Microtunneling**  
Christy Sanders-Meena, Anne Tonella-Howe, Matthew Pease

**Hole Swallows Car, Film at 11:00: Greensboro’s Pilot Program for Water Pipe Bursting Leads to Expanded City Wide Program**  
Robert H. Bald Jr.

**Pipe Reaming in Seattle**  
Roger Beieler

**Rehabilitating a Life Line: Inspecting and Repairing the Hultman Aqueduct in Metropolitan Boston**  
Paul Savard, Peter McGovern

**Multiple HDD Applications for Portland Airport Deicing Enhancement Project**  
Jack R. Ostlund Jr., Barry Sarin

**Sophisticated Sequencing of Water Transmission Main Repairs**  
Ed Alleyne, Bill Judy, Roger Cronin, Denise Nelson

**Engineering Assessment of Damaged 66 Inch Water Main**  
Alfredo Saenz, Robert J. Card

**Target Values of Compacted Gravel for Pipelines**  
Amster Howard

**Rehabilitation of Brazos River and Colorado River Pipeline Bridges**  
Maria Grazia Bruschi, John C. Clenance, Seth Condell, John Schmid
Who's on Your CM Team?

Mark P. Smith, Brian Foredyce

Pipeline Rehabilitation amidst Environmentally Sensitive Location

Steve Bian, Anna Pridmore, Rudy Loera, John Marshall

Power Generation Case Study: Feasibility of Carbon Fiber and Alternate Repair Methods

Gaetano Bologna, Anna Pridmore, Mark Geraghty, Jason Alexander

Successes and Failures in Laying Steel Pipe through Peat

Stephen Mackellar, Matthew Stott

10 Years of Learning—The East Boston Branch Sewer Project from Design through Construction

Phillip Lanergan, Peter McGovern, Paul Savard, David McKiernan, Lisa Hamilton

PPI-BoreAid: A Preliminary Design Tool for Horizontal Directional Drilling using Polyethylene Pipeline

Karl Lawrence, Alireza Bayat, Mark Knight, Camille Rubeiz, Larry Petroff

Breathing New Life into Old Water Pipelines: Renewal Case Studies in the Southeast U.S.

Tim Ball

The Few, the Proud: The Challenge to Upgrade Infrastructure on Active Military Installations and How One Utility Overcame

Challenges of Large Diameter Horizontal Directional Drills

Daniel Applegate, Andrew Cronberg, Thomas A. White

Delivery Logistics for the 144 Inch Tawakoni Pipeline

Douglas Smith, Jennifer Cottingham

Quality Assurance Procedures for Repair of Concrete Pressure Pipes with CFRP Composites

Murat Engindeniz, Rasko P. Ojdrovic, Mehdi S. Zarghamee

Large Diameter Watermain Condition Assessment and Evaluation

Troy L. Bowers, Jeffrey S. Jones, Tamara S. Connolly

Spring Valley Outfall Pipeline Rehabilitation

Michael Pollard

Innovative Joint Proves Successful in Critical Slipline Project

Tom Baas, Jeff Gardner, Richard Mielke

Construction of a Deep Water Marine Outfall Using Design-Build Procurement

Jeffrey A. Lundt

Using Design-Build Procurement for a Deep Water Marine Outfall Pipeline

Jeffrey A. Lundt

PIPELINE LOCATING AND INSPECTION

Miami-Dade Embarks on a Condition Assessment Journey

Ralph Terrero, Richard Coates, Mike Garaci

Completing Condition Assessments Using In-Pipe GPR As Pipe Penetrating Radar

Csaba Ékes, Boriszlav Neducza, Gordon R. Henrich

Handling Transmission Mains in Water Loss Control Programs

Kevin Laven, Jeff Kler

Recent Advances in Pipe Wall Assessment Technology

Xiangjie Kong, Vinh Nguyen, Roberto Mascarenhas

Deterioration of Two Critical Force Mains

Susan M. Gierga, James L. Helton

VOLUME 2

Applying Subsurface Utility Engineering (SUE) to Transportation Projects: The State of the Practice

Kevin M. Thelin, Fulgence Bugingo, Andrew H. Giesy

Permanent Leak Detection on Pipes Using a Fibre Optic Based Continuous Sensor Technology

Andrea Myles

Transmission Main and Plastic Pipe Leak Detection Using Advanced Correlation Technology: Case Studies

Marc Bracken, Dave Johnston
A Simple Soil-Structure Interaction Model for Indirect Damage Assessment of Segmented Concrete Pipelines during PGD ................................................................. 766
   A. S. Bradshaw, R. A. Green, J. P. Lynch, R. L. Michalowski, J. Kim, S. O’Connor, M. Pour-Ghaz, S. Nadukuru, W. J. Weiss

PIPELINE PLANNING AND DESIGN

Lake Oswego’s Innovative Buoyant Interceptor Sewer System Takes Shape .................................................................................................................. 777
   J. R. Holland, J. B. Komarek

Creation and Calibration of LWC’s System-Wide Hydraulic Model ......................................................................................................................... 790
   Andrew F. Williams, Rich Rabold

Maxi-HDD Pull Loads in Non-Level Grade for Polyethylene Pipe Including Ballast ................................................................. 801
   Lawrence M. Slavin, Mohammad Najafi, Eric R. Skonberg

Design and Construction Challenges for a High-Risk, 24 Inch Diameter, 5,400 LF HDD Project ..................................................... 811
   David J. Tank, G. Christian Andreasen Jr.

An Improved Approach for the Design of Thrust Blocks in Buried Pipelines .......................................................................................... 821

When Big Is Too Big—Evaluating 156 Inch Water Main Pipe Materials .............................................................................. 840
   Arthur C. Morris, Robert J. Card, Machrena L. Ramos

Understanding How Molecular Differences Influence Plastic Pipe Performance ................................................................................ 848
   Bob Walker

Analysis and Testing of a Prototype Jointing System for Bar-Wrapped Steel Cylinder Concrete Pressure Pipe .............................................................. 864
   Mohammad Najafi, Richard Mielke, Guillermo Ramirez, Brent Keil, Glenn Davidenko, Shah Rahman

Review of Performance of Gasketed Joints of Buried Concrete and Steel Pipelines in California after Recent Seismic Events .............................................................. 872
   Henry H. Bardakjian, Michael McReynolds, Mehdi Zarghamee

Guidelines for Use of Mini-Horizontal Directional Drilling for Placement of High Density Polyethylene Pipe ...................................................... 882
   Lawrence M. Slavin

A Laboratory Method for Determining the Safe Pull Stress for Directionally Drilled High Density Polyethylene Pipe ...................................................... 892
   M. J. Lamborn, L. J. Petroff

Planning and Building a Marine Outfall in a Sensitive Ecosystem: Lessons Learned ....................................................................................... 903
   Arthur Fleming, Jason Stutes

Large Diameter Steel Pipe Design under Deep Water: Lake Travis Experience ................................................................................................... 919
   Xiaohong He, Shelby Eckols, William Stauber

Answering the Question: Is a Surge Analysis Required? ................................................................................................................................. 929
   David L. McPherson, Christopher Haeckler

Thrust Restraint Design and Analysis for Continuous Pipelines: Case Study of Steel Pipe Using M9, M11, and Fiberglass Analyses ......................................................................................... 937
   Henry Bardakjian, Sam Arnaout, Bo Botteicher, John Luka, David McPherson, Manish Naval, Larry Petroff, Sri Rajah, Stephen Shamaker, Robert Walker, Brent Keil, William Whidden

Design and Installation of Pipeline Systems in Long Tunnels—The Brightwater Conveyance Project .......................................................... 948
   Joe Clare, Travis Schulze

Common Pitfalls in Hydraulic Design of Large Diameter Pipelines: Case Studies and Good Design Practice ............................................. 961
   David Bennett, Rebecca Glaser

Hampton Roads Crossing (HRX) Pipeline: Innovative Marine Pipeline Design and World Record Trenchless Crossing .............................................................. 972
   Robert Scott Quast, Leslie A. Flora

Planning for a Regional (400+ MGD) Transmission Line ......................................................................................................................... 981
   Melissa C. Henderson, Meredith G. McCullough, Yu Sherry Cang

A Change in System Supply and Operations ................................................................................................................................. 992
   Melissa C. Henderson, Alan B. Lindelof, Erwin Burden

Seventy-Two Projects, $600 Million, and 15 Years—Now What? .................................................................................................................. 1002
   Roger Coffey, Sue Marino

Thrust Restraint Concepts and Beam Loads for Segmented Pipelines at Bends .............................................................................. 1015
   Randall C. Conner

Testing and Evaluation of Statically-Loaded Large Diameter Steel Pipe with Native Backfill Soils ..................................................... 1025
   Jwala Raj Sharma, Mohammad Najafi, David Marshall, Abhay Jain, Saeed Rahjoo
Pipe Thrust Restraint Considerations: What You Don’t Find in a Textbook .................................................. 1035
Benjamin C. Adams

Development of a Testing Protocol for Evaluation of Flexible Lining Materials ........................................ 1045
Scott Christensen, Gina Neilson, Bill Spickelemire, John Plattsmier, Eric Loveless

Solving the “No-Win” Scenario: Mercer Island, Washington Sewer Lakeline Replacement ......................... 1065
Jeff Lyshken, Anne Tonella-Howe, Kevin Goss

Evaluation of Seven Flexible Linings to Determine Suitability As an Alternative to Mortar Lining .............. 1078
Scott Christensen, Gina Neilson, Bill Spickelemire, Cindy O’Malley, John Plattsmier, Eric Loveless

The New Mississippi River Bridge: Water Utility Relocations ................................................................. 1096
Jeffrey A. Grutzen, Keenan Bull

“Insulating” Welded Lap Joints for Steel Pipelines—The End to Internal Coating Repairs? ......................... 1105
Steve MacKell

A Review of Available Minor Loss Coefficients for Combining and Dividing Flow Tees ............................ 1116
C. T. Michalos

A City within a City: The Tale of the Relocation of a Sanitary Sewer Interceptor ....................................... 1124
Jack Bell, J. Felipe Pulido, Robert Cullwell

How to Protect Your Pipeline from Corrosion in a Pipeline Spaghetti Bowl............................................ 1134
Scott Maughn, Jimmy Sibler, David Scott

Pipeline Engineering: How to Plan for Everything .................................................................................. 1142
Kevin D. Calderwood, Rachel A. Leclair

Approaches to Fatigue Design in Thermoplastic Pipe ............................................................................. 1152
Scott C. Williams

Design and Construction of a Relief Sewer Siphon under the Santa Clara River by Microtunneling ............ 1162
Rosann Paracuelles, Suren Anketell

Hydraulic Evaluation and Energy Optimization for a 134 Mile Integrated Raw Water Transmission System ........................................................................................................... 1173
Shilpa Shivakumar, Thomas J. Charles, Ed Weaver, David H. Marshall

The Straw That Stirs the Drink—Designing a Challenging Diversion Pump Station and Force Main for Clackamas County Sanitary District #1, Oregon ............................................................. 1183
Nesh Mucibabic, Dewayne Kliewer, Jeremy Holland, Kristi Nelson

Best Value on Large Diameter Pipeline Projects by Integrating Design Parameters, Bid Specifications, and Construction Quality Control ............................................................. 1194
William S. Landin

Innovative Pipeline Cost Estimating for Colorado Water Supply Planning ................................................. 1203
Alexandra Bowen, Jordan Dimick, Nicole Rowan, Eric Hecox

Special Considerations for Protecting Very Long Transmission Mains from Hydraulic Transients .......... 1215
V. Ravisangar, Thomas J. Charles

Innovative Uses of GIS on the Houston 120 Inch Northeast Transmission Main Feasibility Study ............... 1225
Andrew Hunt, Erik Snyder, Jonathan Prévôt

Large Diameter Elevated Transmission Pipeline Crossing of the Snohomish River Estuary: A Case Study Addressing Unique Design Challenges ................................................................. 1234
Gregory S. Harris, Souheil Nasr, Jay D. Cooke

An Urban Alignment for a Waterline Up to 156 Inches ........................................................................ 1246
Arthur C. Morris, Rafael Ortega, Mackrena L. Ramos

Effective Early Planning for Pipeline Projects ....................................................................................... 1252
Evan Bingham, G. Edward Gibson Jr., Jinsung Cho

Selection of Conduit Material for the Provo Reservoir Canal Enclosure Project ........................................ 1263
Adam Murdock, Jeff Budge, Mike Mickelson, Shah Rahman

Performance of Gasket Joints in Steel Pressure Pipes ............................................................................ 1278
Neal Kelemen, Brent Keil, Richard Mielke, Glenn Davidenko, Jeff Gardner

Field Performance of Coatings and Linings for Welded Steel Pipe in the Water Industry ........................ 1288
Sylvia C. Hall

Comparison of the Mechanical Properties of Steel and Ductile Iron Pipe Materials ................................ 1301
Brent Keil, Jack Devletian

Acueducto Rio Colorado Tijuana Project ................................................................................................. 1313
Joel Olmos, Sergio Ramirez, Marco Antonio Santacruz

Seismic Concerns for the Design of Above Ground Pipe Supports ....................................................... 1322
Sri Rajah, James Peterson, Souheil Nasr, John Plattsmier, Stan Boyle

Installing Pipelines with Microtunneling while Successfully Avoiding Claims—A Case History ......... 1332
Brad Moore, Kimberlie Staheli, Bob Jossis, H. Scott Clement
Transient Pressure Monitoring Results—Nacimiento Water Project ................................................................. 1342
Will Worthington, John R. Hollenbeck, Thomas C. Trott

Application and Advantages of Using Internally Restrained PVC Pipes for Installation by Horizontal Directional Drilling ........................................................................................................... 1352
Mustafa Kanchwala, Trupti Kulkarni, Mohammad Najafi, Craig Fisher, Vijay Kumar Shivaji Rao

REGULATIONS, CODES, AND STANDARDS

Pipeline Planning in the UK: Navigating a Constrained Landscape ........................................................................... 1363
Hannah Kirkham

Permitting Requirements and Expectations for Pipeline Repair: New Expectations for 2011 ........................................... 1373
Rachel Walker, Alina Heydt, Todd Fasking

Environmental Permitting for Pipeline Projects ........................................................................................................... 1382
Alex Cohen, Lisa Adolfson, Marjorie Wolfe

SAFETY, RISK ASSESSMENT, AND MANAGEMENT

Web Based Risk Assessment of Water and Wastewater Pipeline Failures ........................................................................... 1393
Varun Raj Sekar, Sunil Kumar Sinha

Assessment Framework for the Impacts of Climate Change and Urbanization on Urban Drainage Systems ................................................................................................................................. 1403
H. D. Tran, S. Molavi, N. Muttil

Verification of PCCP Failure Margin and Risk Curves ........................................................................................................... 1413
Rasko P. Ojdrovic, Peter D. Nardini, Mehdi S. Zarghamee

Bending Behavior of Jointed Ductile Iron Pipelines ........................................................................................................... 1424
Yang Han, Junfeng Duan, Lingling Jia, Yanyan Qin

Pipe Criticality Analysis for Water Distribution Systems ........................................................................................................... 1430
K. R. Piratla, S. T. Ariaratnam

SUSTAINABILITY

NIST-VT Workshop on Aging Water Infrastructure ................................................................................................. 1442
Sunil Sinha, Marc Edwards, Stephanie Hooker, Chris McCowan

Silicone Coating Technology As a Solution to Combat Fouling in Water Transmission Piping ........................................... 1453
Charles Fisher, Kevin Morris

Green Stormwater Infrastructure Use to Control Combined Sewer Overflows ................................................................. 1463
John Phillips, Patty Buchanan
