A Word-Class Approach to Labeling PSCFG Rules for Machine Translation
   Andreas Zollmann and Stephan Vogel ...................................................... 1

Deciphering Foreign Language
   Sujith Ravi and Kevin Knight ................................................................. 12

Effective Use of Function Words for Rule Generalization in Forest-Based Translation
   Xianchao Wu, Takuya Matsuzaki and Jun’ichi Tsujii .................................. 22

Combining Morpheme-based Machine Translation with Post-processing Morpheme Prediction
   Ann Clifton and Anoop Sarkar ................................................................. 32

Evaluating the Impact of Coder Errors on Active Learning
   Ines Rehbein and Josef Ruppenhofer ....................................................... 43

A Fast and Accurate Method for Approximate String Search
   Ziqi Wang, Gu Xu, Hang Li and Ming Zhang ............................................ 52

Domain Adaptation by Constraining Inter-Domain Variability of Latent Feature Representation
   Ivan Titov ..................................................................................................... 62

Exact Decoding of Syntactic Translation Models through Lagrangian Relaxation
   Alexander M. Rush and Michael Collins .................................................... 72

Jigs and Lures: Associating Web Queries with Structured Entities
   Patrick Pantel and Ariel Fuxman ............................................................... 83

Semi-Supervised SimHash for Efficient Document Similarity Search
   Qixia Jiang and Maosong Sun ................................................................. 93

Joint Annotation of Search Queries
   Michael Bendersky, W. Bruce Croft and David A. Smith ............................ 102

Query Weighting for Ranking Model Adaptation
   Peng Cai, Wei Gao, Aoying Zhou and Kam-Fai Wong .............................. 112

Automatically Extracting Polarity-Bearing Topics for Cross-Domain Sentiment Classification
   Yulan He, Chenghua Lin and Harith Alani .................................................. 123

Using Multiple Sources to Construct a Sentiment Sensitive Thesaurus for Cross-Domain Sentiment Classification
   Danushka Bollegala, David Weir and John Carroll .................................... 132

Learning Word Vectors for Sentiment Analysis
   Andrew L. Maas, Raymond E. Daly, Peter T. Pham, Dan Huang, Andrew Y. Ng and Christopher Potts ................................................................. 142
Target-dependent Twitter Sentiment Classification
Long Jiang, Mo Yu, Ming Zhou, Xiaohua Liu and Tiejun Zhao

A Comprehensive Dictionary of Multiword Expressions
Kosho Shudo, Akira Kurahone and Toshifumi Tanabe

Multi-Modal Annotation of Quest Games in Second Life
Sharon Gower Small, Jennifer Strommer-Galley and Tomek Strzalkowski

A New Dataset and Method for Automatically Grading ESOL Texts
Helen Yannakoudakis, Ted Briscoe and Ben Medlock

Collecting Highly Parallel Data for Paraphrase Evaluation
David Chen and William Dolan

A Large Scale Distributed Syntactic, Semantic and Lexical Language Model for Machine Translation
Ming Tan, Wenli Zhou, Lei Zheng and Shaojun Wang

Goodness: A Method for Measuring Machine Translation Confidence
Nguyen Bach, Fei Huang and Yaser Al-Onaizan

MEANT: An inexpensive, high-accuracy, semi-automatic metric for evaluating translation utility based on semantic roles
Chi-kiu Lo and Dekai Wu

An exponential translation model for target language morphology
Michael Subotin

Bayesian Inference for Zodiac and Other Homophonic Ciphers
Sujith Ravi and Kevin Knight

Interactive Topic Modeling
Yuening Hu, Jordan Boyd-Graber and Brianna Satinoff

Faster and Smaller N-Gram Language Models
Adam Pauls and Dan Klein

Learning to Win by Reading Manuals in a Monte-Carlo Framework
S.R.K Branavan, David Silver and Regina Barzilay

Creative Language Retrieval: A Robust Hybrid of Information Retrieval and Linguistic Creativity
Tony Veale

Local Histograms of Character N-grams for Authorship Attribution
Hugo Jair Escalante, Thamar Solorio and Manuel Montes-y-Gomez

Word Maturity: Computational Modeling of Word Knowledge
Kirill Kireyev and Thomas K Landauer
