# TABLE OF CONTENTS

## VOLUME I

**Heavy Oil and Extra Heavy Oil Production by Big Casing/Tubing and ESP**

Hongan Dou, Yuwen Chang .......................... 1

**Application of Multi-point Temperature and Pressure Monitoring Technology in SAGD ProductionWells**

Xie Wenyuan, Liu Dezhu, Zhao Peng, Yang Zhixiang, Zhang Fuxing .......................... 13

**Super Heavy Oil SAGD Pilot Test in Block Shu1 of Liaohe Oilfield**

Sun Shouguo, Peng Songliang, Zhou Liguo, Jiang Hua .......................... 18

**Evaluation of SF Injection- Production Systems for Heavy Oil in Mid-Deep Formations in Block Qi40 of Liaohe Oilfield**

Liu Dezhu, An Jiuquan, Zhou Liguo, Zhang Lina .......................... 24

**Research and Application on Development of Thin and Susceptible Heavy Oil Reservoir in Wangzhuang Oilfield**

Zhu Guolin, Chen Xinmin, Liu Linbo, Zhou Yisheng .......................... 31

**Research on CO2 Assisted Extra Heavy Oil Recovery Technology**

**High-temperature Plug Formation with Industrial Waste during Steam Injection Stimulation of Heavy Oil in China’s Henan Oilfield**

W. Zhang, C. Zhao, X. Wang, H. Cheng, Z. Pan .......................... 44

**Study on Effect of Flow Conduit Types on Well Water Cut in Tahe Heavy Oil Carbonate Reservoir**

Zhongchun Liu, Yulin Ren, Xiangchun Yuan, Chengyuan Lv, Jianglong Li, Zhongliang Tan, Ming Luo .......................... 50

**Researches on Conversion of Recovery Methods for Heavy Oil Reservoirs in Liaohe Oilfield**

Zhong Guan, Yuhong Fu, Pingee Yang, X. Wang, Yanzi Xu .......................... 58

**A New Heat Sensitive Gel for Profile Control in Steam Floods: Laboratory Study and Field Trial**

Cao Yaping, Wang Qian, Li Mu, Hu Jianhua, Su Ye .......................... 65

**High Temperature Optical Fiber Temperature and Pressure Monitoring Technique for SAGD**

Li Jia, Changlu Hu .......................... 72

**Laboratory Research on Ploymer Flooding for SZ36-1 Offshore Heavy Oilfield**

Sun Shouguo .......................... 79

**Drilling Technology For Fiszbone Wells In Shallow Heavy Oil Field**

Fan Zhiguo, Zhao Ziren, Li Hongyan, Wan Jianglu .......................... 86

**Geochemical Based Proxies for Assessing In-Situ Processing of Heavy Oils and Oil Sands**

H. Huang, Tamer Koksalan, Barry Bennett, Jennifer Adams, S. Larter .......................... 90

**Structural Description of Aromatic Core in Residue Fractions**

Hui-Cheng Zhang, Wan-Fu Sun, Xiang-Chen Fang, Ming-Hua Guan .......................... 103

**Delayed Coking for Refractory Feedstock Processing**

Haiping Shen, Zhibin Liu, Jun Long .......................... 109

**Study on FRET Ebullated-Bed Hydrotreating**

Tao Yang, Li Jia, Changlu Hu .......................... 114

**The Study on the Origin of H2S in the Steam Injection Heavy Oil Blocks**

Liu Qicheng, Wu Tuo, Yang Junyin, Huang Yi .......................... 119

**Drilling Fluids Engineering to Drill Extra-heavy Oil Reservoir on the Orinoco Oil Belt, Eastern Venezuela**

R. Pino, W. Gonzalez .......................... 127

**Funding the Heavy Oil Sector’s Innovation – Maximizing Canada’s R&D Tax Credit**

G.S. Hill, M. Bernard, S. Cheung .......................... 133

**More than 200 Multilateral Wells Drilled in the Faja Del Orinoco Extra-Heavy Oil Reservoir**

Steven R. Fipke .......................... 137

**Naphthenic Acid Removal by Catalytic Decarboxylation on Alkaline Earth Oxide Catalysts**

L. Dong, H. Yang, P. Rahimi, S. Ng, O. Omotoso, J. Chen, Z. Ring .......................... 148

**Heavy Oil Cementing Best Practices for Long-Lasting Zonal Isolation**

F. Tahmourpour, J. Griffith .......................... 152

**Combining InSAR and GPS for Improved Surface Deformation Monitoring**

E. Davis, S. Marsic, W. Roadarmell .......................... 158

**Experiences and Best Practices in the use of PCP’s in Orinoco Belt Carabobo Area, Venezuela**

Foamy Oil Experiments Monitored by Computed Tomography Scanning .................................................. 173
   E. Kowalcowski, L. Rennan, K. Solbakken, E. Gilje, K. Meltuus, J.K. Ringen
Profitability and Technical Efficiency Analysis of Combined Steam Flooding and Horizontal Wells for a Relatively Thin Sand Reservoir in the Orinoco Belt in Venezuela ........................................... 185
   J. J. Castillo, J. Buitrago
Prediction of Solubility of Hydrogen, Methane and Ethane in Heavy Oils ................................................. 190
   M.R. Riazi, Y.A. Roomi
Investigation of Toe-to-Heel Steam Flooding (TTHSF) for Heavy Oil Recovery ......................................... 196
   A.S. Bagci, M.H. Salisu, E. Mackay
Heat Integration and Energy Optimization in SAGD Surface Facilities ..................................................... 207
   Naryana Murthy Nadella
Extra Heavy Oil pre-Dehydration Process Development ............................................................................. 216
   Noak Christine, Dalmazzzone Christine, Glenat Philippe, Pichot Damien
Regional Geologic Framework, Depositional Models and Resource Estimates of the Oil Sands of Alberta, Canada ............................................................................................................................... 224
   F.J. Hein, R.A. Marsh
Preliminary Results of Enhanced Heavy Oil Recovery by CO2 Cyclic Injection ......................................... 233
   R. Shi, J. Schnitzler, A. Kantzas
Design and Installation of a High-Pressure 3D Physical Model for Evaluation of Solvent Vapor Extraction Processes ........................................................................................................................................ 243
Integration of Hydroconversion Upgrader Into Refinery for Bottoms and Crude Oil Quality Upgrading – Case Study .......................................................................................................................... 255
   J. K. Ruyan
Using CT Scanning to Study 3-D VAPEX Process ......................................................................................... 262
   G.Q. Wu, A. Kantzas
Influence of Modifiers on the Quality of Deasphalted Oil Obtained from Bitumen in Solvent Deasphalting ........................................................................................................................................ 275
   D. Seth, S. Kieser, T.J.W. De Bruijn
Improving Athabasca Bitumen Development Economics through Integration with HTL Upgrading ............... 285
   Ed Koska, Joe Kuhach, Ed Veith
In Situ Upgrading Potential of the CAPRITM Process ................................................................................. 297
   M. Greyes, C. Ayasse, A. T. Turia
Relationship Between Dehydration and Hydrocarbon Losses for Various Chemical Applications ................. 311
   X. Yang
All Metal PCP Field Trial Update ................................................................................................................. 319
   A. Damnjanovic, S. Jahn, G. Mitskopoulos, L. Seince
Water Production in Extra Heavy Oil Environment: Controlling the Risks, Optimizing the Production .................................................................................................................................................. 326
   M. Inizan, Y. Alves, E. Cermeño, E. Draoui, Y. Gamez
Utilization of Near Bit Reamer Technology to Simultaneously Manage Lost Circulation and Increase ROP in Heavy Oil Drilling .................................................................................................. 337
   R. Bews
The Origin of Matrix and Fracture Mega-Porosity in a Carbonate Bitumen Reservoir, Grosmont Formation, Saleski, Alberta ...................................................................................................................... 342
   J. J. Castillo, J. Buitrago, K.N. Wilde, M.E. Connelly
Precise Ground Movement Monitoring with Satellite Radar Imagery .......................................................... 353
   B. Kampes, M. Van Der Kooiij
Measurement of CO2 Diffusivity in Extra Heavy Oil Saturated Sands: A New Mathematical Modeling Approach ........................................................................................................................................ 361
   R. Kharrat, H. Rahnema, S.M. Ghaderi, M.H. Ghazanfari
SW-SAGD Pilot Project, in the Well MFB-617, TL Sands, MFB-15 Reservoir, Bare Field, Eastern Basin of Venezuela ........................................................................................................................................ 372
Design of In Situ Combustion Process by Using Experimental Data ............................................................. 379
   S. Razaghi, R. Kharrat, S. Vossoughi
Strategies to Improve SAGD Performance in Top Water Reservoirs .............................................................. 390
   L.V. Mejia-Caña, S.J. Spjolyst, E. Gilje, E. Ivrrud, J. Alvestad
Value of NMR Logging for Heavy Oil Characterization .............................................................................. 399
   S. Chen, J. Chen, D. Georgi, B. Sun
Oilsands Hydrotransport Process Control Using Computational Fluid Dynamics ........................................... 415
   O. Garcia, C. Diaz-Goano, F. Forbes
Influence of Reservoir Parameters and Steam Rate on Sagd Process in a Reservoir with Gas Cap .................................................. 421
J.J.M. Barilias, T.F. Dutra Jr., W. Mata
Zero Emissions & Water Friendly SAGD Projects ........................................................………………………………………………………… 427
R. Bernar, A. Fischer, R. Lennox, P. Brunelle, S. Krennyak, W. Lee, S. Sim
High Resolution Geomodeling, Ranking and Flow Simulation at SAGD Pad Scale ................................................................. 436
C.T. Neufeld, C.V. Deutsch, C. Palmgren, T.B. Boyle
Inhibition of Biogenic Sulfide Production through Indigenous Bacteria and Amended Nitrate in Western Canadian Heavy Oil Fields .......................................................... 445
Q. Tan, G.H. Huang, H. Yu, G.C. Li, Y.P. Cui
Mathematical Modeling of Viscbreaking Process ................................................................................................................................. 453
A. Salena, C. Diaz-Goa, H. Dettman
Successful Field Application in Continuous DTS Monitoring under Harsh Environment of SAGD Wells Using Improvised Optical Fiber Technology – Case Study from Canada .......................................................... 461
J. Kaura, J. Sierra
Thermal Developments in Petroleum Development Oman's Southern Fields ........................................................................................................... 472
Elaine Leith, Apollo Kok, John Van Wunnik, Vincent Van Engelen, Saleh Jabri, Farid Nabavi, Ken Portanger, Jeroen Regtien

Challenging Conventional Wisdom, Waterflooding Experience on Heavy Oil Fields in Southern Oman .......................................................... 480
Salim Hamed Al Sikaiti, Jeroen Regtien
A New On-site Partial Upgrading Technology of Extra Heavy Crude Oils with High Temperature and High Pressure Water ................................................................. 492
Y. Takeuchi, N. Watanabe, D. Miyamoto, A. Kishita, K. Tohji
Heavy Crude Oil Production Increase Through the Use of a Novel Flow Improver Product: A Case Study ................................................................. 497
R.L. Johnston, P.A. Lauzon, J.D. Pierce
Direct Current Stimulation for Heavy Oil Production ................................................................................................................................. 508
J.K. Wittle, D.G. Hill, G.V. Chilingar
Job Design and Cement System to Contain Steam and Improve Heavy Oil Recovery ....................................................................................... 526
K. Ravi, B. Hunter, D. Kalakhofsky

The Application Of Non-Seismic Geophysics To The Direct Imaging Of Oil Sands And Other Shallow Hydrocarbon Deposits ....................................................................... 534
J.J. Forsyth, B. Feramans
Husky Tucker Lake SAGD Liner Design, Fabrication and Installation Evaluation ....................................................................................... 541
J.X. Xie
A Study of Strain-Based Design Criteria for Thermal Well Casings ........................................................................................................... 548
J. Xie

VOLUME 2

Design Considerations for Wire Wrapped Screens in SAGD Well Application ....................................................................................... 557
J. Xie, T.A. Zahacy, C. Fan, C.M. Matthews
Theoretical Modeling for Optimizing Horizontal Production Well Placement in Thermal Recovery ........................................................................... 566
D.J. Bourgeois
Modeling of Phase Equilibria and Viscosity of Heavy Oils ................................................................................................................................. 575
Julian Y. Zuo, Dan D. Zhang, Jefferson Creek
Waste Water Treatment Options for SAGD Oil Production Facilities ........................................................................................................... 581
Paul Bauman, P. Geoph
Coiled Gas Lift design installing at the well PM02, Morichal District, Venezuela ....................................................................................... 596
J.C. Row, S. Marfissi, F. Campos, E. Lozada
A Case Study of a New Technique for Drilling SAGD Twin Wells in Heavy Oil Reservoirs ........................................................................... 602
Supercritical Fluid Extraction: A Non-aqueous Technology for the Extraction of Bitumen from Oil Sands ........................................................................... 612
S.E. Guigard, W.H. Silver
Case Histories for Heavy Oil Recovery in Naturally Fractured Carbonate Reservoirs in the Middle East ........................................................................... 618
A.S. Bagei, A. Shafiei, M.B. Dusseau
When Is Subcool Applicable for SAGD Monitoring
D. Rudenko, V. Shako, D.C. Bexte

Is Your Cement Sheath Stressed?
G.G. De Bruijn, D.C. Bexte

Bitumen Production Potential from the Wabasca Grand Rapids Formation Deposit
M.B. Dusseault, R.P. Oskui, B. Farhad, I. Al Sammak, A. Al Naqi

Production Technologies for Lower Fars HO, Kuwait
J.A. Peterson, M.E. Connelly, N.R. Edmunds

Orinoco Heavy Oil Belt
Lisbel Perdomo, Carlos Perez Damas, Edgar Fernandez Rincon

Passive Microseismic Monitoring: A Real-Time Tool for Assessing the Heavy Oil Reservoir Response and Facility Performance
I. Weir-Jones, Bohdan Nedilko

New Developments in Orinoco Oil Belt Projects Reflect a Positive Effect on the Areas Reserves
T. Villarreal

Oil Sands Breakthrough using a Novel Reverse Emulsion Breaker for SAGD Fluid Separation
Alberto E. Franco-Fuenmayor, Michael P. Squicciarini, Brian R. Young, Frederick J. Morrison, Wes J. Sahai

Gravity Stable Combustion Processes for Athabasca Oil Sand Reservoirs
G.B. Lin, R. Coates, J. Ivory

Multiphase Metering: Importance of Fluid Property Knowledge in SAGD Operations
Daniel Hompoth, Bruno G. Pinguet, Elsie Guerra

Performance of Combination of a Venturi and Nuclear Fraction Meter in SAGD Production Operations
Daniel Hompoth, Nathan Khun, Bruno G. Pinguet, Elsie Guerra

Worm Hole Predictor Observation with Acoustic Data
G. Drebit, M. Tescuba

SAGD Production Optimization: Combination of ESP and Multiphase Metering
Bruno G. Pinguet, Elsie Guerra, Colin Drever

Integrated Reservoir Characterization and Oil in Place Estimation for Ayacucho Area, Orinoco Oil Belt, Venezuela
E. Hernandez, L. Beza, A. Cadena

Investigation of Mechanisms Involved in Generation of Foamy Oil Flow
S. Xu, B. Maini

Subsurface Optimization Yielding Maximum Long-Term Production
Glenda Wylie, Jacob Thomas

Stability Analysis of Steam Fingering in Steam-Assisted Gravity Drainage
D.R. Gotawala, I. Gates

The Interpretation and Application of Horizontal Well Logs in Heavy Oil Reservoir
Ma Longxin, Zhang Shancheng, Xu Baojun, Han Guoqing

Centrifuge Options for Production of “Dry Stackable Tailings” in Surface Mined Oil Sands Tailings Management
X. Yang, I. Gates

Water Use in Bitumen Production: Tailings Management in Surface Mined Oil Sands
R.J. Mikula, V.A. Munoz, O. Omotoso

Estimating Technically Recoverable Reserves in the Faja Petrolifera del Orinoco - FPO
M.B. Dusseault, J.R. Barrios, Cesar Guerra

History Match of an Athabasca Bitumen Combustion Tube Experiment
X. Yang, I. Gates

Viscosity Determination of Heavy Oil and Bitumen: Cautions and Solutions

Economic Benefits of Downhole Sand Treatment in CHOPS Operations
B. T. Wagg, Y. Fang

Results of the Drilling Cuttings Reuse and Recycling Program of PetroPiar, S.A. (Formerly Petrolera Ameriven, S.A.)
A. Arrocha, G. Ellis, R. Camacho, A. Crespo, C. Jimenez, F. Morales

Feasibility Study of In-Situ Combustion (ISC) in a 2-D Laboratory-Scale Fractured System Using a Thermal Reservoir Simulator
S.M. Fatemi, R. Kharrat, S. Vossoughi

The Impact of Steam Placement Control on SAGD Performance: A Numerical Study from the Orinoco Heavy Oil Belt
Lisbel Perdomo, Carlos Perez Damas, Edgar Fernandez Rincon

Production Technologies for Lower Fars HO, Kuwait
M.B. Dusseault, R.P. Oskui, B. Farhad, I. Al Sammak, A. Al Naqi

Bitumen Production Potential from the Wabasca Grand Rapids Formation Deposit
J.A. Peterson, M.E. Connelly, N.R. Edmunds

Is Your Cement Sheath Stressed?
G.G. De Bruijn, D.C. Bexte

When Is Subcool Applicable for SAGD Monitoring
D. Rudenko, V. Shako, D. H-S. Law
Applicability of SAGD in Eastern Venezuela Reservoirs
José Antonio Piña, José Luis Bashbush, Edgar Alexander Fernandez
910

PetroBeam Process for Heavy Oil Upgrading
Yuriy A. Zaikin, Raissa F. Zaikina
920

Integrated Rock Properties and Fluid Distribution Determination Using Core and Log Data, Oficina
Formation, Ayacucho Area, Orinoco Heavy Oil Belt
F. Useche, C. Bejarano, A. Didanloo, S. Shahbazian
928

Effects of Well Placement using Multi-Segmented Wells in a Full Field Thermal Model for SAGD:
Athabasca Oil Sands
F. Akram
942

Alberta’s Bitumen Carbonate Reservoirs – Moving Forward with Advanced R&D
J.M. Alvarez, R. Sawatzky, L.M. Forster, R. Coates
951

Joint Implementation of Vapour Extraction — Heavy Oil Recovery Process
B.J. Krsted, K.D. Knorr, C.K. Preston, K. Worth, R. Sawatzky
965

Enhancing Heavy Oil Recovery Using Foam Injection in Applications to Cyclic Steam Stimulation
Eddy Isaacs, Jian-Yang Yuan
970

Improved Cementing Practice Prevents Gas Migration and Surface Casing Vent Flow
D.C. Bexte, B. Etten, E. Fouillard, M. Willis, G.G. De Bruijn
974

SAGD or Cold Production. A Case of Study for an Orinoco Heavy Oil Field
C.E. Granado, A.J. Velasquez, A.J. Serna, J.R. Barrios, A. Zambrano
979

Identification of Three-Phase Flow Patterns of Heavy Oil from Pressure Drop and Flow Rate Data
F. Pacheco, A.C. Bannwart, J.R.P. Mendes, A.B.S. Serapião
995

Beyond Dibit and Synbit
D. Thomas, G.A. Constable, K.H. Oehr
1000

Oil Sands Industry’s Options to Cope with Reduced Greenhouse Gas Limits plus Tightening Natural
Gas Supplies
Paul E Koppel, Jason Pelly, Peter H. Johnson
1009

Designer Water Enabled Polymer Flooding
Michael Curole, Robert Chin, Peter Doe
1016

Improved Heavy Oil Recovery by CO2 Injection Augmented with Chemicals
Y.P. Zhang, S.G. Sayegh, S. Huang
1029

Operability and Maintainability of In-Pit Oil Sands Bitumen Production Systems
M.G. Lipsett, M-J. Zuo, A. Scaffo-Migliaro
1042

A Breath of Fresh Air – Encana’s Gas Displacement Solution to the Gas Over Bitumen Issue
Larry W. Freeman, Ben I. Nzekwu, John D.M. Belgrave
1048

Metal PCP Field Trial Pushes Up Pumping Window for Heavy Oil Hot Production: Joslyn Field Case
Jean-Louis Beauquin, Felix Ndinemenu, Gilles Chatier, Lionel Lemay, L. Seince, S. Jahn
1059

Potential Applications of Nanotechnology to Heavy Oil Upgrading
M.R. Gray
1066

Implementing CHOPS in the Karazhanbas Heavy Oil Field, Kazakhstan
Patrick M. Collins, M.B. Dusseauelt, Darcy Dorscher, Ed Kueber
1071

Deliberate Sand Production from Heavy Oil Reservoirs: Potent Activation of Both Solution Gas and
Aquifer Drives
E.S. Vittoratos, L. Zhang, E. Turek, C.C. West
1088

The Use of Water-Mapping Technology to Increase the Productivity and Minimize the Risks of
Oilfield Flooding Practices
J.R. Montgomery, V.O. Kofed, P.B. Rollins
1094

Multidisciplinary Work in Petrocedeño: The Key for Success in a Challenging Extra Heavy Oil
Development
Y. Gamez, P. Germain, F. Maes, P. Pouget
1100

Partial Upgrading by Solvent Deasphalting
Luis C. Luzardo
1106

Author Index
