<tbody>
<tr>
<td>Orthogonal Bases Used for Feed Forward Control of Wind Turbines</td>
<td>1</td>
</tr>
<tr>
<td>Peter Fogh Odgaard, Jakob Stoustrup</td>
<td></td>
</tr>
<tr>
<td>Block Design of Robust Control Systems by Direct Lyapunov Method</td>
<td>7</td>
</tr>
<tr>
<td>Mikhail Medvedev, Viacheslav Phikhopov</td>
<td></td>
</tr>
<tr>
<td>Hybrid Control of Container Cranes</td>
<td>13</td>
</tr>
<tr>
<td>Hans Hellendoorn, Steven Molder, Bart De Schutter</td>
<td></td>
</tr>
<tr>
<td>A Matching Pursuit Algorithm Approach to Chaser-Target Formation Flying Problems with Linear Time-Invariant Dynamics</td>
<td>19</td>
</tr>
<tr>
<td>Paolo Massioni, Finn Andersen, Michel Verhaeugen</td>
<td></td>
</tr>
<tr>
<td>State Synchronization of Networked Euler-Lagrange Systems with Switching Communication Topologies Subject to Actuator Faults</td>
<td>25</td>
</tr>
<tr>
<td>Ali Reza Mehrabian, Siamak Tafazoli, Khashayar Khorasani</td>
<td></td>
</tr>
<tr>
<td>Adaptive Observer-Based Switched Control for Electropneumatic Clutch Actuator with Position Sensor</td>
<td>33</td>
</tr>
<tr>
<td>Hise Langjord, Glenn-Ole Kaana, Ter Arne Johansen</td>
<td></td>
</tr>
<tr>
<td>Output Feedback Stabilization of Time-Delay Switched Linear Systems</td>
<td>39</td>
</tr>
<tr>
<td>Luca Galbusera, Paolo Bolzern, Grace S. Deaecto, Jose C. Geromel</td>
<td></td>
</tr>
<tr>
<td>On the Determination of Cooperative Risk-Value Aware Strategies for Linear Stochastic Multi-Agent Systems</td>
<td>45</td>
</tr>
<tr>
<td>Khanh D. Pham</td>
<td></td>
</tr>
<tr>
<td>Decentralized Control Structure for Linear Stable and Unstable Plants Based on the Output Controllability Analysis</td>
<td>3</td>
</tr>
<tr>
<td>Samim Zaram, Assaad Zaram</td>
<td>53</td>
</tr>
<tr>
<td>Improving the Stability Conditions of TS Fuzzy Systems with Fuzzy Lyapunov Functions</td>
<td>59</td>
</tr>
<tr>
<td>Flavio A. Faria, Geraldo Nunes Silva, Vilma A. Oliveira, Rodrigo Cardim</td>
<td></td>
</tr>
<tr>
<td>Model Predictive Control of Time-Delay Switched Linear Systems</td>
<td>65</td>
</tr>
<tr>
<td>Hyojeong Park, Stefano Di Cairano, Ilya V. Kolmanovsik</td>
<td></td>
</tr>
<tr>
<td>Integral Partitioning Approach to Stability Analysis and Stabilization of Distributed Time Delay Systems</td>
<td>71</td>
</tr>
<tr>
<td>Zhiguo Feng, James Lam</td>
<td></td>
</tr>
<tr>
<td>System Dynamics and Adaptive Control of MEMS Gyroscope Sensor</td>
<td>77</td>
</tr>
<tr>
<td>Juntao Fei, Weili Dai, Min Gang Hua, Yuncan Xue</td>
<td></td>
</tr>
<tr>
<td>Stability Analysis of Impulsive Nonlinear Quadratic Systems</td>
<td>83</td>
</tr>
<tr>
<td>Francesco Amato, Roberto Ambrusino, Giannaria De Tommasi, Alessio Merola</td>
<td></td>
</tr>
<tr>
<td>Cancellation of Unknown Harmonic Disturbance for Nonlinear System with Input Delay</td>
<td>89</td>
</tr>
<tr>
<td>Alexey Bobtsov, Anton Pyrkin, Artem Kremlev, Stanislav Aranovskiy</td>
<td></td>
</tr>
<tr>
<td>Robust Output Stabilization of Time-Delay Nonlinear System</td>
<td>95</td>
</tr>
<tr>
<td>Alexey Bobtsov, Anton Pyrkin, Maxim Faronov, Nikolay Nikolaev, Olga Silva</td>
<td></td>
</tr>
<tr>
<td>A Distributed Motion Planning and Distributed Filtering Approach for Target Tracking in Mobile Sensor</td>
<td>100</td>
</tr>
<tr>
<td>Gerasimos Rigatos</td>
<td></td>
</tr>
<tr>
<td>FPGA Implementation of Spiking Neural Networks Supported by a Software Design Environment</td>
<td>109</td>
</tr>
<tr>
<td>Alfredo Rosado-Munoz, A. Fijakowski, Manuel Bataller-Monpean, Juan Fco. Guerrero-Martinez</td>
<td></td>
</tr>
<tr>
<td>Gain-Scheduled H∞ controllers being Derivative-Free of Scheduling Parameters via Parameter-Dependent Lyapunov Functions</td>
<td>115</td>
</tr>
<tr>
<td>Masayuki Sato, Dimitri Peaucelle</td>
<td></td>
</tr>
<tr>
<td>Moment and SDP Relaxation Techniques for Smooth Approximations of Problems Involving Nonlinear Differential Equations</td>
<td>121</td>
</tr>
<tr>
<td>Martin Mevissen, Jean B. Lasserre, Didier Henrion</td>
<td></td>
</tr>
<tr>
<td>Stability Analysis of Switched Systems Using Lyapunov-Krasovskii Functions</td>
<td>127</td>
</tr>
<tr>
<td>Sina Yamec Caliskan, Hitay Ozbay, Silviu-Iulian Niculescu</td>
<td></td>
</tr>
<tr>
<td>Extending the Relay Feedback Experiment</td>
<td>132</td>
</tr>
<tr>
<td>Kristian Soltész, Tore Heggland</td>
<td></td>
</tr>
<tr>
<td>On Reset Control Systems with Discrete-Time Triggering Conditions</td>
<td>138</td>
</tr>
<tr>
<td>Yaqian Guo, Weihua Gui, Chunhua Yang, Lihua Xie</td>
<td></td>
</tr>
<tr>
<td>Dynamic Integral Sliding Mode Control of Nonlinear SISO Systems with States Dependent Matched and Mismatched Uncertainties</td>
<td>144</td>
</tr>
<tr>
<td>Quadrat Khan, Aamer Iqbal Bhatti, Qudeer Ahmed</td>
<td></td>
</tr>
<tr>
<td>Lumpining the States of a Finite Markov Chain through Stochastic Factorization</td>
<td>150</td>
</tr>
<tr>
<td>Andrea M. Barrero, Marcelo Fragaoso</td>
<td></td>
</tr>
<tr>
<td>Anisotropic Norm Bounded Real Lemma for Linear Discrete Time Varying Systems</td>
<td>156</td>
</tr>
<tr>
<td>Eugene Maximov, A. P. Kurdyukov, Igor Vladimirov</td>
<td></td>
</tr>
<tr>
<td>Fault Detection and Identification: Serial Form versus Simultaneous Form</td>
<td>162</td>
</tr>
<tr>
<td>Zhibo Zhu, Zhiqiang Ge, Zhi-Huan Song, Li Zhao</td>
<td></td>
</tr>
<tr>
<td>System Identification Technique Application to Revealing Human-Operator Skills</td>
<td>168</td>
</tr>
<tr>
<td>Kirill Chernyshov</td>
<td></td>
</tr>
</tbody>
</table>
Stochastic Oscillations in Oilwell Drillstrings: Distributed Parameter and Neutral Type Retarded Model Approaches .................................................................................................................................................. 174

On-off Control Design of a Class of Linear Systems via Lipschitz Switching Surfaces .......................... 180
Xin Hua, Yu Yao, Baosheng Yang, Kai Zheng

Functional Metamodels for Discrete Event Systems ............................................................................. 186
Laurent Thiry

Making Parametric Hammerstein System Identification a Linear Problem ............................................ 192
Es-Wei Bai, Zhijun Cai

An Explicit Formula for Computation of the State Coordinates for Nonlinear I/O Equation.................. 198
Juri Belikov, Ute Kotta, Marius Tonsor

Nested Switching Control Design for Fast PZT Actuated Nanopositioning ........................................ 204
Jinchuan Zheng, Minyue Fu

Flow Estimation of Boundary Layers Using Wall Shear Information ..................................................... 210
Bryn E. Jones, Eric C. Kerrigan, Jonathan P. Morrison, Tamer A. Zaki

The Proximal Point Approach to Optimal Control of Affine Switched Systems .................................. 216
Yadom Ashmakovsky, Michael V. Basin

Multirate Asynchronous State and Parameter Estimation for Centrifugal Compressors ....................... 222
Yuesheng Yang, Markus Hogberg

An Adaptive PI Nonlinear Controller Applied to Slug Control Problem in Procedures for Petroleum Exploration and Production.................................................................................................................................................. 228
Adhemar De Barros Fontes, Ramon Almeida Reis Soaza

Developing Soft Sensors Based on Orthogonal Projections to Latent Structures with Kernel Algorithm .................................................................................................................................................. 234
Jiawei Liu, David S. H. Wong

Models of Reflexive Collective Behaviour ............................................................................................. 240
Dmitry Novikov

Finite-Time and Asymptotic Stabilization of Car-Like Kinematics with Amplitude-Limited Control Input .................................................................................................................................................. 246
Maciej Michalek, Krzysztof R. Kozlowski

A Very Relaxed Control Law for Bearing-Only Triangular Formation Control ........................................ 252
Adrian Bishop

The Lyapunov Function Design for the Stability Analysis of the "Italian Version" of the Second Order Sliding Mode Controllers .................................................................................................................................................. 260
Andrey Polyakov, Alexander S. Poznyak

Further Stability Criteria for Time-Delay Systems with Interval Time-Varying Delays ......................... 266
M. N. Alpaslan Parlakci, Ibrahim Beklan Kucukakmiraal

E-Field Sensors and Sensor-Based Control Strategies for M/M Safe Cooperation ................................ 272
Giuseppe Conte, David Scarradazz, Matteo Rossetti

Robust Performance Design of a State Predictive Controller on Parameter Space ................................ 278
Madoni Saeki, Mohamed Assi

An Integrated Systems Approach for Solving Multi-Objective Scheduling Problems and Advanced Control of an Experimental Hot-Rolling Mill .................................................................................................................................................. 284
Sidahmed Gaffour, Mahdi Mahfouj, Jun Chen, George Papanoutsos

A New Frequency Domain System Identification Method ......................................................................... 290
Alexander A. Stoitky

A Geometric Approach to Zero Cancellation in Linear Multivariable Systems with Direct Feedthrough Terms .................................................................................................................................................. 296
Giovanni Marro, Elena Zattoni

Block-Oriented Nonlinear System Identification by Stochastic Approximation ...................................... 302
Han-Fu Chen, Xing-Min Chen

Robust Stability of Reset Control Systems with Uncertain Output Matrices ........................................... 308
Yuyuan Guo, Weihua Gui, Chunhua Yang

State Estimation Via l1-Norm Approximation: Application to Inertial Navigation ................................ 312
Pavel A. Akimov, Alexander Matasov

On the Perturbation of Homogeneous LTI Descriptor Differential Systems ............................................. 318
Athanassios Pantelous, Athanasios Karageorgos, Grigorios Kalogeropoulos

Bayesian Statistical Monitoring of Complex Semiconductor Manufacturing Batch Processes ............ 324
Zhiquang Ge, Zhi-Huan Song, Junhua Zheng, Huaping Dai

Error Dynamics-Based Lyapunov Guidance Law for Stationary Target Observation ........................... 330
Mingwu Kim, Youhan Kim

Fault-Tolerant Control for LPV Systems Based on Fault Compensator ............................................... 336
Jee-Hun Park, Shun-Ichi Azuma, Toshiharu Sugie

Modeling and Optimization of a Grade Change for Multistage Polyethylene Reactors ....................... 342
Per-Ola Larsson, Johan Akesson, Staffan Haugwitz, Niklas Andersson

Notes on Sliding Mode Control of Two-Level Quantum Systems ......................................................... 348
Daoyi Dong, Ian R Petersen

Contour Following Using C2 PH Quintic Spline Curve Interpolators ...................................................... 354
Javad Jahampour, Mi-Cheng Tai, Mings-Yang Cheng, J-Han Liu

On Computing Budget Allocation for Finding the Simplest Good Enough Design .................................. 360
Qing-Shan Jia
Maximum-Volume Invariant Ellipsoid Approximating Attraction Domain in Stabilization Problem for Wheeled Robot

A. Varga

Stability of Economically-Oriented NMPC with Periodic Constraint

Rui Huang, Lorenz T. Biegler

Performance Information in Control of Model-Following Stochastic Systems

Khanh D. Pham

Optimal Control of a Multi-Energy District Boiler: A Case Study

Julien Eynard, S. Grien, Monique Pelle

Initializing Wiener-Hammerstein Models Based on Partitioning of the Best Linear Approximation

Jonas Sjoberg, Johan Schoukens

On Parametric Solution of Fault Detection Problems

On Attitude Synchronization of Multiple Rigid Bodies with Time Delays

Hanlei Wang, Yongchun Xie

Trajectory Tracking of Vision Based Robot Systems Using Piecewise Continuous Controllers and Observers

Haogang Yang, Christian Fassneger, Vladan Koncar, Nikola D. Christov

Robotic Stretcher for SMA Patient: Preliminary Tests on Controllability and Safety

Taisuke Sakaki, Takayuki Irie, Ryuta Kurogi, Takahiro Koga, Kuniharu Ushijima, Mihoko Sakuragi, Keiichi Miyaynaga

Geometric Insight and Structure Algorithms for Unknown-State, Unknown-Input Reconstruction in Linear Multivariable Systems

Giovanni Marro, Elena Zattoni, Dennis S. Bernstein

Weight Optimization for Maximizing Robust Performance in H∞ Loop-Shaping Design

Mobodaji Osilaga, Sourav Patra, Alexandre Lancon

Necessary and Sufficient Conditions for Stability of Kalman Filtering with Markovian Packet Losses

Keyou You, Minyue Fu, Lihua Xie

On Boolean Control Networks -- an Algebraic Approach

Daizhan Cheng, Hongsheng Qi, Yin Zhao

Disturbance Decoupling Via Dynamic Output Feedback for Switched Linear Systems

Carlo Bruni, Giorgio Koch, Federico Papa

On-Line Parameter Tuning of Model Predictive Control

Kvetoslav Belda

Crane Scheduling of Steel-Making and Continuous Casting Process Using the Mixed-Timed Petri Net Modelling

Via CPLEX Optimization

Liangliang Sun, Wei Liu, Tianyou Chai, Hong Wang, Binglin Zheng

An Effective Approach for the Scheduling of Steel-Making and Continuous Casting System with Stochastic Processing Requirements

Sun Liangliang, Tianyou Chai, Wei Liu, Peter B. Luh, Binglin Zheng

Robust Synchronization of Multiple Agents with Uncertain Dynamics

Kiyotugu Takahashi

Coordinated Control of Discrete Event Systems with Non-prefix-Closed Languages

Jan Komenda, Tomas Maasopas, Jan H. Van Schuppen

A Mamdani-Type Recurrent Interval Type-2 Fuzzy Neural Network for Identification of Dynamic Systems with Measurement Noise

Chia-Feng Juang, Ren-Bo Huang

Global Stabilization Control of Acrobat Based on Equivalent-Input-Disturbance Approach

Ancai Zhang, Jinhua She, Xuchi Lai, Min Wu

A General Method for Handling Disturbances on Utilities in the Process Industry

Anna Lindholm, Hampus Carlsson, Charlotte Johnsson

Adaptive System of Precision Control with a Reference Model

Vladislav Yu. Rothery, Victor Glumov, Victor Sukhanov

Driver Attention Warning System Based on a Fuzzy Representation of the Vehicle Model

Hamid Dahmani, M. Chadi, Abdelhamid Rabbi, Ahmed El Hajjaji

Robust Stable Cost Optimization in a Three Echelon Supply Chain Model

Darya Kastisian, Martin Mannigmann

On Energy Optimized Network Construction for Distributed Averaging in a Dynamic Environment

Ioannis Paschalidakis, Binbin Li

Recursive Variable Horizon Trajectory Control for Directional Drilling Using Elliptical Helixes

Neilkumal Panchal, Martyn Thomas Bayliss, James F. Whidborne

Coherent Quantum H∞ Control Via a Strict Bounded Real Quantum Controller

Hendra G. Harno, Ian R. Petersen

Finite Horizon H∞ Control for a Class of Linear Quantum Sampled-Data Measurement Systems: A Dynamic Game Approach

Aline Maadlouf, Ian R. Petersen

Assessment of the Airway Alterations by Means of a Fractal Ladder Network Model

Clara Ionescu, Andres Hernandez, Mihai Chiriita, Robin M. C. De Keyser

Robust Estimation of Temperature Field During Microwave Tempering under Unknown Dielectric Properties

Lionel Biollereaux, Mazen Alamir, Sebastien Curet, Olivier Rouaud, Pascal Bellemain

### On the Exact Solution of the Matrix Riccati Differential Equation
Lorenzo Ntogramatzidis, Augusto Ferrante

### On Feature Parameterization for EKF-Based Monocular SLAM
Simone Ceriani, Daniele Marzorati, Matteo Matteucci, Davide Migliore, Domenico G. Sorrenti

### On the Convergence Rate of the Leake-Liu Algorithm for Solving Hamilton-Jacobi-Bellman Equation
Wei-Tian Chen, Brian D. O. Anderson
A New Mathematical Model for Car Drivers with Spatial Preview .......................................................... 10206
Mukul Agarwal, Sanjoy K. Mitter

A Dynamic Model for Anaerobic Digestion of Microalgae ........................................................................ 10212
Francis Maitre, Olivier Bernard, Monique Ras, Laurent Lardon, Jean-Philippe Steyer

Control of a Parametrically Excited Crane .................................................................................................. 10218
Carlos Vazquez, Joaquin Collado

Adaptive Consensus for a Class of Uncertain Nonlinear Multi-Agent Dynamical Systems ......................... 10224
Lu Liu, Koji Tsumura, Shinya Hara

A Multi-Agent System Based on the Multi-Objective Simulated Annealing Algorithm for the Static Dial a Ride Problem ........................................................................................................... 10230
Issam Zidi, Kameel Zidi, Khaled Mezghouthi, Khaled Gherira

Developing a Capability Maturity Model for Enterprise Intelligence ......................................................... 10236
John Huffman, Lawrence Whitman

LMI Sliding Mode Control Applied to Power System Modeled As Infinite Bus Connected Generator ........... 10242
Juan-Mauricio Salamanca, Oscar Higuera Martinez

A Control and Communications Architecture for a Secure and Reconfigurable Power Distribution System: An Analysis and Case Study .......................................................................................................... 10249
Anthony Giacomoni, Massoud Amin, Bruce Wollenberg

Gaussian Based Classification with Application to the Iris Data Set ................................................................ 10256
H. J. Chang, Alessandro Astolfi

Passivity-Based Swinging up of a Pendulum .................................................................................................. 10262
Luis Alvarez-Icaza

Smart Grid as a Dynamical System of Complex Networks: A Framework for Enhanced Security ............. 10268
S. Massoud Amin, Anthony Giacomoni

A Nonlinear Control Design for Tracked Robots with Longitudinal Slip ...................................................... 10274
Juliano Issaqui, Juan F. Camino, Douglas Zampieri

Probabilistic Analysis on the V2G Power Capacity Regarding Frequency Regulation ................................ 10280
Sekyung Han, Soohee Han, Kaoru Sezaki

Parametric Model Reduction in the Loewner Framework .......................................................................... 10286
Sandra Lefebvre, Athanasios C. Antoulas, Antonio Cosmin Iosita

On the Absolute Stability Approach to Quantized H∞ Control .................................................................. 10292
He Kong, Bin Zhou

Integration of Substation Data ...................................................................................................................... 10298
Mladen Kuznencov

Data Based Design of PID Controllers for a Magnetic Levitation Experiment ........................................... 10304
Pavanarshitha Kallikuri, Lee H. Keel, Shankar P. Bhattacharyya

Distributed 8-Consensus in Directed Delayed Networks of Multi-Agents ...................................................... 10310
Jie Zhou, Quanjun Wu, Hua Zhang, Lan Xiang

Image Information Extraction Based on Spiking Neural Networks .............................................................. 10316
Xu Wang, Zhiquang Cao, Long Cheng, Chao Zhou, Min Tan, Zeng-Guang Hou

Processing Aortic and Pulmonary Artery Waveforms to Derive the Ventricle Time-Varying Elastance .......... 10322
David Stevenson, Christopher E. Hann, J. Geoffrey Chase, James A. Revie, Geoffrey M. Shaw, Thomas Desai, Bernard Lambermont, Alexandre Ghusyen, Philippe Küh, Stefan Heldmann

Vision-Based Tracking with Extended Kalman Filter .................................................................................... 10328
Satoshi Takahashi, T. Honda, H. Takauji, S. Kaneko

Generalized Robust Diagonasimality of Discrete Event Systems ................................................................. 10334
Lilian Kawakami Carvalho, Marcos Vicente Moreira, Joao Carlos Basilio

Time-Optimal Output Feedback Controller for Toxic Wastewater Treatment in a Fed-Batch Bioreactor .......... 10340
Alejandro Vargas, Jaime A. Moreno, Ismael Mendez

On the Control of Sludge Level and Underflow Concentration in Industrial Thickeners .............................. 10346
Juan Pablo Segovia, Daniel G. Sbarbaro

Quantization Scheme Design in Distributed Event-Triggered Networked Control Systems ......................... 10352
Yu Sun, Xiaofeng Wang

Multi-Frequency Technique for Frequency Response Measurement and its Application to Servo System with Friction ............................................................................................................................................ 10358
Ehsan Keikha, Abdullah Al Maman, Tong Heng Lee, Charanjit S. Bhatia

Development of a Clutch-Control-System for a Hybrid Electric Vehicle with One-Motor and Two-Clutch ........................................................................................................................................... 10364
Kazutaka Adachi, Hiroaki Ashizawa, Sachiyro Nomura, Yoshimasa Ochi

Utility-Side Voltage and PQ Control with Inverter-based Photovoltaic Systems ........................................... 10370
Fangxing Li, Sarineta Adhikari, Yan Xu, Huijuan Li, John Kueck, Isabelle Snyder, Thomas Barker, Ronald Hite

Smarter Settings-Free Algorithm for Fault Location on Transmission Lines .................................................. 10377
Zoran Radojevic, Gary Preston, Borko Cupic, Vladimir Terzija

Vibration Control of Semiconductor Wafer Transfer Robot by Building an Integrated Tool of Parameter Identification and Input Shaping ........................................................................................................ 10384
Wissam Arifov, Takahiro Yamashita, Kazuhiko Terashima, Youji Masui, Toru Saekei, Toshio Kamigaki, Hirotohhi Kawamura

Quad-Rotor Formation Control As an Interconnected System ...................................................................... 10391
Luis Garcia Delgado, Alejandro Diaz, Victor Santibanez, Miguel Llama

Architecture for Communication with a fidelity Criterion in Unknown Networks ........................................... 10397
Mukul Agarwal, Sanjoy K. Mitter
Distributed Motion Coordination for Multi-Agent Systems with Connectivity Maintenance Using Backbone-Based Networks

Light Environment Optimization for Lettuce Growth in Plant Factory
Hiroshi Shimizu, Yuta Saito, Hiroshi Nakashima, Juro Miyazaki, Katsuaki Ohkoi

Distributed Backstepping Control of Multiple Thrust-Propelled Vehicles on Balanced Graph
Dongjian Lee

Task-Level Control of Motion and Constraint Forces in Holonomically Constrained Robotic Systems

Tracking Motion of Deformable Organ in DCE Framework
Roberto Setola, Valentina Russo

Human Motor Learning Through Iterative Model Reference Adaptive Control
Show-Han Zhou, Denny Oetomo, Ying Tan, Etienne Burdet, Iven Mareels

Trajectory Tracking Control of Pendulum with Variable Length by Partial Energy Shaping
Xin Xin, Tatsuya Shinji, Taiga Yamasaki, Changyun Sun

Group Consensus of Networked Multi-Agent Systems with Directed Topology
Chong Tan, Guoping Liu, Guang-Ren Duan

Object Manipulation Based on Robust and Adaptive Control by Hemispherical Soft Fingertips
Satoshi Ueki, Haruhisa Kawasaki, Tetsuya Mouri, Akihiro Kaneshige

Nonlinear Control and Model Analysis of Trirotor UAV Model
Yassuyuki Kataoka, Kazuma Sekiguchi, Mitsuii Sampei

Safety Issues in Adaptive Control Systems for Automatic Administration of Vasoactive Drugs
Nicolo Malaguti, Arvin Delghani, Rodney A. Kennedy

Stabilization for Decomposable Dissipative Discrete-Time Switched Systems
Bin Liu, David J. Hill

Operation and Configuration of a Storage Portfolio Via Convex Optimization
Matt Kneading, Yang Wang, Ekine Akiyibi, Stephen P. Boyd

Optimal State-Feedback Design for MIMO Systems Subject to Multiple SNR Constraints
Sebastian A. Pulgar, Eduardo I. Silva, Mario E. Salgado

Bank of Virtual Actuators for Fault Tolerant Control
Maria Serena, Jose Adrian De Dona, Jan Richter

Development of a Frequency-stabilizing Scheme for Integrating Wind Power Generation into a Small Island Grid
Koji Yamashita, Orie Sakamoto, Yoshihiro Kitauchi, Toshiho Inoue, Hiroyuki Fukuoka, Tomohiro Shiohama

Output Parameterization Based on Invariant Relative Degree
Kazuma Sekiguchi, Mitsuii Sampei

On the Stability of MPC with a Finite Input Alphabet
Ricardo P. Aguilera, Daniel E. Quevedo

Decoupled Quadrature and Force Feedback Control of Capacitive MEMS Gyroscopes
Markus Egerstedt, Florian Maurer, Andreas Kugi

Low-Computational Cost Estimation Algorithm for Adaptive Optics Systems
Mohamed Abbas Turki, Donovan Esqueda Merino, K. Kasper, C. Durieu

Two-Degree-Of-Freedom Anti-aliasing Technique for Wide-Band Networked Control
Ramon A. Delgado, Juan C Aguero, Graham C. Goodwin, Juan J. Yuz

Transition Control for a Fixed-Wing Vertical Take-Off and Landing Aircraft
Pedro Casau, David Cabecinhas, Carlos Silvestri

Stability of State Estimation Over Sensor Networks with Markovian Fading Channels
Daniel E. Quevedo, Anders Ahlen, Karl Henrik Johansson

Fixed Structure Controller Synthesis Using Groebner Basis and Sign-Definite Decomposition
Navid Mohsenizadeh, Swaroop Darbha, Shankar P. Bhattacharyya

Development of an Individual-Adaptive Hurry Driving Monitoring System with Driving-State Recognition
Watanawong Khongsongram, Shinitaro Saigo, Pongthong Raksincharoensak, Masao Nagai, Tomomasa Sato

An Improvement on the Method for Nonlinear Pressure Control of Self-Supplied Variable Displacement Axial Piston Pumps

Improving the Performance of Linear Systems by Adding a Hybrid Loop
Christophe Priour, Sophie Tarrabouich, Luca Zaccarian

Development of Micro Precision Irrigation System in Plant Factory
Yuanf Hendranwar, Haruhiko Murase

Control-Oriented Input Design for Open-Loop System Identification
Yahid Anfar, Arash Sadeghadeh, Hamidrez Momeni

Pitch Shifting by H∞-Optimal Variable Fractional Delay Filters
Masaaki Yagahara, Kazutaka Hanibuchi, Yutaka Yamamoto

Planning Transport Sequences for Flexible Manufacturing Systems
Patrik Magnusson, Nina Sundström, Kristofer Bengtsen, Bengt Lennartson, Petter Falkman, Martin Fabian

Learning Using State Space Kernel Machines
Alexander Ayskin, Bradley Bell, James V. Burke, Gianluigi Pillonetto

Dynamical Systems Coordination Via Sliding Mode Reference Conditioning
Alejandro Vignoni, Jesus Pico, Fabrizio Garelli, Herman De Battista

Convergence of a Recursive Least Squares Algorithm for Frequency Domain Identification
Xiao-Li Hu, James Welsh
Image Processing by Artificial Neural Network for Stress Diagnosis of Tomato ................................................................. 11202

Study on Modifications of PLS Approach for Process Monitoring .................................................................................. 11207
Kenji Hatou, Agung Pratama Pamungkas, Tetsumi Morimoto

Time-Optimal, Dual-Stage, Output Transition: With Pre/Post Actuation ........................................................................ 11213
Santosh Devasia

Initialization of Gradient-Based Optimization Algorithms for the Identification of Structured State-Space Models .......... 11219
Olivier Prot, Guillaume Mercere

A Systematic Approach to Observer Design for the Air-Intake of Combustion Engines ................................................ 11225
Georg Nan, Andreas De Moll, Steven X. Ding, Nick Weinhold, Matthias Schultabers

Qualitative and Quantitative Optimal Experimental Design for Parameter Identification of a MAP Kinase Model .... 11231
Rene Schenkendorf, Michael Mangold

A General Distributed MPC Framework for Cooperative Control .................................................................................... 11237
Matthias Albrecht Muller, Marcus Rehle, Frank Allgower

On Adaptive Stabilization of Mode-Observable Switching Linear Systems ...................................................................... 11243

Multiscale Modelling of Postharvest Storage of Fruit and Vegetables in a Plant Factory Context .................................... 11249
Jesse De Baadermeeker, Bart Nicolai, Mulgaeta Delele, Pieter Verhoven

Stabilization of a Magnetic Suspension by Immersion and Invariance and Experimental Robustness Study .............. 11254
Emmanuel Hristea, Houria Siguerdidjane

Statistical Analysis and Monitoring for Handling Different Modes Batch Processes ......................................................... 11260
Yingwei Zhang, Zhiming Li, Tianyou Chai

A Design Pattern for Translating UML Software Models into IEC 61131-3 Programming Languages ........................... 11266
Alessandro Panferov, Alexander Nebivolf, Sergey Brodsky

GPU-Based Acceleration of the MLEM Algorithm for SPECT Parallel Imaging with Attenuation Correction and Compensation for Detector Response ......................................................... 11272
Akos Szalavecz, Gabor Hess, Tamas Bukki, Bela Kari, Balazs Benyo

Performance Improvement Clarification for Refrigeration System Using Active System Monitoring .......................... 11278
Torben Green, Henrik Niemann, Roszehb Izalti-Zamanaibadi

Decoupling Smith Control for Multivariable System with Time Delays ........................................................................... 11284

Optimised Output Sensitivity Loop Shaping Controller for Ship Rudder Roll Damping ....................................................... 11290
Paolo Raspas, Elena Torta, Gianluca Ippoliti, Mogens Blanke, Sauro Longhi

Communication Sequence Selection to Preserve Reachability/observability in Networked Control Systems with Communication Constraints: A Graphic Approach .......................................................... 11296
Simhae Martinez-Martinez, Hossein Hashemi-Nejad, Taha Boukholza, Dominique D. J. Sauter

Theory and Software Package for Simulation and Smart Control Design for Complex Flexible Aerospace Vehicles ................................................................................................................................. 11302
Alessandro Abate, Joost-Pieter Katoen, John Lygeros, Maria Prandini

Contact Force Estimation in the Railway Vehicle Wheel-Rail Interface ............................................................................. 11308
Christopher Patrick Ward, R. M. Goodall, Roger Dixon

A Two-Step Scheme for Approximate Model Checking of Stochastic Hybrid Systems ...................................................... 11314
Alessandro Abate, Joost-Pieter Katoen, John Lygeros, Maria Prandini

Fusion of an Extended H, Filter and Cubature Kalman filter .............................................................................................. 11320
Kumar Pakki Bharum Chandra, Da-Wei Gu, Jan Postlethwaite

On the Swing-Up of the Pendubot Using Virtual Holonomic Constrains .................................................................. 11326
Lina Consolini, Manfredi Maggioni

Optimal Power Control for Smart Homes .......................................................................................................................... 11332
Gregory De Oliveira, Mireille Jacomino, Day Long Ha, Stephane Ploix

Identification and Uncertainty Domain Quantification: Experimental Validation on a 'Smart' Wind Turbine ................ 11340
Wafa Farah, Guillaume Mercere, Ivo Hautziger, Jan-Willem Wingerden, Thierry Poinot

A Dynamic Feedforward Control Approach for a Semi-Active Damper Based on a New Hysteresis Model .................. 11346
Enrico Pellegrini, Guido Koch, Sebastian Spirk, Boris Lohmann

Valve Friction Quantification: Industrial Case Studies .......................................................................................................... 11352
Claudio Garcia, Rodrigo Alvite Romano, Daniel Uchara

Robust High Fidelity Needle Insertion in Soft Tissues Implemented on a Teleoperation System ........................................ 11358
Mohammad Reza Dehghan, Seyed Mehdi Rezaei, H. A. Talebi, Mohammad Zareinejad

Development of Real-Time Acquisition System of Intraoperative Information on Use of Surgical Instruments for Scrub Nurse Robot ................................................................................................ 11364

Implicit Fractional Model Order Estimation Using Intersecting Multiple Model Kalman Filters ........................................ 11370
Michalas Romanovas, Lasse Klingerbel, Martin Tracholle, Yannos Manoli, Ahmed Al-Jawad

An Explicit Variance Reduction Expression for the Rao-Blackwelled Particle Filter ....................................................... 11376
Fredrik Lindsten, Thomas Bo Schon, Jimmy Olsson

Robust Road Departure Avoidance Based on Driver Decision Estimation ................................................................ 11382
Mohsen Alirezaei, Matteo Corno, Ali Ghaffari, Reza Kazemi

Finite-Time State-Constrained Optimal Control for Input-Affine Systems with Actuator Noise ............................... 11388
Per Raugqist, Claas Breitholtz, Torsten Wik

Estimating Nitrate Concentration in the Post-Denitrification Unit of a Municipal Wastewater Treatment Plant .............. 11393
Michela Mulas, Francesco Corona, Henri Haimi, Laura Emilia Sundell, Mari Heinonen, Riku Vahala
Kinematic Control of Robots with Noisy Guidance System .......................................................... 11399
Ciro Natale
Swing-Up and Stabilization of Rotary Inverted Pendulum Using Sliding Modes .................................... 11407
Shailaja Kurode, Bijan Bandyopadhyay, Aju Chalanga
Automatic Code Generation for Microcontrollers from Place-Transition Petri Net Models .................. 11407
Henrique Dezani, Norian Marranghello, Aledir Silveira Pereira, Alexandre C. R. Da Silva, Marek Wegryn
Passive Fault Tolerant Control of Piecewise Affine Systems Based on H Infinity Synthesis .................. 11419
 Mehdi Gholami, Vincent Cocquemont, Henrik Schoier, Thomas Bak
An Assistance System Approach for Flexible Product Transport Operations in Process Plants .................. 11425
Liyong Yu, Gustavo Quiros, Ulrich Eplee
Input Filter Design for Feasibility in Constraint-Adaptation Schemes ........................................... 11431
Gene Bunin, Gregory Francois, B. Srinivasan, Dominique Bonvin
Outliers Detection in Industrial Databases: An Example Sulphur Recovery Process .......................... 11437
Hugo Garces, Daniel G. Storbaro
Multiple Model Predictive Control of Multivariable Ph Process Using Adaptive Weighting Matrices .... 11443
Jing Wang, Huy Nguyen, Vincent Monteiro, Alireza Fathih
The Asymptotical Error of Broadcast Gossip Averaging Algorithms .............................................. 11449
Fabio Fagnani, Paolo Frasca
Path Smoothing Using Clothoids for Differential Drive Mobile Robots ........................................... 11454
Misel Brezak, Ivan Petrovic
Real-Time Wide-Field Monitoring System Based on Image Mosaicing Technique and Its Application .... 11460
Li-Hao Zou, Jie Chen, Juan Zhang, Jinghui Lu
Analysis of Sliding Motion on a Nonsmooth Surface ........................................................................ 11466
Kai Zheng, Jiabai Gu, Min Yang, Xingcheng Wang, Fuchen He
Smart Reconfigurable Fault-Tolerant Flight Control against Actuator Failures .................................. 11471
Chingiz Hajiyev
Adjoint-Based Distributed Multiple Shooting for Large-Scale Systems ............................................. 11477
Carlo Savorgnan, Attila Kazma, Joel Andersson, Moritz Diehl
Optimal Control of Formula 1 Race Cars in a VDrift Based Virtual Environment ............................ 11483
Florian Kehrle, Janick Frasch, Christian Kirchen, Sebastian Sager
Model Reduction of Spatially Distributed Systems Using Coprime Factors and Semidefinite Programming .... 11489
Aivar Soulou, Anders Rantzer
Wind Farm Load Reduction Via Parametric Programming Based Controller Design ......................... 11495
Vedrana Spudic, Mato Baotic, Nedjeljko Peric
Rice Yields and Protein Content Estimation by Low-Altitude Remote Sensing Using Spectroradiometer ..... 11501
Issiei Ran-Ya, Kazunobu Ishii, Noboru Noguchi
Event Driven Intelligent PID Controllers with Applications to Motion Control .................................. 11507
Jevi Grotal, Javier Romero, Danica Kraje
Identification of Noise Covariances for State Estimation of Autonomous Hybrid Systems .................. 11513
Vinay Bavdekar, Sachin Patwardhan
State Estimation for Parabolic PDEs with Varying Parameters on 3-Dimensional Spatial Domains ........ 11519
Lukas Jadachowski, Thomas Meurer, Andreas Kugi
Robust Control of a Pressure Swing Adsorption Process ............................................................ 11525
Francoise Couenne, Tony LeGorrec, Hai Peng
In-Flight Results from the Drag-Free and Attitude Control of GOCE Satellite .................................... 11531
Massimiliano Saponara, G. Sechi, M. Buonocore, F. Cometto, A. Tramutola, B. Yinai, G. Andre, M. Fehringr
Objective Sensitivity Analysis of Biological Oscillatory Systems ................................................... 11539
Bao-Yun Lu, Hong Yue
A Virtual Target-Based Underway Docking Procedure for Unmanned Surface Vehicles ...................... 11545
Morten Breivik, Jon-Erik Loberg
Virtual Visual Servoing for Real-Time Robot Pose Estimation ....................................................... 11551
Yev Grotal, Javier Romero, Danica Kraje
Linear Slip Control Formulation for Vehicular Anti-Lock Braking System with Suspension Effects .......... 11557
Otis Tichatonga Nyantoro, Jomok Olayeswaju Pedro, Oluyomide Akintunde Dahunsi, Barry Dwolatzky
A Simulation Algorithm for Natural Gas Networks Based on Node Potential Analysis with Modelling of Real Gas Behaviour ........................................................................................................... 11563
Jens Rudiger, Joachim Horn
A Comparative Study of Two Polynomial Optimization Methods for Computing Robust Stability and Performance Margins .................................................................................................................. 11569
Mixed Strategies in Maxi-Min Testing of the Quality of Robust Stabilization Algorithms ...................... 11575
V. V. Alexandrov, Stepan Stepanovich Lemak, Anton Victorovich Lebedev
Planning Unmanned Aerial Vehicle's Path for Maximum Information Collection Using Evolutionary Algorithms .......................................................... 11580
Halit Erguze, Kemal Leblebiciglu
Structured Model Order Reduction of Boiler-Header Models .......................................................... 11586
Christoph Starke, Henrik Sandberg, Pavel Trnka, Vladimir Havlena, Jiri Behi
Cooperative and Decentralized Navigation of Autonomous Underwater Gliders Using Predictive Control .................................................................................. 11593
Alessandro Fonti, Alessandro Freddi, Sauro Longhi, Andrea Monteri
Welfare-Maximizing Correlated Equilibria with an Application to Wireless Communication .... 11599
Fook Kong, Daniel Kuhn, Berc Rustem
Seyedmosaibeh Tahatabazepour, Mehdi Gholi, Thomas Bak, Henrik Schioler

The Effect of Delayed Impulses on Stability of Impulsive Time-Delay Systems ................................................................. 1111

W.-H. Chen, Wei Xing Zheng

Synchronization and Non-Synchronization Properties of Directed Networks with Constant Out-Degree ................................. 1117

Alessandro Rizzo, Richard S. Varga, Arturo Buscarino, Luigi Fortuna, Mattia Frasca

PostureCare - towards a Novel System for Posture Monitoring and Guidance ............................................................. 1123

**Authors:**

- Hyo-Sang Shin, Hangju Cho, Antonios Tsourdos
Path Following Controller Design for a Class of Mechanical Systems

Guaranteed Cost H_\infty Control of Linear Stochastic Markovian Switching Systems

Design of Fractional PI Controllers for a Binary Distillation Column with Disturbances Restricted in Magnitude and Slope

Discrete-Time LPV Controller Synthesis Using Dilated LMIs with Application to an Arm-Driven Inverted Pendulum

High Gain Observer for Induction Motor in Presence of Magnetic Hysteresis

Moments of Cumulated Output and Completion Time of Unreliable General Markovian Machines

LQG Control with Extended Kalman Filter for Power Systems with Unknown Time-Delays

Digital Implementation of Backstepping Controllers Via Input/lyapunov Matching

Advanced HVAC Control: Theory vs. Reality

Stability Windows and Unstable Root-Loci for Linear Fractional Time-Delay Systems

Control of Discrete-Time Stochastic Systems with State Equality Constraints

Ubiquitous Factory: Vision, Architecture and Methodology

Guaranteed Performance Level Iterative Control with Input Constraints: An LMI Approach

Cyclic Jobshop Problem and (max, Plus) Algebra

Optimal State Space Solution to the Fault Detection Problem at Single Frequency

Invariant Funnels Around Trajectories Using Sum-Of-Squares Programming

Optimal Encoders Maximizing Directed Information of Channels with Memory and Feedback: Stochastic Control and Dynamic Programming

Explicit Weight Selection Procedure for Optimal Control Problems with Weighted Objectives

Flatness Based Control of a Suspension System: A GPI Observer Approach

UniBot Remote Laboratory: A Scalable Web-Based Set-Up for Education and Experimental Activities in Robotics

Cubature Kalman Filter Based Localization and Mapping

Teaching PID Tuning with IMC Design for Dynamic Systems Using ScicosLab

Distributed Model-Predictive Control Driven by Simultaneous Derivation of Prices and Resources

Direct Design of Robust Decentralized Controllers

Set-Based Parameter Estimation for Symmetric Network Motifs

Optimal Control of Multidimensional Population Balance Systems for Crystal Shape Manipulation

Fully Parameterized Tube MPC

Robust Model Predictive Control through Dynamic State-Feedback: An LMI Approach

Multivariable Centralized Control with Decoupling and Feedforward Compensation for Residential Wind Turbine
Aeroelastic Modelling of Long-Span Suspension Bridges

A Compartmental Model Based Control Strategy for NeuroMuscular Blockade Level

Modeling and Analysis of Gene-Therapeutic Combination Chemotherapy for Pancreatic Cancer

PROBA-2 Attitude and Orbit Control System: In-Flight Results of Innovative GNC Functions

Modelling Microalgae Growth in Nitrogen Limited Photobioreactor for Estimating Biomass, Carbohydrate and Neutral Lipid Productivities

Power System Model Identification Via the Thermodynamic Formalism

Improved Correlation Analysis and Visualization of Industrial Alarm Data

Homogeneity for Time-Delay Systems

Anaerobic Digestion of Microalgae: Identification for Optimization and Control

Fault Tolerant Networked Control Systems Subject to Actuator Failure Using Virtual Actuator Technique

Optimal Control on Lie Groups: Implementations Details of the Projection Operator Approach

A Supervised Robust Predictive Multi-Controller for Large Operating Conditions of an Open-Channel System

Adaptive Open-Loop Aerobatic Maneuvers for Quadrocopters

Decentralized Hierarchical Multi-Rate Control of Constrained Linear Systems

Optimal Control on Lie Groups: Implementations Details of the Projection Operator Approach

A Supervised Robust Predictive Multi-Controller for Large Operating Conditions of an Open-Channel System

Adaptive Open-Loop Aerobatic Maneuvers for Quadrocopters

Decentralized Hierarchical Multi-Rate Control of Constrained Linear Systems

Domenico Bianchi, Alessandro Borri, Bernardoino Castillo-Toledo, M. Domenica Di Benedetto, Stefano Di Gennaro

Using Timed Automata in Requirements Analysis for Engine Control Units
Sebastian Grobosch, Volkmar Kamin, Kriengkrai Kriikirawin, Stefan Kowalewski

Non-Smooth Control Design for Stabilizing the Switching Linear Systems by Left Eigenstructure Assignment
Yashar Kiani, Naif Bajcinca

Robust Positive Interval Observers for Uncertain Positive Systems
Mohamed Babajeff, Mostapha Ai Rami, Uwe R. Helminke

Output Torque Modeling of a Magneto-Rheological Based Actuator
Peyman Vahidnia, Mehrdad R. Kermani

Fast Model Based Approximation of the Closed-loop Performance Limits of Gas/Liquid Inline Separators for Accelerated Design
Martin Leshkev, Adrie Huisman, Paul M. J. Van Den Hof, Stefan Belfroid, Erik Nennie, Paul Verheek, Aimara Fuenteayor, Ruud

Distributed Relative Clock Synchronization for Wireless Sensor Networks
Iman Shames, Adrian Bishop

Sensitivity of Joint Estimation in Multi-Agent Iterative Learning Control
Angela Schollig, Raffaello D'Andrea

Analytic Approximate Solution to The Nonlinear Output Regulation Problem Using Galerkin Approximation
Method
Ali Asadi, Ali Asadi,Mohammad Reza Shirzad, Mostafa Ahmadi Jazoomand

Robust Adaptive Control Applied to Chua's Circuit
Samaherini Dias, Allan Martins, Aldair Dantas De Araujo, Kurioso Queiroz

Control of Glucose Concentration in Type-1 Diabetes Mellitus with Discrete-Delayed Measurements
Pablo Gonzalez, Ricardo Femat

Elucidating the Design Principles of Signal Transduction Networks - Application to Dopamine and Calcium Signaling in Reinforcement Learning
William Ipanaque, Jose Manrique

A Control System for a Self-Reacting Point Absorber Wave Energy Converter Subject to Constraints
Giorgio Bacelli, John Ringwood, Jean-Christophe Gilletoeux

Identification and Control of pH Using Optimal Piecewise Linear Wiener Model
William Ipanaque, Jose Manrique

Model Predictive Control Based on LMIs Applied to an Omni-Directional Mobile Robot
Humberto Xavier Araujo, Andre Gustavo Scarioli Concescio, Gustavo Henrique Da Costa Oliveira, Jonatas Ribeiro Pitanga

Decision Support Tool for Patient Recruitment in a Hadrontherapy Center
Tao Wang, Eric Marcon, Pascal Pommier, Tian Zhang

Modeling and Nonlinear Control of The Pierburg Inlet Swirl Actuator
Aminhe Kebairi, Mohamed Becherif, Mohammed El Bagdouri

Model-Based Knowledge Extraction for Automated Monitoring and Control
Sophie Marie Fusson

Distributed Fault Detection and Isolation in a Class of Large-Scale Nonlinear Uncertain Systems
Xiaodong Zhang, Qi Zhang

Potential Function Formation Control of Nonholonomic Mobile Robots with Curvature Constraint
Josiel Gouvea, Fernando Lizarriarde, Liu Hu

An Iterative Algorithm for the Subspace Identification of SISO Hammerstein Systems
Kian Jalaleddini, Robert Edward Kearney

On the controllability of Continuous-Time Markov Jump Linear Systems
Alfredo R. R. Narvaez, Eduardo F. Costa

Analysis of a Deconvolution Algorithm for Quantized-Input Linear Systems through Iterated Random Functions
Xiaodong Zhang, Qi Zhang

Intrinsic Quadratic Differentials of the Endpoint Maps of Nonlinear Systems with L^1 Controls
Scott Cameron Amis, Martin Guay

Fault Tolerant Model Predictive Control of Quad-Rotor Helicopters with Actuator Fault Estimation
Hojjat A. Izadi, Youmin Zhang, Brandon W. Gordon

Finite Approximation of the Optimal Average Cost for a Class of Stochastic Control Systems
Alessandro N. Vargas, Joao B. R. Do Val

Detecting Integrity Attacks on SCADA Systems
Roham Chabakzwar, Yinon Mo, Bruno Sinopoli

An Algorithm for the Long Run Average Cost Problem for Linear Systems with Indirect Observation of Markov Jump Parameters
Carlos Alexandre Silva, Daiane C. Bortotin, Eduardo F. Costa

Strategies for Glucose Control in People with Type 1 Diabetes
Dimotrit Bounou, Daniel Finan, John Bagger Jorgensen, Niels Kolstad Poulsen, Henrik Madsen

Structure of Discrete Systems with Switched Delay
Erik I. Verriest

State Observation and Friction Estimation in Engine Air Path Actuator Using Higher Order Sliding Mode Observers
Fayez Shakil Ahmed, Salah Lagbrouche, Mohammed El Bagdouri
A New Approach to Robust Linear Filtering Problems ................................................................. 14626
Marco Henrique Terra, Joao Yoshiyuki Ishihara, Roberto S. Inone

Optimal Path Following for High Wind Flights ........................................................................... 14632
Ashwini Ratnou, P. R. Sujit, Mangal Kohari

Multi-Agent Systems Reaching Optimal Consensus with Time-Varying Communication Graphs .......................................................... 14638
Guodong Shi

Input Design for Nonlinear Stochastic Dynamic Systems - a Particle Filter Approach ................................................................. 14645
Bhushan Gopalauni, Thomas Bo Schon, Adrian George Wills

Coverage of Curves in 3D with Swarms of Nonholonomic Aerial Robots ........................................ 14651
Matteo Goncalves, Luciano Pimenta, Guilherme A. S. Pereira

Sigma-Delta Control of a Biased and Initially-Displaced MEMS Microphone ........................................ 14657
Andrew Steinmann, Neng Eva Wu, Quang Su, Ronald N. Miles

Aggregation Methods for Linearly-Solvable Markov Decision Processes ........................................ 14663
Mingsuon Zhong, Emanuel Todorov

Kalman Filtering with Intermittent Observations: Critical Value for Second Order System ............... 14669
Yin Mo, Bruno Sinopoli

Stabilization of Polynomial Systems with Bounded Actuators using Convex Optimization ............... 14675
Tanagorn Jannawasin, Michihiro Kasunitchi, Tatsuo Narikyo

Adaptive Estimation in Nonlinearly Parameterized Discrete-Time Nonlinear Systems .................... 14681
Devon Lehrer, Veronica Adetola, Martin Guay

Implementing Real-Time Gain Optimization in a Multi-Agent System Designed for Optimized Multiobjective Power Plant Control .................................................................................. 14687

Channel Optimization for Binary Hypothesis Testing .................................................................... 14693
Giancarlo Baldan, Munther A. Dahleh

A Structure for Verifying Observational Properties of Decentralized Discrete-Event Systems .......... 14699
S. L. Ricker

Maneuvering Target Tracking Method based on Unknown but Bounded Uncertainties ...................... 14705
Hosfair Rahmati, Hamid Khaloozadeh, Mosqa Ayati

Blind Identification for Controlled Limit-Cycle Systems Using Harmonic Balance and Output Oversampling ........................................................................ 14711
Jamei Head, Jason Gomes, Craig Williams, Kwang Y. Lee

A Generic Approach to Missile Autopilot Design Using State-Dependent Nonlinear Control ............ 14717
Tayfun Cimen

Fault Identification Using Kernel Principal Component Analysis ..................................................... 14731
Mohamed Bin Shams

Detection of Motion Direction Using a Model of Turtle Retinal Patch .............................................. 14737
Meryn Parakrama Bandara Ekanayake, Bijoy Ghosh

Real-Time Optimizing Nonlinear Control Applied to a Continuous Reactive Distillation Process .......... 14751
Ebrashid Idris, Sebastian Engell

L_i Adaptive Controller for Uncertain Nonlinear Multi-Input Multi-Output Systems with Input Quantization .................................................................................. 14757
Hsiu Sun, Nairey Hovakimyan, Tamer Basar

Characterization of Fixed Modes in a Structurally Constrained Control System with Input and Output Delays ........................................................................ 14763
Ahmadreza Momeni, Amir G. Aghdam

The Application of Automation Theory to Railway Signaling Systems: The Case of Turkish National Railway Signaling Project ................................................................. 14769
Mehmet Turan Söylemez, Mustafa Seckin Durmus, Ugur Yildirim, Serhat Turk, Arcan Sonat

Design of Adaptive PCA Controllers for SISO Systems .......................................................... 14775
Luis Brito Palma, Fernando Coito, Paulo Gil, Rui Neves-Silva

Formation Adaptive Control for Nonholonomic Dynamic Agents: Regulation and Tracking ........ 14781
Ademir Rodrigues Pereira, Josiel Gouvea, Fernando Lizaralde, Liu Hsu

New Results of Energy-Based Swing-Up Control for Rotational Pendulum .................................... 14787
Seiji Tanaka, Xin Xin, Taiga Yamasaki

Adaptive Robust Control for Micropositioning of Piezoelectric Actuators with Environment Force Estimation ........................................................................ 14793
Hamed Ghafarirad, Seyed Mehdi Rezaei, Mohammad Zarinejad, Amir Abdullah

Grasp Identification and Synthesis Using Static Grasp Pose .............................................................. 14799
Jongwoo Park, Joono Cheong

On the Number of Iterations to the Closest Quadratically Invariant Information Constraint ........ 14805
Michael Rokovitz, Nuno C. Martins

Estimating Interval Process Models for Type 1 Diabetes for Robust Control Design .................. 14811
Harald Kirchsteiger, Giovanna Castillo Estrada, Stephan Polzer, Eric Renard, Luigi Del Re

Impulse Parametric Sensitivity Analysis .......................................................................................... 14817
Thanmeer Malai Perumal, Raduythan Gunawan

New Ankle Actuation Mechanism for a Humanoid Robot .......................................................... 14822
Gyij Van Oort, Boelaif Retnik, Stefano Stramigoli

Pattern Formation in Networks of Nonlinear Systems with Delay Couplings ................................ 14829
Eiichi Uchida, Toshihiko Oguchi

Demand Response Program Implementation Practices in Korea ....................................................... 14835
Jinho Kim, Youngwoon Nam, Taekyoung Hahn, Junhee Hong

Jinho Kim, Youngwoo Nam, Taekyung Hahn, Junhee Hong
Nonlinear Control for Stabilizing Power Systems During Major Disturbances ................................................................. 14839

Head Movement Dynamics Constrained by Fick Gimbals ..................................................................................................... 14845

IDA-PBC with Constant Interconnection and Damping Structures .......................................................................................... 14851

Human Motion Analysis from Inertial Sensor Data Based on Nonlinear Dynamics ................................................................. 14857

Adaptivity: A Quality Goal for Agent-Oriented Models? ...................................................................................................... 14863

Modeling and Control of a Small-Scale Hybrid Aircraft ....................................................................................................... 14868

Observer and Damping Feedback Construction Based on Approximate Hamiltonian Dissipative Realization ................................. 14874

Pass Balancing Switching Control of a Four-Passes Furnace System .................................................................................. 14880

Extremum Seeking-Like Observer for Nonlinear Systems ...................................................................................................... 14886

Reconfigurable Direct Control Allocation for Overactuated Systems ....................................................................................... 14892

Modeling of a Water Canal System Using a Weighed Composition of Local Linear State Space Models ........................................... 14897

Integrated Design and Control of Flexure-Based Nanopositioning Systems Part II: Application Case Study ................................. 14903

Multisensor Set-Membership State Estimation of Nonlinear Models with Potentially Failing Measurements ............................... 14912

Optimal Decentralized Servo Control for Systems with Diagonal Decoupling Matrix ................................................................ 14918

Integrated Design and Control of Flexure-Based Nanopositioning Systems Part I: Methodology ................................................ 14924

On Discretized Sliding Mode Control Systems ...................................................................................................................... 14931

Robust Experiment Design through Randomisation with Chance Constraints ........................................................................ 14936

Using Knowledge and Expressions to Validate Inter-Model Constraints ................................................................................ 14942

A Human-Inspired Hybrid Control Approach to Bipedal Robotic Walking ........................................................................... 14948

Toward a Framework for Sustainable Cyber-Physical Energy Systems: Frequency Regulation Revisited ........................................ 14956

A Hybrid Architecture for Maneuver-Based Motion Planning and Control of Agile Vehicles ..................................................... 14965

Using Persistent Homology to Determine a Human-Data Based Cost for Bipedal Walking ....................................................... 14971

Online Monitoring of Plant Cell Cultures Using Laser-Induced Endogenous Biomarkers and Direct Observers .............................. 14977

Interplay between Feedback and Feedforward Control in Fly Gaze Stabilization .................................................................... 14983

Bilinear Model Predictive Control of a HVAC System Using Sequential Quadratic Programming .................................................. 14989

Medical Decision Support Systems Based on Soft Computing Techniques ................................................................................ 14995

Emission Reduction of Legacy Natural Gas Engines by Model Predictive Control ................................................................ 15001

Consensus Control for Underactuated Vehicles ..................................................................................................................... 15006

Outer-Loop Sliding Mode Control Approach to Longitudinal Autopilot Missile Design .............................................................. 15012

Markov Decision Processes and Determining Nash Equilibria for Stochastic Positional Games .................................................. 15020

Observer Design for Needle Steering Using Task-Induced Symmetry and Reduction ................................................................ 15026

Darboux Polynomials for Lie Algebras ...................................................................................................................................... 15032

Robot Farming System Using Multiple Robot Tractors in Japan Agriculture ............................................................................. 15038

Intelligent Alert Systems for Error and Conflict Detection in Supply Networks ........................................................................... 15043
