# Table of Contents

## Advancements in Power Systems Operations with Variable Generation

- A Flexible Power System Operations Simulation Model for Assessing Wind Integration
  - Erik Ela; Michael Milligan; Mark O'Malley
  - Page: 1
- ISO New England Wind Integration Study
  - Michael Henderson; William Henson; John Norden; Wayne Coste; Robert Zavadil; Richard Piwko; Gary Jordan; Gene Hinkle; Nicholas Miller
  - Page: 9
- Implications of Geographic Diversity for Short-Term Variability and Predictability of Solar Power
  - Andrew Mills; Ryan Wiser
  - Page: 15
- Generation and Demand Management Improvement with Increased Variable Generation - A Midwest ISO Perspective
  - Li Zhang; Paul Grabh; Tengshun Peng; Marc Keyser
  - Page: 24
- Rapid Redispatch and Stochastic Optimal Power Flow in Systems with Wind Power
  - Robert Entriken; Adam Twid; Daniel Brooks
  - Page: 30
- Operational Tools and Policies for Integrating Large Amounts of Variable Generation in Ireland and Northern Ireland
  - Alan Rogers; Jonathan O'Sullivan; Ivan Dudurych
  - Page: 35

## Bringing Smart Grids to the Next Level – Approaches, Results and Experience from Europe

- Utilizing Battery Electric and Plug-In Hybrids for Smart Grid Operation Techniques
  - Michael Agsten; Mike Blund; Steffen Schlegel; Dirk Westermann
  - Page: 41
- Modeling of Tidal Energy Conversion Systems for Smart Grid Operation
  - Maren Kuschke; Kai Streun
  - Page: 46
- Smart Grids – a Key Step to Energy Efficient Cities of the Future
  - Gerrit Jan Schaeffer; Ronnie Belmans
  - Page: 49
- New Approaches for Smart Grid Requirements: Grid Protection and Optimization of Distribution Grid Operation
  - Sabine Bitter; Hannes Rüttgers; Sebastian Ritter; Peter Bretschneider; Dirk Westermann
  - Page: 56
- Smart Transmission Grid for Europe: Research Challenges in Developing Grid Enabling Technologies
  - Luigi Vanfreti; Dirk Van Hertem; Lars Nordström; Jan Ove Gjerde
  - Page: 63
- Real-Time Monitoring as Enabler for Smart Transmission Grids
  - Emilio Barocio; Bijanta Pal; Arturo Messina
  - Page: 71

## Deploying Smart Grids to the Next Level – Approaches, Results and Experience from Europe

- Towards a Risk-Based Network Operation and Design Standards
  - Goran Strbac; Rodrigo Moreno; Danny Puljani; Manuel Castro
  - Page: 79
- Intelligence by Design for the Entropic Grid
  - Matias Negrete-Pincetic; Sean Meyn
  - Page: 83
- Achieving a Low Carbon Economy in a Fast Developing Country
  - Sebastian Moscaruger; Hugh Rudnick
  - Page: 91
- How to Ensure Affordable and Secure Generation in a Power Market: The Brazilian Experience
  - Bernardo Bezerra; Luiz Augusto Barroso; Fernando Porrua
  - Page: 97

## Distributed Generation Protection

- An Observer-Based Protection System for Microgrids
  - Mohamed Ereraiaj; Joydeep Mitra
  - Page: 101
- A Robust Wavelet-ANN Based Technique for Islanding Detection
  - Mohamed El Nizawy; Ehab El-Saadany; Magdy Salama
  - Page: 108

## Distribution Fault Locating

- Recognition of Fault Transients Using a Probabilistic Neural-Network Classifier
  - Navane Perera; Abhula Rajapakshe
  - Page: 116
- Fault Location Using Impedance-Based Algorithms on Non-Homogeneous Feeders
  - S. Kulkarni; N. Karmik; S. Das; Surya Santoyo
  - Page: 117
- Effect of Load Current on Fault Location Estimates of Impedance-Based Methods
  - N. Karmik; S. Das; S. Kulkarni; Surya Santoyo
  - Page: 123
Distribution Fault Location Using Short-Circuit Fault Current Profile Approach ................................................................. 129
S. Day; S. Kulkarni; N. Karnik; Surya Santoso

Optimal Fault Current Limiter Sizing for Distribution Systems with DG .................................................................................. 136
Hatem Zeineldin; Weidong Xiao

EDUCATION AND RESEARCH ON INTEGRATION OF RENEWABLE RESOURCES INTO POWER SYSTEMS

Educational and Research Challenges and Opportunities Related to Renewable Energy ............................................................ 141
Anil Pahwa; William Kuhn; Ruth Douglas Miller; Andrew Rys

Assessing the Reliability Impacts of Wind Energy ......................................................................................................................... 144
Rama Ramakumar

Renewable and Efficiency Systems Integration at the National Renewable Energy Laboratory ......................................................... 148
David Mooney; Ben Kroposki; William Kramer

Future of Renewable Energy Development & Deployment ........................................................................................................... 149
Tom Key

Large-Scale Photovoltaic Solar Power Integration in Transmission and Distribution Networks ......................................................... 150
Rajiv Varma; Magdy Salama

Smart Distribution System Research and Education at the FREEDM Systems Center ................................................................. 154
Mesut Baran

ELECTRIC MACHINERY POSTER SESSION

Design and Implementation of DC-Bus System Module for Parallel Integrated Sustainable Energy Conversion Systems ......................................................................................................................... 157
Mahmoud Amin; Osama Mohammed

EMISSION REDUCTION: MODELING CONSIDERATIONS, ASSESSMENT, AND QUANTIFICATION

Optimal Power Generation Mix Towards an Emission Target ......................................................................................................... 165
Chenchen Yuan; Furong Li; Bless Kari

Evaluating the Benefits of a Hybrid Solid Oxide Fuel Cell Combined Heat and Power Plant for Energy Sustainability and Emissions Avoidance ................................................................. 172
Chris Colson; Hashem Nehrir

Generator Maintenance Scheduling Considering Minimization of CO2 Emissions ......................................................................... 173
Srijib Mabberjee; Servan Teleke; Veera Bandara

Quantification of Emission Reduction from Electricity Network with the Integration of Renewable Resources ............................. 179
M. Aba Abdullah; Ashkib P. Agalgaonkar; Kashem M. Muttaqi

Assessing Impact of Demand Response in Emission-Constrained Environments ................................................................. 186
Masood Parvania; Mahmud Fotashi-Firoozabad; Mohammad Shahidehpour

ENERGY DEVELOPMENT AND POWER GENERATION POSTER SESSION

An Approximate Model of Wind Turbine Control Systems for Wind Farm Power Control ................................................................. 192
Yi Guo; Seyed Hossein Hosseini; Choon Yik Tang; John Jiang

Frequency Response and Dynamic Power Balancing in Wind and Solar Generation .......................................................................... 199
Taegun Oh; Jiseok Choi; Junmin Choi; Ungki Bae; Kwang Y. Lee

Comprehensive Review of Wind Energy Maximum Power Extraction Algorithms ................................................................. 204
Shravana Musunuri; Herbert Ginn III

Real-Time Energy Management of a Stand-Alone Hybrid Wind-Microturbine Energy System Using Particle Swarm Optimization ......................................................................................................................... 212
Seyyed Ali Pourmousavi Kani; Hashem Nehrir; Christopher Colson; Caisheng Wang

Comparing Technical Connection Requirements for Large Wind Power Plants ................................................................................. 213
Mansour Mohseni; Syed Islam

Multi-Objective Optimal Operation Incorporating Wind Power ......................................................................................................... 221
Libao Shi; Chen Wang; Liangzhong Yao; Yicin Ni; Bazargan Masoud

Performance of Wind Driven Induction Generator Under Balanced/Unbalanced Load and Excitation ............................................... 228
Kattapalli Trinadha; Ashwani Bandara

Wind Turbines with Energy Storage for Power Smoothing and FRT Enhancement ................................................................. 236
Guoyi Xu; Lie Xu; John Morrow

Voltage Fluctuation and Flicker Assessment of a Weak System Integrated Wind Farm ......................................................................... 243
Chun Wei; Minxiao Han; Wenli Yang

Hydrogen Energy Storage for a Permanent Magnet Wind Turbine Generator Based Autonomous Hybrid Power System ......................................................................................................................... 248
Nishad Mendis; Saad Sayeef; Kashem M. Muttaqi; Sarath Perera

Low Voltage Ride-Through of DFIG Wind Turbines Complying with Western-Power Grid Code in Australia ........................... 255
Mansour Mohseni; Mohammad A. S. Masoum; Syed Islam
A New Dynamic Strategy for Improved Ride-Through Capability of Wind Turbine Generator .................................................. 263
Xiangliang Wei; Lu Cheng-Hong; Qiong Jiang; Zhiyong Wang

Renewable Energy Utilization in China ........................................................................................................................................... 276
Tze-Fun Chan; Loi Lei Lai

Simulation and Modelling of PV-Wind-Battery Hybrid Power System ................................................................. 280
Thaletens Mishtal; Gabrielle Coppez; Sunesh Choudhury; S. P. Choudhury

Dynamic Model for Full-Converter Wind Turbines Employing Permanent Magnet Alternators ........................................... 287
M. Singh; Surva Santosoo

Impact of Wind and Solar Generation on the California ISO’s Intra-Hour Balancing Needs .................................................... 294
Jian Ma; Yuri Makarov; Clyde Loutan; Zhijun Xie

Per-Blade Equivalent Wind Speed Function for High Order Drive Train Modeling ....................................................... 300
Luís Alberto Fajardo-R.; Aurelio Medina

Low Voltage Ride Through Control Strategy of Directly Driven Wind Turbine with Energy Storage System ....................... 307
Kun Zhang; Yuping Duan; Jianfong Wu; Jun Qiu; Jinling Li; Shu Fan; Hui Huang; Chengxiong Mao

A Wind Farm Coordinated Controller for Power Optimization ................................................................................................. 314
Jin Shu; Baohui Zhang; Zhiquan Bo

Analysis of Seasonal Wind Speed and Wind Power Density ....................................................................................................... 322
B. G. Kumaraswamy; B. K. Keshavan; Y. T. Ravikiran

Emulation of a 1.5MW Wind Turbine with a DC Motor .................................................................................................................. 326
Trevor Hardy; Ward Jewell

Modeling and Simulation of a Wind Turbine-Generator System ................................................................................................. 334
Ambrosio Carulli; Ziyad Salameh

Simulation and Experimental Study of Multi-Inverter Islanding ............................................................................................... 341
Dustin Schutz; Michael Ropp

A Fast Maximum Power Extraction Algorithm for Wind Energy Systems .................................................................................. 345
Shravana Musunuri; Herbert Ginn

A. Chikh; A. Chandra

Grid Integration Impacts and Energy Storage Systems for Wind Energy Applications-A Review .................................................. 360
Majidali Choudhury; M. Enamul Haque; M. Akhtarjaman; Michael Negnevitsky; Ameen Gargoon

Modeling and Analysis of an LCL Filter for Grid-Connected Inverters in Wind Power Generation Systems ......................... 368
Bohaun Liu; Byeong-Mun Song

Contribution of PV Systems with Ultra Capacitor Energy Storage on Inter-Area Oscillation .................................................. 374
Rakibuzzaman Shah; Mithulananthan Nadarajah; Kwang Y Lee

Control Strategy of Three Phase Grid-Connected Photovoltaic Arrays with Open Loop Maximum Power Point Tracking ........... 382
Ahmed Khalili; Ehab El-Saadany

A New Tool for Design Optimization and Cost Estimation of Stand-Alone Photovoltaic Power Plants .................................. 390
Polycarp Muoka; M. Enamul Haque; Michael Negnevitsky

Short-Term Solar Power Prediction Using an RBF Neural Network ............................................................................................ 397
Jianwu Zeng; Wei Qiao

Partial Shading Modeling of Photovoltaic System with Experimental Validations ............................................................... 405
Sonal Patel; Wajiha Shireen; Jia Jiang

An Optimum Method for Maximum Power Point Tracking in Photovoltaic Systems ......................................................... 414
A. Chikh; A. Chandra

Estimation of Total Power Output Fluctuation of High Penetration Photovoltaic Power Generation System ......................... 420
Takayoshi Kato; Takato Inoue; Yasuo Suzuki

Increasing Photovoltaic Penetration with Local Energy Storage and Soft Normally-Open Points ........................................... 427
Jeffrey Bloemink; Tim Green

Novel Configurations for Photovoltaic Farms to Reduce Partial Shading Losses ............................................................... 435
Mohamed Shams El-Dess; Mehrdad Kazerni; Magdy Salama

Maximum Power Point Tracking for Photovoltaic Systems Using Fuzzy Logic and Artificial Neural Networks ...................... 440
Ayman Zein Alabedin; Ehab F. El-Saadany; Magdy M. A. Salama

Research and Development of Photovoltaic Power Systems in China .................................................................................. 449
Xiaofu Xiong; Jizhong Zhu; Kwok Cheung

Fast Converging Digital MPPT Control for Photovoltaic (PV) Applications ................................................................. 455
Sonali Patel; Wajiha Shireen

A Grid Compatible Methodology for Reactive Power Compensation in Renewable Based Distribution System ....................... 461
Tareq Aziz; U. P. Mhaskar; Tapan K. Saha; Nadarajah Mithulananthan

A Study on Design and Functionalities of Smart Grid .............................................................................................................. 469
Fang Yuan Xu; Loi Lei Lai

Experiment-Based Simulation for Distortion Behavior in LV Networks for Microgrid Modeling ........................................ 474
Yan Kik Moh; Norman C. F. Tse; Wing-Hong Lau; M. C. Leung

Sliding Mode Control Approach for Voltage Regulation in Microgrids with DFIG Based Wind Generations ...................... 480
Rassoul Asgharzadeh; Rajesh Kavasseri

Computer Models for Microgrid Applications ...................................................................................................................... 488
Xin Qiu; Tu Nguyen; Mariesa Crow; A. C. Elmore; Bruce McMillin
Load Sharing of Autonomous Distribution-Level Microgrids …................................................................. 496
Aboutaleb Haddadi; Geza Joon
Multi-Agent System Based Intelligent Distributed Control System for Power Plants …........................... 505
Kwang Y. Lee; Jason D. Head; Jason R. Gomes; Craig S. Williams
Fault Analysis of Different Kinds of Distributed Generators……………………………………………………… 512
Samei Liu; Tianshu Bi; Anchong Xue; Qunan Yang
Robust Decentralized Control for Islanded Operation of a Microgrid …...................................................... 518
Maryam Babazadeh; Houseang Ka
The Relevance of CCS for the Future Power Market …................................................................................. 526
Stephan Spiecker; Volker Eickoldt; Christoph Weber
Fuel Cell Inverter Scale-Up Experience …..................................................................................................... 534
George Bernsten
A Total Energy Approach to Integrated Community Infrastructure Design …............................................. 538
Marc Bee; Jianzhong Wu; Bishoy Awaad; Janaka Ekamasure; Nick Jenkins
Electricity Consumption-Economic Growth Nexus in China: Evidence from Provincial Panel Data …………. 546
Market Operation Dynamic Model and Analysis on Interconnected Power Systems ….................................. 554
Young-Sik Jang; Geun-Pyo Park; Yong Tae Yoon; Sang-Seung Lee
Battery Storage and Testing Protocols for CHP Systems ….......................................................................... 560
Gabrielle Coppes; Sunetra Chowdhury; S. P. Chowdhury
A Rotational Wave Energy Conversion System Development and Validation with Real Ocean Wave Data … 567
Hayrettin Karayaka; Hugo Mahlke; Dacek Bogucki; Mehrube Mehrineoglu
Locating Major Harmonic Current Contributors by Layered Knowledge Discovery in Database …………… 574
A. K. So; W. H. Lai; C. F. Tse; N. F. Tsang; M. C. Leung
On Some Aspects of Power System Stabilizer Blocking Logic …................................................................... 579
Matthias Baechle; Valeriy Knazkins; David Stutz
Neural Network Based Superheater Steam Temperature Control for a Large-Scale Supercritical Boiler Unit … 585
Liangyu Ma; Kwang Y. Lee
Integrated Maintenance Model of Generators and Transmission Lines Based on Fast Group Searching ….. 593
Optimizer
An Investigation of Implementing Emergency Demand Response Program (EDRP) in Unit Commitment Problem … 599
Mehdi Rahmani-Andebili; Amir Abbodolah; Mohsen Parsa Moghadam
Wind and Solar Power Supply for EMP Protected Critical Infrastructures …................................................ 606
Oguz Soysal; Hikmat Soysal; Chuck Santo; Eric Moore
Investigations Into the Upgrading of Existing Transmission Lines from HVAC to HVDC …......................... 607
Pathmanathan Naidoo
Knowledge Discovery and Data Mining for Power System Contingency Analysis …..................................... 611
Shun King Wong; Zhuo Yang Dong
Comparison of Energy Consumption in HVAC Systems Using Simple ON-OFF, Intelligent ON-OFF and Optimal … 617
Controllers
Karthik Chinakanni; Anunay Krishnamurthy; James Moyne; Fangming Gu
Role of Nuclear Energy in the Electricity Supply of South Africa …............................................................ 623
Mansudeti Mathosyanatsimbi; William Ydul; Sunetra Chowdhury, S. Chowdhury
Hybrid Wavelet-PSO-ANFIS Approach for Short-Term Wind Power Forecasting in Portugal ………………… 629
J. P. S. Catalito; H. M. J. Pousinho, V. M. F. Mendes
A Gas Turbine Model for Studies on Distributed Generation Penetration Into Distribution Networks ………... 630
Stefano Massucco; Andrea Pitta; Federico Silvestro

ETCC POSTER SESSION

Charging Service Elements for an Electric Vehicle Charging Service Provider …........................................... 631
Olle Sundström, Carl Binding
Wireless AMI Application and Security for Controlled Home Area Networks …........................................... 637
Yasukumar Aravinthan; Vinod Nambudiri; Samshodh Sunku; Ward Jewell
Electric Vehicle Forecast for a Large West Coast Utility …............................................................................. 645
Josh Schellenberg; Michael Sullivan
A Case Study on the Hybridization of an Electric Vehicle Into a Fuel Cell Hybrid Vehicle and the Development of a Solar Powered Hydrogen Generating Station …....................................................................................... 651
Ngalula Sandrine Mubenga; Thomas Stuart
Integration of Plug-In Hybrid Electric Vehicles Into Building Energy Management System …………………... 659
Zhu Wang; Lingfeng Wang; Anastasia Dounis; Rui Yang
A Novel Line Section Protection for the FREEDM System Based on the Solid State Transformer ………………… 667
Passinam Taitcho; Yu Jiang; Hui Li
Aggregator Analysis for Efficient Day-Time Charging of Plug-In Hybrid Electric Vehicles …........................ 675
Anik Bandopadhyay; Lingfeng Wang; Vijay Devabhaktuni; Robert Green II
Theoretical Resource Assessment of Marine Current Energy in the Agulhas Current Along South Africa's East Coast ….................................................................................................................................................. 683
Eric Marais; Sunetra Chowdhury; Shyama Pada Chowdhury
Present Status and Future Trends in Enabling Demand Response Programs ................................................................. 691
Payam Teimourzadeh Baboli; Mohsen Parnia Meghdadi; Mehdi Eghbal
Power Flow Modeling and Analysis of Voltage Source Converter-Based Plug-In Electric Vehicles ............................ 697
Alejandro Jimenez; Norberto Garcia

IEC 61850 COMMUNICATIONS

Seamless and Low-Cost Redundancy for Substation Automation Systems (High Availability Seamless Redundancy, HSR) .......................................................... 703
Hubert Kirrman; Oliver Kleinhein; Karl Weber; Hans Weibel
Latency Considerations in IEC 61850-Enabled Substation Automation Systems .............................................................. 710
Bamdad Falahati; Mirmasoul J. Mousavi; Mehdi Vakilian
IEC 61850 Based Substation Automation System Architecture Design ................................................................. 718
Jian-Wei Tan; Wen-Peng Luan

INTELLIGENT GRID POSTER SESSION

Lin Zhao; Philipp Aweter; Andreas Schäfer; Christopher Breuer; Albert Moos
Performance Evaluation of a PHEV Parking Station Using Particle Swarm Optimization ....................................... 732
Wencong Su; Mo-Yuen Chow
Hybrid Control for Micro-Grid Based on Hybrid System Theory ............................................................................. 738
Chunxia Du; Xiongbing You; Zhaopan Hu; Donglei Liu; Fang Zhao
Using Load Switches to Control Aggregated Electricity Demand for Load Following and Regulation ................... 749
Taylor Keep; Froylan Silvestre; David Auslander; Duncan Callaway
Evaluation Index System for Smart Grids Based on Demands from Stakeholders ..................................................... 756
Bai Chen; Guang-Yu He; Wei Tan; Yong Deng
Optimal Demand Response Based on Utility Maximization in Power Networks ....................................................... 763
Na Li; Lijian Chen; Steven Low
Multi Objective Decision Making Method for Demand Side Management of LV Residential Distribution Networks with Plug-In Electric Vehicles .................................................................................. 771
Michael Wisart; Farhad Shahnaj; Arindam Ghosh; Gerard Leadwich
Forecasting Charging Load of Plug-In Electric Vehicles in China ............................................................................ 779
Zhuowei Wei; Yonghua Song; Zechun Hu; Zhiwei Xu; Xia Yang; Kaiqiao Zhan
Optimal PMU Placement: A Comprehensive Literature Review .................................................................................. 787
William Yuill; Armien Edwards; Sanjota Chowdhury; S. P. Chowdhury
Use of Delayed Smart Meter Measurements for Distribution State Estimation ......................................................... 795
Kannalath Samaravoon; Jianzhong Wu; Janaka Ekamayake; Nick Jenkins
Interoperable Device Identification in Smart-Grid Environments ............................................................................ 801
Nicolai Kuntze; Carsten Rudolph; Ingo Bente; Joerg Vieweg; Josef Von Helden
Incremental Cost Consensus Algorithm in a Smart Grid Environment ................................................................. 808
Ziang Zhang; Mo-Yuen Chow
Power Flow Control of Inverter Based Distributed Generators in LV Microgrids ....................................................... 814
Kourosh Sedghisigarchi
A Regional Electricity Market Approach in View of Related Smart Grid Initiatives .................................................. 820
Seok-Chan Oh; James D'Arcy; Jorge Arinez; Stephan Biller; Alfred Hildreth
Assessment of Energy Demand Response Options in Smart Grid Utilizing the Stochastic Programming Approach ........................................................................................................ 828
Research on Architecture of ITS Based Smart Charging Guide System ............................................................... 833
Qinglai Guo; Yao Wang; Hongbin Sun; Zhenghao Li; Boming Zhang
Security Constrained Unit Commitment and Economic Dispatch Through Benders Decomposition: A Comparative Study .................................................................................. 838
Sanja Crejic; Junjun Xiong
Optimal Transmission Switching Analysis and Marginal Switching Results ............................................................. 846
Clayton Barrows; Seth Blumsack
Technical and Economic Assessment of Active Distribution Network Technologies ................................................ 849
Rodrigo Hidalgo; Chad Abbey; Geza Joos
Secondary Voltage Control for Harmonics Suppression in Islanded Microgrids .................................................... 855
Xiongwei Wang; Josep M. Guerrero; Fred Bialasberg; Zhe Chen
The Impact of Integrating Distributed Generations on the Losses in the Smart Grid .............................................. 863
Yiyan Guo; Yufeng Lin; Mingjie Sun

MARINE SYSTEMS COORDINATING COMMITTEE POSTER SESSION

Power Tracking Control Challenges in Hydrokinetic Energy Conversion Systems .................................................. 869
Jahangir Khan; Tariq Iqbal; John Quaicoe
PLANNING AND IMPLEMENTATION TOPICS

A Study of Submarine Power Grid Planning for Offshore Wind Farm ................................................................. 875
Hunter Huang; Gary Zhang; Peng-Kai Wang; Tien-Chieh Wu; Hui-Jue Su
Environmental Effects Evaluation of Urban Distribution Network Planning Based on a Comprehensive Model .......... 880
Bo Zeng; Min Zhang; Jianhua Zhang; Jun Dong; Yu Xue; Yu Han
Transmission Expansion Planning by Meta-Heuristic Techniques: A Comparison of Shuffled Frog Leaping Algorithm, PSO and GA ........................................................................................................ 887
Mehdi Eghbal; Tapan Kumar Saha; Kazi Nazmul Hasan
Tradeoffs in Planning Renewable Power Generation Entry to the Electricity Market ............................................ 895
Kazi Hasan; Tapan Saha; Mehdi Eghbal
Major Problems Concerning China's Large-Scale Wind Power Integration ...................................................... 903
Ming Yin; Xubo Ge; Yibin Zhang

POWER SYSTEM DYNAMIC PERFORMANCE POSTER SESSION

Synchronous Machine Modeling Precision and Efficiency in Electromagnetic Transients ........................................ 909
Ultras Karagac; Jean Mahseredjian; Omar Saad; Sébastien Demetriou
Analytical Trajectory Extrapolation for Power Systems .................................................................................... 910
Shaohua Wang; Ghadir Radman; Gang Zheng; Wenzhong Guo
Analysis of a Hybrid Offshore Wind and Tidal Farm Connected to a Power Grid Using a Flywheel Energy Storage System ............................................................................................................ 917
Li Wang; Chan-Nan Li; Yi-Ting Chen; Yi-Ting Kao; Yina Chen; Sheng-Wen Wang
STATCOM Modeling Impact on Wind Turbines' Low Voltage Ride Through Capability .................................... 925
Ahmed Awad; Magdy Salama; Ramadan El-Shatat
Performance of Power Oscillation Damping Controllers with Different Static Load Characteristics ................. 929
Nilesh Modi; Tapan Kumar Saha; Nadaraju Mithulananthan
Wide Area Power System Transient Stability Assessment Using Catastrophe Theory Method and Synchrophasors 936
Zhenhua Wang; Adly Gergis; Visvakumar Arawanthan; Elham Medravn
Impact of Distributed Synchronous and Doubly-Fed Induction Generators on Small-Signal Stability of a Distribution Network ................................................................................................................... 943
Ricardo Oliveira; José Zamaidei; Carlos Hossi
Large Signal Stability Analysis Based on Gyrator Model with Constant Power Load ........................................ 951
Weijin Du; Junming Zhang; Yang Zhang; Zhaoming Qian; Fangzheng Peng
Analysis of an Integrated Offshore Wind Farm and Seashore Wave Farm Fed to a Power Grid Through a Variable Frequency Transformer ................................................................. 959
Li Wang; Shun-Ron Jan; Chao-Nan Li; Hao-Wei Li; Yi-Huan Huang; Yi-Ting Chen
An Intelligent System-Centric Control Approach to Power System Stabilization Using Linear Adaptive and Optimal DHP Controller ........................................................................................................... 966
Gerald Swann; Sukumar Kamalasadan
Parameter Ranges for Robust Gain Tuning of Power Systems Stabilizers ............................................................ 974
Ricardo Oliveira; Rodrigo Ramos; Newton Breet
Transient Stability Studies of Doubly-Fed Induction Generator Using Different Drive Train Models ................. 981
Yaoqing Han; Pengjun Wang; Peng Wang; Wenping Qin
Dynamic Simulation of HVDC Interconnection in Large Power System .......................................................... 987
Xuan Minh Bui; Mai H. Nguyen; Tapan Saha
Oscillation Analysis in Western Interconnection Using Distribution-Level Phasor Measurements .................... 994
Yanzhu Ye; Matthew Gardner; Yilu Liu
Dynamic Interactions Among Multiple FACTS Controllers - A Survey ....................................................... 1002
Hoe Jo Kim; Taesik Nam; Kyung Hee Byunghoon Chang; Joe Chow; Robert Enriques
A Study on Dynamic Behavior of Coal-Fired Thermal Power Plant During Significant System Frequency Rise 1010
After System Separation ....................................................................................................................................... Koji Yamashita; Ryohtaro Minami; Toshio Inoue; Terao Ohno; Hiroshi Ichimiyu; Hiroaki Kamei
Application of Dynamic Equivalencing in Large-Scale Power Systems ............................................................. 1018
Feng Ma; Xiaochuan Lu; Vijay Vittal
Coordination of Synergetic Excitation Controller and SVC Damping Controller Using Particle Swarm Optimization ........................................................................................................................... 1028
Yazid Alfadhley; Ali Felaichi; Ali Karimi
Frequency Control Using Vanadium Redox Flow Batteries on Wind Farms ..................................................... 1036
Dominic Banham-Hall; Gareth Taylor; Christopher Smith; Malcolm Irving
Improving the Performance of the Equivalent Wind Method for the Aggregation of DFIG Wind Turbines .......... 1044
Zhaojun Meng; Feng Xue
A Modified Static Voltage Control Algorithm Based on Optimal Multiplier Method and Dynamic Generation Characteristics .............................................................................................................. 1050
Bo Gong
NewSART Automatic Voltage and Reactive Power Regulator for Secondary Voltage Regulation: Design and Application ............................................................................................................................... 1056
Giorgio Sulligoi; Massimiliano Chiadone; Vittorio Arcidiacono
Adaptive Tracking of Ambient System Oscillations by Nonstationary RLS Techniques ................................................................. 1063
Ismael Moreno; A. R. Messina

Estimation of a Shunted Radial Transfer Path Dynamics Using PMUs ........................................................................................... 1071
Yasser Wehbe; Linling Fan

Development of PSO Based Control Algorithms for Maximum Wind Penetration ........................................................................ 1077
Sasidharan Sreedharan; Weerasen Ongsakul; Jai Govind Singh; I Made Warthana; Kittiwit Buayai

Real Time Dynamics Monitoring System (RTDMS®) for Use with SynchroPhasor Technology in Power Systems ............................ 1083
Abhijeet Agarwal; John Ballantine; Bharat Bhugara; Jim Dyer; Ken Martin; Jianzhong Mo

Analysis of Power System Disturbances Based on Distribution-Level Phasor Measurements ............................................................... 1091
Yanzhu Ye; Jingyuan Dong; Yiha Liu

Instantaneous Modal Estimation of Sub-Synchronous Oscillations Using Simplified Recursive Newton Type Algorithm ..................... 1098
Jorge Ivan Sanchez; Emilio Barocio; Pavel Zutić; Ramon Betancourt

Analysis of Frequency Extrema in the Eastern and Western Interconnections .................................................................................. 1106
Penn Markham; Yiha Liu; Terry Blake; David Bertagnolli

Online Voltage Stability Load Index Estimation Based on PMU Measurements .................................................................................. 1114
Joseph Makasa; Ganesh Kumar Venugopalan

Dynamic Stability and Network Constrained Optimal Spinning Reserve Allocation ........................................................................ 120
Ayman Hoballah; István Erlich

Characteristics and Modeling of Motor Load on Partial Motor Stalled Conditions ............................................................................. 1125
Jinghong Zheng; Xiaoyu Wang; Shouchen Zhu; Wilsun Xu

POWER SYSTEM INSTRUMENTATION AND MEASUREMENTS POSTER SESSION

Wide-Area Frequency as a Criterion for Digital Audio Recording Authentication .............................................................................. 1126
Yuming Liu; Zhiyong Yuan; Penn Markham; Richard Conners; Yiha Liu

Study on Rotary Loop Flow Controller for Futuristic Distribution Networks ..................................................................................... 1133
S. C. Verma; Fujihiko Yamada; Yasuyuki Kondo; Fujuyuki Ueda; Kenichi Kuroda; Masashi Kitayama; Yoshiyuki Komo

Low-Cost Power Monitoring System Using Mobile Handset ............................................................................................................. 1140
Seaseung Oh; Gilsung Byeon; Sang-Hee Kang; Gilsoo Jang

PRACTICAL ASPECTS OF ELECTRIC LOAD FORECASTING

A Naive Multiple Linear Regression Benchmark for Short Term Load Forecasting .............................................................................. 1144
Tao Hong; Pu Wang; H. Lee Willis

Comparative Study on Load Forecasting Technologies for Different Geographical Distributed Loads ..................................................... 1150
Shu Fan; Yuan-Kang Wu; Wei-Jen Lee; Ching-Yin Lee

Short Term Load Forecasting Using Regime-Switching GARCH Models .......................................................................................... 1158
Hao Chen; Fangxing Li; Qiuian Wan; Yurong Wang

Short-Term Load Forecasting Using Semi-Parametric Additive Models ............................................................................................ 1164
Shu Fan; Rob Hyndman

MGE Experience with INSITE Spatial Load Forecasting ..................................................................................................................... 1171
Dave Barger

Including a Combined Fuzzy and Probabilistic Load Model in Transmission Energy Loss Evaluation: Experience at BC Hydro ............. 1174
Wenyan Li; Paul Choudhury

PSPACE POSTER SESSION

Network Pricing for High Voltage Radial Distribution Networks ..................................................................................................... 1182
Yan Zhang; Furong Li

PSCC POSTER SESSION

Compact S-Boxes in Wireless SCADA for Offshore Wind Farms ........................................................................................................ 1187
Xian Liu

Performance of Optical Links in Wireless SCADA for Offshore Wind Farms ....................................................................................... 1192
Xian Liu

PSO POSTER SESSION

A Water Flow Forecasting for Dam Using Neural Networks and Regression Models ......................................................................... 1197
Toshihisa Egawa; Kazuo Saeki; Yoshinori Ichikawa; Tatsuya Itaku; Tetsuro Matsui; Yasushi Shikagawa

Smart Grid Communication Requirements for the High Voltage Power System .............................................................................. 1203
Prashant Kamal; Anjan Bose

Principal Components Fault Location Based on WAMS/PMU Measure System ................................................................. 5787

Zengfeng Wang, Yangang Zhang, Jinfang Zhang

From Transportation Patterns to Power Demand: Stochastic Modeling of Uncontrolled Domestic Charging of Electric Vehicles ............................................................................................................. 5792

Alicja Lojowska, Dorota Kowalicka, George Papaeftimiou, Lou Van Der Sluis

Impacts of DG on the Operation of Auto-Reclosing Devices in a Power Network ................................................................. 5799

Mona Lisa Njoyzaa, Sunetra Chowdhury, Shyama Pada Chowdhury

Transmission Congestion Management Through Optimal Transmission Switching ................................................................. 5807

Mohitab Khanhavadii, Hassan Ghaved

Indian Electricity Grids: A Decade of Reformation and Roadmap Ahead ................................................................................... 5812

S. R. Narasimhan, Pushpa Seshadri, M. G. Raoot, S. A. Khaparde

Data Integrity Attack and Its Impacts on Voltage Control Loop in Power Grid ................................................................. 5818

Sudharrth Sridhar, G. Manimaran

Estimation and Characteristic Analysis of Aggregated Generation of Geographically Distributed Wind Farms ........................... 5824

Jiang Wu, Xiaohong Guan, Xiaoxin Zhou, Yuxun Zhou

Quantifying Short-Term Wind Power Variability .......................................................................................................... 5830

Thekla Boutsika, S. Santosso

Object-Oriented 3-Phase Distributed Dynamic State Estimator .............................................................................................. 5837

Ranke Huang, Evangelos Farantatos, George J. Cokkinides, A. P. Sakis Meliopoulos, Bruce Fardanesh, George Stefopoulos

PSO PAPER SESSION

Patterns and Practices for CIM Applications ...................................................................................................................... 5845

Brahul Khare, Mostafa Khadem, Sainath Moorty, Kittipong Methaprayoon, Jun Zhu

Direct Load Control for Wind Power Integration ................................................................................................................. 5853

Junji Kondoh

Two-Stage Splitting Control Design for Large Scale Power Systems .................................................................................. 5861

Ming Jin
Island Grid Modeling and Validation Using Single Phase Phasor Measurement Data ................................................................. 5868
Lang Chen; Mital Gandhi; James Hurtt; Penn Markham; Yingchen Zhang; Yilu Liu

An Approach for Demand Response to Alleviate Power System Stress Conditions ................................................................. 5875
Shengnan Shao; Manisa Pipattanasomporn; Safiur Rahman

Power System Islanding Detection and Identification Using Topology Approach and Decision Tree ............................................. 5882
Rui Sun; Zhongyu Wu; Virgilio Centeno

Black Start Capability Assessment in Power System Restoration .................................................................................................. 5888
Wei Sun; Chen-Ching Liu; Shanshan Liu

Service Restoration in Balanced and Unbalanced Distribution Systems with High DG Penetration ................................................... 5895
Aboelsood Zidan; Ehab El-Saadany

RELAYING SESSION 4

A Novel CT Saturation Identification Scheme for Differential Protection of Generators ............................................................... 5903
Xiangning Lin; Zhiqian Bo

A Morphological Scheme for the Correction of CT Saturation Waveforms .................................................................................. 5907
T. Y. Ji; Q. H. Wu; W. H. Tang; L. Jiang

Fast Identification of Power Transformer Magnetizing Inrush Currents Based on Mathematical Morphology and ANN .......................................................... 5914
D. Y. Shi; J. Buse; Q. H. Wu; L. Jiang; Y. S. Xue

Voltage Sag Data Utilization for Distribution Fault Location ....................................................................................................... 5920
Saeed Lotfifard; Mladen Kezunovic; Mirrasoul J. Mousavi

Investigation of Various Options to Avoid False Tripping of a Primary Distribution Feeder: Part II - Solution Techniques ........................................................................................................ 5921
Om P. Dahal; Sukumar M. Brahma; Satish J. Ranade; Robert J. Malahowski

SMART GRID

One Day Smart Grid Supersession - Analytics and Integration .................................................................................................. 5929
Edwin Liu

WIDE AREA MEASUREMENTS

Dynamic Performance Test of Single-Phase Phasor Measurement Units ....................................................................................... 5934
Zhencui Lin; Yong Liu; Yong Jia; Yingchen Zhang; Tao Xue; Yilu Liu; Fushuan Wen

Smart Clocks Have a Hand in the Smart Grid ............................................................................................................................. 5941
Jeffrey Fletcher; M. Chaluvadi; Dhananjay Anand; J. Amelot; Y. Li-Baboud; J. Moyne

Optimal PMU Placement in a Power Network for Full System Observability ............................................................................. 5947
Abdul Aziz Fish; Sunetra Chowdhury; Shyama Pada Chowdhury

Development and Implementation of a Phasor Measurement Unit for Real-Time Monitoring, Control and Protection of Power Systems .............................................................................................................. 5955
Vahid Salehi Pour Mehr; Ali Mazloomzadeh; Osama Mohammed
