2011 33rd International Conference on Software Engineering

(ICSE 2011)

Honolulu, Hawaii, USA
21 – 28 May 2011

Pages 1-620
## Technical / Research Track

### Testing the Waters I
Andrea Arcuri and Lionel C. Briand — *Simula Research Laboratory, Norway*  
Page: 1

### aComment: Mining Annotations from Comments and Code to Detect Interrupt Related Concurrency Bugs
Lin Tan, Yuanyuan Zhou, and Yoann Padioleau — *University of Waterloo, Canada; UC San Diego, USA; Facebook Inc., USA*  
Page: 11

### Camouflage: Automated Anonymization of Field Data
James Clause and Alessandro Orso — *University of Delaware, USA; Georgia Institute of Technology, USA*  
Page: 21

### Surfing the Dependability Wave
A Lightweight Code Analysis and its Role in Evaluation of a Dependability Case  
Joseph P. Near, Aleksandar Milicevic, Eunsuk Kang, and Daniel Jackson — *Massachusetts Institute of Technology, USA*  
Page: 31

Towards Quantitative Software Reliability Assessment in Incremental Development Processes  
Toshiya Fujii, Tadashi Dohi, and Takaji Fujiwara — *Hiroshima University, Japan; Fujitsu Quality Laboratory, Japan*  
Page: 41

The Impact of Fault Models on Software Robustness Evaluations  
Stefan Winter, Constanttin Sărbu, Neeraj Suri, and Brendan Murphy — *TU Darmstadt, Germany; Microsoft Research, UK*  
Page: 51

### Refactoring Your Lei I
Transformation for Class Immutability  
Fredrik Kjolstad, Danny Dig, Gabriel Acevedo, and Marc Snir — *University of Illinois at Urbana-Champaign, USA*  
Page: 61

Refactoring Java Programs for Flexible Locking  
Max Schäfer, Manu Sridharan, Julian Dolby, and Frank Tip — *Oxford University, UK; IBM Research Watson, USA*  
Page: 71

Refactoring Pipe-like Mashups for End-User Programmers  
Kathryn T. Stolee and Sebastian Elbaum — *University of Nebraska-Lincoln, USA*  
Page: 81

### Comprehending the Drift I
Mining Message Sequence Graphs  
Sandeep Kumar, Siau Cheng Khoo, Abhik Roychoudhury, and David Lo — *National University of Singapore, Singapore; Singapore Management University, Singapore*  
Page: 91

Automatically Detecting and Describing High Level Actions within Methods  
Giriprasad Sridhara, Lori Pollock, and K. Vijay-Shanker — *University of Delaware, USA*  
Page: 101

Portfolio: Finding Relevant Functions and Their Usages  
Collin McMillan, Mark Grechanik, Denys Poshylvanyk, Qing Xie, and Chen Fu — *College of William and Mary, USA; Accenture Technology Lab, USA*  
Page: 111

</table>
Outrigger Models and Clones

Model Projection: Simplifying Models in Response to Restricting the Environment
Kelly Androutsopoulos, David Binkley, David Clark, Nicolas Gold, Mark Harman, Kevin Lano, and Zheng Li — University College London, UK; Loyola University Maryland, USA; King’s College London, UK

MeCC: Memory Comparison-based Clone Detector
Heejung Kim, Yungbum Jung, Sunghun Kim, and Kwankeun Yi — Seoul National University, South Korea; Hong Kong University of Science and Technology, China

Frequency and Risks of Changes to Clones
Nils Göde and Rainer Koschke — University of Bremen, Germany

Surfer Model Checking
Symbolic Model Checking of Software Product Lines
Andreas Classen, Patrick Heymans, Pierre-Yves Schobbens, and Axel Legay — University of Namur, Belgium; IRISA/INRIA Rennes, France; University of Liège, Belgium

Verifying Multi-threaded Software using SMT-based Context-Bounded Model Checking
Lucas Cordeiro and Bernd Fischer — University of Southampton, UK

Run-Time Efficient Probabilistic Model Checking
Antonio Filieri, Carlo Ghezzi, and Giordano Tamburrelli — Politecnico di Milano, Italy

Comprehending the Drift II
Non-Essential Changes in Version Histories
David Kawrykow and Martin P. Robillard — McGill University, Canada

Aspect Recommendation for Evolving Software
Tung Thanh Nguyen, Hung Viet Nguyen, Hoan Anh Nguyen, and Tien N. Nguyen — Iowa State University, USA

Identifying Program, Test, and Environmental Changes That Affect Behaviour
Reid Holmes and David Notkin — University of Waterloo, Canada; University of Washington, USA

Testing the Waters II
Program Abstractions for Behaviour Validation
Guido de Caso, Víctor Braberman, Diego Garbervetsky, and Sebastián Uchitel — Universidad de Buenos Aires, Argentina; Imperial College London, UK

Programs, Tests, and Oracles: The Foundations of Testing Revisited
Matt Staats, Michael W. Whalen, and Mats P. E. Heimdahl — University of Minnesota, USA

RACEZ: A Lightweight and Non-Invasive Race Detection Tool for Production Applications
Tianwei Sheng, Neil Vachharajani, Stephane Eranian, Robert Hundt, Wenguang Chen, and Weimin Zheng — Tsinghua University, China; Google Inc., USA

Riding the Design Wave II
Detecting Software Modularity Violations
Sunny Wong, Yuanfang Cai, Miryung Kim, and Michael Dalton — Drexel University, USA; University of Texas at Austin, USA

Feature Cohesion in Software Product Lines: An Exploratory Study
Sven Apel and Dirk Beyer — University of Passau, Germany; Simon Fraser University, Canada

Leveraging Software Architectures to Guide and Verify the Development of Sense/Compute/Control Applications
Damien Cassou, Emilie Ballard, Charles Consel, and Julia Lawall — University of Bordeaux, France; INRIA, France; DIKU, Denmark; LIP6, France

Refactoring Your Lei II
Refactoring to Role Objects
Friedrich Steimann and Fabian Urs Stolz — Fernuniversität in Hagen, Germany; Volkswohl Bund Versicherungen, Germany

Supporting Professional Spreadsheet Users by Generating Leveled Dataflow Diagrams
Felienne Hermans, Martin Pinzger, and Arie van Deursen — Delft University of Technology, Netherlands
Reverse Engineering Feature Models
Steven She, Rafael Lotufo, Thorsten Berger, Andrzej Wasowski, and Krzysztof Czarnecki — University of Waterloo, Canada; University of Leipzig, Germany; IT University of Copenhagen, Denmark .................................................. 461

Empirical Luau II
Empirical Assessment of MDE in Industry
John Hutchinson, Jon Whittle, Mark Rouncefield, and Steinar Kristoffersen — Lancaster University, UK; Østfold University College, Norway; Møreforskning Molde AS, Norway .............................................. 471

Dealing with Noise in Defect Prediction
Sunghun Kim, Hongyu Zhang, Rongxin Wu, and Liang Gong — Hong Kong University of Science and Technology, China; Tsinghua University, China ................................................................. 481

Ownership, Experience and Defects: A Fine-Grained Study of Authorship
Foyzur Rahman and Premkumar Devanbu — UC Davis, USA .................................................................................. 491

Program Surfing II
Interface Decomposition for Service Compositions
Domenico Bianculli, Dimitra Giannakopoulou, and Corina S. Păsăreanu — University of Lugano, Switzerland; NASA Ames Research Center, USA; Carnegie Mellon Silicon Valley, USA ....................................................... 501

Unifying Execution of Imperative and Declarative Code
Aleksandar Milicevic, Derek Rayside, Kuat Yessenov, and Daniel Jackson — Massachusetts Institute of Technology, USA ............................................................... 511

Always-Available Static and Dynamic Feedback
Michael Bayne, Richard Cook, and Michael D. Ernst — University of Washington, USA ..................................................... 521

Comprehending the Drift III
Improving Requirements Quality using Essential Use Case Interaction Patterns
Massila Kamalrudin, John Hosking, and John Grundy — University of Auckland, New Zealand; Swinburne University of Technology at Hawthorn, Australia .................................................. 531

Understanding Broadcast Based Peer Review on Open Source Software Projects
Peter C. Rigby and Margaret-Anne Storey — University of Victoria, Canada .......................................................... 541

Software Systems as Cities: A Controlled Experiment
Richard Wettel, Michele Lanza, and Romain Robbes — University of Lugano, Switzerland; University of Chile, Chile .......................................................... 551

Web Surfing
Automated Cross-Browser Compatibility Testing
Ali Mesbah and Mukul R. Prasad — University of British Columbia, Canada; Fujitsu Laboratories of America, USA .......... 561

A Framework for Automated Testing of JavaScript Web Applications
Shay Artzi, Julian Dolby, Simon Holm Jensen, Anders Møller, and Frank Tip — IBM Research, USA; Aarhus University, Denmark ........................................................................................................... 571

Coalescing Executions for Fast Uncertainty Analysis
William N. Sumner, Tao Bao, Xiangyu Zhang, and Sunil Prabhakar — Purdue University, USA ........................................ 581

Testing the Waters III
Mining Parametric Specifications
Choonghwan Lee, Feng Chen, and Grigore Roşu — University of Illinois at Urbana-Champaign, USA .......... 591

Estimating Footprints of Model Operations
Cédric Jeanneret, Martin Glinz, and Benoit Baudry — University of Zurich, Switzerland; IRISA, France .......... 601

Precise Identification of Problems for Structural Test Generation
Xusheng Xiao, Tao Xie, Nikolai Tillmann, and Jonathan de Halleux — North Carolina State University, USA; Microsoft Research, USA .................................................................................. 611
Keynotes

Interactivity, Continuity, Sketching, and Experience (Keynote Abstract)
Kumiyo Nakakoji — Software Research Associates Inc., Japan ................................. 621

Exciting New Trends in Design Thinking (Keynote Abstract)
Bill Dresselhaus — DRESSELHAUSgroup Inc., USA/Korea ................................. 622

Software Engineering in Practice

Empirical Software Engineering
A Case Study of Measuring Process Risk for Early Insights into Software Safety
Lucas Layman, Victor R. Basili, Marvin V. Zelkowitz, and Karen L. Fisher — Fraunhofer CESE, USA; University of Maryland, USA; NASA Goddard Spaceflight Center, USA .................................................. 623

Model-Driven Engineering Practices in Industry
John Hutchinson, Mark Rouncefield, and Jon Whittle — Lancaster University, UK .................................................. 633

SORASCS: A Case Study in SOA-based Platform Design for Socio-Cultural Analysis
Bradley Schmerl, David Garlan, Vishal Dwivedi, Michael W. Bigrigge, and Kathleen M. Carley — CMU, USA ................................. 643

Industry Software Architecture
A Method for Selecting SOA Pilot Projects Including a Pilot Metrics Framework
Liam O’Brien, James Gibson, and Jon Gray — CSIRO, Australia; ANU, Australia; NICTA, Australia .................................................. 653

Architecture Evaluation without an Architecture: Experience with the Smart Grid
Rick Kazman, Len Bass, James Ivers, and Gabriel A. Moreno — SEI/CMU, USA; University of Hawaii, USA .................................................. 663

Bringing Domain-Specific Languages to Digital Forensics
Jeroen van den Bos and Tjis van der Storm — Netherlands Forensic Institute, Netherlands; Centrum Wiskunde en Informatica, Netherlands .................................................. 671

Software Engineering at Large
Building and Using Pluggable Type-Checkers
Werner Dietl, Stephanie Dietzel, Michael D. Ernst, Kivanç Muşlu, and Todd W. Schiller — University of Washington, USA .................................................. 681

Deploying CogTool: Integrating Quantitative Usability Assessment into Real-World Software Development
Rachel Bellamy, Bonnie E. John, and Sandra Kogan — IBM Research Watson, USA; CMU, USA; IBM Software Group, USA .................................................. 691

Experiences with Text Mining Large Collections of Unstructured Systems Development Artifacts at JPL
Daniel Port, Allen Nikora, Jairus Hihn, and LiGuo Huang — University of Hawaii, USA; Jet Propulsion Laboratory, USA; Southern Methodist University, USA .................................................. 701

Software Metrics
An Evaluation of the Internal Quality of Business Applications: Does Size Matter?
Bill Curtis, Jay Sappidi, and Jitendra Subramanyam — CAST, USA .................................................. 711

Characterizing the Differences Between Pre- and Post- Release Versions of Software
Paul Luo Li, Ryan Kivett, Zhiyuan Zhan, Sung-eok Jeon, Nachiappan Nagappan, Brendan Murphy, and Andrew J. Ko — Microsoft Inc., USA; Microsoft Research, USA; University of Washington, USA .................................................. 716

Why Software Quality Improvement Fails (and How to Succeed Nevertheless)
Jonathan Streit and Markus Pizka — itesra GmbH, Germany .................................................. 726

Software Testing and Analysis
Code Coverage Analysis in Practice for Large Systems
Yoram Adler, Noam Behar, Orna Raz, Onn Shehory, Nadav Steindler, Shmuel Ur, and Aviad Zlotnick — IBM Research Haifa, Israel; Microsoft, Israel; Shmuel Ur Innovation, Israel .................................................. 736

Practical Change Impact Analysis Based on Static Program Slicing for Industrial Software Systems
Mithun Acharya and Brian Robinson — ABB Corporate Research, USA .................................................. 746
Value-Based Program Characterization and Its Application to Software Plagiarism Detection
Yoon-Chan Jhi, Xinran Wang, Xiaoji Jia, Sencun Zhu, Peng Liu, and Dinghao Wu — Pennsylvania State University, USA; Chinese Academy of Sciences, China .......................................................... 756

Tools and Environments
A Comparison of Model-based and Judgment-based Release Planning in Incremental Software Projects
Hans Christian Benestad and Jo E. Hannay — Simula Research Laboratory, Norway .................................................. 766

An Industrial Case Study on Quality Impact Prediction for Evolving Service-Oriented Software
Heiko Koziolek, Bastian Schlich, Carlos Bilich, Roland Weiss, Steffen Becker, Klaus Krogmann, Mircea Trifu, Raffaela Mirandola, and Anne Koziolek — ABB Corporate Research, Germany; University of Paderborn, Germany; FZI, Germany; Politecnico di Milano, Italy; KIT, Germany .......................................................... 776

Enabling the Runtime Assertion Checking of Concurrent Contracts for the Java Modeling Language
Wladimir Araujo, Lionel C. Briand, and Yvan Labiche — Juniper Networks, Canada; Simula Research Laboratory, Norway; University of Oslo, Norway; Carleton University, Canada .................................................. 786

New Ideas and Emerging Results

Collaboration
Perspectives of Delegation in Team-Based Distributed Software Development over the GENI Infrastructure (NIER Track)
Pierre F. Tiako — Langston University, USA; Tiako University, USA .......................................................... 796

The Hidden Experts in Software-Engineering Communication (NIER Track)
Irwin Kwan and Daniela Damian — University of Victoria, Canada .......................................................... 800

How Do Programmers Ask and Answer Questions on the Web? (NIER Track)
Christoph Treude, Ohad Barzilay, and Margaret-Anne Storey — University of Victoria, Canada; Tel-Aviv University, Israel .......................................................... 804

Tools
Sketching Tools for Ideation (NIER Track)
Rachel Bellamy, Michael Desmond, Jacquelyn Martino, Paul Matchen, Harold Ossher, John Richards, and Cal Swart — IBM Research Watson, USA .......................................................... 808

Digitally Annexing Desk Space for Software Development (NIER Track)
John Hardy, Christopher Bull, Gerald Kotonya, and Jon Whittle — Lancaster University, UK .......................................................... 812

Information Foraging as a Foundation for Code Navigation (NIER Track)
Nan Niu, Anas Mahmoud, and Gary Bradshaw — Mississippi State University, USA .......................................................... 816

Tools & Languages
Identifying Method Friendships to Remove the Feature Envy Bad Smell (NIER Track)
Rocco Oliveto, Malcom Gethers, Gabriele Bavota, Denys Poshovsky, and Andrea De Lucia — University of Molise, Italy; College of William and Mary, USA; University of Salerno, Italy .......................................................... 820

The Code Orb – Supporting Contextualized Coding via At-a-Glance Views (NIER Track)
Nicolas Lopez and André van der Hoek — UC Irvine, USA .......................................................... 824

Permission-Based Programming Languages (NIER Track)
Jonathan Aldrich, Ronald Garcia, Mark Hahnemberg, Manuel Mohr, Karl Naden, Darpan Saini, Sven Stork, Joshua Sunshine, Éric Tanter, and Roger Wolff — CMU, USA; Karlsruhe Institute of Technology, Germany; University of Chile, Chile .......................................................... 828

Process
Toward a Better Understanding of Tool Usage (NIER Track)
Alberto Sillitti, Giancarlo Succi, and Jelena Vlasenko — Free University of Bozen, Italy .......................................................... 832

Characterizing Process Variation (NIER Track)
Borislava I. Simidchieva and Leon J. Osterweil — University of Massachusetts at Amherst, USA .......................................................... 836
Blending Freeform and Managed Information in Tables (NIER Track)
Nicolas Mangano, Harold Ossher, Ian Simmonds, Matthew Callery, Michael Desmond, and Sophia Krasikov — UC Irvine, USA; IBM Research Watson, USA ........................................... 840

Design and Implementation of a Data Analytics Infrastructure in Support of Crisis Informatics Research (NIER Track)
Kenneth M. Anderson and Aaron Schram — University of Colorado, USA .................................................. 844

Requirements
A Domain Specific Requirements Model for Scientific Computing (NIER Track)
Yang Li, Nitesh Narayan, Jonas Helming, and Maximilian Koegel — TU München, Germany .............................. 848
CREWW - Collaborative Requirements Engineering with Wii-Remotes (NIER Track)
Felix Bott, Stephan Diehl, and Rainer Lutz — University of Trier, Germany ................................................... 852
Learning to Adapt Requirements Specifications of Evolving Systems (NIER Track)
Rafael V. Borges, Artur d’Avila Garcez, Luis C. Lamb, and Bashar Nuseibeh — City University London, UK; UFRGS, Brazil; The Open University, UK; Lero, Ireland ................................................. 856
Towards Overcoming Human Analyst Fallibility in the Requirements Tracing Process (NIER Track)
David Cuddeback, Alex Dekhtyar, Jane Huffman Hayes, Jeff Holden, and Wei-Keat Kong — California Polytechnic State University, USA; University of Kentucky, USA .............................................. 860

Verification 1
Positive Effects of Utilizing Relationships Between Inconsistencies for more Effective Inconsistency Resolution (NIER Track)
Alexander Nöhrer, Alexander Reder, and Alexander Egyed — Johannes Kepler University, Austria .................... 864
Matching Logic: A New Program Verification Approach (NIER Track)
Grigore Roşu and Andrei Ştefănescu — University of Illinois at Urbana-Champaign, USA ............................ 868

Testing
Model-based Performance Testing (NIER Track)
Cornel Barna, Marin Litoiu, and Hamoun Ghanbari — York University, Canada ............................................. 872
Tuple Density: A New Metric for Combinatorial Test Suites (NIER Track)
Baiqiang Chen and Jian Zhang — Chinese Academy of Sciences, China .................................................... 876
Search-Enhanced Testing (NIER Track)
Colin Atkinson, Oliver Hummel, and Werner Janjic — University of Mannheim, Germany ............................ 880

Testing & Debugging
Fuzzy Set-based Automatic Bug Triaging (NIER Track)
Ahmed Tamrawi, Tung Thanh Nguyen, Jafar Al-Kofahi, and Tien N. Nguyen — Iowa State University, USA ............. 884
Exploiting Hardware Advances for Software Testing and Debugging (NIER Track)
Mary Lou Soffa, Kristen R. Walcott, and Jason Mars — University of Virginia, USA ...................................... 888
Better Testing Through Oracle Selection (NIER Track)
Matt Staats, Michael W. Whalen, and Mats P. E. Heimdahl — University of Minnesota, USA .......................... 892

Program Analysis 1
Tracking Data Structures for Postmortem Analysis (NIER Track)
Xiao Xiao, Jinguo Zhou, and Charles Zhang — Hong Kong University of Science and Technology, Hong Kong .... 896
Iterative Context-Aware Feature Location (NIER Track)
Xin Peng, Zhenchang Xing, Xi Tan, Yijun Yu, and Wenyun Zhao — Fudan University, China; National University of Singapore, Singapore; The Open University, UK ................................................. 900
A Study of Ripple Effects in Software Ecosystems (NIER Track)
Romain Robbes and Mircea Lungu — University of Chile, Chile; University of Bern, Switzerland ...................... 904
Design Traceability

Tracing Architectural Concerns in High Assurance Systems (NIER Track)
Mehdi Mirakhorli and Jane Cleland-Huang — DePaul University, USA 908

A Combination Approach for Enhancing Automated Traceability (NIER Track)
Xiaofan Chen, John Hosking, and John Grundy — University of Auckland, New Zealand; Swinburne University of Technology at Melbourne, Australia 912

Capturing Tacit Architectural Knowledge Using the Repertory Grid Technique (NIER Track)
Dan Tofan, Matthias Galster, and Paris Avgeriou — University of Groningen, Netherlands 916

Modeling (or not)

Flexible Generators for Software Reuse and Evolution (NIER Track)
Stanislaw Jarzabek and Ha Duy Trung — National University of Singapore, Singapore 920

The Lazy Initialization Multilayered Modeling Framework (NIER Track)
Fahad R. Golra and Fabien Dagnat — Université Européenne de Bretagne, France; Institut Télécom, France 924

Towards Architectural Information in Implementation (NIER Track)
Henrik Bærbak Christensen and Klaus Marius Hansen — Aarhus University, Denmark; University of Copenhagen, Denmark 928

Empirical SE

Topic-based Defect Prediction (NIER Track)
Tung Thanh Nguyen, Tien N. Nguyen, and Tu Minh Phuong — Iowa State University, USA; Posts and Telecommunications Institute of Technology, Vietnam 932

Automated Usability Evaluation of Parallel Programming Constructs (NIER Track)
Victor Pankratius — Karlsruhe Institute of Technology, Germany 936

Data Analytics for Game Development (NIER Track)
Kenneth Hullett, Nachiappan Nagappan, Eric Schuh, and John Hopson — UC Santa Cruz, USA; Microsoft Research, USA; Microsoft Game Studios, USA; Bungie Studios, USA 940

Program Analysis 2

Mining Service Abstractions (NIER Track)
Dionysis Athanasopoulos, Apostolos V. Zarras, Panos Vassiliadis, and Valerie Issarny — University of Ioannina, Greece; INRIA-Paris, France 944

A Software Behaviour Analysis Framework Based on the Human Perception Systems (NIER Track)
Heidar Pirzadeh and Abdelwahab Hamou-Lhadj — Concordia University, Canada 948

Dynamic Shape Analysis of Program Heap using Graph Spectra (NIER Track)
Muhammad Zubair Malik — University of Texas at Austin, USA 952

Program Analysis: From Qualitative Analysis to Quantitative Analysis (NIER Track)
Sheng Liu and Jian Zhang — Chinese Academy of Sciences, China 956

Verification 2

Diagnosing New Faults Using Mutants and Prior Faults (NIER Track)
Syed Shariyar Murtaza, Nazim Madhavji, Mechelle Gittens, and Zude Li — University of Western Ontario, Canada; University of West Indies, Barbados 960

Empirical Results on the Study of Software Vulnerabilities (NIER Track)
Yan Wu, Harvey Siy, and Robin Gandhi — University of Nebraska at Omaha, USA 964

Different Angles

Multifractal Aspects of Software Development (NIER Track)
Abram Hindle, Michael W. Godfrey, and Richard C. Holt — UC Davis, USA; University of Waterloo, Canada 968

The American Law Institute’s Principles on Software Contracts and their Ramifications for Software Engineering Research (NIER Track)
James B. Williams and Jens H. Weber-Jahnke — University of Victoria, Canada 972

Toward Sustainable Software Engineering (NIER Track)
Nadine Amsel, Zaid Ibrahim, Amir Malik, and Bill Tomlinson — UC Irvine, USA 976
DemoSurf: Software Analysis and Model Evolution
MT-Scribe: An End-User Approach to Automate Software Model Evolution
Yu Sun, Jeff Gray, and Jules White — University of Alabama at Birmingham, USA; University of Alabama, USA; Virginia Tech, USA

Inconsistent Path Detection for XML IDEs
Pierre Genevès and Nabil Layaida — CNRS, France; INRIA, France

Automated Security Hardening for Evolving UML Models
Jan Jürjens — TU Dortmund, Germany; Fraunhofer ISST, Germany

DemoSun: Dynamic Software Updates and Analysis
JavAdaptor: Unrestricted Dynamic Software Updates for Java
Mario Pukall, Alexander Grebhahn, Reimar Schröter, Christian Kästner, Walter Cazzola, and Sebastian Götz — University of Magdeburg, Germany; Philips-University Marburg, Germany; University of Milano, Italy; University of Dresden, Germany

DyTa: Dynamic Symbolic Execution Guided with Static Verification Results
Xi Ge, Kunal Tankaja, Tao Xie, and Nikolai Tillmann — North Carolina State University, USA; Microsoft Research, USA

Identifying Opaque Behavioural Changes
Reid Holmes and David Notkin — University of Waterloo, Canada; University of Washington, USA

FireDetective: Understanding Ajax Client/Server Interactions
Nick Matthijssen and Andy Zaidman — Delft University of Technology, Netherlands

DemoSky: Software Testing and Quality Assessment
BQL: Capturing and Reusing Debugging Knowledge
Zhongxian Gu, Earl T. Barr, and Zhendong Su — UC Davis, USA

Covana: Precise Identification of Problems in Pex
Xusheng Xiao, Tao Xie, Nikolai Tillmann, and Jonathan de Halleux — North Carolina State University, USA; Microsoft Research, USA

The Quamoco Tool Chain for Quality Modeling and Assessment
Florian Deissenboeck, Lars Heinemann, Markus Herrmannsdoerfer, Klaus Lochmann, and Stefan Wagner — TU München, Germany

ReAssert: A Tool for Repairing Broken Unit Tests
Brett Daniel, Danny Dig, Tihomir Gvero, Vilas Jagannath, Johnston Jiaa, Damion Mitchell, Jurand Nogiec, Shin Hwei Tan, and Darko Marinov — University of Illinois at Urbana-Champaign, USA; EPFL, Switzerland

AutoBlackTest: A Tool for Automatic Black-Box Testing
Leonardo Mariani, Mauro Pezzè, Oliviero Riganelli, and Mauro Santoro — University of Milano Bicocca, Italy; University of Lugano, Switzerland

DemoSand: Computer Supported Cooperative Work and Software Engineering
Using MATCON to Generate CASE Tools That Guide Deployment of Pre-Packaged Applications
Nicolas Mangano, Mitch Dempsey, Nicolas Lopez, and André van der Hoek — UC Irvine, USA

SEREBRO: Facilitating Student Project Team Collaboration
Noah M. Jorgenson, Matthew L. Hale, and Rose F. Gamble — University of Tulsa, USA

StakeSource2.0: Using Social Networks of Stakeholders to Identify and Prioritise Requirements
Soo Ling Lim, Daniela Damian, and Anthony Finkelstein — University College London, UK; University of Victoria, Canada

Miler: A Toolset for Exploring Email Data
Alberto Bacchelli, Michele Lanza, and Marco D’Ambros — University of Lugano, Switzerland

A Demonstration of a Distributed Software Design Sketching Tool
Nicolas Mangano, Mitch Dempsey, Nicolas Lopez, and André van der Hoek — UC Irvine, USA
DemoShore: Software Development and Maintenance

View Infinity: A Zoomable Interface for Feature-Oriented Software Development
Michael Stengel, Janet Feigenspan, Mathias Frisch, Christian Küstner, Sven Apel, and Raimund Dachselt — University of Magdeburg, Germany; University of Marburg, Germany; University of Passau, Germany

CodeTopics: Which Topic am I Coding Now?
Malcom Gethers, Trevor Savage, Massimiliano Di Penta, Rocco Oliveto, Denys Poshvyvanyk, and Andrea De Lucia — College of William and Mary, USA; CMU, USA; University of Sannio, Italy; University of Molise, Italy; University of Salerno, Italy

JDeodorant: Identification and Application of Extract Class Refactorings
Marios Fokaefs, Nikolaos Tsantalis, Eleni Stroulia, and Alexander Chatzigeorgiou — University of Alberta, Canada; University of Macedonia, Greece

Evolve: Tool Support for Architecture Evolution
Andrew McVeigh, Jeff Kramer, and Jeff Magee — Imperial College London, UK

Portfolio: A Search Engine for Finding Functions and Their Usages
Collin McMillan, Mark Grechanik, Denys Poshvyvanyk, Qing Xie, and Chen Fu — College of William and Mary, USA; University of Illinois at Chicago, USA; Accenture Technology Labs, USA

Impact Project Focus Area

Impact of Process Simulation on Software Practice: An Initial Report
He Zhang, Ross Jeffery, Dan Houston, LiGuo Huang, and Liming Zhu — NICTA, Australia; University of New South Wales, Australia; The Aerospace Corporation, USA; Southern Methodist University, USA

Barry W. Boehm and Ricardo Valerdi — University of Southern California, USA; MIT, USA

Symbolic Execution for Software Testing in Practice – Preliminary Assessment
Cristian Cadar, Patrice Godefroid, Sarfraz Khurshid, Corina S. Păsăreanu, Koushik Sen, Nikolai Tillmann, and Willem Visser — Imperial College London, UK; Microsoft Research, USA; University of Texas at Austin, USA; CMU, USA; NASA Ames Research Center, USA; UC Berkeley, USA; Stellenbosch University, South Africa

Technical Briefings

ICSE 2011 Technical Briefings
Gail C. Murphy and Andreas Zeller — University of British Columbia, Canada; Saarland University, Germany

Doctoral Symposium

Mature Phase Extended Abstracts

Exploring, Exposing, and Exploiting Emails to Include Human Factors in Software Engineering
Alberto Bacchelli — University of Lugano, Switzerland

GATE: Game-based Testing Environment
Ning Chen — Hong Kong University of Science and Technology, China

Reuse vs. Maintainability: Revealing the Impact of Composition Code Properties
Francisco Dantas — PUC-Rio, Brazil

Specification Mining in Concurrent and Distributed Systems
Sandeep Kumar — National University of Singapore, Singapore

Detecting Architecturally-Relevant Code Smells in Evolving Software Systems
Isela Macia Bertran — PUC Rio, Brazil

Pragmatic Reuse in Web Application Development
Josip Maras — University of Split, Croatia
Inconsistency Management Framework for Model-Based Development
   Alexander Reder — Johannes Kepler University, Austria ........................................ 1098
Mental Models and Parallel Program Maintenance
   Caitlin Sadowski — UC Santa Cruz, USA ................................................................. 1102
Pragmatic Prioritization of Software Quality Assurance Efforts
   Emad Shihab — Queen’s University, Canada ............................................................ 1106
Directed Test Suite Augmentation
   Zhihong Xu — University of Nebraska-Lincoln, USA ................................................. 1110
Reengineering Legacy Software Products into Software Product Line Based on Automatic Variability Analysis
   Yinxing Xue — National University of Singapore, Singapore ...................................... 1114
1.x-Way Architecture-Implementation Mapping
   Yongjie Zheng — UC Irvine, USA .............................................................................. 1118

Early Phase Extended Abstracts
Using Software Evolution History to Facilitate Development and Maintenance
   Pamela Bhattacharya — UC Riverside, USA ................................................................. 1122
Searching, Selecting, and Synthesizing Source Code
   Collin McMillan — College of William and Mary, USA ............................................. 1124
Tracing Architecturally Significant Requirements: A Decision-Centric Approach
   Mehdi Mirakhorli — DePaul University, USA .............................................................. 1126
Predictable Dynamic Deployment of Components in Embedded Systems
   Ana Petričić — Mälardalen University, Sweden .......................................................... 1128
A Declarative Approach to Enable Flexible and Dynamic Service Compositions
   Leandro Sales Pinto — Politecnico di Milano, Italy .................................................... 1130
A Framework for the Integration of User Centered Design and Agile Software Development Processes
   Dina Salah — University of York, UK ........................................................................ 1132
Improving Open Source Software Patch Contribution Process: Methods and Tools
   Bhuricha Deen Sethanandha — Portland State University, USA ................................ 1134
Systematizing Security Test Case Planning Using Functional Requirements Phrases
   Ben Smith — North Carolina State University, USA ..................................................... 1136
Mining Software Repositories Using Topic Models
   Stephen W. Thomas — Queen’s University, Canada .................................................. 1138

ACM Student Research Competition
Test Blueprint: An Effective Visual Support for Test Coverage
   Vanessa Peña Araya — University of Chile, Chile ......................................................... 1140
A Formal Approach to Software Synthesis for Architectural Platforms
   Hamid Bagheri — University of Virginia, USA ............................................................ 1143
Detecting Cross-browser Issues in Web Applications
   Shauvik Roy Choudhary — Georgia Institute of Technology, USA .............................. 1146
Measuring Subversions: Security and Legal Risk in Reused Software Artifacts
   Julius Davies — University of Victoria, Canada ........................................................... 1149
Building Domain Specific Software Architectures from Software Architectural Design Patterns
   Julie Street Fant — George Mason University, USA .................................................... 1152
Using Impact Analysis in Industry
   Robert Goeritzer — University of Klagenfur, Austria ................................................ 1155
A Decision Support System for the Classification of Software Coding Faults: A Research Abstract
   Billy Kidwell — University of Kentucky, USA ............................................................. 1158
Specification Mining in Concurrent and Distributed Systems
   Sandeep Kumar — National University of Singapore, Singapore ............................... 1161
A Case Study on Refactoring in Haskell Programs
Da Young Lee — North Carolina State University, USA
Build System Maintenance
Shane McIntosh — Queen’s University, Canada
Finding Relevant Functions in Millions of Lines of Code
Collin McMillan — College of William and Mary, USA
Requirements Tracing: Discovering Related Documents through Artificial Pheromones and Term Proximity
Hakim Sultanov — University of Kentucky, USA
An End-User Demonstration Approach to Support Aspect-Oriented Modeling
Yu Sun — University of Alabama at Birmingham, USA
Problem Identification for Structural Test Generation: First Step Towards Cooperative Developer Testing
Xusheng Xiao — North Carolina State University, USA
Role: A Hybrid Automated Test Generation Tool for Java
Sai Zhang — University of Washington, USA
Scalable Automatic Linearizability Checking
Shao Jie Zhang — National University of Singapore, Singapore
Workshop Summaries
Workshop on Cooperative and Human Aspects of Software Engineering (CHASE 2011)
Marcelo Cataldo, Cleidson de Souza, Yvonne Dittrich, Rashina Hoda, and Helen Sharp — Robert Bosch Research, USA; IBM Research, Brazil; IT University of Copenhagen, Denmark; Victoria University of Wellington, New Zealand; The Open University, UK
Fourth International Workshop on Multicore Software Engineering (IWMSE 2011)
Victor Pankratius and Michael Philippsen — Karlsruhe Institute of Technology, Germany; University of Erlangen-Nuremberg, Germany
Workshop on Flexible Modeling Tools (FlexiTools 2011)
Harold Ossher, André van der Hoek, Margaret-Anne Storey, John Grundy, Rachel Bellamy, and Marian Petre — IBM Research Watson, USA; UC Irvine, USA; University of Victoria, Canada; Swinburne University of Technology at Hawthorn, Australia; The Open University, UK
Workshop on Games and Software Engineering (GAS 2011)
Jim Whitehead and Chris Lewis — UC Santa Cruz, USA
Workshop on Software Engineering for Cloud Computing (SECloud 2011)
Chris A. Mattmann, Nenad Medvidovic, T. S. Mohan, and Owen O’Malley — Jet Propulsion Laboratory, USA; University of Southern California, USA; Infosys Technologies, India; Yahoo Inc., USA
Second International Workshop on Software Engineering for Sensor Network Applications (SESEA 2011)
Kurt Geihs, Luca Motolla, Gian Pietro Picco, and Kay Römer — University of Kassel, Germany; Swedish Institute of Computer Science, Sweden; University of Trento, Italy; University of Lübeck, Germany
Seventh International Workshop on Software Engineering for Secure Systems (SESS 2011)
Seok-Won Lee, Mattia Monga, and Jan Jürjens — University of Nebraska-Lincoln, USA; Università degli Studi di Milano, Italy; TU Dortmund, Germany
Fourth Workshop on Refactoring Tools (WRT 2011)
Danny Dig and Don Batory — University of Illinois at Urbana-Champaign, USA; University of Texas at Austin, USA
Second International Workshop on Product Line Approaches in Software Engineering (PLEASE 2011)
Julia Rubin, Goetz Botterweck, Andreas Pleuss, and David M. Weiss — IBM Research Haifa, Israel; Lero, Ireland; University of Limerick, Ireland; Iowa State University, USA
Third International Workshop on Software Engineering in Healthcare (SEHC 2011)
Eleni Stroulia and Kevin Sullivan — University of Alberta, Canada; University of Virginia, USA
Collaborative Teaching of Globally Distributed Software Development: Community Building Workshop (CT-GDSD 2011)
Stuart Faulk, Michal Young, David M. Weiss, and Lian Yu — University of Oregon, USA; Iowa State University, USA; Peking University, China
Fifth International Workshop on Software Clones (IWSC 2011)
James R. Cordy, Katsuro Inoue, Stanislaw Jarzabek, and Rainer Koschke — Queen’s University, Canada; Osaka University, Japan; National University of Singapore, Singapore; University of Bremen, Germany ........................................ 1210

Second International Workshop on Managing Technical Debt (MTD 2011)
Ipek Ozkaya, Philippel Kruchten, Robert L. Nord, and Nanette Brown — SEI/CMU, USA; University of British Columbia, Canada ................................................................. 1212

Sixth International Workshop on Traceability in Emerging Forms of Software Engineering (TEFSE 2011)
Denys Poshvyanych, Massimiliano Di Penta, and Huzefa Kagdi — College of William and Mary, USA; University of Sannio, Italy; Winston-Salem State University, USA ........................................ 1214

Sixth International Workshop on Automation of Software Test (AST 2011)
Howard Foster, Antonia Bertolino, and J. Jenny Li — City University London, UK; ISTI-CNR, Italy; Avaya Research Labs, USA .................................................................................. 1216

Third International Workshop on Principles of Engineering Service-Oriented Systems (PESOS 2011)
Manuel Carro, Dimka Karastoyanova, Grace A. Lewis, and Anna Liu — Universidad Politècnica de Madrid, Spain; University of Stuttgart, Germany; CMU, USA; NICTA, Australia ........................................................................... 1218

Workshop on SHAring and Reusing architectural Knowledge (SHARK 2011)
Paris Avgeriou, Patricia Lago, and Philippe Kruchten — University of Groningen, Netherlands; VU University Amsterdam, Netherlands; University of British Columbia, Canada .................................................................................. 1220

Second International Workshop on Web 2.0 for Software Engineering (Web2SE 2011)
Christoph Treude, Margaret-Anne Storey, Arie van Deursen, Andrew Begel, and Sue Black — University of Victoria, Canada; Delft University of Technology, Netherlands; Microsoft Research, USA; University College London, UK ......................................................... 1222

Workshop on Emerging Trends in Software Metrics (WETSoM 2011)
Giulio Concas, Massimiliano Di Penta, Ewan Tempero, and Hongyu Zhang — University of Cagliari, Italy; University of Sannio, Italy; University of Auckland, New Zealand; Tsinghua University, China ........................................................................... 1224

Fourth International Workshop on Software Engineering for Computational Science and Engineering (SE-CSE 2011)
Jeffrey C. Carver, Roscoe Bartlett, Ian Gorton, Lorin Hochstein, Diane Kelly, and Judith Segal — University of Alabama, USA; Sandia National Laboratories, USA; Pacific Northwest National Laboratory, USA; USC-ISI, USA; Royal Military College, Canada; The Open University, UK ........................................................................... 1226

Third International Workshop on Search-Driven Development: Users, Infrastructure, Tools, and Evaluation (SUITE 2011)
Sushil Bajracharya, Adrian Kuhn, and Yunwen Ye — Black Duck Software, USA; University of Bern, Switzerland; Software Research Associates Inc., Japan ........................................................................... 1228

First Workshop on Developing Tools as Plug-ins (TOPI 2011)
Judith Bishop, David Notkin, and Karin K. Breitman — Microsoft Research, USA; University of Washington, USA; PUC-Rio, Brazil ........................................................................... 1230

SCORE Student Contest

SCORE 2011, the Second Student Contest on Software Engineering
Matteo Rossi and Michal Young — Politecnico di Milano, Italy; University of Oregon, USA ........................................................................... 1232
