2010 IEEE 23rd International Symposium on Computer-Based Medical Systems

(CBMS 2010)

Bentley, Australia
12-15 October 2010
Table of Contents

23rd IEEE International Symposium on Computer-Based Medical Systems
CBMS 2010

Preface ........................................................................................................................................................................... ix
Conference Committees ......................................................................................................................................................... x

Keynotes
Ensembles of Classifiers and Their Application to Bioinformatics Problems ......................................................... 1
Vasile Palade

Trusted Ontology-Based Telemedicine Systems and Real-Time Discoveries ......................................................... 2
Allan K.Y. Wong

Tutorials
Integrating image and text information for biomedical information retrieval ......................................................... 3
Sameer Antani

Stream Computing and its Application to Critical Care .......................................................................................... 4
Carolyn McGregor

Handling Concept Drift in Medical Applications: Importance, Challenges and Solutions ................................. 5
Mykola Pechenizkiy

Knowledge Discovery and Decision Systems in Biomedicine
A Comorbidity-based Recommendation Engine for Disease Prediction .............................................................. 6
Francesco Folino and Clara Pizzuti

Finding Approximate Frequent Patterns in Streaming Medical Data .................................................................... 13
Jessica Lin and Yuan Li

SVM-enabled Prognostic Algorithm for Clinical Decision Making: the Use of CD4 T-cell Level and HIV-1 Viral Load for Guiding Treatment Initiation and Alteration ......................................................... 19
Khairul Azhar Kasmiran, Albert Y Zomaya, Ali Al Mazari and Roger J Garsia

Discovery of Sleep Composition Types using Expectation-Maximization ............................................................. 26
Amro Khasawneh, Sergio Alvarez, Carolina Ruiz, Shivin Misra and Majaz Moonis

Predicting the highest workload in cardiopulmonary test ....................................................................................... 32
Elena Baralis, Tania Cerquitelli, Silvia Chiusano, Vincenzo D’Elia, Riccardo Molinari and Davide Susta

Early Experiences in Mitotic Cells Recognition on HEp-2 Slides ........................................................................... 38
Pasquale Foggia, Gennaro Percannella, Paolo Soda and Mario Vento

Heart Failure Hospitalization Prediction in Remote Patient Management Systems ................................................. 44
Mykola Pechenizkiy, Ekaterina Vasilyeva, Indre Zliobaite, Aleksandra Tesanovic and Goran Manev

Stability of different feature selection methods for selecting protein sequence descriptors in protein solubility classification problem ...................................................................................................... 50
Simon Kocbek, Gregor Stiglic, Igor Pernek and Peter Kokol

</table>
Care pathway records and variance data: enabling research through the use of ontologies

Mark Olive, Alison Lashwood and Tony Solomonides

Technology Enhanced Learning in Medical Education

The pedagogical requirements of patient e-health education to increase health literacy

Kevin Butterworth, Omnia Allam and Alex Gray

An Aboriginal English Ontology Framework for Patient-Practitioner Interview Encounters

David Forbes, Amandeep Sidhu and Joipal Singh

A tool to enhance the sharing of digital health resources – the Healthcare LOM Editor

Stathis Th. Konstantinidis, Panagiotis Bamidis, Daniela Giordano, Eleni Kaldoudi, Costas Pappas and Valerie Smothers

The Benefits and Limitations of Reference Function on PDA Use in Medical Education:

A case study

Rattiporn Luanrattana

Intelligent Patient Management

Using Mixed Phase-type Distributions to Model Patient Pathways

Sally Mclean, Lalit Garg, Maria Barton and Ken Fullerton

Continuous Dynamic Bayesian Networks for Predicting Survival of Ischaemic Heart Disease Patients

Adele Marshall, Laura Hill and Frank Kee

Data preparation for clinical data mining to identify patients at risk of readmission

Erich Teichmann, Eren Demir and Thierry Chaussolet

An Approach to Exploring the Effect of Weather Variations on Chronic Disease Incidence Rate and Potential Changes in Future Health Systems

Muhammad Islam, Thierry Chaussolet, Nazmiye Ozkan and Eren Demir

Automated Generation and Deployment of Clinical Guidelines in the ICU

Femke De Bacquere, Hendrik Moens, Kristof Steurbaut, Kirsten Colpaert, Chris Danneels, Johan Decruyenaere and Filip De Turck

Empowering Data Sources to Manage Clinical Data

Emma Chavez Mora and Gavin Finnie

Telemedicine

Artificial Neural Network for Herbal Ingredient Discoveries

Jackei H. K. Wong, Wilfred W.K. Lin, Allan K.Y. Wong and Tharam S. Dillon

Experimental Evaluation of Query Processing on Encrypted Telemedicine Data

Ling Feng

A Fully Automated System for Retinal Vessel Tortuosity Diagnosis Using Scale Dependent Vessel Tracing and Grading

Qin Li, Jane You, Jinghua Wang, and Allan Wong
Image Informatics in Biomedical Research and Clinical Medicine

Comparative Study of Shape Retrieval using Feature Fusion Approaches ......................................................... 226
Haiying Guan, Sameer Antani, L. Rodney Long and George Thoma

A Parallel Cellular Automata with Label Priors for Interactive Brain Tumor Segmentation .......................... 232
Edward Kim, Tian Shen and Xiaolei Huang

Sensitivity of Volumetric Brain Analysis to Systematic and Random Errors ................................................ 238
Antonios-Konstantinos Thanellas and Mika Pollari

Localized Multiscale Texture Based Retrieval of Neurological Image ............................................................. 243
Sidong Liu, Lei Jing, Weidong Cai, Lingfeng Wen, Stefan Eberl, Michael Fulham and Dagan Feng

Fast Automatic Liver Segmentation Combining Learned Shape Priors with Observed Shape Deviation ........ 249
Marius Erdt, Matthias Kirschner, Sebastian Steger and Stefan Wesarg

A 2D Segmentation Algorithm for the Analysis of TBY-2 Cells ........................................................................ 255
Mariangela De Marco, Vittoria Locato, Paolo Soda and Luca Vollero

“Bag of Keypoints”-Based Biomedical Image Search with Affine Covariant Region Detection and Correlation-Enhanced Similarity Matching ................................................................. 261
Md Mahmudur Rahman, Sameer Antani and George Thoma

Segmentation of leukocyte cells in bone marrow smears ............................................................................... 267
Thorsten Zerfaß, Erik Haßmeyer, Timo Schlarb, and Matthias Elter

Automatic Extraction of Mosaic Patterns in Uterine Cervix Images ............................................................... 273
Zhiyun Xue, Rodney Long, Sameer Antani and George Thoma

Flow simulation in coronary artery models: An investigation of the effect of variable angulations at left coronary artery ................................................................................................................. 279
Thanapong Chaichana, Zhonghua Sun, Supan Tungjitkusolm and Manas Sangworasil

A Content-based Image Retrieval Framework for Multi-Modality Lung Images ............................................. 285
Yang Song, Weidong Cai, Stefan Eberl, Michael J Fulham and Dagan Feng

Protein Spot Detection in 2D-GE Images using Morphological Operators ...................................................... 291
Eleftheria Mylona, Michalis Savelonas, Dimitris Maroulis, Antonia Vlahou and Manousos Makridakis

Fast Dual-Point Hough Transform for Medical Object Recognition .................................................................... 297
Alena Bakulina, Dzmitry Hlindzich and Reinhard Maenner

A New Feature Descriptor Derived From Hilbert Space-Filling Curve to Assist Breast Cancer Classification ........................................................................................................................................ 303
Denise Guliato, Walter Alexandre Alencar de Oliveira and Caetano Traina Jr.

Improving Medical Image Retrieval through Multi-Descriptor Similarity Functions and Association Rules .................................................................................................................................................. 309

Silhouette-based feature selection for classification of medical images ........................................................ 315
Sérgio Francisco da Silva, Bruno Brandoli, Danilo Medeiros Eler, Joao Batista Neto and Agma J. M. Traina
Medical Databases & Information Systems
iCube: A Similarity-Based Data Cube for Medical Images ............................................................. 321
Luana Annibal, Joaquim Felipe, Cristina Dutra de Aguiar Ciferri and Ricardo Ciferri
Evidence/Discovery Based Evolving Ontology (EDBEO) ................................................................. 327
Ehsan Nasiri Khoozani, Omar Hussain, Tharam Dillon and Maja Hadzic
Improving Health Information Access through Social Networking ................................................... 334
Jill Freyne, Slomo Berkovsky, Stephen Kimani, Nilufar Baghaei and Emily Brindal
Evaluating Relationship between Sexuality and Mental Health with the help of Computers ............ 340
Marjan Khajehei and Maja Hadzic

Computer-Aided Diagnosis
A 3D/4D Freehand Ultrasound system for cardiac modelling and analysis .................................. 346
Dzmitry Hlindzich, Aleh Kryvanos, Reinhard Maenner and Christina Doesch
Pre-CAD System for Normal Mammogram Detection using Local Binary Pattern Features .......... 352
Mona Elshinawy, Abdel-Hameed Badawy, Wael Abd-Almageed and Mohamed Chouikha
CAD of Osteoporosis in Vertebrae Using Dual-energy CT ........................................................... 358
Stefan Wesarg, Marius Erdt, Konstantinos Kafchitsas and M. Fawad Khan
Body Landmark Detection for a Fully Automatic AAA Stent Graft Planning Software System ...... 364
Jan Egger, Shaohua Kevin Zhou, Stefan Grosskopf, David Liu, Christian Hopfgartner, Dominik Bernhardt, Christina Biermann, Christopher Nimsky and Bernd Freisleben
Using Ontologies and Probabilistic Networks to Develop a Preventive Stroke Diagnosis System (PSDS) ................................................................................................................................. 370
Alejandro Rodriguez, Miguel Angel Mayer, Giner Alor Hernandez, Juan Miguel Gomez, Guillermo Cortes Robles and Angel Lagares Lemos
Compact Review of Structural and Microstructural Brain Analysis Methods ............................... 378
Antonios-Konstantinos Thanellas and Mika Pollari
Methods for greyscale representation of HEp-2 colour images ..................................................... 383
Ermanno Cordelli and Paolo Soda

Ontologies for Biomedical Systems
Design of a Probabilistic Ontology-based Clinical Decision Support System for Classifying Temporal Patterns in the ICU: a Sepsis Case Study ................................................................. 389
Femke Ongenae, Tom Dhaene, Dominique Benoit, Filip De Turck and Johan Decruyenaere
Using Archetypes and Domain Specific Languages on Development of Ubiquitous Applications to Pervasive Healthcare ......................................................................................................................... 395
Anderson Luiz Menezes, Carlos Eduardo Cirilo, Joao Luis Cardoso De Moraes, Wanderley Lopes de Souza and Antonio Francisco do Prado
Towards Large Scale Modeling and Realization of SNOMED CT in OWL-DL ............................... 401
Michael Li Qing An, Wee Tiong Ang and Rajaraman Kanagasabai
A Framework for Patient Practitioner Information Exchange ......................................................... 408
David Forbes, Amandeep Sidhu and Jaipal Singh
Towards a Methodology for Lipoprotein Ontology

Meifania Chen and Maja Hadzic

e-health

SmartDiet: A Personal Diet Consultant for Healthy Meal Planning

Jen-Hao Hsiao and Henry Chang

A Holistic Framework for Understanding Acceptance of Remote Patient Management (RPM) Systems by Non-Professional Users

Seppo Puuronen, Ekaterina Vasilyeva, Mykola Pechenizkiy and Aleksandra Tesanovic

E-health Modelling for Decision Support: Can technology turn us all into experts?

Jon Avalon, Peter Hayward, Victor Lane and Jim Snaith

An Approach of a Telematics Infrastructure for the German Electronic Health Card

Manuel Zwicker, Juergen Seitz and Nilmini Wickramasinghe

GEROM – On-line virtual environment for postgraduate health care education

Helena Blažun, Peter Kokol

“Mobile Phone” Revolution in Africa as a Key Factor for Transfer of EU Know How for Development of e-Health and Related Intuitive Education

Dusan Soltes

Knowledge-Based & Decision Support Systems

Ontology Based Semantic Recommendations for Discharge Summary Medication Information for Patients

Mehnaz Adnan, Jim Warren and Martin Orr

From Medical Guidelines to Personalized Careflows: the iCareflow Ontological Framework

Rodrigo Bonacin, Marcos Da Silveira and Cédric Pruski

A Framework for Nursing Documentation enabling Integration with EHR and Real-time Patient Monitoring

Jennifer Percival, Carolyn McGregor, Nathan Percival, Rishikesan Kamaleswaran and Sascha Tuuha

PGIS: Electronic Diary Data Integration with GPS Data — Initial Application in Substance-Abuse Patients

Massoud Vahabzadeh, Mustapha Mezghanni, Jia-Ling Lin, David Epstein and Kenzie Preston

Case-based reasoning for assessment and diagnosis of depression in palliative care

Agnar Aamodt, Odd Erik Gundersen, Jon Høvold Loge, Tomasz Szczepanski and Elisabet Wasteson

Integrating User Preference to Similarity Queries over Medical Images Datasets

Mônica R. P. Ferreira, Marcelo Ponciano-Silva, Agma Traina, Caetano Traina Jr., Sandra de Amo, Fabiola Pereira and Richard Chbeir
