2011 Fourth International Conference on the Applications of Digital Information and Web Technologies

(ICADIWT 2011)

Stevens Point, Wisconsin, USA
4-6 August 2011
# TABLE OF CONTENTS

## COMMUNICATION SOFTWARE

Using LINQ Transformation Patterns to Evaluate SQL Queries ................................................................. 1  
*Robert Dollinger, Kent Thomas*

Ranking of New Sponsored Online Ads ........................................................................................................ 7  
*Hamed Sadeghi Neshat*

A Privacy-Aware, End-to-End, CFG-Based Regression Test Selection Framework for Web Services Using Only Local Information ........................................................................................................... 13  
*Michael Ruth, Curtis Rayford Jr.*

A MixIST Image Restoration Algorithm Based on IST .................................................................................... 19  
*Minghu Huang, Hanqiang Cao*

## COMPUTER AND NETWORK SECURITY

Virtualized Hosting: Devising a Security Policy Through Log Analysis .......................................................... 25  
*Dennis C. Guster, Olivia F. Lee, Dustin C. Rogers*

Enhancing Security and Confidentiality in Location-Based Data Encryption Algorithms .................................. 30  
*Rohollah Karimi, Mohammad Kalantari*

## COMPUTER COMMUNICATION

Low Cost Log Statistical Filtering in the Real World: Chained Tokens and Bayesian Filters ............................ 36  
*Russel W. Havens, Chia-Chi Teng*

Accuracy Enhancement in Environment Sound Recognition Using ZC Features and MPEG-7 with Modified K-NN Classifier Feature ........................................................................................................... 41  
*Mubarak Obaid AlQahtani, Abdulaziz S. Almazyad*

Pretreatment for Skeletonization Based on Direction Chain Net ....................................................................... 45  
*Bo Ruan, Lin-ping Du, Li Zeng, Yuan-yuan Zhou*

A Self-Healing Architecture for Web Services Based on Failure Prediction and a Multi Agent System .......... 48  
*Mahmoud Hossein Zadeh, Mir Ali Seyyedi*

Dynamically Reconfigurable User Interface – A Case Study from Health Care Application .......................... 53  
*Kasi Periyasamy, Vinoth Perkinian*

## COMPUTER NETWORKS

Better Prediction of Humidity Using Artificial Neural Network ...................................................................... 59  
*Bimal Dutta, Susanta Mitra*

Exponential Synchronization of Cohen-Grossberg Neural Networks with Diffusion Terms and Delays .......... 65  
*Teng Lv, Weimin He, Ping Yan*

A Local Registration Scheme for Route Optimization in Nested NEMO ....................................................... 70  
*Tianhan Gao, Nan Guo*

Distributed Speech Processing over Wireless Mesh Networks ....................................................................... 75  
*Rajesh M. Hegde, B. S. Manoj*

Saudi Arabia Stock Prices Forecasting Using Artificial Neural Networks ...................................................... 81  
*Sunday Olusanya Olutunji, Mohammad Saad Al-Abmadi, Moustafa Elshafei, Yaser Ahmed Fallatah*

Overlay Network for Personalized Ubiquitous Environment Roaming .......................................................... 87  
*Toru Kobayashi, Masami Ueno, Yoshikatsu Tada*

Comparison of Intraframe and Interframe LSF Quantization in Packet Networks ........................................ 94  
*Fatiha Merazka*
DATA MINING

The Cassiopeia Model: Using Summarization and Clusterization for Semantic Knowledge Management

Marcus V.C. Guelpeli, Ana Cristina Bicharra Garcia, Antonio Horta Branco

Proximity-Based Sentiment Analysis

S.M. Shamimul Hasan, Donald A. Adjeroh

Evaluating Discovered Rules from Association Rules Mining Based on Interestingness Measures Using Fuzzy Expert System

Hamid Eslami Nosratabadi, Sanaz Pourdarab, Ahmad Nadali, Mahdieh Khalilinezhad

DATABASES APPLICATIONS

Extending Vector Space Model for XML Ranking

Weimin He, Teng Lv

INFORMATION NETWORKS

Jibo Yu, Yongxin Zhu, Liang Xia, Meikang Qin, Yuzhuo Fu, Guoguang Rong

INFORMATION RETRIEVAL

Related Paper Recommendation to Support Online-Browsing of Research Papers

Manabu Ohta, Toshihiro Hachiki, Atsuhiro Takasu

Specification and Verification of Timed Automaton Using Meta-Modeling and Graph Grammars

Mohamed El-Kamel Hamdane, Allaoui Chaoui

Dynamic Implicit Strict Partially Ordered Sets

Andrew Chen

Open Issues on Query by Humming

Nauman Ali Khan, Mubashar Mushtaq

Generalized Confidence Interval for R = P(X > Y) of Pareto Distribution and Its Application in Web Performance

Dais George, Sebastian George

Impact of Web Portals on E-Learning

Adeyinka Tella, M.T. Bashorun

PATTERN RECOGNITION

Flexible Process Support by Automatic Aggregation of Implicit and Explicit User Behavior

Thomas Burkhart, Dirk Werth, Peter Loos

Pattern Recognition for Counting of Bounded Bar Steel

Wang Jingchong Chen Hao, Xu Xiaqing

SPAAT-A Modern Tree Based Approach for Sequential Pattern Mining With Minimum Support

C.S. Ashwin, M. Rishigesh, T.M. Shyam Shankar

PERFORMANCE EVALUATION

On Non-Invasive Network Measurement for Emergency Response Wireless Mesh Networks

B.S. Manoj, Bheemarjuna Reddy Tamma, Paul Blair, Ramesh Rao

Author Index
