TABLE OF CONTENTS

VOLUME 1

PLENARY 1 - MONDAY

Molecular Design, Function, and Commercial Application of Shape-Selective Catalysts for the Petrochemical Industry.................................................................................................................................1
Jeffrey S. Beck

CHEM – SESSION 1A

Furanics: Versatile Molecules for Biofuels and Bulk Chemicals Applications ..........................................................................................3
Pieter Imhof, Ana S. Dias, Ed De Jong, Gert-Jan Gruter

Bifunctional Catalyst for the One-step Continuous Synthesis of Exo-tetraydrodicyclopentadiene from Dicyclopentadiene...............................................................................................................................5
Wei Wang, Zhong-Wen Liu, Jian Lu, Zhao-Tie Liu

Lipase-Catalyzed Diacylcerol Production Under Sonochemical Irradiation .................................................................................................7
Rodrigo Octavio M. A. De Souza, Octavio Augusto Ceva Antunes, Ivelize Babicz, Selma G. F. Leite

Mechanistic Factors Influencing Recyclability of Co-Salen Catalysts in the Hydrolytic Kinetic Resolution of Epichlorohydrin..........................................................................................................................9
Surbhi Jain, Robert J. Davis, Christopher W. Jones, Marcus Weck

Tunable Cooperative Effects in Multi-Center Catalysis for the Synthesis of New Materials. Binuclear Phenoxyiminato Polymerization Catalysts ....................................................................................................................11
Mike R. Salata, Brandon A. Rodriguez, Massimilano Delferro, Tobin J. Marks

ENERGY – SESSION 1A

Dehydration of Glucose into HMF by Lewis Acidic Metal Chlorides: Development of a Heterogeneous MECl₃/Ionic Liquid SBA-15 Catalyst ..........................................................................................13
Emiel J. M. Hensen, Volkan Degirmenci, Pieter Magusin

Acid-Catalyzed Monosaccharide Dehydration in the Condensed Phase ..................................................................................................................15
Basak Cinlar, Brent H. Shanks

Global Energy Challenges and Role of Catalysis for Sustainable Energy Development ..................................................................................17

Hydrogenolysis of Glycerol to Propanediols over Multifunctional Catalysts .................................................................................................19
Abdullah Alhanash, Elena F. Kozhevnikova, Ivan V. Kozhevnikov

Catalytic Deoxygenation of Free Fatty Acids over Pd/C.................................................................................................................................21
Jeremy G. Immer, H. Henry Lamb

Catalytic Conversion of Carbohydrates to Mono-functional Hydrocarbons followed by Catalytic C-C Coupling..................................................23
Edward L. Kunke, Elif I. Gurbuz, Hilde J. Venvik, Dante A. Simonetti, Ryan M. West, Juan Carlos Serrano-Ruiz, Christian A. Guertner, James A. Dumesic

ENV – SESSION 1A

Diesel NOₓ Afttreatment Catalytic Technologies: Towards a Convergence of the Catalytic Chemistry? .................................................................25
Pio Forzatti, Luca Lietti, Isabella Nova, Enrico Tronconi

Dynamic Behavior of Fe-Zeolite Urea-SCR Catalysts .................................................................................................................................27
Aleksyey Yezerets, Krishna Kamasamudram

Mechanistic Evaluation of the Low-Temperature Activity of Transition Metal Exchanged Zeolite SCR Catalysts ..................................................29
Joseph M. Fedeiko, Bin Chen, Hui-Ying Chen

A Microcalorimeter Study of Ammonia Adsorption over Cu Beta Zeolite for Urea SCR Applications ........................................................................31
Norman Wilken, Neal W. Currier, Krishna Kamasamudram, Junhui Li, Aleksyey Yezerets, Louise Olsson

Modeling and Experimental Studies of HNCO as a Reactant for NOₓ Control .................................................................................................33
Maruthi N. Devarakonda, Russell G. Tonkyn, Diana N. Tran, Jonathan L. Male

Mechanistic Kinetics-based Simulation of Automotive NH₃ Oxidation Catalysts ..........................................................................................35
Alexander F. Scheuer, Anke Schuler, Alfons Drochner, Herbert Vogel, Martin Vostmeier, Jürgen Gieshoff

FUND – CATALYSIS ON AU – SESSION 1A

Au/ZnO and ZnO Catalysts in Methanol Synthesis: A Steady-state, Transient Kinetic and DRIFTS Study ..............................................................37
Martin Muhler, Kevin Kahler, Jennifer Strunk, M. Rohe, M. Comotti, F. Schuth

Operando Infrared Spectroscopy of Low-Temperature CO Oxidation on Au/SiO₂ Catalyst ........................................................................39
Zili Wu, Sheng Dai, Steven H. Overbury
Reaction-Relevant Gold Structures in Au-CeO₂ and Au-Fe₂O₃ Catalysts and Structure Sensitivity of the Water-Gas Shift Reaction ................................................................. 41
Yangping Zhai, Ruí Si, Weiling Deng, Maria Plytani-Stefanopoulou, Anatoly Frenkel, Steven R. Overbury, George Flynn, Kwang Rim

Tuning and Understanding Oxygen Activation by Gold: Synthesis and Characterization of New Au and Ni-Au Catalysts .............................................................................................................. 43
Bert D. Chandler, Cormac Long, Rachel J. Korkosz, Heather Hartshorn, Christopher J. Purser

Highly Active CeO₂-supported Au Clusters for Butadiene Hydrogenation ............................................................................................................. 45
Emiel J. M. Hensen, Yejun Guan

A Transient Kinetic Analysis of the Epoxidation of Propene over Gold-Titania Catalysts .................................................................................................................. 47
T. Alexander Nijhuis, Elena Sacaliluc-Parvulescu, Bert M. Weckhuysen, Jaap C. Schouten

Microkinetics of the Water-Gas Shift Reaction Over Pt and Au Supported Dual-Site Catalysts ......................................................... 49
Olivier Thonin, Yeas Schuurman, Priscilla Avenir, Fabrice Diehl

FUND – THEORY IN CATALYSIS – SESSION 2A

Bridging the Environment Gap using First-Principles-Based Catalyst Modeling .............................................................................................................................. 51
William F. Schneider, Rachel B. Geiman, Abhijit Phanak, David Schmit, Hangyou Wang, Ye Xu

Measuring the Electronic Structure of Alloy Materials and Relating it to their Catalytic Performance ........................................... 53
Liang Qi, Jia Li

First-Principles Studies of Surface Oxide Formation on Pt Electrodes ........................................................................................................... 55
Danielle J. Hansgen, Jingguang G. Chen, Dionistios G. Vlachos

Theoretical and Experimental Studies of Ammonia Decomposition for Hydrogen Production ................................................................................................................ 57
Peter A. Ferris, Dante A. Simoneit, Shampa Kondia, James A. Dumesic, Jeni K. Norskov, Manus Marvillas

Catalytic Ethanol Decomposition: a Case Study in Reducing Brute-Force DFT Work for Surface Reactivity by Combining BEP and Scaling Relations ........................................................................................................ 59
Yusuke Mi Kami, Haruhiko Mori, Shuauke Arita, Takato Mitsudome, Tomoo Mizugaki, Koichiro Iijukawa, Kiyotomo Kameda

Mechanistic Studies of the Synthesis and Decomposition of Ethanol on Rh Catalysts ........................................................................................................ 61
Yongman Choi, Ping Liu

Oxidative Dehydrogenation of Propylene on Small Pt Clusters: A Density Functional Study ........................................................................................................ 63
Larry A. Curtiss, Jeff Grewley, Paul C. Redfern, Peter Zapol, Faisal Mehmood, Stefan Vajda

CHEMICALS/ENERGY – MONDAY AFTERNOON

Synergy in Bimetallic Al-Zr-Ti-D-I ................................................................. 65
Selvedin Talatovic, Anand Ramanathan, Ulf Hansfeld

Pd Supported on ZnAl₂O₃ as Catalyst for One-Step Synthesis of Methyl Isobutyl Ketone ................................................................. 67
Fahd Ihab Al-Wasaimi, Elena F. Kozhevnikova, Ivan V. Kozhevnikov

Hydroxyapatite-Supported Silver Nanoparticle Catalyst for Selective Hydration of Nitriles to Amides in Water ................................................................. 69
Yuusuke Mi Kami, Haruhiko Mori, Shuauke Arita, Takato Mitsudome, Tomoo Mizugaki, Koichiro Iijukawa, Kiyotomo Kameda

New Heterogeneously Catalyzed Processes for Environmentally Benign and Sustainable Chemical Production .................................................................................... 71
Wolfgang F. Hoelderich

Ternary Pt/Rh/SnO₂ Electrocatlysts for Oxidizing Ethanol to CO₂ ........................................................................................................ 73
Ping Liu, A. Kowil, M. Li, K. Sasuki, M. Vukmiricov, N. Martinkovic, R. R. Adzic

Partial Oxidation of Jet Fuel Over Molybdenum Dioxide ................................................................. 75
Oscar G. Marin Flores, Sa Y. Ha

Oxidative Desulfurization of Diesel Fuels Using Air by in-situ Hydroperoxide Generation for Fuel Cell Applications ................................................................................................................................................ 77
Ramanathan Sundararaman, Xiaoliang Ma, Chunshan Song

Deep Desulfurization of Fossil Fuels by Air in Lactone Solvent: the Remarkable Absence of a Role for Catalysts ........................................................................................................ 79
Xiao Ding Xu, Jacob A. Moulja, Michiel Makkee

Preferential CO Oxidation over Supported Ru Catalysts ........................................................................................................... 81
Yun Hu Kim, Run Duck Park, Hyun Chul Lee, Doohwan Lee, Kang Hee Lee

ENERGY – SESSION 1P

Production of Hydrogen and Alkanes by Aqueous Phase Processing of Aqueous Fraction of Bio-oil ........................................................................................................ 83
Tushar P. Vispute, George W. Huber

Catalytic Upgrading of Biomass-derived Acids by Dehydration/hydrogenation and C-C Coupling Reactions ........................................................................ 85
Juan Carlos Serrano-Ruiz, James A. Dumesic

‘Single-step’ Catalytic Cellulose Conversion in Ionic Liquids........................................................................................................ 87
Yi Su, Heather M. Brown, Conrad Z. Zhang, Xiren Hwang, Guosheng Li, Xiao-Dong Zhou, James E. Amontette, John L. Foltin, Donald M. Camasoni, David L. King, James A. Franc

Computational Study of Ethanol Synthesis from Biomass-derived Syngas using Rh-based Catalysts ........................................................................................................ 89
Shawn M. Kauthman, Dongbai Mei, Roger Rousseau, Jim White, Mark Gerber, Don Stevens

Aromatic Production from Biomass by Catalytic Fast Pyrolysis ........................................................................................................... 91
Torren R. Carlson, Jangho Je, George W. Huber
Production of HMF from Aqueous Fructose: a Microwave Study ................................................................. 93
Thomas S. Hansen, Astrid Bixen, John M. Woodley, Sven Pedersen, Anders Rützger
Layered Hydroxide Catalysts for Transesterification of Tributyrin with Methanol ........................................ 95
Yuanzhou Xi, Robert J. Davis
Aqueous-phase Reforming of Glycerol: Reaction Pathways, Base Effects, and Catalyst Deactivation .......... 97
David L. King, Yong Wang, Guan-Guang Xia, Yong Yang, David Heldbrunn, Tom Peterson, Liang Zhang
Upgrading of Bio-oil via Acid Removal: Effect of Various Alcohols and Aldehydes on Esterification of Acetic Acid .......................................................... 99
Nantaporn Lohitharn, Shaojian Miao, Brent H. Shank
Simultaneous Transesterification and Esterification to Biodiesel Using Zinc Oxide-based Catalyst .............. 101
Shuai Yan, Steven O. Salley, K. Y. Simon Ng, Manhoe Kim

ENV – SESSION 1P
The Different Impacts of SO2 and SO3 on Cu/Zeolite SCR Catalysts .......................................................... 103
Yeeun Cheng, Christine Lambert, Do Heui Kim, Ja Han Kwak, Charles H. F. Peden
Mechanisms of Hydrocarbon Poisoning of a Urea SCR Catalyst .............................................................. 105
Josh A. Pihl, Russell G. Tonkyn, Todd J. Toops, Jonathan L. Male, Darrell R. Herling, C. Stuart Daw
Deactivation of Vanadia-based SCR Catalysts by Phosphorus ................................................................. 107
Anker D. Jensen, Francesco Castellino, Jan Erikkson, Rasmus Fehrmann
Reactivity of Commercial Fe- and Cu-promoted Zeolite Catalysts in the NH3-NO/NO2 SCR for Diesel Exhaust ................................................................. 109
Antonio Grossale, Isabella Nova, Enrico Tronconi
Dual SCR Catalyst System for Lean NOx Reduction ................................................................................. 111
Galen B. Fisher, Craig L. Dimaggio, Ken M. Rahmoeller, Mark C. Sellmav
Urea-SCR for NOx Diesel Emission Control: the Influence of Urea and its Decomposition Products on the SCR Activity of Zeolites ........................................................................... 113
Mai Eichelsbaum, Robert J. Farrarauo, Marco J. Castaldo
Evidence of WGS reaction: Direct H2 involvement in HC-SCR DeNOx ................................................... 115
Christopher J. Brooks, John M. Pigis
Reduction of Surface Nitrates by Hydrogen as a Key Step in H2-assisted HC-SCR over Ag-Al2O3 ................. 117
Hannes Kannisto, Hanna Härelnd Ingelsten, Derek Creaser, Magnus Skoglundh
Bi-functional Hydrocarbon SCR Catalyst .................................................................................................. 119
Dan Hancu, Donald Whisenhunt, Ben Winkler, Oltea Siclovan, Larry Lewis, Ashish Mhadeshwar, Andrew Gordon, Burapat Inceewungvonr, Vladimir Demidyuk, Christopher Hardacre, Robbie Burch
HC-SCR for Diesel NOx Reduction on Supported Metal Catalysts ......................................................... 121
Steven Schmieg, Michael B. Viola, Richard J. Blint

FUND – FUNDAMENTAL STUDIES ON MODEL SURFACES – SESSION 1P
BaO/Pt(111) Model NO, Storage/Reduction Catalysts .............................................................................. 123
János Szányi, Kamuda Mudiyaanselage, Cheol-Woo Yi
Anomalous Surface Segregation of the Less Reactive Bimetallic Alloy Component Driven by CO Adsorption ........................................................................ 125
Klas J. Andersson, Federico Calle-Vallejo, Jan Rossmann, Ib Chorkendorff
Studying the Evolution of Catalytic Surfaces under Realistic Conditions: Pd50Au50(110) Surface Properties Under CO, O2, and CO + O2 Elevated Pressures ........................................................................ 127
Rational Catalyst Design Applied to the Selective Hydrogenation of Acetylene ........................................ 129
Felix Studt, Frank A. Bihl-Pedersen, Thomas Bliagard, Rasmus Z. Sorensen, Arkadii Kustov, Claus H. Christensen, Jens K. Nørskov
Surface Science Model Approach to Ziegler-Natta Catalysts ..................................................................... 131
J. W. Niemantsverdriet, Adelaida Andoni, Peter Thane, John C. Chadwick
Which Transition States and Intermediates Control Catalyst Activity, and How Well Do We Know Their Energies? ................................................................................... 133
Charles T. Campbell
Effect of Za Alloying On the Reactivity of Pd Catalysts ............................................................................ 135
Eseoghen Jeroro, John M. Vohs
In-situ XPS Studies of Crotyl Alcohol Selective Oxidation over Pd(111) and Au/Pd(111) Surface Alloys .............................................................................. 137
Adam F. Lee, Simon Hackett, Graham J. Hutchings, James Naughton, Karen Wilson
Highly Selective Oxidative Dehydrogenation of Propane on Sub-Nanometer Platinum Clusters ................. 139
Stefan Vajda, Michael J. Pellett, Jeffrey P. Greely, Christopher L. Marshall, Larry A. Curtiss, Gregory A. Ballentine, Jeffrey W. Elam, Stephanie Catillon-Mucherie, Paul C. Redfern, Faisal Mehmoos, Peter Zapal

FUND – THEORY IN CATALYSIS – SESSION 2P
Development and Application of Fast Transition State-Finding Strategies for Catalyzed Reactions ................. 141
Anthony Goodrow, Alexis T. Bell, Martin Head-Gordon
Tailoring Surface Chemical Properties using Electronic Structure Theory ................................................. 143
Jens K. Nørskov

Development of Catalytic Strategies for Upgrading of Biofuels ......................................................... 382
Steven Crossley, Sarupas Sithissa, Lance Lobban, Richard Mallinson, Daniel Resasco
Effective Global Kinetic Model for Dynamic Regeneration of NOx Storage and Reduction Catalyst .......................................................... 448

Support Effect on Palladium Particle Stability Followed During NO + H2 + O2 Reactions: Comparison Between Pd/Al2O3 and Pd/LaCo3O4 Catalysts .......................................................................................................................... 450
Christophe Dujardin, Jean-Philippe Daquin, Pierre Miquel, Sylvain Cristof, Sergey Nikitenko, Win Bras, Pascal Granger

Characteristics of Pt-BaO/Co3O4 Lean NOx Trap Catalysts: the Role of the Co3O4 Support in the Desulfation Process .......................................................................................................................................................... 452
Do Heui Kim, Ja Hun Kwak, Janos Szanyi, Xiangqin Wang, Jonathan C. Hanson, Charles H. F. Peden

Elucidating Effects of Rh, CeO2, and Feed Conditions During NOx Storage and Reduction on Pt/Rh/BaO/Co3O4 Monolith Catalysts .......................................................................................................................................................... 454
Yongjie Ren, Robert Clayton, Vemuri Balakotaiah, Michael P. Harold

Bimetallic Catalysts for the Selective Catalytic Reduction of NOx Using Reformate and Propylene as Reductants .......................................................................................................................................................... 456
Richard C. Eski, Levi Thompson

Performance Improvement of MgCo2O4 Catalyst for N2O Decomposition .......................................................................................................................... 458
Stefania Purfari, Samir Bansal, Nanzio Basso, Debora Fino

Impact of Dopants in Ba-based NOx Storage Reduction (NSR) Catalysts on Sulfation, Desulfation, and Performance .......................................................................................................................................................... 460
Todd J. Troops, Chengdu N. Liang, Josh A. Pihl, Nathan A. Ottenger

The Effect of CO2 on NOx Storage/Reduction Catalysts .......................................................................................................................................................... 462
Janos Szanyi, Christelle Verrier, Ja Hun Kwak, Do Heui Kim, Chundi Cao, Guillaume Clet, Charles H. F. Peden

PLENARY 2 - TUESDAY

Designing Mono- and Multifunctional Catalysts and Processes .......................................................................................................................... N/A
Avelino Corma

CHEM – SESSION 2A

Potential Industrial Application of Mesoporous Silicate in the Catalytic Oxidation of Aromatics under Room Temperature .......................................................................................................................................................... 464
Nizhui Li, Yan Kong, Cheng Wu, Yingjie Zhang, Dandan Cheng, Peng Sun, Jun Wang

Catalytic Oxidation of Glycerol to High-value Chemical Dihydroxyacetone .......................................................................................................................... 466
Wenbin Hu, Arvind Varma

Catalytic Epoxidation of R-(+)-Limonene using Jacobsen’s Catalyst Under Heterogeneous Conditions .......................................................................................................................................................... 468
Jairo A. Cubillos, Santiago Vásquez, Aida L. Villa, Consuelo Montes De Correa

Ozonolysis Reactions in Dense-phase CO2 .......................................................................................................................................................... 470
Andrew M. Dantny, Bala Sabramaniam, Daryle H. Busch

Synthesis of SO3H Functionalized Ionic Liquids and their Catalytic Performance in the Butylation of Phenols with Tert-Butanol .......................................................................................................................................................... 472
Xinwen Guo, Lei Gao, Xiaowa Nie, Min Liu, Xumei Liu, Jinxia Zhou

Novel Solvent Systems for Catalytic Processes: Part I & II .......................................................................................................................................................... 474
Charles L. Liotta, Charles A. Eckert

ENERGY – SESSION 2A

Reactive Adsorption of Thiophene On Ni/ZnO: Kinetic and In-situ XRD Studies .......................................................................................................................... 478
Igor Bezverkhyy, Andrey Ryzhikov, Olga Safonova, Pavel Afanasiev, Jean-Pierre Belliat

Sulfur Removal via Selective Adsorption using Organic Framework Supported Molybdenum Carbides .......................................................................................................................................................... 480
Fan Shi, Katie Cychoz, Adam Matzger, Antek-Wong Foy, Levi F. Thompson

Rare Earth Oxides/Sulfides as High-temperature Sulfur Adsorbents .......................................................................................................................................................... 482
Ioannis Valsamakis, Rui Si, Maria Flytzani-Stephanopoulos

Selective Desulfurization of Hydrocarbon Fuels by Ag/TiO2: Preparation, Performance, and Characterization .......................................................................................................................................................... 484
Sachin Nair, Alexander Samokhvalov, Eduardus Duint, Zenda Davis, John Heinz, Bruce J. Tatarchuk

Ambient Temperature Adsorptive Desulfurization of Natural Gas .......................................................................................................................................................... 486
Chandra Ratnamay, Jon P. Wagner, Steven Spivey

A Novel Catalyst-Sorbent System for an Efficient H2 Production with In-situ CO2 Capture .......................................................................................................................................................... 488
M. H. Halabi, M. H. J. M. De Croon, J. Van Der Schaaf, P. D. Cobden, J. C. Scholten

Adsorptive Denitrogenation of Liquid Hydrocarbon Streams on Carbon-Based Adsorbents .......................................................................................................................................................... 490
Masoud Almarji, Chunshan Song, Xiaoliang Ma

ENV – SESSION 2A

Doped Cobalt Hydroxalcites as NOx Storage/Reduction Catalysts .......................................................................................................................................................... 492
Antonio Eduardo Palomares, Cristina Franch, Alvaro Uzcategui, Avelino Corma

Detailed Kinetic Modeling of NOx Storage and Reduction with Hydrogen as the Reducing Agent .......................................................................................................................................................... 494
Anna Lindholm, Neal W. Currier, Junhui Li, Alexey Tezerev, Louise Olsson
Isotopic Studies of NOx, Storage and Reduction over Pt/BaO/Al2O3 using Temporal Analysis of Products ................................................................. 496

Elucidating Lean NOx Trap Regeneration and Degradation Chemistry: Insights from Intra-Catalyst Spatiotemporally Resolved Measurements ........................................... 498

NOx Storage-Reduction Characteristics of Ba-Based Lean NOx Trap Catalysts Subjected to Simulated Road Aging .......................................................... 500

Yaying Ji, Courtney Fisk, Vencom Easterling, Mark Crocker, Jae-Soon Choi, William Partridge

Specific Role of Alumina Surface Sites for BaO Anchoring and Nitrate Formation in BaOγ-Al2O3 NOx Storage Reduction Materials ........................................... 502

Ja Hun Kwak, Donghai Mei, Cheol-Woo Yi, Do Heui Kim, Charles H. F. Peden, Lawrence F. Allard, Janos Sanyi

FUND – CATALYSIS ON OXIDES – SESSION 4A

Catalysis Science of Bulk Mixed Metal Oxide Catalysts: an Operando IR-TPSR Spectroscopic Study ................................................................. 504

Kamalakanta Routray, Israel E. Wachs

Identification of the Role of Carbon in Highly Active and Selective MoO3-based Catalysts for the Skeletal Hydroisomerization of Alkanes: a TPO and TAP Study ................................................................. 506

Alessandro Goguet, Frederic C. Meunier, Francesco Cavallaro, Sergiy Shekhman, Christopher Hardacre

Effect of the Supporting Oxide on the Activity of Vanadia Catalysts .................................................................................................................. 508

Maria Veronica Guadaglia-Pirovano, Cristina Popa, Veronica Brzilda, Tanya K. Todorova, Yoshiki Shimodaizira, Joachim Sauer

A First-Principles Study of Surface Doping of Ceria with Noble Metals for Hydrocarbon Conversion ................................................................. 510

Michael Janik, Adam D. Mayernick

Developing Structural Models for Mo-based Selective Oxidation Catalysts using High-Resolution Scanning Transmission Electron Microscopy ................................................................................................. 512

A Combined Experimental and Theoretical Investigation of the Structure and Reactivity of VOx/TiO2/SiO2 ................................................................. 514

William C. Vining, Anthony Goodrow, Jennifer Strunk, Alexis T. Bell

Al-doped ZnO Support for Methanol Reforming: Modified Electronic Structure and Interaction with the Active Site ................................................................................................. 516

Giulio Lolli, Raoul Naumann D'Alboncourt, Malte Behrens, Robert Schlügel

FUND – IN-SITU SPECTROSCOPY CHARACTERIZATION – SESSION 3A

Chemical Imaging of Catalytic Solids at the Micron and Nano Scales .................................................................................................................. 518

Bert M. Weckhuysen

High-energy Diffraction and Open Cell Architectures for Studying Catalysts in Action ................................................................................................. 520

Matthew Graham O'Brien, Andrew Michael Beale, Bert Marc Weckhuysen

Mechanistic Study of Ethylene Hydroformylation over Rh/Al2O3 under Reaction Conditions by Time-resolved FTIR Spectroscopy ................................................................................................. 522

Narayanamperpa Sivasankar, Heinz Frei

NMR Relaxometry Studies of Adsorbate-Catalyst Interactions .................................................................................................................. 524

Daniel Weber, Jonathan Mitchell, James McGregor, Zhenyu Huang, Lynn F. Gladden

A Novel Method to Assess Activation on Surfaces .................................................................................................................. 526

Frederike C. Jennys, Katrina Komertz, Irina R. Subbotina, Vladimir B. Kazansky, Oleg V. Komarev, Stancil K. Komar, Irina R. Subbotina, Vladimir B. Kazansky

Exploration of Single Molecule Fluorescence in Haloperoxidase-like Chemistry: Hypobromite as the Active Vehicle of Active Oxygen ................................................................................................. 528

Bert F. Sels, Virginia Martinez, Gert De Cremer, Maarten B. J. Roelfjaers, Michel Slowa, Mukalesh Barnah, Dirk E. De Vos, Johan Hofkens

CHEM – SESSION 2P

Effect of Feed Configuration on n-Butane to Maleic Anhydride Yield: From Lab Scale to Commercial ................................................................. 530

Ali Sheikhani, Gregory S. Patience, Richard E. Bochra

Oxidation of Ethanol over Zeolite-supported Silver Catalysts .................................................................................................................. 532

Bashir S. At-Hajri, David Chadwick

Direct Phenol Synthesis from Benzene/O2 and Active Oxygen Species on a Novel Tremendously Active Re-Pt/ZSM-5 Catalyst ................................................................. 534

Mizuki Tada, Linsheng Wang, Sachin Malwadkar, Yang Yong, Takashi Okawara, Yasuhiro Iwasawa

Characterization of Cu-Au, Ni-Au bimetallic catalysts by TOF-SIMS and SEM-EDS techniques ................................................................................................. 536

Tomasz P. Minczewski, Pawel Mierczynski, Katarzyna Banolek, Wojciech K. Jozwiak

Dehydrogenation of Paraffins using PtSn/Mg(Al)2O3: Catalyst Design and Characterization ................................................................................................. 538

Georges G. Siddiqi, Pengjing Sun, Vladimir Galvita, Alexis T. Bell

Pd-promoted Selective Gas Phase Hydrogenation of p-Chloronitrobenzene over Alumina-supported Au ................................................................................................. 540

Catherine Louis, Mark A. Keane, Fernando Cardenas-Lizama, Santiago Gomez-Quero, Antoine Hugon, Laurent Delannoy

New Reaction Kinetic Data on Enantioselective Hydrogenation of Activated Ketones over Pt-Cinchona Catalysts ................................................................................................. 542

Jozsef L. Margitfalvi, Emilia Talas
The Effect of Modifiers in Liquid-phase Hydrogenation: Use of Selective Poisons to Enhance Selectivity

Hydrogenation of Nitrile Butadiene Rubber: Innovation of the Current Commercial Technology

Design of a Versatile Bisalen Motif for Cooperative Co-Salen-mediated Epoxide Ring-Opening

Enhanced Emission of NH3 and N2O from Pd Supported Catalysts

Emissions from Premixed Charge Compression Ignition (PCCI) Combustion and Affect on Emission Control

NOx and Soot Removal over Ba- and K-based Pt/Al2O3 4-Way Catalysts

Potential of NOx Storage/Release Materials for High-temperature Diesel Soot Oxidation

Conversion of Bioethanol to 1-Butanol – A Step Towards Sustainable Transportation Fuels

Understanding the Effect of Platinum Particle Size on the Rate of NO Oxidation

In-situ Redispersion of Platinum Nanoparticles Supported on Ceria-Based Oxide for Auto Exhaust Catalysts

Impact of Stepwise Desulfation on the Performance of a Ba-Based Commercial Lean NOx Trap Catalyst

Potential of NO, Storage/Release Materials for High-temperature Diesel Soot Oxidation

Effect of Precursor on the Coarsening Behavior of Nano-Particulate Alumina-Supported Pt-Pd Catalysts for NO Oxidation

Emissions from Premixed Charge Compression Ignition (PCCI) Combustion and Affect on Emission Control Devices

Enhanced Emission of NH3 and N2O from Pd Supported Catalysts

Regenerative Sulfur Traps: SO2, Storage and Release Kinetics

Diffusion Limitation in the Alkylation of Benzene: a Multiscale Investigation

Homologation of Dimethyl Ether to Highly Branched Alkanes on Acidic Zeolites

New Mechanistic Insights into the Formation of Zeolite Frameworks

Synthesis and Catalytic Properties of Ti-Silicate Form of Zeolite Beta

Manuel Moliner, Pedro Serna, Angel Cantin, Maria J. Diaz-Cabanas, Avelino Corma
Dynamic Structural Changes in a Zeolite-Supported Iridium Catalyst for Ethylene Hydrogenation: Reversible Interconversion of Metal Complexes and Clusters Controlled by the Reactant Composition ........................................... 598
Alper Uzun, Bruce Gates
Templated Synthesis of Hierarchically Mesoporous Zeolites from Cationic Polymers and Their Excellent Catalytic Properties ................................................................. 600
Feng-Shou Xiao, Tiandi Yang, Chengyang Yin, Lifeng Wang
Hierarchical Zeolites with Tailored Mesoporosity by Partial Detemplation and Desilication ........................................... 602
Sonia Abello, Adriana Bonilla, Danny Verboekend, Javier Pérez-Ramírez
Preparation of Interlayer-expanded Zeolites having High Catalytic Performance through Silylation of Layered Zeolite Precursors ................................................................. 604
Takashi Tatsumi, Hiyuki Kui, Peng Wu, Satoshi Inagaki
FT-IR and Catalytic Characterization of the Acidity of Imogolite-based Systems .................................................. 606
Barbara Bonelli, Ilaria Bottero, Eduardo Garrone, Fabrizio Cavani, Nicola Ballarini, Sauro Passeri

FUND – HETEROGENEOUS CATALYSIS IN THE LIQUID PHASE – SESSION 3P

Size and Composition Dynamics of Bimetalllic Nanoparticle Electro catalysts Probed using In-situ Small-angle X-Ray Scattering .................................................................................. 608
Chengfei Yu, Shirlline Koh, Michael F. Tommy, Peter Strasser
Sub-second Liquid Transient ATR FT-IR Micro Flow Cell for In-situ Analysis of Sorption Phenomena and Surface Kinetics ........................................................................................................... 610
T. J. A. Renckens, A. R. Almeida, M. B. Damen, Guido Mal, M. T. Kreutzer
In-situ Spectroscopic Identification of Surface Intermediates in Aqueous-phase Metal-catalyzed Reactions ................. 612
Kimberly Heck, Benjamin G. Janesko, Quang X. Nguyen, Gustavo E. Scarsenia, Naomi J. Halas, Michael S. Wong
Heterogeneous Catalysis in the Liquid Phase: Challenges to Fundamentals and Engineering .................................. 614
Leon Lefferts, Barbara L. Mojet, K. Seshan
Insight Into the Liquid-phase Aerobic Epoxidation of Alkenes Catalyzed by Gold Nanoparticles ................................. 616
Kevin Guillois, Frederic Chieux, Bertrand Itieria, Johnay Bisquet, Violaine Mendez, Valérie Capri
Hydrogen Reactions on Pt supported on Au, Cu, and HOPG: the Influence of the Substrate on Electro catalyst Activity .................................................................................................................. 618
Holger Wolfschmidt, Rainer Bußlar, Odysseas Paichos, Tine Brülle, Ulrich Stimming
A First-principles Analysis of the Mechanisms and Site Requirements for the Electro catalyst Oxidation of Methanol and Formic Acid .................................................................................. 620
Matthew Neurock, Michael Jantik, Sally Waxleiki
MS-IR Studies of Surface Formate Reactivity under Methanol Synthesis Conditions on Cu/SiO2 ................................. 622
Yong Yang, Charles A. Mims, Robert Disselkamp, Charles H. F. Peden, Donghai Mei, Charles T. Campbell
Structural and Spectroscopic Study of the Water Gas Shift Activity of the CuFe2O4 Catalyst ...................................... 624
Michael Estrella, Laura Barrio, Wen Wen, Gong Zhou, Jonathan C. Hanson, Jose Rodriguez, Xianqin Wang

POSTER SESSION 2

Mesoporous PtRu on Fiber-bed Supports: High-performance Anodes for Direct Liquid Fuel Cells ............................... 626
Elid Gyenge, Tommy T. Cheng
Early Transition Metal Carbide and Nitride Catalysts for Fischer-Tropsch Synthesis .................................................. 628
Josh A. Schadde, Levi Thompson
Effect of Preparation Method of CoFe2B3Mo12O51 on the Catalytic Performance in the Oxidative Dehydrogenation of n-Butene ........................................................................................................... 630
Ji Chul Jung, Howon Lee, In Kyo Song
In-situ Generated Nanocatalysts for NaBH4 Hydrolysis Studied by Liquid Phase Calorimetry: Influence of the Nature of the Metal on the H2 Production Rate .................................................. 632
Anthony Garron, Simona Bennici, Aline Auroux
V-Mo-based Catalysts for Oxidative Desulfurization of Diesel Fuel ........................................................................... 634
Omar Gonzalez-Garcia, Luis Cedeho
Metal Nanoparticles in Cubic Mesosstructures for Regenerable Deep Desulfurization of Warm Syngas .................. 636
Liyu Li, David L. King, Jun Liu
Metallic Phases of Cobalt-based Catalysts in Ethanol Steam Reforming: the Effect of Cerium Oxide .......................... 638
Sean S.-Y. Lin, Do Heui Kim, Su Y. Ha
Highly Active and Stable Ni-Ce-ZrO2 Catalysts in Combined H2O and CO2 Reforming for Methane for Gas-to-Liquids Processing ............................................................................................... 640
Hyun-Song Roh, Dae-Woon Jung, Je-Hwan Eum, Byung-Chul Yoo, Kei Young Koo, Wang Lui Yoon
The Effect of Low Concentrations of CO on H2 Activation on Pt/C .................................................................................. 642
Jack Z. Zhang, Kitiya Hongsirikarn, James G. Goodwin Jr.
Effect of Promoters on the Mechanistic Aspects of CO Hydrogenation on Rh/SiO2 ..................................................... 644
Jia Gao, Xinhuai Mo, James G. Goodwin Jr.
The Role of Pd Dispersion in Deoxygennation of Palmityc and Stearic Acids over Pd/C Catalysts .............................. 646
Irina Simakova, Päivi Mäki-Arvela, Andrey Simakov, Olga A. Simakova, Miguel Estrada, Dmitry Yu. Murzin
Dimethyl Ether Synthesis at Low Temperature ........................................................................................................... 648
R. Prusser, S. Pompiman, V. Tharupong
Partial Oxidation of Methane using Mo2C/Co₃O₄ as Catalyst .................................................. 650
Cortez, Arianna M. Silva, Fabio B. Noronha, Victor Teixeira Da Silva
Oxidative Coupling of Methane over Na2WO4-SiO2 Catalyst: Effect of SiO2 Supports .......................................................... 652
Young-Woong Suh, Yuna Ko, Dong Jin Suh, Tae-Jin Park
Fuel Gas Production from Waste Paper over Supported Metal Catalysts in High-temperature Liquid Water .......................................................... 654
Aritomo Yamaguchi, Norihito Hiyoshi, Osama Sato, Kyo K. Band, Masayuki Shirai
Conversion of Cellulose to H2 using Metals Supported Mesoporous Catalysts .......................................................... 656
Akhil Tansale, Jorge Norberto Beltrumini, Gao Qing Ma, Lu
Carbon Nanotube-Promoted Cu/Zn Catalysts for Efficient Hydrogenolysis of Glycerol to Glycols .......................................................... 658
Zhijie Lin, Sihe Shen, Juan Wang, Youzhu Yuan
Direct Use Of H2-Poor Syngas in the Fischer-Tropsch Synthesis .......................................................... 660
Matteo Luatti, Sara Königberg, Sven Järäis, Anders Holmen
Hydrogenation of Carboxylic Acids over P-Mo-V Heteropoly Compounds in Comparison with the Constituent Mo and V Oxides .......................................................... 662
Ivan V. Kochchev, Hacib Benaisse, Paul N. Davey, Elena F. Kochchevtskova
Characterization of Hydrocarbon Deposits Present on Methane Reforming Catalysts .......................................................... 664
Stewart F. Parker, Christopher D. Frost, David Lennon, Neil G. Hamilton, Ian S. Silverwood, R. Mark Ormerod, Hayley Parker, John Stanforth
XAFS Study of Gold Catalysts Supported on Nanostructured Alumina and Alumina Doped with Ce-Zr Mixed Oxides .......................................................... 666
Irina L. Simakova, Andrey V. Smakov, V. V. Kriventsov, E. Smolentseva, F. Castillon, M. Estrada, E. Vargas, D. P. Ivanov, B. N.
Hinghofer, D. I. Kochubey, S. Fuentes
Peculiarities of Supported Gold Catalysts: The Role of Nano-Environment in Activity Control of Supported Gold Catalysts .......................................................... 668
József L. Margitfalvi, Mihály Hegedűs, Andráss Tompos, Ervin Gy. Szabó, Ferenc Somodi, Ágnes Szegedi
A DFT Study of Ethylene Epoxidation on AgO And Ag2O Slab Surfaces .......................................................... 670
M. Olas Obeke, Isik Onal, Rustger A. Van Santen
Effects of Specific Features of the Defect Structure On the Bonding and Mobility/Reactivity of Oxygen in Ceria-Based Nanomaterials .......................................................... 672
Tatyana Kuznetsova, Vladislav A. Sudjakov
Aqueous-phase Fischer-Tropsch Synthesis with a Ruthenium Nanocluster Catalyst .......................................................... 674
Chao-Xian Xiao, Zhi-Peng Cai, Tao Wang, Yuan Kui, Ning Yan
Single-phase Au-Pd Catalyst .................................................................................................................. 676
Laura Prati, Alberto Villa, Dang Sheng Su, Di Wang, Gabriel M. Veith
Optimization of Au/MgO and Au/Al2O3 Catalysts for the PROX Reaction .......................................................... 678
József L. Margitfalvi, Andras Tompos, Lajos Vegvari
Higher Alcohol Synthesis From Syngas Over Molybdenum-based Catalysts .......................................................... 680
Robert Andersson, Magali Boutonnet, Sven Järäis
How Much do we Know about Aerobic Oxidations? ............................................................................ 682
Ive Hermans
Characterization and Catalytic Activities of Supported NiW Catalysts .......................................................... 684
Charbel Roukoss, Christelle Legens, Audrey Bonduelle, Cyrill Schland
Rational Synthesis of Heterostructured Active Centers for Au Nanocatalysts .......................................................... 686

The Role of Carbocations and Alkoxides on Hydrocarbons Reactions Catalyzed by Zeolites ............................................................................ 704
Nilson Rosenbach Jr., Alex P. A Dos Santos, Claudia J. A. Mota
3-D Quantification of Heterogeneous Catalysts ............................................................................ 706
Mike Arslan, John C. Waldsley, Erling Ryter, Edward Bergene, Paul A. Midgley
Estimating the Surface Area of Micro-Meso-porous Catalytic Materials ............................................................................ 708
Time of Flight Mass Spectrometry for Quantitative Data Analysis in Fast Transient Studies Using a Temporal Analysis of Products (TAP) Reactor ............................................................................ 710
Alexandre Goguet, Christopher Hardacre, Noleen Maguire, Kevin Morgan, Steve Thompson, Sergiy Shekhtman
In-situ Characterization of an Inverse CeO2/CuO Powder Catalyst for the Water Gas Shift Reaction ........................................ 777
Laura Barrion, Michael Estrella, Wen Wen, Jonathan Hanson, Jose A. Rodriguez, Aitor Hornes, Arturo Martinez-Arias, Marcos Fernandez-Garcia

Catalytic Partial Oxidation of Diesel Fuel: Effect of Alkaline Earth Metal Dopant at the A-site of a Rh-Substituted Pyrochlore .............................................................. 779
Daniel Haynes, David A. Berry, Dashyant Shekhawat, Mark W. Smith, James J. Spivey

Influence of Phosphorus on the Activity of Ru/Co/ZrP/SiO2 Fischer-Tropsch Catalyst .......................................................... 781
Jong Wook Bae, Seung-Moon Kim, Yun-Jo Lee, Ki-Won Jun

HDS Screening Capabilities using Avantium's Parallel Fixed Bed Technology ................................................................. 783
Alejandro Perez De Santana, Peter Mangnus, Guido Clause

Methane Partial Oxidation Mechanism over Pt-Ru Catalysts ........................................................................................................ 785
Roberto Lanza, Sven Jarus, Paolo Canu

Thermal Stability and Reducibility of Surface Oxygen and Nitrogen Functional Groups on Carbon Nanotubes and Their Application in Electro-catalysis ...................................................... 787
Martin Mohler, S. Kandu, T. C. Nagaih, W. Xia, Y. Wang, M. Bron, W. Schuhmann

First-Principles Design of Electrocatalysts for Direct Borohydride Oxidation .......................................................... 789
Michael Janik, Gholamreza Rostamkia

NiMoP Heteropolycompounds Supported on Ti/SBA-15 as Catalysts for Desulfurization of 4,6-Dimethylbenzothiophene skipping page numbers

Functions of Transition Metal Oxide Nanoparticles in H2 Production from Bio-alcohols ................................................................. 793
Min Yang, Yulianna Leon, Xianqin Wang

Rh Supported on Y2O3 Nanotubes: a Novel Catalyst for Steam Reforming of Ethanol to Hydrogen ........................................ 795
Xuzheng Wu, Sibudjing Kawi

Mesoporous Carbon-supported Nickel Phosphide Catalysts Prepared by Solid-phase Reaction ...................................................... 797
Guojun Shi, Jianyi Shen

Syngas Production in Oxy-CO2 Reforming of Methane over La2O3,Sr3NiO4 Perovskite-type Oxides .................................................. 799
Kesada Sathithamporn, Sibudjing Kawi

Application of TiO2 Nanotubes for Photocatalytic Water Splitting ........................................................................ 801
Omnar Kartizcaloglu, Sadig Kadiyes, Deniz Uner

Development of Methanol Synthesis at Low Temperature From CO2-Rich Syngas Over Metal Oxide Catalysts .......................... 803
Porngpiman Srisatapasuya, Prasert Reubroycharun

Enhanced Catalyst Lifetime and Selectivity in the Conversion of Methanol to Gasoline over HZSM-5 by Desilicication with NaOH .............................................................................. 805
Stian Svelle, Unni Olsbye, Karl Petter Lillerud, Finn Joensen, Pablo Beato, Marina Kastova, Martin Spangberg Holm, Claus Hvid Christensen, Morten Bjergen

Physical and Chemical Characterization of Upgraded Bio-oils via Hydrodeoxygenation .................................................. 807
Sanjivee Gajjela, Fei Yu, El-Barbary Hassan, Philip Steele

Mesoporous Silica-supported Pd Nanoparticles for Catalytic Decarboxylation of Fatty Acids ..................................................... 809
Eric W. Ping, Thomas F. Fuller, Christopher W. Jones, John Pierson, Robert Wallace

Mo and Ni Loading Influence on Catalytic Activity of NiO-MoO3/MgO-TiO2 Catalysts: HDS of DBT ........................................................................ 811
Alda E. Cruz, Zeferino Contreras, Julio C. Mogica, Alejandro Alvarez, Alfredo Guevara

Processing of Polymeric Cord by Low-Temperature Catalytic Pyrolysis .................................................................................... 813
Esther Sulman, Yu Lugovoy, Yu Kosivtsov, V. Alfyorov

Raising the Activity and Selectivity of Cobalt Catalysts for Fischer-Tropsch Synthesis with a Novel Carbon Nanotube Support in a CSTR ........................................................................ 815
Marisane Trepunari, Ahmad Tavasoli, Ajay K. Dalai, Nicolas Abatzoglou

Polyol Hydrogenolysis by In-situ-generated Hydrogen .......................................................................................... 817
Debadu S. Roy, Bala Subramaniam, Raghunath V. Chaudhuri

Deoxygenation of Methyl Esters over Supported Noble Metal Catalysts ........................................................................ 819
Phuong T. M. Do, Martina Chiappero, Lance L. Lobban, Daniel Reucacco

Reforming Liquid Hydrocarbons with Ni-substituted Barium Hexaaluminates: Effect of Oxygen-conducting Support .......................................................................................... 821
Mark W. Smith, David A. Berry, Dashyant Shekhawat, Daniel J. Haynes, James J. Spivey

Effect of Catalyst Preparation on the Steam Reforming Behavior of Supported Nickel Catalysts .................................................. 823
Jale F. Akyurtlu, Fahy Sagar Guggilla, Ates Akyurtlu

Low-temperature Ethanol Steam Reforming for Hydrogen Production over Rh, Pt, and Rh-Pt Catalysts ........................................................................ 825

The Influences of Reductant on the Structure and Catalytic Activity of Co-MCM-41 with High Cobalt Content ................................................. 857

Peng Sun, Yan Kong, Xinjie Xu, Jun Wang

Multifunctional Heterogeneous Catalysts for Cascade Reactions in the Preparation of Fragrances ......................................................... 859

Maria J. Climent, Avelino Corma, Sara Ibarra, Maria Mifsud, Alexandra Veltyn

Selective Hydrogenolysis of Glycerol to Propylene Glycol over supported Palladium Catalysts: Effect of Support ......................................................... 861

Maria Grazia Musolino, Luciano A. Scarpino, Concetta Busacca, Francesco Mauriello, Rosario Pietropaolo

Study of the Mechanism of Methylation of Phenol over Acid Zeolites ......................................................................................... 863

Maria E. Sud, Cristina L. Padro, Carlos R. Apestyegua

Microwave Synthesis of Thermally Stable TUD-1 Materials ......................................................................................... 865

Sang-Eon Park, Sung-Min Jeong, Nanzhe Jiang

Direct Synthesis of Ionic Liquid (N-methylimidazole) onto Mesoporous SBA-15 and Base Catalytic Applications ......................................................... 867

Nanzhe Jiang, Hua Jin, Sang-Eon Park

New Catalytic Processes for the Conversion of Biomass to Levulinic Acid and to γ-Valerolactone ............................................................................. 869

Valentina De Luca, Anna Maria Ravazzi Galletti, Anna Iuliano, Marco Martinelli, Claudia Antonetti

Stabilization and Recovery of Gold Catalysts in the Carbene Transfer Reaction to Alkenes within Ionic Liquids ......................................................... 871

Maria J. Sabeter, Avelino Corma, Irene Dominguez, Tania Bodenas

Promoting Effect of Ionic Liquids in Citral Hydrogenation: One-Pot Production of Citronellal On Modified Metal/Surface Catalysts ............................................................................. 873

Jürgen Arras, Martin Steffen, Yalida Shaveghi, Peter Claus, Dominik Ruppert

Kinetics of Selective Hydrogenation of Alpha, Beta-unsaturated Aldehydes over Supported Ionic Liquid Catalysts ......................................................... 875

Pasi Virtanen, Jyrki-Pekka Mikkola

Multinuclear Rhodium Complexes in Asymmetric Hydrogenation ................................................................................................. 877

Angelika Preetz, Wolfgang Baumann, Hans-Joachim Drexl, Christian Fischer, Detlef Heller

Liquid-phase Oxidation of n-Octane in the Presence of Vanadium-based Materials ............................................................................. 879

Mihaela Florea, Cerasella Veregut, Vasile I. Parvulescu

Hydrogenation of Citral On IrAu/TiO2 Catalysts: Effect of the Preparation Method ............................................................................. 881

Gabriela Diaz, Antonio Gómez-Cortés, Hugo Rojas, Orlando Hernandez, Julie J. Murcia

Imine Hydrogenation Catalyzed by Ruthenium Complexes ................................................................................................. 883

Maria J. Climent, Avelino Corma, Irene Dominguez, Tania Bodenas

Using Calcium Oxide-based Catalysts in Transesterification of Soybean Oil with Methanol ............................................................................. 887

Shuli Yan, Steven O. Salley, K. Y. Simon Ng

Vanadium Oxides Supported on Hydroxyapatite for the Activation of n-Pentane and n-Hexane ............................................................................. 889

Sooboo Singh, Sreekanth B. Jonnalagadda

Gas-Phase Epoxidation of Propylene over Ag/TS-1 Prepared with KOH As Precipitator ............................................................................. 891

Jinhua Wang, Min Liu, Guangfeng Liu, Xinhua Guo

Phosphated Zirconia as a Promoter of n-Hexane Isomerization ................................................................................................. 893

Joan Manuel Hernández, Luz Arcelia García, Ricardo García Amillía

Acetonitrile Hydrogenation: Influence of Acid-base Properties of the Support on Selectivities ............................................................................. 895

Camille De Fontaine, Lise Martial, Ralicha Jonescu, Charles Kappenstein, Laurence Pirault-Ray

Catalyst Design for the Hydrogenation of Cinnamaldehyde to Hydrocinnamic Acid ............................................................................. 897

Jaime L. Morrow, Jason L. Carson, Venu Arunajatesan
Selectivle Hydrogenation of Acetylene On Nanocrystalline α-Al2O3-supported Pd Catalysts: Influence of Preparation Method and Support Crystallite Size

Development of Superior Cr2O3/Al2O3 Catalysts for Fixed-bed Dehydrogenation of Light Alkanes

Homogeneous Mo-based Catalysts for Transesterification between Dimethyl Carbonate and Phenol

Copper Supported on ZnAl2O4 Catalysts for Methanol Synthesis

Pd-Promoted Selective Gas-phase Hydrogenation of Butadiene over Alumina-supported Au Catalysts

Imidazole-NHC Organocatalysis: the Benzoin Condensation

Influence of Ru and ZrO2 Addition to Co/SiO2 Catalysts on Composition and Distribution of Liquid Products

Oxidation of 2,6-Dimethylphenol to 2,6-Dimethyl-1,4-Benzquinone with Hydrogen Peroxide Catalyzed by TiO2-

Selective Hydrogenation of C=O Group in Unsaturated Aldehydes by Pd-based Catalytic Systems

Vapor-Phase Hydrolysis of Monochlorobenzene over CuZSM-5 Catalyst Prepared by Solid-state Ion Exchange

Pd2(dba)3 in Butylpyridinium Ionic Liquids as Catalytic System for Copper- and Phosphine-Free Sonogashira Cross Coupling

Kinetic Study of Liquid-phase Hydrogenation of Citral over Pt and PtSn Supported Catalysts

Oxidation of 2,6-Dimethylphenol to 2,6-Dimethyl-1,4-Benzquinone with Hydrogen Peroxide Catalyzed by TiO2-CeO2 Mixed Xerogels

Ethanol Conversion to Toluenet Over HZSM-5

Selectivle Hydrogenation of the C1 Group Unsaturated Aldehydes by Pd-based Catalytic Systems

Diameter Tuning of Single-walled Carbon Nanotubes using Co-MCM-41

Tantalum Clusters Supported on Silica-Alumina and on γ-Al2O3: Influence of Support Composition and Chemistry on Cluster Structure

Catalytic Properties of Au/HMS-Ti towards the Oxidation of 1-Hexene

Characterization of the Surface Properties of Slip Catalyst

Discovery and Optimization of Novel High-performance Polyolefin Catalysts

PLENARY 3 - WEDNESDAY

Fundamental Catalysis: From Reaction Mechanisms to New Catalytic Materials

CRE – SESSION 1A

Molecule-Based Modeling of Heavy Hydrocarbon Structure and Reactions: Discrete and Statistical Approaches

1H DOSY NMR: an Effective Tool to Investigate Asphaltenes Behavior

Factors contributing to the Effectiveness of Vanadium Catalysts for SO2 Oxidation using Steady-state and Transient Response Methods

Effect of Membrane Treatment On CO Competitive Adsorption on 3-µm Pd23wt%Ag Membranes

Kinetic Studies of the Stability of Pt for NO Oxidation: Effect of Sulfur

Experimental and Kinetic Investigations of NO Oxidation on Model Pt Catalysts

PLNARY 3 - WEDNESDAY

Fundamental Catalysis: From Reaction Mechanisms to New Catalytic Materials

CRE – SESSION 1A

Molecule-Based Modeling of Heavy Hydrocarbon Structure and Reactions: Discrete and Statistical Approaches

1H DOSY NMR: an Effective Tool to Investigate Asphaltenes Behavior

Factors contributing to the Effectiveness of Vanadium Catalysts for SO2 Oxidation using Steady-state and Transient Response Methods

Effect of Membrane Treatment On CO Competitive Adsorption on 3-µm Pd23wt%Ag Membranes

Kinetic Studies of the Stability of Pt for NO Oxidation: Effect of Sulfur

Experimental and Kinetic Investigations of NO Oxidation on Model Pt Catalysts
FUND – CATALYST PREPARATION – SESSION 6A

Surface Chemistry with Model Coordination Complexes and Organometallic Clusters for the Preparation of Noble Metal-based Carbon-supported Catalysts ................................................................. 977
Christopher Willcox, Chantal Diverchly, Deborah Vidick, Sophie Hermans, Michel Devillers

Synthesis of Chromates in Chromasiloxane Ring Structures as Active Site Models for the Phillips Catalyst ................................................................. 979
Ceri A. Demmelmaier, Rosemary E. White, Jeroen A. Van Bokhoven, Susann L. Scott

Selective Adsorption of Manganese onto Cobalt for Optimized MnCo/TiO2 Fischer-Tropsch Catalysts ................................................................. 981
Theresa Felix, Letícia Espinosa-Antono, Emilie De Smit, Lawrence D'Souza, Randall Meyer, Bert M. Weckhuysen, John Regalbuto

Synthesis, Characterization, and Catalytic Activity of Novel Building-block AluminoSilicate Catalysts ................................................................. 983
Joshua G. Abbott, Craig E. Barnes

Synthesis of Hierarchically Porous Zeolites for Catalytic Applications ............................................................................................................. 985
Ryong Ryno, Minkey Choi, Jeongnam Kim, Kyungsu Na

Synthesis of Stable V-doped MoC with High Surface Area ............................................................................................................. 987
Thomas P. B. Cotter, Frank Georgiades, Wei Zhang, Olaf Timpe, Annette Trunschke, Robert Schlögl

FUND – PARTIAL OXIDATION – SESSION 5A

Partial Oxidation of Alcohols on TiO2(110) and (WO3)/TiO2(110) Model Catalysts ................................................................................................. 989
Yu Kwon Kim, Oleksander Bondarchuk, Bruce D. Kay, J. M. White, Roger Bouwman, Zdenek Dohnalek

Atomic-Scale View of Hydration and Redox of VO, Supported on α-Fe2O3(0001) ................................................................................................. 991
Chang-Yong Kim, Jeffrey Khu, Anthony A. Escuadro, Michael J. Bedzyk, Peter C. Stair

Synthesis and Characterization of Supported Vanadium Oxides for the Oxidative Dehydrogenation of Cyclohexane ................................................................. 993
Staci L. Wegener, Hack-Sung Kim, Tobin J. Marks, Peter C. Stair

Modification of Palladium (II) Catalysis for Selective Partial Oxidation of Alcohols with Multifunctional Pyridylsiloxane Ligands ................................................................................................. 995
Michael N. Mistaghi, Harold H. Kung

The Effect of Ag Particle Shape and Surface Structure on Ethylene Epoxidation Selectivity ................................................................................................. 997
Phillip Christopher, Suljo Linic

ENERGY – SESSION 3A

Mechanism for Methane Steam Reforming over Transition Metals ................................................................................................. 951
Jens Sehested, Jos Verstak Jakobsen, Stig Helveg, Glenn Jones, Thomas Bligaard, Jens K. Nørskov

The Effect of the Metal Nature on Deactivation During Steam Reforming of Ethanol for Hydrogen Production ................................................................. 953

Hydrogen Production from Steam Reforming of Bio-Ethanol over Non-Precious Metal Catalysts ................................................................................................. 955
Hua Song, Umit Ozkan

Methanol Steam Reforming Over Pd/ZnO Catalysts: Nature of the Active Sites and Origin of CO Formation ................................................................................................. 957
Robert A. Dagle, Vanessa M. Leharbier, Abhaya K. Datye, Yong Wang

Identification of the Active Catalyst Phases of the Bimetallic Cobalt and Palladium Zinc Oxides for the Reforming Reactions of Alcohols ................................................................................................. 959
Barr Halevi, Eric Peterson, Jonathan Paiz, Hien Pham, Abhaya Datye

Optimal Design of CH4 Catalytic Partial Oxidation Reformers on Rh-based Catalysts for Small-scale Syngas Production ................................................................................................. 961
Matteo Maestri, Alessandra Beretta, Pio Forzatti, Gianpiero Greppi, Enrico Tronconi, Dimitrios G. Vlachos

Millisecond Catalytic Reforming of Biomass for Synthetic Fuels ........................................................................................................ 963
Joshua L. Colby, Lanny D. Schmidt

ENERGY – SESSION 4A

Selective Decoration of Sonochemically Prepared MoS2/Al2O3 with Co or Ni by Impregnation with An Acetylactonate Precursor ................................................................................................. 965
Sang-II Lee, Ara Cho, Jae Hyun Koh, Sang Heup Moon

From Sulfided to Noble Metal Catalysts in the Hydrodeoxygenation of Aliphatic Esters ................................................................................................. 967
Andrea Gutierrez, Maija Honkela, Eeva-Maija Pyynin, Olli Kruuse

FCC Pretreatment Hydrotreating Catalysts ................................................................................................................................. 969
Sonja Eijshout, Steven Mayo, Louis Burns

Intrinsic Potential of Supports for HDT Revealed and Assessed by Clean CoMo Preparation Methods ................................................................................................. 971
Charbel Roukas, Bo Phung Ngoc, Elodie Devers, Dorothée Laurenti, Karin E. Marchand, Laurence Massin, Anne-Agathe Quoineaud, Christelle Legens, Michel Vrinat

Desulfurization of and Tar Removal from Gasifier Effluents Using Mixed Rare Earth Oxides ................................................................................................. 973
Kerry M. Dooley, Sumana Adamsmill, Vibram Kalakota

Hydrodenitrogenation of Carbazole and Quinoline over a Nano-Dispersed Mo Sulfide Catalyst Using In-situ Hydrogen ................................................................................................. 975
Kun Liu, Flora T. T. Ng

FUND – CATALYST PREPARATION – SESSION 6A
Adsortion and Dissociation of CO on Body Centered Cubic Transition Metals and Alloys: Effect of Coverage and Scaling Laws

CO Oxidation on Rh/SiO2 and Pt/SiO2 Model Catalysts at Elevated (~10 Torr) Pressures

Michael Lundwall, Sean M. McClure, Fan Yang, Zihao Zhou, D. Wayne Goodman

CRE – SESSION 1P

Reversible and Irreversible Changes in Co Fischer-Tropsch Catalysts During Synthesis

Stuart Soled, Chris Kiewer, Gabor Kiss, Joseph Baumgartner

Elucidating Mechanisms that Control Metal Sintering

Matthew Neerock, Yu Cai, Randall Meyer, John Lockemeyer, Randall Yeates, Donald Reinalda, Michael Lemanski

Understanding Sintering of Supported Metal Catalysts

Gustavo A. Fuentes, Elizabeth Salinas-Rodriguez, Enrique Soto-Mercader, Guillermo Rivera

Deactivation of Accelerated Engine-Aged and Field-Aged Fe-Zeolite SCR Catalysts and the Role of the Diesel Oxidation Catalyst

Adam Foster, Ke Nguyen, Bruce Bunting, Todd J. Toops

Effect of Sulfur on Properties of Mo2C and Pt/Mo2C Catalysts

Josh A. Schaule, Adam Lautsche, Levi Thompson

Nature of Deactivation in SOFC Anode Catalysts in the Presence of H2S

Nandita Lakshminarayanan, John N. Kuhn, Umit S. Ozkan

Role and Structure of Carbonaceous Materials in Dehydrogenation Reactions

Conversion of Hydrocarbon Fuels over Rhodium: Towards a Better Understanding of Coking of Catalysts

Claudia Essmann, Benjamin Schädel, Marco Hartmann, Lubow Maier, Thomas Schimmel, Olaf Deutschmann

Platinum-group Metal Catalysts for Hydrogen Production via Sulfur-based Thermochemical Water Splitting Cycles

Daniel M. Ginosar, Lucia M. Petkovics, Kyle C. Burch, Sergey N. Rashkeev, Helen H. Farrell, Klaus Van Benthem

ENERGY – SESSION 4P

Inhibiting Effect of Model Oxygenated Compounds on the HDS of Dibenzothiophenes over CoMoP/Al2O3 Catalyst

Maxime Philippe, Frédéric Richard, Damien Hudebine, Sylvette Brunet

Hydrodeoxygenation of 4-Methylphenol over Mo Catalysts

Victoria M. L. Whiffen, Kevin J. Smith

Kinetics Study of the Hydrogenation/Deoxygenation of Furfural and Methyl Furfural over Supported Metal Catalysts

Surappa Sithsira, Steven Crossley, Lance Lobban, Richard Mallinson, Daniel Rasasco

Effect of Sulfur Compounds On the HDS/Hydrogenation Selectivity in the Transformation of a Model FCC Gasoline over Mo-based Catalysts

Celine Fontaine, Yilda Romero, Christophe Bouchy, Antoine Daudin, Elodie Devers, Pascal Baybaut, Sylvette Brunet

Effect of Support on NiMo/MnO-Al2O3 Catalysts: Application to Hydrodesulfurization of Dibenzothiophene

Zeferino Contreras, Elda A. Cruz, Julio C. Mogeza, Alejandro Alvarez, Alfredo Guinane

New Insights into the Control of the Selectivity HDS/Hydrogenation in Hydrocracking

Néocle Dos Santos, Hugues Dulot, Michel Virnich

Ammonoxidation Catalysis for NOx Control in Partial Combustion FCC

David M. Stockwell, Qi Fu

Hydrodesulfurization of 4,6-Dimethyldibenzothiophene over High-surface-area Metal Phosphide

Bai Wang, Kevin J. Smith

Hydrogenation and Direct Desulfurization Pathway in Thiophene HDS over Co-promoted and Nonpromoted MoS2: a Density Functional Theory Study

Poul Georg Moses, Bert Hansen, Jens K. Nørskov, Henrik Topsoe

Highly Stable Catalysts for Ethanol Steam Reforming

Ayman M. Karim, James J. Strohm, Vanessa Leharbier, Guosheng Li, David King, Yong Wang

ENERGY/CHEMICALS – WEDNESDAY AFTERNOON

Formic Acid as a Hydrogen Source for Vapor-phase Catalytic Reactions

Dmitri A. Bulushev, Julian R. H. Ross

Size Optimization of Ru Nanoparticles for the Generation of CO2-free H2 from Ammonia

Elizabeth D’Addio, Jochen Lauterbach

Efficient Hydrogen Evolution Sites of Photocatalysts for Water Splitting

Kazunari Domen

H2 Activation and Base-promoted Hydride Transfer Reactions Using Transition Metal Diphosphine Complexes: Development of a Multi-Step Process to Regenerate Ammonia Borane

Michael T. Mock, Robert G. Potter, Daniel L. Dubois, Donald M. Camaioni, Tom Autrey, John C. Linehan
Continuous Homogeneous Hydroformylation with Nanofiltration for Retention of Polymer Supported Rh Catalyst Complexes..........................................................1049

Carbonization of Aryl Olefins and Alcohols using Immobilized Pd Complex Catalysts ..........................................................1051
Bibhas R. Sarkar, Yuanchun Li, Raghabath V. Chaudhari

Effects of Ligand Composition on the Activity of Rh(III) for the Oxidative Carboxylation of Toluene to p-Toluic Acid ..........................................................................................1053
Joseph Zalewski, Andrew Behn, Alexis T. Bell

Novel Vapor-Phase Carboxylation of Dimethoxymethane over Acid Zeolites ..........................................................1055
Paat E. Celnik, Tae-Jin Kim, Alexis T. Bell

Structure-Activity Relationships of Au-based Catalysts for the Carboxylation of Methanol to Acetic Acid and Methyl Acetate: Identification of the Active Sites ..........................................................1057
Alexandre Goguet, Youssef Saheb, Katafutini Narasingharao, Christopher Hardacre

ENVIRONMENTAL – WEDNESDAY PM

Improving Performance of Regenerable CaO-based CO₂ Absorbent Using Novel Sintering-resistant Formulations ..........................................................1059
Liyu Li, Liang L. King, Jun Liu, Xiangxin Yang, Chris J. Howard

Effects of Preparation Conditions and Ni/Co Ratio on NiCo Bimetallic Catalyst Performance for CO₂ Reforming of CH₄ ..........................................................1061
Chunyu Xi, Hai Wang

Catalytic CO₂ Hydrogenation to Feedstock Chemicals for Jet Fuel Synthesis ..........................................................................................1063
Robert Werner Dorner, Dennis Hardy, Burtron Davis, Frederick W. Williams, Heather Willauer

Synthesis of DMC from CH₃OH and CO₂ over Ce₀₂ZrₓO₂ Catalysts ..........................................................................................1065
Zhi-Fang Zhang, Zhong-Wen Liu, Jian Lu, Zhao-Tie Liu

Relating Pore Structure to Activity at the sub-Crystal Level: an Electron Backscatter Diffraction and Fluorescence Microscopy Study ..........................................................................................1067
Bert F. Sels, Maarten B. J. Boeleeaers, Robert Ameloot, Anton-Jan Bons, Wilfried Mortier, Gert De Cremer, Rene De Kloe, Johan Hoykens, Dirk E. De Vos, Bert F. Sels

Enhancement of Palladium Catalytic Activity by Gold for Trichloroethene Reductive Dechlorination ..........................................................................................1069
Yu-Lun Fang, Pedro J. J. Alvarez, Jeffrey T. Miller, Michael S. Wong

Effect of Water on Photocatalytic Decomposition of Tetrahydrofuran on TiO₂ ..........................................................................................1071
Mogos M. Mogaka, John L. Falconer, J. Will Medlin

Strategies for Minimizing Catalyst Deactivation in the Aqueous-phase Hydrodechlorination of Chlorinated Pollutants ..........................................................................................1073
Salvador Ordóñez, Beatriz P. Vivas, Fernando V. Díez

Waste Water Purification from Phenol by Novel Polymer-Containing Nanocatalysts ..........................................................................................1075
Esther Salum, V. Doluda, V. Mattewa, N. Lukania, L. Bronstein

Nanoparticle SCR DeNo Catalysts ..........................................................................................1077
Steffen B. Kristensen, Andreas J. Kunov-Kruse, Anders Råsager, Rasmus Fehrmann

FUND – CATALYST PREPARATION – SESSION 3P

Use of Electroless Deposition Methodologies to Prepare Novel Bimetallic Catalysts ..........................................................................................1079
John B. Monnier, Melissa T. School, Kevin D. Kordell, Sarahka S. Rehill, Christopher T. Williams, John W. Van Zee

Surface-enhanced Interactions in Mn-based Molecular Oxidation Catalysts ..........................................................................................1081
Justin M. Notestein, Andrew Korinda, Nicholas Schoenfeldt

Magnetic Resonance Imaging to Study Impregnation Processes on γ-Al₂O₃ Support Bodies ..........................................................................................1083
L. Espinosa-Alonso, K. P. De Jong, B. M. Weckhuysen, Anna A. Lysova

Site-Isolated Pt-SBA15 Materials from Tris(tert-butoxy)silox Complexes of Pt(II) and Pt(IV) ..........................................................................................1085
Robert M. Rius, Daniel A. Ruddy, Jeffrey T. Miller, T. Don Tilley

Design and Synthesis of Robust Calixarene-Capped Metal Clusters and Aggregates As Catalytically Active Structures ..........................................................................................1087
Alexander Katz, Jeong-Myeong Ha, Namal De Silva, Andrew Solovyov

A Surface Science Approach to the Preparation of Alumina-Supported Ni-Mo Catalysts in Aqueous Solution ..........................................................................................1089
Asma Tougert, Xavier Carrier, Michel Che

Synthesis of Dendrimer-encapsulated One-Nanometer Rh and Pt Particles and their Catalytic Activity for Ethylene and Pyrrole Hydrogenation ..........................................................................................1091
Wenyu Huang, John N. Kuhn, Chia-Kuang Trung, Garbor A. Somorjai

Seed-Mediated Synthesis of Nanostructured Supported Pd Catalysts and Applications in Selective Hydrogenation Reactions ..........................................................................................1093
Gilles D. Berhault, Laurent Piccolo, Ana Vallecarv, Marta Bausach, Céleste Thomazeau, Denis Uzzo

An Inexpensive Plug-flow Reactor for X-Ray Absorption Spectroscopy at Catalytically Relevant Reaction Conditions ..........................................................................................1095
Bradley R. Fingland, Fabio H. Ribeiro, Jeffrey T. Miller

Synthesis and Characterization of Photocatalytically Active Titania Nanotubes ..........................................................................................1097
Elizabeth G. Runney, Johannes W. Schwank
POSTER SESSION 3

Hydrogen Production From Dimethyl Ether on Rh-based Catalysts ................................................................. 1099
Sergio Cavallaro, Emanuele Guaraccia, Viviana Chiodo, Natale Montel, Salvatore Panter, Jan C. Bartz

Hydrogen From Sustainable Feedstocks: Design of Stable Catalysts for Steam Reforming of Model Oxygenates ................. 1101
Berta Matas Giebell, Kevin Nichols, Igor Babich, Leon Lefferts, Kalathuyer Shethan

An Innovative Calorimetric Investigation of the Kinetics of Hydrogen Release From Catalyzed Hydrolysis of Borohydrides .......................................................... 1103
Simona Bennici, Lilijana Damjanovic, Aline Aurois

Liquid-phase Ethanol Reforming with Water over Alumina-supported Ir and Pt Catalysts .................................................. 1105
Soraya Teixeira Brandão, Lilian Maria Tosta Simplicio, Roberto Batista Da Silva Jr.

Modelling of a Pd-Ag Membrane Reactor for the Production of Ultrapure H2 from the Dry Reforming of Methane ........... 1107
Eduardo A. Lombardo, Leandro Coronel, Laura M. Coniglino, John F. Munera

Oxidative Steam Reforming of Ethanol over Bimetallic PtRu Catalysts ................................................................. 1109
Chen-Bin Wang, Jia-Lin Bi, Wen-Feng Wang, Chi-Han Wang, Chiu-Tik Yeh

Syngas Production via Combined H2O and CO2 reforming of Methane over Ce-promoted Ni/Al2O3 Catalyst: Effect of Ce Addition on Coke Formation ........................................ 1111
Kee Young Koo, Hyeon-Seok Roh, Un Ho Jung, Wang Lai Yoon

Catalytic Steam Reforming of Coke Oven Gas for Hydrogen Production ................................................................. 1113
Joo-Hyoung Park, Kyong-Tae Kim, Dong Jun Koh, Dong Nam Shin, Heedong Chun, Hyeon Park, Yong Shik Jeong

Hydrogen Production by Ethanol Steam Reforming over Co-Hydrotalcites .......................................................... 1115
Jose Luis Contreras, J. Salomones, B. Zeifert, G. A. Fuentes

Partial Oxidation of Methane over Ni, Pd, and Pt Catalysts: Mechanism Investigation ..................................................... 1117
Verónica M. Irurzun, Daniel Resasco

Enolation of Acetic Acid on Monoclinic Zirconia Surface .......................................................... 1119
Betina Faroldi, Eduardo A. Lombardo, Laura M. Coniglino

Evaluation of a Zoned Rh-Pt Catalyst for Hydrogen Generation From Diesel Fuel Via Autothermal Reforming ................ 1123
Anh Hoang Dam, H. M. Wang, Roya Dehghan, John Walmsley, Anders Holmen, Chen De

Surface Properties and Catalytic Behavior of Ru Supported on Composite La2O3-SiO2 Oxides .......................... 1121
Theodore Ignatenko

Structural Investigation of Model Planar Perovskite-Supported Precious-Metal Catalysts .............................................. 1125
Xanthias Karatzas, Lars J. Petersson

Preparation and Characterization of Ni-Ag Surface Alloy Catalysts .......................................................... 1127
Anh Hoang Dam, H. M. Wang, Roya Dehghan, John Walmsley, Anders Holmen, Chen De

In-situ UV/Vis Spectroscopy for Analysis of Dynamics of Surface Processes: Kinetics of Reduction and Oxidation of V0x in the Oxidative Dehydrogenation of Propylene over VOx/Ti-Si-MCM-41 with O2 and N2O ........................................ 1129
Olga Orvitsier, Angelika Brückner, Eugeni K. Konratienko

In-situ Characterization of Ethanol Reforming Catalysts (Rh-Pd/CoO3) using Time-Resolved X-Ray Diffraction .............. 1131
Gong Zhou, Laura Barrios, Michael Estrella, Sanjaya Senanayake, Ichham Idriss, Jonathan C. Hanson, Jose Rodíguez

Effect of Pt-Re Interaction on the Aqueous-phase Reforming of Glycerol over Pt-Re/C Catalysts ................................. 1133
Liang Zhang, Yong Yang, Gordon Xia, David Helebrant, David L. King, Yong Wang

Structural Changes of a Ni/Mg/K/Al2O3 Catalyst Used for Multiple Cycles of Steam Reforming Gasified Biomass .............. 1135
Matthew M. Yang, Kimberly A. Magri-Fairn

In-situ ATR-IR Study of CO Oxidation over Pt/Al2O3 and Pd/Al2O3 in Water: Promotion Effects by Water and pH .............. 1137
Barbara L. Meier, Leon Lefferts, Sune D. Ebbesen

Methane Dry Reforming with CO2: a Study of Surface Carbon Species ........................................................................ 1139
Lezio Gucci, G. Stefer, Olga Gezzi, Ivar Soajo, Andreas Tonnys, J. Schuy

Influence of the ZnO Surface Structure on the Reactivity of Pd/ZnO Catalysts for Methanol Steam Reforming .................. 1141
Vanessa M. Lebarbier, Kaile Zhu, Jun Liu, Patrick Burton, Eric Peterson, Abhaya K. Datye, Yong Wang

Modelling the C2+ Hydrocarbons During the Fischer-Tropsch Synthesis using Transient Kinetics ............................... 1143
Nileindran Sundar Govender, Mart H. J. M De Croom, J. C. Schouten

Enhancement of Sugar Char Surface Area by Chemical and Physical Activation Processes .......................................... 1145
Jolion Janaun, Noshu Eason

Crucial Role of Vanadium in La2Ni3V7O20 Catalyst for Selective Oxidation of Propane .................................................. 1147
Salvatore Crupanzano, J. V. Babich, L. Lefferts

Dealkylation and Ring Opening: Comparison of Energetics from Ab-initio Calculations .............................................. 1149
Chandra Mohi Kotikalapudi, Ajay K. Dalai

Activity and Selectivity of Co-Mo Catalysts Supported on Different Silicas for the Synthesis of Single-Walled Carbon Nanotubes ........................................................................ 1151
M. Pilar Ruiz, Verónica M. Irurzun, Cristina Caamaño, Daniel Resasco

Synthesis of Single-Walled Carbon Nanotubes Over Co-Mo Catalysts Prepared by the Sol-Gel Method .......................... 1153
Verónica M. Irurzun, Daniel Resasco

Synthesis of Zeotypes with β Structure and their Activity in R-(+)-Limonene Epoxidation with Hydrogen Peroxide-Urea Adduct .................................................................................. 1155
Farláñ Taborda, Aída Luz Villa, Montes De C. Consuelo

Autothermal Reforming of Liquid Fuels with Ni/CZO Catalysts ............................................................................. 1157
Johannes W. Schwank, Andy Tadd, Xiaolin Chen, Ben Gould, Joe Mayne, Kevin Dahlberg

Catalytic Stability of Immobilized Enzyme on Passivated SBA-15 for Transesterification of Vegetable oil and Methanol .................................................................. 1159
Warintorn Thitsartarn, S. Kawi
Effect of Pore Diameter Variation on Activity of CNT-supported Catalyst for Hydrotreating of Coker Light Gas

Joon-Woo Kim, Hae-Ri Kim, Byung-Yong Lee, Suk-Jin Choung

Alumina Doped with Fe Synthesized by Sol Gel: Characterization and Trichloroethylene Catalytic Combustion

Javier Rivera De La Rosa, Araceli Hernández, Carlos J. Lucio Ortiz, Jose A. De Los Reyes Heredia

Ternary Wide Band Gap p-Block Metal Semiconductor ZnGa2O4 for Photocatalytic Benzene Degradation

Zhaoxue Li, Bin Xue, Ling Wu, Xiaoxi Wang, Xianzhi Fu

Hydrothermal Synthesis and Catalytic Performance of a New Series of Photocatalyst R5SnO3 (R = Nd, Sm, Eu, Gd, Er, Yb)

Wanjun Wang, Jinhong Bi, Ling Wu, Zhouchi Li, Xianzhi Fu

Effects of the Modification with Tungstosilicic Acid on the Physicochemical Properties of Mesoporous Titania

Vanessa Fuchs, Mirta Blanco, Luis Pizzio

Complete Oxidation of Chlorinated Aromatic Compounds over Metal Oxide Composite Aerogel Catalysts

Dong Jin Suh, Jinsoo Choi

Perovskite-type Catalysts for Automotive Diesel Exhaust Gas Treatment

Carlos A. Gonzalez, Consuelo Montes De Correa

CO Oxidation on Gold Nanoparticles Supported on Titanium Oxide Nanotubes

Selective Catalytic Reduction of NO by NH3 over V2O5-WO3/TiO2 Catalysts

Akaraw Sirisuk, Ishun Aranyakamemsuk, Piyanon Prasertphatham

Catalytic Wet Air Oxidation of Phenol: Deactivation Phenomena and Insight into Regeneration Possibilities

Sylvain Keav, Agnès Martin, Pirault-Roy Laurence, Jacques Barbier, Daniel Duprez

Development Of Visible Light-based Photocatalysts with Improved Band Gaps

Beatriz Aristizábal, Catalina Valderrama, Consuelo Montes De Correa

Nitrates Abatement With Pd, In Alumina-supported Catalysts: Continuous Down-flow Reactor Studies

Nancy Martin Guarega, Alejandro Lopez-Guerra, Jose Antonio De Los Reyes, Julia Aguilar

ortho-Dichlorobenzene Oxidation over Pd-Co/Sulfated Zirconia Washcoated Minimonoliths

Zhaohui Li, Hun Xue, Ling Wu, Zhaohui Li, Xianzhi Fu

Complete Oxidation of Benzaldehyde over PdCo/CoS on Silica-supported Catalysts

Angelica Chicas-Reyes, A. Gutierrezalejandre, Jorge Ramirez

CO Oxidation on Gold Nanoparticles Supported on Titanium Oxide Nanotubes

Mauro Mendoza, Jorge Ramirez, Rodolfo Zanella

A Study of Reaction Parameters and Catalytic Properties in Photo-decomposition of Acetaldehyde over In, Pdoped TiO2

Joon-Woo Kim, Hae-Ri Kim, Byung-Tong Lee, Suk-Jin Choung
Catalytic Hydrodeochlorination of PCBs by Pd/SBA-15 under Mild Conditions ................................................................. 1343
Kenneth G. Rappé, Lisa Johnson, Jonathan M. Halpern

Photocatalytic Properties of TiO₂ Supported On NaTaO₃ and NaTaO₃ Doped with Sm and La: Effect of the Synthesis Route .................................................................................................................................................................................. 1345
Che-Feng Chang, Yu-Wei Li, Jonathan Cheng-Ming Chang

Synthesis and Characterization of (ZrO₂-TiO₂)/Al₂O₃ Ternary Oxides as Hydrodesulfurization Catalyst Carrier ............................ 1347
José Escobar, Florentino Muñoz, María C. Herrera, José Antonio De Los Reyes, Carlos A. Ulin, Armando Vázquez

Low-temperature Hydrocarbon/O₂ Oxidation Catalysis Supporting HCCI Emissions .......................................................... 1349
Kenneth G. Rappé, Jonathan M. Halpern

Synthesis, Characterization, and Photocatalytic Activity of M-TiO₂ .................................................................................. 1351
Odrilon Vazquez-Cuchillo, L. M. Bautista-Carillo, A. Cruz-Lopez, J. F. Sanchez-Ramirez, L. Torres-Martínez

Reduction of Al-Cr Dehydrogenation Catalyst Selectivity as a Result of its Deactivation .................................................... 1353
Vladimir Fridman, Elizabeth Romaine-Schmidt

Olefins Production by a Two-Step Oxidative Dehydrogenation in a Novel Perovskite Hollow-fiber Membrane Reactor ........................................ 1355
Oksana Z. Valek, Thomas Schiestel, Steffen Worch, Jürgen Caro

Liquid-phase Degradation of Dioxins over Pd/Al₂O₃ .................................................................................................................. 1357
Martha Cobo, Andrés Orrego, Jimena González, Juan A. Conesa, Consuelo Montes De Correa

Effect of Sulfur on Precious Metal Steam Reforming Catalysts .............................................................................................. 1359
S. David Jackson, Claire Gillian, Martin Fowles, Sam French

New Three-Phase Catalytic Reactors based on Carbon Nanotubes Grown over Structured Metallic Supports ...................... 1361
Antonio Monton, Vanesa Martinez-Hansen, Nieves Latorre, José Ignacio Villacampa, Carlos Royo, Eva Romeo, Enrique García-Boyardie

Nanocrystalline Mesoporous Titania Catalysts for the Selective Oxidation of Benzyl Alcohol to Benzaldehyde ..................... 1363
Maria L. Carreón, Moises A. Carreón, Jaime Espino-Valencia, Reyna Natividad

Recycling and Utilization of Spent Hydroprocessing Catalysts .............................................................................................. 1365
Meena Marafi, Antony Stanislaus

Extending Catalyst Life: Laboratory Aging Tests as Tools to Enhance Catalyst Performance .................................................. 1367
Michael A. Urbancic, Mingyong Sun, Steven A. Blankenship

Characteristics of Coke Formation over Pt/Al₂O₃ Catalysts in Propane Dehydrogenation .......................................................... 1369
Jasnoon Choi, Won-Ii Kim, Hyung Lim Koh, Young Kyo Choi

Kinetic Parameter Estimation for a Tubular Fischer-Tropsch Synthesis Reactor ............................................................... 1371
